EPA believes that this fate and transport model represents a reasonable worst-case scenario for disposal of the petitioned waste in a landfill, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA subtitle C. The use of a reasonable worst-case scenario results in conservative values for the compliance-point concentrations and ensures that the waste, once removed from hazardous waste regulation, will not pose a threat to human health or the environment if the petitioner chooses to dispose of the waste in accordance with Subtitle D requirements. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate to consider extensive site-specific factors when applying the fate and transport model. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data during the evaluation of delisting petitions. In this case, the Agency determined that, because Care Free sends the petitioned waste to an off-site, commercial landfill facility for final disposal, and because Care Free's waste volume (only 100 cubic yards per year) is relatively small compared to other wastes contained in the landfill, ground-water monitoring data collected at the commercial facility would not characterize the effects of the petitioned waste on the aquifer underlying the disposal facility. Therefore, the Agency did not request ground-water monitoring data.

Finally, the Hazardous and Solid Waste Amendments of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made until all public comments (including those at hearings, if any) on today's proposal are addressed.

II. Disposition of Petition

Care Free Aluminum Products, Inc., Charlotte, Michigan

1. Petition for Exclusion

Care Free Aluminum Products, Inc., located in Charlotte, Michigan, manufactures aluminum storm doors, windows, and miscellaneous construction materials. Care Free petitioned the Agency to exclude its wastewater treament sludge filter cake presently listed as EPA Hazardous Waste No. F019—"Wastewater treament sludges from chemical conversion coating of aluminum except from zirconium phosphating in aluminum can washing when such phosphating is an exclusive conversion coating process". The listed constituents of concern for EPA Hazardous Waste No. F019 are hexavelent chromium and complexed cyanide (see 40 CFR 261, appendix VII).

Care Free petitioned to exclude its waste because it does not believe that the waste meets the criteria of the listing. Care Free claims that its treament process generates a non-hazardous waste because the constituents of concern in the waste are in an essentially immobile form. Care Free also believes that the waste is not hazardous for any other reason (*i.e.*, there are no additional constituents or factors which could cause the waste to be hazardous). Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments (HSWA) of 1984. See section 222 of HSWA, 42 U.S.C. 6921(f), and 40 CFR 260.22(d) (2)–(4). Today's proposal to grant this petition for delisting is the result of the Agency's evaluation of Care Free's petition

2. Background

On March 14, 1989, Care Free petitioned the Agency to exclude its wastewater treatment filter cake from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32, and subsequently provided additional information to complete its petition. In support of its petition, Care Free submitted: (1) Detailed descriptions and schematics of its manufacturing and waste treatment processes; (2) a list of all raw materials and Material Safety Data Sheets (MSDS) for all trade name products used in the manufacturing and treatment processes; (3) results from total constituent analyses for the eight Toxicity Characteristic (TC) metals listed in 40 CFR 261.24,[1] nickel, cyanide (total and reactive), and reactive sulfide; (4) results from EP leachate procedure for the eight TC metals, nickel, and cyanide; (5) results from the Oily Waste Extraction Procedure (OWEP; SW–846 Method 1330) for the eight TC metals and nickel; (6) results from the Toxicity Characteristic Leaching Procedure (TCLP, as described in 40 CFR part 261, appendix II) for TC constituents, fluoride, and nickel; (7) results from total oil and grease analyses; and (8) results from characteristics testing for ignitability, corrosivity, and reactivity.

Care Free manufactures aluminum storm doors, storm windows, and miscellaneous extruded aluminum building materials. Care Free's conversion coating process is designed to provide corrosion-resistant film on extruded aluminum (*e.g.*, storm door and window frames) prior to the painting and assembling process. The film is formed by the chemical reaction of hexavalent chromium with the aluminum surface in the presence of anionic "activator" components such as phosphate and fluoride. The conversion coating process is normally operated five-days per week, one or two shifts per day depending on Care Free's work load.

In Care Free's conversion coating process, the aluminum parts are first loaded onto a rack, and then lowered into the first process tank containing an alkaline cleaner for one to five minutes at a temperature of 120 °F to 160 °F for the removal of any residue (such as dirt and aluminum oxide) prior to coating. The aluminum parts are removed from the tank to drip-dry and then are rinsed with water in the post-cleaning, two-stage, counter-current flow rinse tank (two separate tanks). The rinsed parts then are lowered into the chromate conversion tank for conversion-coating. Once a sufficient coating thickness is obtained, the parts are raised above the conversion coating tank to drip-dry. The coated parts then are rinsed with water in the post-coating, two-stage, counter-current flow rinse tank (two separate tanks). The coated parts then are allowed to air dry on a drip pad. The aluminum parts are further dried using an oven to remove all surface moisture and are stored for future painting in a segregated paint line.

Prior to July 4, 1989, the spent rinse waters from the post-cleaning and post-coating rinse tanks continuously entered the wastewater collection sump for subsequent treatment. On July 4, 1989, in an attempt to reduce the amount of surfactant (which Care Free thought was erroneously registered as total oil and grease (TOG) in the TOG analyses) entering the treatment system, Care Free segregated the post-cleaning rinse water for direct discharge to the Charlotte Publicly Owned Treatment Works (POTW). As of July 4, 1989, only the rinse water from the post-coating rinse tanks and the post-coating rinse drip pad are sent to the wastewater collection sump for subsequent on-site treatment. The spend cleaning and spent conversion coating baths are not discharged to the wastewater collection sump, and therefore, do not enter the petitioned wastestream.

The contaminated rinse waters from the conversion coating process are pumped from the collection sump to one of two, 5000-gallon batch treatment tanks. No other manufacturing operations discharge any waste to the wastewater treatment system. The frequency of wastewater treatment is approximately two batches per week. Once a batch treatment tanks is filled, air is continuously bubbled into the tank using a sparge ring to completely mix the contents of the tank throughout the treatment process. A sample is drawn and is titrated in order to determine the dosage of sufluric acid necessary to adjust the pH of the rinse water to approximately 2.0 to 2.5. After the calculated dosage of sufluric acid is added, the pH is verified and fine-tuned as necessary.

Care Free then uses an oxidation-reduction potential (ORP) meter to determine the amount of sodium metabisulfite necessary to reduce all of the hexavalent chromium. The calculated amount of sodium metabisulfite plus ten percent excess then is added to the batch tank and allowed to react for at least five minutes. The ORP and residual hexavalent chromium concentrations are then measured and the process (*i.e.*, addition of sodium metabisulfite and measurement of the ORP and hexavalent chromium concentration) is repeated until the ORP is below 230 mV and no hexavalent chromium is detected.

A new sample is withdrawn from the batch treatment tank and is titrated in order to determine the amount of calcium hydroxide (hydrated lime) required to raise the pH to approximately 9. Once the calcium hydroxide has been added to the batch treatment tank, the pH is again checked, and additional calcium hydroxide is added, as needed, until the pH is the range of 8.0 t 9.0 pH units. At this pH range, metal hydroxide precipitates form and a flocculent is then added to promote settling once the sparge ring is turned off. The flocculated metal hydroxide percipitant is gravity settled and the treated wastewater is decanted and discharged to the POTW.

After completion of the wastewater treatment process, the settled sludge is transferred from the batch treatment tank to the sludge holding tank, where the sludge is mixed and sampled. Care Free then titrates the settled sludge to determine the amount calcium hydroxide required to adjust the pH to approximately 11.5. After the calculated dosage of calcium hydroxide is added and well-mixed with the sludge, the pH is verified and additional calcium hydroxide is added as necessary. The pH adjusted sludge then is pumped to a filter press for dewatering. The filter cake is temporarily accumulated in drums and then periodically transferred to a roll-off container which is taken off-site for disposal at a commercial landfill. The supernatant from the filter press is discahraged to the POTW.

To collect representative samples from filter presses like Care Free's, petitioners are normally requested to collect a minimum of four composite samples comprised of independent grab samples collected over a period of time (*e.g.*, grab samples collected every hour and composited by shift) sufficient to represent the variability or uniformity of the waste. See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA, Office of Solid Waste And Emergency Response, Publication SW–846 (third edition), November 1986, and "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste, (EPA/530–SW–85–003), April 1985.

Care Free initially collected a total to ten composite samples (including two duplicate composite samples) of its wastewater treatment sludge filter cake during a four-week period (August 29, 1988 through September 23, 1988(. On two seperate occasions per week, the most recently generated drum of filter cake waste was divided into four quadrants and a full-depth core sample was collected from the center of each quadrant using a prewashed 1.5 inch diameter PVC pipe. The four full-depth core samples were mixed to produce one composite sample. All ten composite samples were produced using this sampling procedure and represent Care Free's waste generated prior to the segregation of the post-cleaning rinse water from the treatment system.

All ten composite samples were analyzed for the total concentrations (*i.e.*, mass of a particular constituent per mass of waste) of the TC metals, nickel, cyanide (total and reactive), reactive sulfide, total oil and grease content, and the characteristics of hazardous wastes (*i.e.*, ignitability, corrosivity, and reactivity). The ten composite samples also were analyzed for the EP leachate concentrations (*i.e.*, mass of a particular constituent per unit volume of extract) of all the TC metals, nickel and cyanide (using distilled water in the cyanide extractions).

Due to the high oil and grease content of the initial samples (up to 24 percent—dry weight), the Agency questioned the appropriateness of the EP method used in the initial extractions. Wastes having more than one percent total oil and grease may either have significant concentrations of constituents of concern in the oil phase, which may not be assessed using the standard EP leachate procedure, or the concentration of oil and grease may be sufficient to coat the solid phase of the sample and interfere with the leaching of metals from the sample (see SW–846 Mehtod Number 1330). Care Free, therefore, collected four additional composite samples of the filter cake waste over a four-week period (June 30, 1989 through July 28, 1989).

Care Free collected a full-depth core sample from the center of each drum of filter cake waste generated during the week using a prewashed, 1.5 inch diameter PVC pipe. All of the full-depth core samples were mixed to produce one weekly composite sample. This sampling procedure was repeated for the collection of the other three weekly composite samples. The four weekly composite samples (and one duplicate composite sample) were analyzed for the OWEP leachate concentrations of all the TC metals and nickel.[2]

As discussed earlier, on July 4, 1989, Care Free modified its conversion coating process to reduce the amount of surfactant entering the treatment system by no longer treating the post-cleaning rinse water. As a result of this modification, the one elevated OWEP leachate value for chromium, and the availability of the new TCLP leaching procedure, Care Free collected an additional four weekly composite samples (and one duplicate weekly composite sample) and five daily composite samples.

Care Free, using the same sampling procedure used to collect the second set of samples (described above), collected an additional four weekly composite samples (and one duplicate composite sample) representing waste generated between October 1, 1990 and October 28, 1990. Care Free also collected five daily composite samples on September 24, 1990 through September 28, 1990. Each daily composite sample was produced by collecting a full-depth core sample using a prewashed, 1.5 inch diameter PVC pipe from each drum of waste generated on a single day.

Care Free analyzed the four weekly composite samples (and one duplicate composite sample) for the total constituent concentrations of the TC metals, nickel, total cyanide, reactive sulfide, and total oil and grease. Care Free also analyzed the four weekly composite samples (and the duplicate weekly composite sample) for both the TCLP and EP leachable concentrations of the TC metals and nickel.[3] The fourth weekly composite sample (and the duplicate weekly composite sample) also was analyzed for the TCLP concentrations of the TC organic constituents and fluoride. Lastly, Care Free analyzed the five daily composite samples for the EP leachate concentration of chromium and the total concentration of total oil and grease.

Care Free claims that due to consistent manufacturing and waste treatment processes, the analytical data obtained from the three sampling events are representative of any variation in the wastewater treatment sludge filter cake constituent concentrations.

3. Agency Analysis

Care Free used SW–846 Method Numbers 6010 through 7520 and 9010 to quantify the total constituent concentrations of the TC metals, nickel, and cyanide; SW–846 Method Numbers 1310 (EP), 1311 (TCLP, as described in 40 CFR part 261, appendix II), and 1330 (OWEP) to quantify the leachable

[1] EPA has adopted the Toxicity Characteristic Leaching Procedure (TCLP) in the Toxicity Characteristic (TC) rulemaking (55 FR 11798, March 29, 1990) as a replacement to the EP for the establishment of the TC regulatory levels and these eight metals are now referred to as the TC metals.

[2] Care Free did not analyze the collected samples for TOG content; therefore, due to the segregation of the post-cleaning rinse water from the treatment system, the TOG content may have been less than one percent (as indicated by the third set of analyses performed later in 1990) and OWEP analyses may not have been required. The Agency notes that the samples are still valid.

[3] The waste exhibited a TOG content ranging from <0.0088% to 0.15%; therefore, Care Free was not required to use the OWEP.

concentrations of the TC metals and nickel in the waste. Care Free used SW–846 Method Number 9071 to quantify the total oil and grease (TOG) content of the waste and Method Number 9030 to quantify the total constituent concentration of reactive sulfide. (Analysis for the leachable concentrations of sulfide, reactive sulfide, or reactive cyanide are not necessary because the Agency's level of regulatory concern is based on the total concentration of reactive sulfide and reactive cyanide.)

Table 1 presents the maximum total concentrations of all the TC metals, nickel, cyanide, reactive cyanide, and reactive sulfide in Care Free's waste. Table 2 presents the maximum leachate (EP, OWEP, or TCLP) concentrations of each of the TC metals, fluoride, nickel, cyanide. Table 3 presents all of the EP, OWEP, and TCLP leachate data for chromium.

TABLE 1.—MAXIMUM TOTAL CONCENTRATIONS—INORGANIC CONSTITUENTS (MG/KG)

[Wastewater treatment sludge filter cake]

< Denotes that the constituents was not detected at the detection limit specified in the table.

The detection limits presented in Tables 1 through 3, represent the lowest concentrations quantifiable by Care Free when using the appropriate SW–846 analytical methods to analyze its waste. Detection limits may vary according to the waste and waste matrix being analyzed, *i.e.*, the "cleanliness" of waste matrices varies and "dirty" waste matrices may cause interferences, thus raising the detection limits.

Using the appropriate SW–846 test methods and adequate detection limits, none of the TC organic constituents, except for traces of benzene (0.0013 mg/l) and methyl ethyl ketone (0.11 mg/l) were detected in the fourth weekly composite sample. However, neither benzene nor methyl ethyl ketone (or any other TC organic) were detected in the duplicate weekly composite sample. In addition neither benzene nor methyl ethyl ketone are used at Care Free's facility. Care Free, therefore, believes that these two constituents are likely laboratory contaminants and are not present in the petitioned waste.

Last, on the basis of test results provided by the petitioner, none of the analyzed samples exhibited the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

Care Free submitted a signed certification stating that based on current annual waste generation, its maximum annual generation rate of wastewater treatment sludge filter cake is 100 cubic yards. The Agency may review a petitioner's estimates and, on occasion, has requested a petitioner to re-evaluate estimated waste generation rate. EPA accepts Care Free's certified estimate of 100 cubic yards/year of wastewater treatment filter cake sludge.

EPA does not generally verify submitted test data before proposing delisting decisions. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency, however, has maintained a spot-check sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions. A spot-check visit to a selected facility may be initiated before finalizing a delisting petition or after granting an exclusion. As a part of this program, the Agency conducted a spot-check sampling visit at Care Free's facility. The results of this visit, including chemical analyses of waste from Care Free, are discussed later in this notice.

4. Agency Evaluation

The Agency considered the appropriateness of alternative waste management scenarios for Care Free's filter cake waste and decided that disposal in a landfill is the most reasonable, worst-case scenario for this waste. Under this disposal scenario, the major exposure route of concern for any hazardous constituents would be ingestion of contaminated ground water. The Agency, therefore, evaluated the petitioned waste using the modified EPA's composite model for landfills (EPACML) which predicts the potential for ground-water contamination from wastes that are landfilled. See 56 *FR* 32993 (July 18, 1991), 56 *FR* 67197 (December 30, 1991), and the RCRA public docket for this notice for a detailed description of the EPACML model, the disposal assumptions, and the modifications made for delisting. This model, which includes both unsaturated and saturated zone transport modules, was used to predict reasonable worst-case contaminant

levels in ground water at a compliance point (*i.e.*, a receptor well serving as a drinking-water supply). Specifically, the model estimates the dilution/attenuation factor (DAF) resulting from subsurface processes such as three-dimensional dispersion and dilution from ground-water recharge for a specific volume of waste. The Agency requests comments on the use of the EPACML model as applied to the evaluation of Care Free's waste.

For the evaluation of Care Free's petitioned waste, the Agency used the EPACML model to evaluate the mobility of barium, chromium, fluoride, mercury, and nickel from Care Free's wastewater treatment sludge filter cake. The Agency's evaluation, using the maximum annual waste volume of 100 cubic yards and the maximum reported leachate (EP/OWEP/TCLP) concentrations, generated the compliance-point concentrations shown in Table 4. The Agency did not evaluate the mobility of the remaining inorganic constitutents (*i.e.*, arsenic, cadmium, lead, selenium, silver, and cyanide) from Care Free's waste because they were not detected in the EP/OWEP/TCLP extract using the appropriate SW–846 analytical methods (see Table 2). The Agency believes that it is inappropriate to evaluate non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method. If a constituent cannot be detected (when using the appropriate analytical method with an adequate detection limit) the Agency assumes that the constitutent is not present and therefore does not present a threat to either human health or the environment.

TABLE 4.—EPACML MODEL: CALCULATED COMPLIANCE-POINT CONCENTRATIONS (MG/L) LISTED AND NON-LISTED CONSTITUENTS

[Wastewater treatment sludge filter cake]

Constituents	Compliance-point concentrations [1]	Levels of regulatory concern [2]
Barium	0.0025	1
Chromium	0.037 (0.0057) [3]	0.1
Fluoride	0.158	4
Mercury	0.00009	0.002
Nickel	0.0032	0.1

[1] For Care Free's maximum annual waste volume of 100 cubic yards, the EPACML model calculated a DAF of 100.

[2] See "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions, Submitted Under 40 CFR 260.20 and 260.22", July 1991, located in the RCRA public docket.

[3] The compliance-point concentration generated using the second highest leachate value is also presented.

The filter cake exhibited barium, chromium, fluoride, mercury, and nickel levels at the compliance point below the health-based levels used in delisting decision-making. Based on the data for leachable chromium collected by Care Free (See Table 3), the Agency believes that the highest value reported (3.7 mg/l) is anomalous and appears to be an outlier. Therefore, the compliance point concentration based on the second highest chromium level is given in Table 4 and may be more representative of the maximum levels of leachable chromium in Care Free's waste. In any case the Agency notes that the compliance point concentration derived from 3.7 mg/l data point is still below the level of regulatory concern. Additionally, the total constituent concentrations of reactive cyanide and reactive sulfide are below the Agency's interim standards of 250 ppm and 500 ppm, respectively. See "Interim Agency Thresholds for Toxic Gas Generation," July 12, 1985, internal Agency memorandum in the RCRA public docket.

The Agency reviewed Care Free's manufacturing process and its list of raw materials and agrees with Care Free's assertion that the low TCLP levels of benzene and methyl ethyl ketone found in the fourth weekly composite sample are likely due to laboratory contamination. The Agency notes that these two constituents were not detected in the duplicate sample taken by Care Free, nor were they found during the Agency's November 1990 spot-check visit (discussed below). The Agency, therefore, did not evaluate the mobility of either benzene or methyl ethyl ketone using the EPACML. EPA notes, however, that the TCLP concentrations of benzene and methyl ethyl ketone are less than the health-based levels of 0.005 mg/l and 2 mg/l used in delisting decision-making (see "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions, Submitted Under 40 CFR 260.20 and 260.22", July 1991, located in the RCRA public docket). Therefore, neither constituent would be of concern even if compared directly to health-based levels without use of the EPACML model.

On the basis of test results submitted by the petitioner, pursuant to § 260.22, the Agency concludes that the waste does not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

On November 9, 1990, EPA conducted a site visit to Care Free as part of the Agency's spot-check and analysis program. One composite sample, consisting of one full-depth core sample collected from each of the nine drums holding wastes generated during the week of October 22–October 28, 1990 was collected using a slotted PVC pipe. The Agency analyzed the composite sample for the total constituent concentrations and the TCLP concentrations of the TC metals, nickel, and cyanide (using distilled water in the cyanide extraction). The composite sample also was analyzed for total constitutent concentrations of the volatile priority pollutants.

The maximum reported total constitutent concentrations for all of the TC metals, nickel, and cyanide are presented in Table 5. The maximum reported TC leachate concentrations for each of the TC metals, nickel, and cyanide are presented in Table 6. Using S–846 Method Number 8240, the Agency determined that none of the volatile priority pollutants were detected in Care Free's waste using the appropriate detection limits.

TABLE 5.—MAXIMUM TOTAL INORGANIC CONCENTRATIONS (MG/L) AGENCY SPOT-CHECK VISIT SAMPLES

[Wastewater treatment sludge filter cake]

Constituents	Total constituent concentrations (dry weight)
Arsenic	30.8
Barium	58.4
Cadmium	<1.3
Chromium	30200
Lead	<25.4
Mercury	<0.91
Nickel	14.2
Selenium	<25.4
Silver	<2.5
Total Cyanide	<6.2

< Denotes that the constituent was not detected at the detection limit specified in the table.

TABLE 6.—MAXIMUM LEACHABLE CONCENTRATIONS (MG/L) AGENCY SPOT-CHECK VISIT SAMPLE

[Wastewater treatment sludge filter cake]

Constituents	TCLP leachate concentrations
Arsenic	<0.1
Barium	<0.05
Cadmium	<0.005
Chromium	<0.01
Lead	<0.1
Mercury	<0.002
Nickel	<0.04
Selenium	<0.1
Silver	<0.01
Total Cyanide	<0.01

< Denotes that the constituent was not detected at the detection limit specified in the table.

The Agency did not use the EPACML model to evaluate the mobility of any of the TC metals, nickel, cyanide, or the volatile priority pollutants, because none of the inorganic constituents were detected in the TCLP leachate (see Table 6) and none of the volatile priority pollutants were detected in the total constituent analysis. Furthermore, a comparison of Care Free's sampling data with the Agency's spot-check data revealed only minor variations in the analytical data; therefore, these spot-check visit data support the Agency's conclusion that Care Free's waste is not hazardous.

5. Conclusion

The Agency believes that Care Free's wastewater treatment system can render the filter cake waste non-hazardous. The Agency believes that the sampling procedures used by Care Free were adequate, and that the samples are representative of the day-to-day variations in constituent concentrations found in the wastewater treatment sludge filter cake both prior to, and after, Care Free rerouted the post-cleaning rinse water directly to the POTW.

The Agency, therefore, considers Care Free's wastewater treatment sludge filter cake as a non-hazardous waste, as it should not present a hazard to either human health or the environment based on the above evaluation. The Agency proposes to grant an exclusion to Care Free Aluminum Products, Incorporated, located in Charlotte, Michigan, for its F019 wastewater treatment sludge filter cake resulting from the treatment of wastewater generated through the chemical conversion coating of aluminum. If the proposed rule becomes effective the wastewater treatment sludge filter cake would no longer be subject to regulation under 40 CFR parts 262 through 268 and the permitting standards of 40 CFR part 270.

6. Annual Testing

If a final exclusion is granted, the petitioner will be required to demonstrate, on an annual basis, that the characteristics of the petitioned waste remain as originally described. In order to confirm that the characteristics of the waste do not change significantly, the facility must, on an annual basis, analyze a representative composite sample for the constituents listed in 40 CFR 261.24 using the method specified therein. The annual analytical results, including quality control information must be compiled, certified according to 40 CFR 260.22(i)(12), maintained on-site for a minimum of five years, and made available for inspection upon request by any employee or representative of EPA or the State of Michigan. Failure to maintain the required records on-site will be considered by EPA, at its discretion, sufficient basis to revoke the exclusion to the extent directed by EPA.

The purpose of this condition is to ensure that the quality of the petitioned waste remains as originally described by the petitioner. The Agency believes that the data obtained from the annual recharacterization of the petitioned waste will enable both EPA and the RCRA facility inspectors to determine whether the petitioner's manufacturing and waste treatment processes have been significantly altered, or if the waste is more variable than originally described by the petitioner. The Agency also believes that the annual recharacterization of the petitioned waste is not overly burdensome to the petitioner and notes that these data will assist the petitioner in complying with 40 CFR 262.11(c) which requires generators to determine whether their waste is hazardous, as defined by the toxicity Characteristics (See 40 CFR 261.24).

If made final, the proposed exclusion will only apply to the processes and waste volume (a maximum of 100 cubic yards generated annually) covered by the original demonstration. The facility would require a new exclusion if either its manufacturing or treatment processes are significantly altered such that an adverse change in waste composition (*e.g.*, significantly higher levels of hazardous constituents) or increase in waste volume might occur. Accordingly, the facility would need to file a new petition for the altered waste. The facility must treat waste generated either in excess of 100 cubic yards per year or from changed processes as hazardous until a new exclusion is granted.

Although management of the waste covered by this petition would be relieved from subtitle C jurisdiction upon final promulgation of an exclusion, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisted waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Effective Date

The rule, if finally promulgated, will become effective immediately upon such final promulgation. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if finalized, would reduce the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of Section 3010, EPA believes that this exclusion should be effective immediately upon final promulgation. These reasons also provide a basis for making this rule effective immediately upon promulgation under the Administrative Procedure Act, 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The proposal to grant an exclusion is not major, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding waste generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling this facility to treat its waste as non-hazardous. There is no additional impact, therefore, due to today's proposed rule. This proposal is not a major regulation; therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator or delegated representative may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VI. Paperwork Reduction Act

Information collection and record-keeping requirements associated with this proposed rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2050–0053.

List of Subjects in 40 CFR Part 261

Hazardous Waste, Recycling, and Reporting and recordkeeping requirements.

Authority: Sec. 3001(f) RCRA, 42 U.S.C. 6921(f).

Dated: March 5, 1992.

Jeffrey D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, and 6938.

2. In Table 1 of appendix IX, part 261 add the following wastestream in alphabetical order by facility to read as follows:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
Care Free Aluminum Products, Inc.	Charlotte, MI	Wastewater treatment sludge (EPA Hazardous Waste No. F019) generated from the chemical conversion coating of aluminum (generated at a maximum annual rate of 100 cubic yards). In order to confirm that the characteristics of the waste do not change significantly, the facility must, on an annual basis, analyze a representative composite sample for the constituents listed in 40 CFR § 261.24 using the method specified therein. The annual analytical results, including quality control information, must be compiled, certified according to 40 CFR 260.22(i)(12), maintained on-site for a minimum of five years, and made available for inspection upon request by any employee or representative of EPA or the State of Michigan. Failure to maintain the required records on-site will be considered by EPA, at its discretion, sufficient basis to revoke the exclusion to the extent directed by EPA.

[FRL–4116–2]

Wisconsin; Final Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking on application of Wisconsin for program revision and public comment period.

SUMMARY: Wisconsin has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). The Environmental Protection Agency (EPA) has reviewed Wisconsin's application and has made a decision, subject to public review and comment, that Wisconsin's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve Wisconsin's hazardous waste program revisions. Wisconsin's application for program revision is available for public review and comment.

DATES: Comments on the Wisconsin's program revision application must be received by the close of business on April 20, 1992.

ADDRESSES: Copies of Wisconsin's program revision application are available from 8:30 am to 4:30 pm at the following addresses for inspection and copying: Wisconsin Department of Natural Resources, Bureau of Solid and Hazardous Waste Management, 101 South Webster St., Madison, Wisconsin, 53707, contact Mark Gordon; U.S. EPA Region V, Library, 77 West Jackson Blvd., Chicago, Illinois 60604, contact John Maher, (312) 886–6085. Written comments should be sent to U.S. EPA Region V, John Maher, HRM–7J, 77 West Jackson Blvd., Chicago, Illinois, 60604, (312) 886–6085.

FOR FURTHER INFORMATION CONTACT: U.S. EPA Region V, John Maher, HRM–7J, 77 West Jackson Blvd., Chicago, Illinois, 60604, (312) 886–6085.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA" or "the Act"), 42 U.S.C. 6926(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. In addition, as an interim measure, the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98–616, November 8, 1984, hereinafter "HSWA") allows States to revise their programs to become substantially equivalent instead of equivalent to RCRA requirements promulgated under HSWA authority. States exercising the latter option receive "interim authorization" for the HSWA requirements under Section 3006(g) of RCRA, 42 U.S.C. 6926(g), and later apply for final authorization for the HSWA requirements.

Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260–266, 268, 124 and 270.

B. Wisconsin

Wisconsin initially received final authorization effective on January 31, 1986 (51 FR 3783). Wisconsin received authorization for revisions to its program. These revisions became effective on June 6, 1989 (54 FR 22278); and January 22, 1990 (54 FR 48243). On December 13, 1991, Wisconsin submitted a program revision application for additional program approvals. Today, Wisconsin is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(4).

EPA has reviewed Wisconsin's application, and has made a decision, subject to public review and comment, that Wisconsin's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant Wisconsin final authorization for the additional program modifications. The public may submit written comments on EPA's decision up until April 20, 1992. Copies of Wisconsin's application for program revision are available for inspection and copying at the locations indicated in the "**ADDRESSES**" section of this notice.

Approval of Wisconsin's program revision shall become effective when the Administrator's final approval is published in the **Federal Register**. If adverse comment pertaining to Wisconsin's program revision discussed in this notice is received EPA will publish either (1) a notice of disapproval or (2) a final rulemaking approving the modifications, which would include appropriate comment response.

EPA intends to grant Wisconsin authorization for the following provisions:

All NR regulations became effective on March 1, 1991.
*HSWA reqirements.
#Both non-HSWA and HSWA requirements.

EPA shall administer any RCRA hazardous waste permits or portions of permits that contain conditions based upon the Federal program provisions for which the State is applying for authorization and which were issued by EPA prior to the effective date of this authorization. EPA will suspend issuance of any further permits under the provisions for which the State is being authorized on the effective date of this authorization. EPA has previously suspended issuance of permits for the other provisions on January 31, 1986, June 6, 1989, and January 22, 1990, the effective dates of Wisconsin's final authorization for the RCRA base program for non-HSWA Cluster I and part of II.

Wisconsin is not authorized to operate the Federal program on Indian lands. This authority remains with EPA unless provided otherwise in a future statute or regulation.

C. Effect of HSWA on Wisconsin's Authorization

1. General

Prior to the Hazardous and Solid Waste Amendments to RCRA, a State with final authorization administered its hazardous waste program instead of, entirely in lieu of, the Federal program. Except for enforcement provisions not applicable here, EPA no longer directly applied the Federal requirements in the authorized State and EPA could not issue permits for any facilities the State was authorized to permit. When new, more stringent, Federal requirements were promulgated or enacted, the State was obligated to obtain equivalent authority within specified time frames. New Federal requirements usually did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under the amended section 3006(g) of RCRA, 42 U.S.C. 6926(g), new HSWA requirements and prohibitions take effect in authorized States at the same time they take effect in non-authorized States. EPA carries out those requirements and prohibitions directly in authorized and non-authorized States, including the issuance of full or partial HSWA permits, until EPA grants the State authorization to do so. States must still, at one point, adopt HSWA-related provisions as State law to retain final authorization. In the interim, the HSWA provisions apply in authorized States.

As a result of the HSWA, there is a dual State/Federal regulatory program in Wisconsin. To the extent HSWA does not affect the authorized State program, the State program will operate in lieu of the Federal program. To the extent HSWA-related requirements are in effect, EPA will administer and enforce those HSWA requirements in Wisconsin until the State is authorized for them.

Once EPA authorized Wisconsin to carry out a HSWA requirement or prohibition, the State program in that area will operate in lieu of the Federal provision or prohibition. Until that time, the State may assist EPA's implementation of the HSWA under a Cooperative Agreement.

Today's rulemaking includes authorization of Wisconsin's program for several requirements implementing the HSWA. Those requirements implementing the HSWA are specified in the "Wisconsin" section of this notice. Any effective State requirement that is more stringent or broader in scope than a Federal HSWA provision will continue to remain in effect; thus

regulated handlers must comply with any more stringent State requirements.

EPA published a FR notice explaining in detail the HSWA and its effect on authorized States (50 FR 28702–28755, July 15, 1985).

2. Land Disposal Prohibitions

EPA does not intend to authorize Wisconsin to impose certain land disposal prohibitions in this application. The regulations implementing the land disposal prohibitions are found in 40 CFR Part 268. Under sections 5, 6, 42(b) and 44 of part 268, EPA has authority to consider petitions for case-by-case extensions to prohibition effective dates, exemptions to prohibitions based upon a showing of no potential for waste migration, alternate treatment methods, and variances from treatment standards, respectively. Consideration of the sections 5, 42(b) and 44 petitions is permanently reserved to EPA because consideration of those petitions requires a national perspective. In the future, EPA may authorize States to consider the Section 6 petitions. However, EPA is currently requiring that EPA Headquarters handle these petitions. Nothing in RCRA prohibits a State from adopting requirements that parallel Federal requirements. Therefore, petitioners seeking a Section 6 exemption must be granted approval by both EPA and the State.

On August 17, 1990, EPA promulgated the most recent phase of the regulatory framework implementing the land disposal prohibitions. EPA promulgated earlier phases on November 7, 1986, June 4, July 8, and October 10, 1987, August 17, 1988, February 27, May 2, June 23, and September 6, 1989, and June 1, June 13, and August 17, 1990. Wisconsin's rulemaking process follows the EPA rulemaking process. An unavoidable consequence is that Wisconsin's current land disposal prohibitions program is not as comprehensive as the Federal program. Since each new phase of the land disposal prohibition regulations has included modifications to earlier phases and in most instances, those modifications have made the regulatory framework more stringent, certain Wisconsin land disposal requirements may be superseded by Federal land disposal requirements. However, since the balance of the Federal regulations are promulgated pursuant to HSWA, the regulations are effective in Wisconsin and all other States and are directly implemented by EPA. Regulated handlers must comply with any requirements of the retained Federal land disposal prohibitions program that may be more stingent than the analogous requirements of the Wisconsin program. Conversely, because compliance with RCRA does not exempt regulated handlers from compliance with State law, such handlers must also meet any requirements of the Wisconsin program that may be more stringent than the analogous requirements of the Federal program. As a consequence, regulated handlers facing an apparent conflict between State and Federal land disposal prohibitions must always comply with the more stringent of the two requirements.

Codification

EPA codifies authorized State programs in part 272 of 40 CFR. The purpose of codification is to provide notice to the public of the scope of the authorized program in each State. Codification of the Wisconsin program will be completed at a later date.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this authorization will not have a signficant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Wisconsin's program thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. The proposed rule, therefore, does not require a regulatory flexibility analysis.

Paperwork Reduction Act

Under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Federal agencies must consider the paperwork burden imposed by any information request contained in a proposed rule or a final rule. This proposed rule will not impose any information requirements upon the regulated community.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended (42 U.S.C. 6912(a), 6926 and 6974(b).

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[CC Docket No. 92-26; FCC 92-59]

Formal Complaints Against Common Carriers

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This notice of proposed rulemaking was adopted to explore ways in which to improve the Commission's rules governing the handling of formal complaints and expedite resolution of such complaints. The Commission is particularly concerned with addressing delays caused by operation of the discovery process and the filing of repetitive pleadings. Toward this end, the Commission is proposing that formal complaint rules be changed by (1) modifying filing deadlines (e.g., deadlines for answering complaints and responding to discovery would be shortened); (2) eliminating certain pleading opportunities which do not appear particularly useful or necessary (e.g., routine replies to answers to complaints and replies to oppositions to motions would be discontinued); (3) expediting and consolidating the discovery process (e.g., deadlines for initiating, responding and objecting to discovery would be shortened, and the scope of discovery would be limited); (4) adopting rules providing for confidential treatment by opposing parties of certain materials produced through discovery; and (5) authorizing the staff to deliver verbal rulings on a variety of interlocutory matters (e.g., objections to discovery and submission of briefs or other record evidence).

DATES: Comments must be submitted on or before April 21, 1992. Reply comments must be submitted on or before May 11, 1992.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Mary Romano, 202–632–4887.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

The following collection of information contained in this proposed rule has been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act. Copies of the submission may be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC 20036. Persons wishing to comment on this information collection should direct their comments to Jonas Neihardt (202) 395–4814, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503. A copy of any comments filed with the Office of Management and Budget should also be sent to the following address at the Commission: Federal Communications Commission, Information and Records Management Branch, Washington, DC 20554. For further information contact Judy Boley, (202) 632–7513.

OMB Number: 3060–0411.

Title: Sections 1.720–1.734, Formal Complaints Against Common Carriers.

Action: Proposed Revisions.

Respondents: Business on other for profit, including small businesses.

Frequency of Response: On occasion.

Estimated Annual Burden: 7600; *Number of respondents:* 380; *Number of responses per respondent:* 2; *Hours per response:* 10.

Needs and Uses: Information filed pursuant to 47 CFR 1.720 et seq. is provided either with or in response to a formal complaint. The information will be used to resolve a dispute and to determine whether a carrier has violated the Communications Act or a Commission rule or order. The respondents affected are complainants and defendants in complaint proceedings, usually telecommunications common carriers and customers. The NPRM solicits public comment to change certain rules and procedures to facilitate timelier resolution of formal complaints by eliminating procedures and pleading requirements that have caused unintended and unnecessary delays.

This is a synopsis of the Commission's Notice of Proposed Rulemaking in CC Docket No. 92–26 [FCC 92–59], adopted February 13, 1992 and released March 12, 1992. The full text of the Notice of Proposed Rulemaking is available for inspection and copying during normal business hours in the FCC Dockets Branch, room 230, 1919 M Street NW., Washington, DC. The full text of this Notice of Proposed Rulemaking may also be purchased from the Commission's duplicating contractor, Downtown Copy Center, 1114 21st Street NW., Washington, DC 20036, (202) 452–1422.

Summary of Notice of Proposed Rulemaking

1. On February 13, 1991, the Commission adopted a Notice of Proposed Rulemaking in CC Docket No. 92–26 (released March 12, 1992; FCC 92–59) in order to propose changes to rules governing the procedures to be followed when formal complaints are filed against common carriers.

2. The Commission has observed that current procedures, particularly those relating to discovery, have often operated to prolong rather than expedite the formal complaint process. The proposed rules are intended to minimize delay and expedite resolution of formal complaints.

3. Toward this end, the NPRM proposes to modify filing deadlines for certain pleadings in formal complaint cases. Specifically, consistent with the Federal Rules of Civil Procedure, answers to complaints would be due within 20 days from service rather than the 30 days currently allowed. Likewise, responses to interrogatories or other discovery instruments would be due within 20 days from service instead of 30 days.

4. The NPRM also proposes to change the discovery timetable by shortening the time available to initiate discovery so that, unless otherwise directed by the staff, no discovery instrument would be served on an opposing party either before the deadline for filing an answer to a complaint or more than 20 days after such date.

5. The discovery process would also be modified to prohibit any inquiry regarding alleged damages until after an initial finding of liability by the Commission. Since the time and effort expended by the parties and the staff on discovery regarding damages is effectively wasted if no violation or liability is found, the Commission believes a bifurcated approach separating liability and damage issues would expedite and simplify formal complaint discovery and, ultimately, resolution. In addition, the Commission has also proposed a new rule which would provide for the confidential treatment of materials exchanged by opposing parties during formal complaint discovery.

6. The NPRM also proposes to that routine replies to answers to complaints no longer be permitted. Similarly, replies to oppositions to motions would also be discontinued. The Commission has concluded that in most cases, these pleadings have not significantly aided in the resolution of factual or legal issues in the formal complaint context and often simply have repeated arguments made in the original complaint or motion.

7. Finally, to further expedite the formal complaint process, the NPRM proposes to permit the staff to deliver verbal rulings on a variety of interlocutory matters associated with formal complaints. In particular, during status conferences, the staff would issue verbal rulings regarding discovery disputes and submission of briefs and other record evidence. These rulings would be promptly memorialized in writing and served on the parties.

8. Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding because if the proposed rule amendments are promulgated, there will not be a significant economic impact on a substantial number of small business entities, as defined by section 601(3) of the Regulatory Flexibility Act.

9. This notice and comment rulemaking proceeding is non-restricted. Section 1.1206(a) of the Commission's rules, 47 CFR 1.1206(a), contained provisions governing permissible *ex parte* contracts.

10. Accordingly, pursuant to section 1, 4(i), 201(b), 208 and 403 of the Communications Act, 47 U.S.C. 151, 154(i), 201(b), 208 and 403, a Notice of Proposed Rulemaking is Issued, proposing amendment of 47 CFR 1.720 *et seq.*

11. Pursuant to §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415, 1.419, all interested parties may file comments on the matters discussed in this Notice and on the proposed rules by April 21, 1992. Reply comments are due by May 11, 1992. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. To file formally in this proceeding, participants must file an original and four copies of all comments, reply comments, and supporting comments. If participants wish each Commissioner to have a personal copy of their comments, an original plus nine copies must be filed. Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the Dockets Reference Room (room 203) of the Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

47 CFR Part 73

[MM Docket No. 92-45, RM-7918]

Radio Broadcasting Services; Fargo, ND

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Northwestern College seeking the substitution of Channel 250C for Channel 250C1 at Fargo, North Dakota, and the modification of its license for Station KFNW-FM to specify operation on the higher powered channel. Channel 250C can be allotted to Fargo in compliance with the Commission's minimum distance separation requirements with a site restriction of 33.8 kilometers (21 miles) west to accommodate petitioner's desired transmitter site, at coordinates North Latitude 47-00-37 and West Longitude 97-11-40. Canadian concurrence is required because Fargo is located within 320 kilometers (200 miles) of the U.S.-Canadian border. In accordance with § 1.420(g) of the Commission's Rules, we will not accept competing expressions of interest in use of Channel 250C at Fargo or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before May 4, 1992, and reply comments on or before May 19, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: John R. Wilner, Esq., Bryan, Cave, McPheeters & McRoberts, 700 Thirteenth Street, NW., suite 700, Washington, DC 20005-3960 (Counsel to petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-45, adopted March 2, 1992, and released March 13, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

[MM Docket No. 92-46, RM-7915]

Radio Broadcasting Services; Cloquet, MN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by WKLK, Inc., proposing the substitution of Channel 243C3 for Channel 243A at Cloquet, Minnesota, and modification of the construction permit for Station KOUV to specify operation on Channel 243C3. Canadian concurrence will be requested for this allotment at coordinates 46-43-20 and 95-25-15. We shall propose to modify the construction permit for Channel 243A in accordance with Section 1.420(g) of the Commission's Rules and will not accept competing expressions of interest for the use of the channel or require petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before May 4, 1992, and reply comments on or before May 19, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel as follows: Anne Thomas Paxson, Borsari & Paxson, 2033 M Street, NW., suite 630, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

DEPARTMENT OF AGRICULTURE

Forest Service

Supplement to the Final Environmental Impact Statement for Nursery Pest Management, Pacific Northwest Region

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare a supplement to a final environmental impact statement.

SUMMARY: The Forest Service will prepare a draft and final supplement to the Final Environmental Impact Statement (FEIS) for Nursery Pest Management in the Pacific Northwest Region (October 1989). The supplement is for a Forest Service proposed action to consider additional chemicals for use with the selected alternative in the FEIS, at the Wind River Nursery (Gifford Pinchot National Forest) and J. Herbert Stone Nursery (Rogue River National Forest). The Forest Service invites written comments on the supplement and the scope of the proposed action. In addition, the Forest Service gives notice of the full environmental analysis and decision making process that will occur on the proposal so that interested and affected people are aware of how they may participate in the process and contribute to the final decision.

DATES: Comments concerning the scope of the analysis should be received in writing by April 15, 1992.

ADDRESSES: Send written comments to: Ed Olson, USDA Forest Service, Wind River Nursery, Carson, Washington 98610 or Steven Feigner, USDA Forest Service, J. Herbert Stone Nursery, Central Point, Oregon 97502.

FOR FURTHER INFORMATION CONTACT: Sally Campbell, USDA Forest Service, P.O. Box 3623, Portland, Oregon 97208, phone (503) 326–7755.

SUPPLEMENTARY INFORMATION: The Nursery Pest Management FEIS Record of Decision was signed October 31, 1989. No appeals were filed. This supplement is being prepared to keep the FEIS updated and current with pest management needs at the Wind River and J. Herbert Stone nurseries. The FEIS will remain in effect and continue to be implemented during the preparation of the supplement to the FEIS.

The primary objective of Forest Service nurseries is to produce seedlings of high quality and sufficient quantitty to meet Forest Service reforestation needs. The use of modern pest management technology and products are necessary to meet this objective. Presently, the nurseries are implementing an Integrated Pest Management (IPM) approach utilizing all measures of pest control, including chemical pesticides approved for both sites. Some of these chemicals are no longer being manufactured. Also, increasing populations of certain pests seem to indicate that treatment with chemical pesticides not included in the 1989 FEIS may be appropriate. To continue implementing the basic principles of IPM, it is necessary to consider augmenting the list of approved chemical pesticides.

In preparing the draft supplement to the FEIS, the Forest Service will develop alternatives which address the issue of adding chemical pesticides to the list of approved pesticides identified in the FEIS. Pesticides being considered are the following: (1) Simazine—for use in the control of weeds at the J. Herbert Stone Nursery. (2) Oxyfluorfen—for use in the control of weeds at the Wind River Nursery, and (3) DCNA and Metalaxyl—for use as fungicides at the Wind River Nursery. The Forest Service will conduct a site-specific risk assessment, for the proposed chemicals, as part of the supplement.

Public participation will be important during the analysis. The Forest Service will solicit information and seek comments by notifying individuals and organizations known to be interested, as well as affected publics and key contacts involved in the scope of the FEIS analysis. Input will be solicited through mailings and public meetings at the affected nurseries. Comments received will be used in preparation of the supplement.

The draft supplement to the FEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by May 1992. At that time, EPA will publish a notice of availability of the draft supplement in the **Federal Register.**

The comment period on the draft supplementary will be 45 days from the date the EPA's notice of availability appears in the **Federal Register.** It is very important that those interested in the proposed action participate at that time. To be most helpful, comments on the draft supplement should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

Following the comment period on the draft supplement, comments will be analyzed, considered, and responded to by the Forest Service in preparing the final supplement. The final supplement to the FEIS is scheduled to be completed by August 1992.

John F. Butruille, Regional Forester, Pacific Northwest Region, is the responsible official. The responsible official will consider the comments and responses; environmental consequences discussed in the environmental impact statement; and applicable laws, regulations, and policies in making a decision regarding this action. The decision and reasons for the decision will be documented in the Record of Decision. That decision will be subject to appeal in accordance with 36 CFR Part 217.

Dated: March 6, 1992.

John E. Lowe,

Deputy Regional Forester.

BILLING CODE 3410–11–M

Cabin Timber Sale, Wallowa-Whitman National Forest, Baker County, OR

AGENCY: Forest Service, USDA.

ACTION: Revision of a notice of intent to prepare an environmental impact statement.

SUMMARY: This notice of intent revises the notice of intent to prepare an environmental impact statement (EIS) for the Cabin Timber Sale, Wallowa-Whitman National Forest, Baker County, Oregon, published on February 7, 1991 in the **Federal Register** (56 FR 4968). Following preliminary scoping and environmental analysis, the Wallowa-Whitman National Forest has changed the proposed action and the timeline for release of the draft and final EIS. The location of the proposed timber sale has not changed, so the scope of the project in terms of timber harvest or road construction in unroaded areas has not changed.

The proposed action in the original notice of intent came from the Wallowa-Whitman Land and resource Management Plan (Appendix C, page C–15), describing the proposed action as: Cabin Creek timber sale to be sold in fiscal year 1992, harvesting 12 million board feet of timber for 600 acres of suitable ground with 4.0 miles of road construction. This revised notice of intent makes the following changes: the sale name is changed from the Cabin timber sale to the Elk-Cabin Timber Sale; the new proposed action would occur in fiscal year 1993 harvesting approximately 4 million board feet of timber from 250 acreas of suitable land with minimal road construction.

The draft EIS (originally planned for release in July 1991) is expected to be available for review in May 1992 with the final EIS in December 1992.

FOR FURTHER INFORMATION CONTACT: Questions and comments about this EIS should be directed to Lynne Smith or Dave Clemens, Pine Ranger District, General Delivery, Halfway, Oregon 97834, telephone (503).

Dated: March 27, 1992.

R.M. Richmond,

Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Japan Aviation Electronics Industry Limited; Order Denying Permission To Apply for or Use Export Licenses

In the Matter of: Japan Aviation Electronics Industry Limited; 21–6, Dogenzaka 1–chrome, Shibuya–Ku, Tokyo 150, Japan

On March 11, 1992, Japan Aviation Electronics Industry Limited (JAE) was convicted in the United States District Court for the District of Columbia of violating section 38 of the Arms Export Control Act (22 U.S.C. 2778) (AECA). Section 11(h) of the Export Administration Act of 1979, as amended (50 U.S.C.A. app 2401–2420 (1991)) (EAA),[1] provides that, at the discretion of the Secretary of Commerce,[2] no person convicted of a violation of section 38 of the AECA, or certain other provisions of the United States code, shall be eligible to apply for or use any export license issued pursuant to, or provided by, the EAA or the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1991)) (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any export license issued pursuant to the EAA in which such a person has any interest at the time of his conviction may be revoked.

Pursuant to § 770.15 and 772.1(g) of the Regulations, upon notification that a person has been convicted of violating the AECA, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, shall detrmine whether to deny that person permission to apply for or use any export license issued pursuant to, or provided by, the EAA and the Regulations and shall also determine whether to revoke any export license previously issued to such a person. Having received notice of JAE's conviction for violating the AECA, and following consultations with the Director, Office of Export Enforcement, I have decided to deny JAE permission to apply for or use any export license, including any general license, issued pursuant to, or provided by, the EAA and the Regulations, for a period of three years from the date of its conviction, with portions of that denial period being suspended. I have also decided to suspend, for a period of one year, all validated export licenses issued pursuant to the EAA in which JAE had an interest at the time of its conviction.

Accordingly, it is hereby

Ordered:

I. (a) Until March 11, 1995, Japan Aviation Electronics Industry Limited, 21–6, Dogenzaka 1–chrome, Shibuya–ku, Tokyo 150, Japan, hereby is denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving any commodity or technical data exported or to be exported from the United States, in whole or in part, or that is otherwise subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United states or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data, in whole or in part, exported or to be

[1] The EAA expired on September 30, 1990. Executive Order 12730 (55 FR 40373, October 2, 1990) continued the Regulations in effect under the International Emergency economic Powers Act (50 U.S.C.A. 1701–1706 1991)).

[2] Pursuant to appropriate delegations of authority that are reflected in the Regulations, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by section 11(h) of the EAA.

exported from the United States and subject to the Regulations; (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data; and (vi) in participating, in any manner or capacity, in any outstanding individual validated license or in any special licensing procedure, including, but not limited to, distribution licenses.

(b) The denial period set forth above is suspended for the entire three-year period for any transaction in which the end-user of U.S.—origin commodities or technical data is an agency or instrumentality of either the United States or the Japanese governments.

(c) The last 33 months of the three-year denial period shall be suspended for a period of 33 months, beginning three months from the date of this order, for any transaction involving U.S.—origin commodities, software, and technical data that are authorized for export to Japan pursuant to any general license set forth in parts 771 and 779 of the Regulations, for any transaction involving a reexport by JAE pursuant to the permissive reexport provisions of part 774 of the Regulations, and for any transaction involving the export by JAE of U.S.— origin parts, components, materials, or other commodities incorporated abroad into a foreign-made product for which no prior written authorization is required from the Office of Export Licensing pursuant to § 776.12(b) and (d) of the Regulations or that is subject to the permissive reexport provisions of § 779.8 of the Regulations.

(d) The last 24 months of the three-year denial period shall be suspended for a period of 24 months, beginning one year from the date of this order, for all other transactions not covered by subparagraphs (b) and (c) above.

(e) The suspended denial periods set forth in subparagraphs (b), (c), and (d) above shall be waived following the three-year denial period, provided that JAE:

(1) Commits no violation of the Act or any regulation, order, or icense issued under the Act;

(2) Allows unannounced inspections by appropriate Department officials to ensure JAE's compliance with the Act and any regulation, order, or license issued thereunder, as well as to review and monitor JAE's Internal Compliance Program;

(3) Implements any remedial measures suggested by the Department to JAE's Internal Compliance Program to safeguard U.S.-origin equipment and technical data;

(4) Files, by the 15th of each month, a report with the Director, Office of Export Enforcement, identifying each transaction involving the purchase, sale, or other transfer of U.S.-origin commodities or technical data subject to the Regulations in which JAE engaged during the preceding calendar month. Each report shall identify the U.S. supplier, the date the commodity or technical data was received by JAE, the date of any in-country transfer or reexport by JAE, the applicable Japanese or U.S. export licenses or authorizations for any reexport, and the end-use or end-user for the equipment. Such reports shall be filed for each month that all or a portion of the denial period set forth above is suspended pursuant to subparagraphs (b), (c), and (d) above.

(f) During the period the denial period set forth above is suspended pursuant to subparagraphs (b), (c), and (d) above, JAE may participate in transactions that are subject to the Regulations in accordance with the requirements of the Act and the Regulations.

II. After notice and opportunity for comment as provided in § 770.15(h) of the Regulations, any firm, corporation, or business organization related to JAE by affiliation, ownership, control, or position of responsibility may also be subject to the provisions of this Order.

III. As provided in § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

IV. This Order is effective immediately.

V. A copy of this Order shall be delivered to JAE. This Order shall be published in the **Federal Register**.

Dated: March 12, 1992.

Iain S. Baird,

Director, Office of Export Licensing.

Brass Sheet and Strip From the Netherlands; Final Results of Antidumping Duty Administrative Reviews

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of Antidumping Duty Administrative Reviews.

SUMMARY: On November 1, 1991, the Department of Commerce published the preliminary results of two administrative reviews of the antidumping duty order on brass sheet and strip from the Netherlands. The reviews cover one exporter and two consecutive periods from February 8, 1988 through July 31, 1990.

We gave interested parties an opportunity to comment on our preliminary results of these reviews. At the request of respondent, we held an administrative hearing on December 19, 1991. Based on our analysis of comments received and the correction of certain clerical errors, we have changed the final results from those presented in our preliminary results of these reviews.

EFFECTIVE DATE: March 19, 1992.

FOR FURTHER INFORMATION CONTACT: Sally A. Craig or Linda L. Pasden, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-3793.

SUPPLEMENTARY INFORMATION:

Background

On November 1, 1991, the Department of Commerce ("the Department") published in the **Federal Register** (56 FR 56187) the preliminary results of two administrative reviews of the antidumping duty order on brass sheet and strip from the Netherlands. The Department has now conducted these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended ("the Act").

Scope of the Review

Imports covered by these reviews are brass sheet and strip, other than leaded brass and tin brass sheet and strip, from the Netherlands. The chemical compositions of the products under review are currently defined in the Copper Development Association ("C.D.A.") 200 series or the Unified Numbering System ("U.N.S.") C20000 series. Products whose chemical compositions are defined by other C.D.A. or U.N.S. series are not covered by these reviews. The physical dimensions of the products covered by these reviews are brass sheet and strip of solid rectangular cross section over 0.006 inch (0.15 millimeters) through 0.188 inch (4.8 millimeters) in finished thickness or gauge, regardless of width. Coiled, wound on reels (traverse wound), and cut-to-length products are included. Prior to January 1, 1989, this merchandise was classifiable in the Tariff Schedules of the United States Annotated ("TSUSA") under item numbers 612.3960, 612.3962, and 612.3966. Since that date, the merchandise has been classifiable under the Harmonized Tariff Schedule ("HTS") item numbers 7409.21.00.50, 7409.21.00.75, 7409.29.00.50, and 7409.29.00.75. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The reviews cover one manufacturer/exporter, Outokumpu Copper Products B.V. ("OBV") (formerly Metallverken Nederland B.V.), and the two periods from February 8, 1988 through July 31, 1989 ("88/89 review") and August 1, 1989 through July 31, 1990 ("89/90 review").

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received timely comments from both petitioners and OBV. At the request of OBV, a public hearing was held on December 19, 1991.

Comments Pertaining to Both Reviews

Comment 1: Petitioners urge the Department to change the hierarchy of product comparison criteria used for the preliminary analysis (alloy, gauge, width, coating, and packed form) to the following: Form, which is described by petitioners as coil/strip, traverse-wound, or cut-to-length/sheet; coating, which is described by petitioners as tinned or non-tinned; alloy; gauge; and width. Petitioners assert that this conforms to the hierarchy used in the final results of review for both the Canadian and German brass sheet and strip cases (Final Results of Antidumping Duty Administrative Review of Brass Sheet and Strip from Canada and Revocation, in Part, of the Antidumping Duty Order, 56 FR 57317 (November 8, 1991), and Brass Sheet and Strip from the Federal Republic of Germany; Final Results of Antidumping Duty Administrative Review, 56 FR 60087 (November 27, 1991) (adopting the preliminary results, 56 FR 29938)). Petitioners maintain that form and coating are the two most important comparators and should be at the top of the hierarchy rather than at the bottom.

Department's Position: The Department is not satisfied that compelling justification has been submitted by petitioners for changing the order of the product comparison criteria after the issuance of the preliminary results. We note that petitioners agreed during the preliminary course of these reviews that "alloy" should be the first criterion in the hierarchy. Moreover, petitioners mischaracterize the recent German and Canadian reviews. In the brass cases, the Department makes a distinction between "form," defined as sheet versus strip, as opposed to "packed form," defined as the type of packing used (e.g., in coils or traverse-wound). Although we agree that "form" should be of primary consideration in the hierarchy, all sales under consideration in these Dutch reviews are of brass in strip form. Thus, we do not consider "form" to be a relevant comparator in the hierarchy in the hierarchy for these reviews. This differs from the situation in the German and Canadian reviews. Furthermore, because we do not consider "packed form" (i.e., coiled or traverse-wound strip) and "coating" to be the primary comparators in the hierarchy, we have not moved these criteria further up in the hierarchy for the final results.

The hierarchy we used in our preliminary analysis, with the exception of the exclusion of "temper," was that used in the original investigation of sales at less than fair value, which is as follows: Alloy, gauge, width, temper, coating, and packed form. Although we did account for "temper" in our preliminary analysis with the use of a difference-in-merchandise ("diffmer") adjustment, this comparator was not a variable in the hierarchy of product comparison criteria in our preliminary results. Therefore, we have inserted "temper" as a variable in the hierarchy for the final results so that the hierarchy conforms exactly to that used in the original investigation for purposes of determining such or similar merchandise.

Comment 2: Petitioners propose that the Department change it model match methodology. Instead of eliminating factors altogether and in pairs when an identical match cannot be found, petitioners urge the Department to select sales using the next most similar product comparison factor (i.e., the next closest gauge, width, or alloy). Petitioners maintain that the Department's methodology has resulted in comparisons of dissimilar merchandise. Particularly because the Department's methodology eliminates factors in pairs rather than singly, petitioners assert that the methodology ignores substantially more similar home market sales which should be used in comparison to U.S. sales. Therefore, petitioners further urge the Department to examine each of the comparison factors one at a time, rather than in pairs.

Department's Position: Petitioners proposed, after we issued the preliminary results, that we alter the model match methodology so that the next most similar product comparison factor is sought when an identical match cannot be found, rather than eliminating the factor altogether. The Department, however, views its model match methodology as reasonable. Product comparison factors are eliminated in reverse order of importance in the hierarchy when identical matches are unavailable. In addition, diffmer adjustments are then made, where such data is available, to account for the differences in product characteristics as comparison factors are eliminated. Moreover, the Department's methodology is consistent with the methodology used in other brass sheet and strip cases (see, e.g., Brass Sheet and Strip From Sweden; Final Result of Antidumping Duty Administrative Reviews, 57 FR 2706 (January 23, 1992)). At this stage of the proceeding, the Department is unable to determine whether the fundamental changes proposed by petitioners would result in more appropriate matches between U.S. and home market sales. For these reasons, therefore, the Department has not altered its model match methodology in this respect for the final results.

Regarding petitioners' proposal that we drop comparison factors singly rather than in pairs, the Department has determined that this change is reasonable because it ensures that the home market model has as many characteristics as possible in common with the U.S. model. In addition, it is not a substantial change in the fundamental methodology used for the preliminary results. Therefore, we have modified our model match methodology by eliminating criteria one at a time.

Comment 3: Petitioners assert that adjustments for width, coating, and

packed form must be made despite the lack of diffmer data on the record conforming to the width groupings from the original investigation. Petitioners maintain that the Department must either make adjustments for differences in physical characteristics or use best information available when comparing a more costly U.S. sale to a less costly home market sale. Petitioners submit that, if the Department decides that use of best information available is not appropriate, the Department should either (1) modify the data provided by respondent for respondent's proposed width groupings to conform to the width groupings used from the original investigation or (2) rely on cost of production ("COP") and constructed value ("CV") data already provided by respondent to construct diffmers for the width groupings used in the preliminary analysis.

Department's Position: The Department has determined that diffmer adjustment data conforming to the width groupings used in both the original investigation and our preliminary results is appropriate for the final results. Because constructing diffmers using data on the record would have required numerous and substantial calculations, the Department requested all necessary diffmer data from the respondent after issuance of the preliminary results. We have used this diffmer information, conforming to the width groupings used in our preliminary analysis, for our final results.

Comment 4: Petitioners maintain that an adjustment should be made for commissions paid by OBV's related companies, Outokumpu Copper Rolled Products AB and Outokumpu Radiator Strip AB (collectively, "OAB"), to its U.S. subsidiary, Outokumpu Copper (USA) Inc. ("OCUSA"). Petitioners believe that the commissions are directly related to the sales at issue. Furthermore, petitioners maintain that OBV failed to submit information or related-party commission payments and, therefore, that it has failed in its responsibility to prove that the related-party commissions paid are not at arm's length. Thus, petitioners assert that the Department must assume that the rates were at arm's length and use the highest reported commission rate during this period as the best information available.

Department's position: The Court of Appeals' remand in *LMA–La Metalli Industriale S.p.A.* v. *United States*, 912 F.2d 455, 458 (1990), instructed the Department to adjust for commissions paid to a related party in the home market when the commissions were determined to be (1) at arm's length and (2) directly related to the sales in question. Subsequent to this, the Department has developed the following guidelines to determine whether commissions paid to related parties, either in the United States or in the foreign market, are at arm's length.

(1) We will compare the commission paid by the respondent to the related selling agent to those paid by the respondent to any unrelated selling agents in the same market (home or U.S.) or in any third country market.

(2) In cases where there is not an unrelated sales agent, we will compare the commission earned by the related selling agent of sales of merchandise produced by the respondent to commissions earned by the related selling agent on sales of merchandise produced by other unrelated sellers or manufacturers (Final Determination of Sales at Less Than Fair Value: Coated Groundwood Paper From Finland, 56 FR 56363 (November 4, 1991) ("Coated Groundwood Paper from Finland")).

As we stated in Coated Groundwood Paper from Finland, in appropriate circumstances, we will also examine the nature of the agreements or contracts between the manufacturer(s) and selling agent(s) which establish the framework for payment of commissions and for services rendered in return for payment, in order to ensure that both related and unrelated agents perform approximately the same services for the commissions (*Id* at 56372). If, based on the above analysis, the Department is satisfied that the commissions are at arm's length as well as directly related to the sales, we will make an adjustment for these commissions.

In the 88/89 review, OBV used an unrelated commissionaire to sell the subject merchandise in the U.S. market. In responding to the Department's questionnaire, OBV claimed that its parent company, Metallverken AB (now OAB), made payments to its related party, OCUSA, in connection with U.S. sales, but OBV failed to report the amounts. In its rebuttal brief submitted after publication of the Department's preliminary results, however, OBV did report the amounts of these payments to OCUSA during 1989. Normally, the Department would view this submission as untimely, to reject this submission, however, would reward OBV for its untimeliness. Therefore, circumstances require that we use this information in calculating U.S. price. Respondent's new data enables us, first, to make the necessary comparison between the payments made by OAB to the related subsidiary on the one hand and the commissions paid by OAB to the unrelated party on the other. Although the Department is satisfied that these payments were directly related to the sales made by OCUSA, we find that they were not made at arm's-length rates. Accordingly, we did not adjust for these payments as commissions in the 88/89 review. The Department, however, normally regards such payments to related parties as indirect selling expenses (see Television Receivers, Monochrome and Color, from Japan: Final Results of Antidumping Duty Administrative Review, 54 FR 13917, 13924 (April 6, 1989)). Thus, we added these payments to indirect selling expenses in the exporter's sale price ("ESP") calculation for the final results.

In the 89/90 review, OBV provided the amounts of the payments made by OAB to OCUSA in response to the Department's supplemental questionnaire. The Department is satisfied that these payments were directly related to the sales made by OCUSA. During this review period, OBV also used an unrelated commissionaire to sell the subject merchandise in the U.S. market. Thus, the Department compared the payments made by OAB to its related party to the commissions paid by OAB to the unrelated party and determined that these payments were not made at arm's-length rates. Accordingly, the Department did not adjust for these payments as commissions in the 89/90 review. However, because the Department does regard such payments to related parties as indirect selling expenses (see id), we added these payments to indirect selling expenses in the ESP calculation for the final results.

Comment 5: Petitioners note that OBV's reported metal loss values are less than the metal loss values reported in the audited financial statements. Thus, petitioners submit that the Department should calculate OBV's metal loss amounts based on the amounts reported in the financial statements.

Department's Position: The Department has determined not to recalculate the metal loss values reported by OBV because respondent has provided a reasonable explanation, which is supported by information already on the record. Respondent states that the amounts reported in its response reflect an appropriate adjustment to account for recipe gains (which result when a discrepancy exists between the nominal and actual compositions of an alloy), while the amounts reported in the financial statements are reported on a gross basis. It further states that the recipe gains or losses are accounted for elsewhere in the financial statements. Because we have no basis for disputing respondent's claim, we have used the metal loss values as reported by OBV.

Comment 6: Petitioners assert that U.S. price should be adjusted downward to compensate for the absorption or reimbursement of antidumping duties by respondent. Petitioners submit that evidence or reimbursement between the foreign producer and its U.S. subsidiary exists because of respondent's assertion on the record that transfers of funds between OCUSA and its parent company are merely "intracorporate transfers." Thus, petitioners assert that the payments for antidumping duties noted in OCUSA's financial statements are tantamount to payment of those duties by OAB. Petitioners maintain that the Department should reduce U.S. price commensurate with the degree of absorption or reimbursement of antidumping duties, in accordance with section 353.26(1)(a) of the Commerce regulations.

Department's Position: The Department has determined not to make this adjustment to U.S. price. Section 353.26 of the Commerce regulations provides that, in calculating the U.S. price, the Department will deduct any amount of antidumping duties that are reimbursed to the importer by the producer or reseller. No evidence exists on the record that OBV or OAB will pay any antidumping duties directly, pay antidumping duties for OCUSA, or reimburse OCUSA for such duties. Absent evidence of reimbursement, the Department has no authority to make such an adjustment to U.S. price (Brass Sheet and Strip from the Republic of Korea, 54 FR 33257 (August 14, 1989)). As a protection against such reimbursement, section 353.26 also requires that importers provide to the Customs Service a certificate of nonreimbursement prior to liquidation of entries. If that certificate is not provided, the Customs Service will liquidate the entry at twice the antidumping duty rate.

Comment 7: Respondent asserts that the Department's reclassification of warehoused purchase price sales as ESP transactions because there is no identifier on the further-processed transactions was arbitrary and capricious and contrary to law. Respondent maintains that sales involving post-sale warehousing, but not further processing, are purchase price sales and that the Department has "repeatedly" treated such sales as purchase price transactions. Respondent further maintains that sales involving both warehousing and further processing are also purchase price transactions and should not be reclassified as ESP sales. Respondent submits that, if the Department continues to reclassify those sales that were only warehoused as ESP sales, the Department should not make any adjustments to reflect nonexistent further processing costs or attributable profit.

Department's Position: We have determined that this reclassification is appropriate because we requested information on further-processed sales in the original questionnaire for each review and in the supplemental questionnaire for the 88/89 review. However, respondent did not comply with these requests in a timely manner. We are unable, as a result, to determine which products were further processed. Therefore, in accordance with section 776(c) of the Act and as best information available, we have classified all warehoused sales as ESP sales and have adjusted U.S. price for further processing costs and profit on these sales for the final results.

Comment 8: Respondent asserts that the Department's use of the width groupings from the original investigation to determine similar merchandise is inappropriate because these width groupings are unrelated to OBV's cost experience during the review period.

Department's Position: The Department has determined that respondent did not provide sufficient justification, such as cost information on its proposed width groupings, on the record to support a change in the width groupings from those used in the original investigation. Therefore, the Department used the width groupings from the preliminary analysis for the final results.

Comment 9: Respondent submits that the Department should not adjust further-processed ESP sales for a profit factor, as well as for the cost of further processing, unless corresponding adjustments are made for similarly-processed home market sales.

Department's Position: In accordance with section 772(e)(3) of the Act, the Department adjusted U.S. price for the increase in value (including profit) resulting from the further processing done after importation (see, e.g., Final Results of Administrative Review: Color Picture Tubes From Japan, 55 FR 37915 (1990)).

Neither the statute nor our regulations provide for a corresponding adjustment to foreign market value in this situation. However, because section 772(e)(3) of the Act requires that we calculate U.S. price and compare ESP sales in the form in which the merchandise enters the United States, we have modified our model match methodology so that we matched the U.S. product as imported (i.e., in coiled and/or untinned form) with identical or similar home market products. We treated those traverse wound and/or tinned sales which we reclassified as ESP sales in the same manner. Where we could not make identical matches, we made a diffmer adjustment when making comparisons between coiled and traverse-wound merchandise.

Although we are making adjustments to U.S. price for further processing costs (which encompasses any slitting, traverse-winding, and/or tinning performed in the U.S. market), we did not have information available on the record to determine which sales were slit after importation into the United States. Therefore, we could not alter our model match methodology to reflect this further-processing element.

Comment 10: Respondent states that the profit figures it reported for ESP sales are incorrect in that they represent OCUSA's total profit on each sale, rather than just that portion attributable to further processing. Respondent submits that the Department should use corrected profit factors for the final analysis, especially since these factors are used by the Department to calculate profit on further processing for the purchase price sales reclassified as ESP sales. Respondent further submits that the Department should use a weighted-average profit figure, rather than a simple-average profit figure, in its calculation of profit on further processing for the reclassified purchase price sales.

Department's Position: Because OBV had ample time to correct its profit figures before the preliminary results were issued, the Department has determined that OBV's submission of corrected profit figures after issuance of the preliminary results consists of new and untimely information. Therefore, the Department derived profit on further processing for the original ESP sales submitted in each review period by allocating OBV's total profit figures, using OBV's reported transfer prices. We then calculated the weighted-average profit from the resulting profit amounts which we used as profit on further processing for the purchase price sales reclassified as ESP sales.

Comment 11: Respondent maintains that, for purposes of determining whether home market sales were made at prices below the cost of production ("the cost test"), the Department should not recalculate OBV's interest expense

using the total interest expense from the consolidated financial statement of the Outokumpu Group and apply that interest based on cost of goods sold. Respondent submits that use of the Outokumpu Group's interest expense factor bears no relation to OBV's actual cost of production and is, therefore, unfair and distortive. Respondent asserts that the Department should use the interest expense factor reported by OBV, which respondent claims is based on its actual expenses, for the final results.

Department's Position: The cost of production questionnaire requests that "interest expense should include *all* interest expense incurred on the long- and short-term debt of the company from unrelated sources as reported in the consolidated financial statements." The Department typically derives interest expense from the consolidated financial statements of a corporate entity because of the fungible nature of its capital structure (see, *e.g.*, Final Results of Administrative Review: Brass Sheet and Strip From Canada, 55 FR 31414, 31418 (1990)). Therefore, as we did in our preliminary analysis, we have recalculated OBV's interest expense using the total interest expense from the consolidated financial statement of the Outokumpu Group for the final results.

Comment 12: Petitioners contend that the Department erred in its preliminary analysis with the following: (a) In not adding U.S. commissions to foreign market value ("FMV") for purchase price sales; (b) in not deducting an amount for warranty expense in the calculation of OBV's adjusted home market price for purposes of the cost test; and (c) in adding packing expense to the reported gross home market price to calculate the adjusted home market price for purposes of the cost test.

Department's Position: The Department has made the corrections noted in (a), (b), and (c) for the final results. Regarding (b), because the COPs calculated by the Department for purposes of the cost test did not include any direct selling expenses, it was necessary for the Department to deduct direct selling expenses (i.e., warranty expense) in calculating the adjusted home market sales price. Regarding (c), because packing expense was already included in OBV's reported gross unit price, it was not necessary for the Department to add packing expense in calculating the adjusted home market price for purposes of the cost test.

Comment 13: Respondent contends that the Department erred in its preliminary analysis with the following: (a) In not deducting home market packing costs from home market price in the sales comparison analysis; (b) in not deducting OBV's warehouse and inventory carrying costs from the home market price in the ESP sales comparison analysis; and (c) in not adjusting home market and U.S. price to account for OBV's inventory carrying costs in the purchase price sales comparison analysis.

Department's Position: The Department made the correction noted in (a) for the final results. In addressing (b), we added OBV's home market warehouse and inventory carrying costs to home market indirect selling expenses when comparing home market transactions to ESP sales. We did not, however, adjust home market and U.S. price to account for OBV's inventory carrying costs in our purchase price sales comparison analysis for the final results, as suggested in (c). The Department considers inventory carrying cost an indirect selling expense and does not adjust for this expense in a purchase price situation (see, *e.g.*, Final Determination of Sales at Less Than Fair Value: Certain Internal-Combustion, Industrial Forklift Trucks From Japan, 53 FR 12552 (1988)).

Comment Pertaining to the 88/89 Review Only

Comment 14: Respondent maintains that the Department should not discard home market sales found to be below the COP because, overall, these sales comprise less than ten percent of the home market database. Respondent states that, because less than ten percent of the total home market sales were found to be below cost, the Department's long-standing practice is to include *all* sales in the calculation of foreign market value.

Department's Position: In determining whether to disregard home market sales made at prices below the COP, the Department examines whether such sales have been made in substantial quantities over an extended period of time. When less than ten percent of the home market sales of a particular model are at prices below the COP, we do not disregard any sales of that model and make normal price-to-price comparisons. When more than ten percent, but less than 90 percent, of the home market sales of a particular model are determined to be below cost over an extended period of time, we disregard the below-cost sales for purposes of calculating FMV. When more than 90 percent of the home market sales of a particular model are made below cost over an extended period of time, we disregard all home market sales of that model for purposes of calculating FMV (see Final Results of Antidumping Duty Administrative Review: Tapered Roller Bearings Four Inches or Less in Outside Diameter, and Certain Components Thereof, 56 FR 26054, 26060 (June 6, 1991)). Therefore, the sales discarded on a model-specific basis as a percentage of total home market sales is not relevant in the context of this methodology. Thus, for the final results, the Department continued to perform the cost test as it was performed for the preliminary analysis.

Comment Pertaining to the 88/89 Review Only

Comment 15: Respondent submits that, in the calculation of profit on further processing for the purchase price sales reclassified as ESP sales, the Department should not set percentage losses to zero.

Department's Position: We agree and have made the change for our final results.

Final Results of Review

As a result of our analysis of the comments received, we have changed our preliminary results and determine that the following margins exist for OBV:

Period of review	Margin (percent)
2/8/88 to 7/31/89	9.25
8/1/89 to 7/31/90	10.54

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all entries of the subject merchandise covered by these reviews. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the U.S. Customs Service.

Furthermore, the following deposit requirements will remain in effect until publication of the final results of the next administrative review for all shipments of the subject merchandise, entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for OBV will be 10.54 percent; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered by these reviews, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and, (4) the cash deposit rate for all other manufacturers or exporters will be 10.54 percent. This rate represents the highest rate for any firm with shipments in the most recent administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during these review periods. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and this notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.22 of the Commerce Department's regulations (19 CFR 353.22).

Dated: March 16, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Standard Chrysanthemums From the Netherlands; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of Countervailing Duty Administrative Review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on standard chrysanthemums from the Netherlands. We preliminarily determine the net subsidy to be 0.63 percent *ad valorem* for the period January 1, 1990 through December 31, 1990. The rate from the last administrative review was 0.57 percent *ad valorem* for the period covering January 1, 1987 through December 31, 1987. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 19, 1992.

FOR FURTHER INFORMATION CONTACT: Stephanie Moore or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 8, 1991, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administration Review" (56 FR 9936) of the countervailing duty order on standard chrysanthemums from the Netherlands (52 FR 7646; March 12, 1987). On March 27, 1991, the respondent, the Association of Dutch Flower Auctions, requested that we conduct an administrative review of the order. We published the initiation on April 18, 1991 (56 FR 15856). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by this review are shipments of Dutch Standard chrysanthemums. During the review period, such merchandise was classifiable under item number 0603.10.70 of the Harmonized Tariff Schedule (HTS). The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1990 through December 31, 1990, and nine programs.

Analysis of Programs

(1) Natural Gas Provided at Preferential Rates

Natural gas in the Netherlands is sold directly to major customers by the N.V. Nederlandse Gasunie (Gasunie). The Agricultural Industrial Board, or "Landbouwschap," is a quasi-governmental body that negotiates with Gasunie to determine prices and general terms of gas delivery for Dutch greenhouse growers. Gasunie is 40 percent owned by DSM Aardgas (a company wholly-owned by the Government of the Netherlands), 10 percent by the Government of the Netherlands, 25 percent by Shell Nederland, and 25 percent by Esso Nederland N.V. While the Government of the Netherlands does not own a controlling interest in Gasunie, it plays a significant role in setting the price of natural gas. The Minister of Economic Affairs reserves the right to approve selling prices and terms of delivery for supplies to public distributors in the Netherlands, large export contracts, and contracts between Gasunie and the Landbouwschap.

The Landbouwschap is a statutory trade organization created under the Industrial Organizations Act. Its chairman is approved by the Government of the Netherlands, and its purpose is to represent the economic and political interests of the agricultural sector in the Netherlands.

Natural gas prices are based on levels of consumption, which are broken down into four categories or "zones", zones "a" through "d". Zone "a" consumers use between 0 and 170,000 cubic meters (m3) of gas per year; zone "d" consumers use between 10 to 50 million m3 of gas per year. Zone "a" users pay the highest price per m3; zone "d" the lowest.

In the October 1984 contract negotiated with Gasunie by the Landbouwschap on behalf of greenhouse growers, a maximum ceiling price was established. In the Final Affirmative Countervailing Duty Determination; Certain Fresh Cut Flowers From the Netherlands (52 FR 3301, February 3, 1987) (Netherlands Flowers), we determined that the contract with the price ceiling provision constitutes preferential treatment because: (a) Comparable users of natural gas enjoy no such price ceiling; (b) the contract involves the provision of natural gas to a specific industry (i.e., greenhouse growers); and (c) the contract constituted governmental provision of natural gas at a preferential rate. Accordingly, in Netherlands Flowers, we calculated the benefit to greenhouse growers based on the difference between the price of gas actually paid by greenhouse growers in the period of the investigation and the zone "d" price they would have had to pay under the contract absent the price ceiling provision.

In the last administrative review (54 FR 43977; October 30, 1989), we determined that because the contract, which was renegotiated subsequent to Netherland Flowers, did not contain a provision for a ceiling price, the contract did not confer a countervailable benefit. This contract expired on October 1, 1989.

During this review period, greenhouse growers, through the Landbouwschap, negotiated a new contract with Gasunie for the period October 12, 1989 through October 1, 1994. Under this contract, greenhouse growers pay the zone "d" rate plus 0.5 guilder cents/m3. The terms

of the new contract are basically the same as the prior contract. The contract does not contain a ceiling price provision. Therefore, we preliminarily determine that such a contract does not confer a countervailable benefit.

(2) Aids for the Creation of Cooperative Organizations

Under European Community (EC) Regulation 355/77, the EC has provided grants to Dutch auction houses, which are flower grower cooperatives. These funds were provided by the EC through the Agricultural Guidance and Guarantee Fund with matching grant contributions from EC member states. The purpose of the program was to improve the processing, marketing, and distribution of agricultural products in member states. This program was terminated on January 1, 1986, and no grants were disbursed after 1987.

We previously determined that this grant program is countervailable because it is limited to a specific enterprise or industry, or group of enterprises or industries in the Netherlands. See Standard Chrysanthemums From the Netherlands; Preliminary Results of Countervailing Duty Administrative Review (54 FR 43977; October 30, 1989).

To calculate the benefit from this program, we used a declining balance grant methodology. We allocated the benefits from each grant over 10 years, the average useful life of renewable physical assets in the agricultural sector as determined under the U.S. Internal Revenue Service's Asset Depreciation Range System. We used the average interest rate for long-term commercial loans published by the Netherlands Bank (the Central Bank) as the discount rate for each year in which grants were provided. We divided the sum of these benefits by the f.o.b. value of total auction sales in 1990. On this basis, we preliminarily determine the net subsidy to be 0.04 percent *ad valorem*.

(3) Glasshouse Enterprises Program

Under the Glasshouse Enterprises Program, the Ministry of Agriculture and Fisheries provided grants to greenhouse growers in order to stimulate private investment in energy saving methods in the horticulture industry. This program was terminated in June 1985. However, grants approved prior to the termination were disbursed in 1986 and 1987.

We previously determined that this program is a countervailable domestic subsidy because it was available only to greenhouses. See Preliminary Results, *supra* (54 FR 43978; October 30, 1989).

To calculate the benefit from this program, we used the grant methodology described in section 2 above. We divided the total benefits from these grants by the f.o.b. value of total greenhouse sales in 1990. On this basis, we preliminarily determine the net subsidy to be 0.58 percent *ad valorem*.

(4) Aids for the Reduction of Glass Surface

Under the Aids for the Reduction of Glass Surface program, the Ministry of Agriculture and Fisheries provided grants to greenhouse growers for the purpose of increasing the energy efficiency of greenhouses by dismantling existing glass and replacing it with modern energy-saving glass. The program was terminated in November 1984. However, grants approved prior to the termination of the program were disbursed until 1987.

We previously determined that this program was countervailable because it was limited to a specific enterprise or industry or group of enterprises or industries. See Preliminary Results, *supra* (54 FR 43979; October 30, 1989).

To calculate the benefit from this program, we used the grant methodology described in section 2 above. We divided the total benefits from these grants by the f.o.b. value of total greenhouse sales in 1990. On this basis, we preliminarily determine the net subsidy to be 0.003 percent *ad valorem*.

(5) Steam Drainage Systems

In January 1981, the Government of the Netherlands banned the use of methylbromide as a means of soil disinfection due to the potential health hazards caused by the chemical. In December 1981, the Ministry of Agriculture and Fisheries established a program making available cash grants to encourage the use of steam drainage as an alternative method of soil disinfection for greenhouses. The program was terminated in September 1984. However, some grants were disbursed until 1987.

We previously determined that this program is countervailable because it is limited to a specific enterprise or industry, or group of enterprises or industries. See Preliminary Results, *supra* (54 FR 43979; October 30, 1989).

To calculate the benefit from this program, we used the grant methodology described in section 2 above. We divided the total of the benefits from these grants by the f.o.b. value of total greenhouse sales in 1990. On this basis, we preliminarily determine the net subsidy to be 0.004 percent *ad valorem*.

(6) Guarantee Fund for Agriculture

The Stichting Borgstellingsfonds voor de Landbouw (Foundation Security Fund for Agriculture, or "Fund") is used to guarantee the servicing and repayment of loans made by banks to farmers. The Fund acts as an institutional guarantor, not as a lender itself, providing guarantees only when the security offered by the farmer is inadequate for the total loan amount. A loan application may be made to the Fund only after all of the farmer's own securities or collateral have been provided for the loan. If an application is approved under the Fund, the guarantee applies only to the portion of the loan not originally approved by the bank.

In Netherlands Flowers, we found that horticulture received a disproportionate share of loan guarantees under this program. The determination was based on a comparison of the relative shares of horticulture in total loan guarantees in each year from 1982 to 1984, and total agricultural production for 1985. The consistent pattern over the years of horticulture receiving almost 50 percent of the funding even though it accounts for less than 25 percent of the value of agricultural production leads us to conclude that the Fund is administered in such a way as to confer a benefit on a specific group of industries, *i.e.*, horticulture.

In the last administrative review (54 FR 43977; October 30, 1989), we found that this program was not countervailable for the period of review because there was no difference between the commercial interest rate in the Netherlands and the rate charged by the Fund for its guarantees.

During this review period, the average long-term annual interest rates charged on loans under this Fund were consistent with the average interest rates charged on long-term bank loans, as reported by the De Nederlandsche Bank. In addition, loan guarantees granted to greenhouse flower growers did not represent a disproportionate share of the total guarantees. On this basis, we preliminarily determine that this program did not provide a countervailable benefit.

(7) Income Tax Deduction

In January 1990, an income tax deduction program was established in Article 11 of the Regulation. Under this program, growers, auctions, and exporters qualify for an investment allowance on investment in tangible assets. The allowance ranges from 2 percent to 18 percent depending upon the amount of the annual investment. The allowance amount is deducted from the profits made during the year in which the investment was made.

Because this program was implemented in 1990, any benefits bestowed will be measured in the subsequent year, when the deduction from the profits are taken. In accordance with existing practice, the Department measures the benefit at the time a firm can calculate the amount of the benefits, which normally will be the time at which the firm files its tax return. Therefore, we preliminarily determine that any benefit arising under this program is not countervailable during this review period.

(8) Other Programs

We preliminarily determine that exporters or producers of standard chrysanthemums did not use the following programs during the review period:

a. Investment Incentive (WIR)—Regional Program; and
(b) Loans at preferential interest rates.

Preliminary Results of Review

As a result of our review, we preliminarily determine the net subsidy to be 0.63 percent *ad valorem* for the period January 1, 1990 through December 31, 1990.

The Department intends to instruct the Customs Service to assess on shipments of the subject merchandise exported on or after January 1, 1990 and on or before December 31, 1990.

Further, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties, as provided by section 751(a)(1) of the Act, of 0.63 percent of the f.o.b. invoice price on all shipments of subject merchandise from the Netherlands entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Parties to the proceeding may request disclosure of the calculation methodology and interested parties may request a hearing not later then 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the due date for case briefs under section 355.38(e).

The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any case or rebuttal brief.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: March 11, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

ACTION: Notice of application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protests the holder and the members identified in the Certificate from state and federal government antitrust actions and from private treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, room 1800H, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 92-00005." A summary of the application follows.

Summary of the Application

Applicant: World International Investments Corp. ("WIIC"), 4400 Mac Arthur Boulevard, 9th Floor, Newport Beach, California 92660, Contact: John A. MacInnis, Agent, Telephone: (714) 895-2229.

Application No.: 92-00005.

Date Deemed Submitted: March 9, 1992.

Members (in addition to applicant): None.

Export Trade:

1. *Products:* All Products.
2. *Services:* All Services.
3. *Technology Rights:* Technology rights, including, but not limited to, patents and trademarks, that relate to Products and Services.
4. *Export Trade Facilitation Services (as they relate to the Export of Products, Services, and Technology Rights):* Export Trade Facilitation Services, including consulting, research on overseas markets, market analysis and strategy, collection of information on trade opportunities, arranging for exporter risk coverage with the Export-Import Bank, legal assistance, services related to compliance with customs requirements, transportation, facilitating the formation of shippers' associations, financing, and taking title to goods.

Export Markets: The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation: WIIC seeks to:

1. Export specific products and/or services in response to specific orders and will contact individual suppliers as to competitive prices, quality and availability;
2. Provide and/or arrange for provision of export trade facilitation services;
3. Exchange information only in one-on-one discussions with specific suppliers on specific orders or market conditions.

4. Enter into exclusive licensing and distributorship agreements with suppliers for the export of Products, Services, and Technology Rights to the Export Markets;

5. Allocate export sales or divide the Export Markets among suppliers for the sale and/or licensing of Products, Services, and Technology Rights;

6. Establish the price of Products, Services, and Technology Rights for sale and/or licensing in the Export Markets;

7. Negotiate and manage licensing agreements for the export of Technology Rights; and

8. Collect information on trade opportunities in the Export Markets and distribute such information to clients.

Dated: March 13, 1992.

George Muller,

Director, Office of Export Trading Company Affairs.

[FR Doc. 92-6355 Filed 3-18-92; 8:45 am]

BILLING CODE 3510-DR-M

National Oceanic and Atmosphere Administration

Pacific Fishery Management Council Public Hearing

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of reports; notice of public meetings and hearings.

SUMMARY: The Pacific Fishery Council (Council) has begun its annual preseason management process for the 1992 ocean salmon fisheries. As required by the final framework amendment to the Fishery Management Plan for Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon and California, this notice announces the availability of Council documents and dates and locations of Council meetings and public hearings. These actions comprise the complete schedule of events followed by the Council for determining the annual proposed and final modifications to ocean salmon management measures.

ADDRESSES: Send written comments to Lawrence Six, Executive Director, Pacific Fishery Management Council, Metro Center, suite 420, 2000 SW. First Avenue, Portland, Oregon 97201.

FOR FURTHER INFORMATION CONTACT: John Coon, (503) 326-6352.

Council meetings are open to the public and public comment on pertinent issues is solicited at specified times during the meetings. Written comments may be addressed to the Council office. Further details of each meeting will be available in Council news releases and the **Federal Register** or by contacting the Council office directly; 2000 SW. First Avenue, suite 420, Portland, Oregon 97201; (503) 326-6352.

The Council's schedule for development of ocean salmon fishery management recommendations for the 1992 season follows:

February 27—Salmon Advisory Subpanel, Salmon Technical Team (STT), and selected Scientific and Statistical Committee members meet with policy and technical staff from the state and federal fishery agencies and treaty Indian tribes to review preliminary stock abundance estimates prepared by the STT. The meeting will be held at the Red Lion Inn—Jantzen Beach, Portland, Oregon.

March 2—Council reports which summarize the 1991 salmon season and project the expected salmon stock abundance for 1992 are available to the public from the Council office.

March 9-13—Council and advisory entities meet at the Red Lion Inn—Seatac Airport to adopt 1992 regulatory options for public review. The options should meet the management objectives of the framework plan. Any need for emergency changes to the plan should be identifed for public review.

March 13-23—STT completes "Preseason Report II analysis of Proposed Regulatory Options for 1992 Ocean Salmon Fisheries".

March 19—Newsletter with proposed management options and public hearing schedule is distributed (includes options, rationale, and condensed summary of biological and economic impacts).

March 26—The STT "Preseason Report II Analysis of Proposed Regulatory Options for 1992 Ocean Salmon Fisheries" will be distributed with Council briefing book.

March 30—Public hearings are held to review the proposed April 6 regulatory options adopted by the Council. All public hearings begin at 7 p.m. on the following dates and at the following locations:

March 30, 1992 Astoria Middle School, 1100 Klaskanine Avenue, Astoria, Oregon.

March 31, 1992 Red Lion Inn, 1313 Fourth Bayshore Drive, Coos Bay, Oregon.

March 31, 1992 General Administration Building, Auditorium, Olympia, Washington.

April 1, 1992 Red Lion Inn, 1929 Fourth Street, Eureka, California.

April 6, 1992 Clarion Hotel, 401 East Millbrae, California.

April 6-10—Council and its advisory entities meet at the Clarion Hotel—San Francisco Airport, San Francisco, California to adopt final 1992 regulatory measures. New options or analyses presented at the April meeting must be reviewed by the STT and public prior to any Council action.

April 16—Newsletter describing adopted ocean salmon fishing management measures is mailed to the public.

April 10-22—STT completes "Preseason Report III Analysis of Council Adopted Regulatory Measures for 1992 Ocean Salmon Fisheries."

May 1—Federal regulations implemented and preseason report III available for distribution.

Dated: March 13, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Defense FAR Supplement, part 242, Contract Administration, and the clauses at 252.242; DD Form 1659.

Type of Request: Reinstatement.

Average Burden Hours/Minutes per Response: 1.5 hours.

Responses per Respondent: 6.7.

Number of Respondents: 47,454.

Annual Responses: 317,454.

Annual Burden Hours (Including Recordkeeping): 479,902.

Needs and Uses: Defense FAR Supplement (DFARS) part 242, concerns information collection requirements required to perform contract administration functions, including special requirements of the Defense Logistics Agency.

Affected Public: Businesses or other for-profit, Non-profit institutions, and Small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Peter N. Weiss.

Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce. Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-6302 Filed 3-18-92; 8:45 am]

BILLING CODE 3810-01-M

Office of the Secretary

AGENCY: Defense Intelligence Agency Advisory Board.

ACTION: Notice of closed meeting.

SUMMARY: Pursuant to the provisions of Subsection (d) of section 10 of Public Law 92-463, as amended by section 5 of Public Law 94-409, notice is hereby given that a closed meeting of the DIA Advisory Board has been scheduled as follows:

DATES: Thursday & Friday, 14-15 May 1992 (8 a.m. to 5 p.m.).

ADDRESSES: The DIAC, Bolling AFB, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel John G. Sutay, USAF, Chief, DIA Advisory Board, Washington, DC 20340-1328 (202/373-4930).

SUPPLEMENTARY INFORMATION: The entire meeting is devoted to the discussion of classified information as defined in section 552b(c)(1), title 5 of the U.S. Code and therefore will be closed to the public. The Board will receive briefings on and discuss several current critical intelligence issues and advise the Director, DIA, on related scientific and technical intelligence matters.

Dated: March 16, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-6361 Filed 3-18-92; 8:45 am]

BILLING CODE 3810-01-M

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 30 March 1992.

Time: 0900-1500 hours.

Place: PEO AVSCOM, St. Louis, MO.

Agenda: Members of the Army Science Board's Systems Issue Group for the Evaluation of the Longbow for Apache and Comanche will meet to introduce the members to the respective program/project managers and their staffs. The group will provide classified responses to the proposed terms of reference for the study, and discuss their intended approach and focus. The project managers and their staffs will then present a detailed program briefing with attendant focus on the technical aspects and issues pertinent to the study. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695-0781/0782.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Draft Implementation Plan for the Environmental Restoration and Waste Management Programmatic Environmental Impact Statement

AGENCY: U.S. Department of Energy (DOE).

ACTION: Amendment of notice of availability for public comment and announcement of public workshops; extension of public comment period.

SUMMARY: DOE announced on February 4, 1992 (57 FR 4193), the availability, for public review and comment, of the Draft Implementation Plan (IP) for the Environmental Restoration and Waste Management (EM) Programmatic Environmental Impact Statement (PEIS) and plans to conduct a series of five regional workshops to discuss the Draft IP. DOE is now announcing plans to hold a sixth public workshop on the Draft IP in the Cincinnati, Ohio, area, and extending the end of the public comment period from April 10, 1992, to April 24, 1992. For the convenience of the public, DOE is also republishing the information from the February 4 Notice concerning the purpose and format of the workshops. The only amendments to that notice are the date and location of the sixth workshop and the extension of the comment period. The purpose of the Draft IP is to record the results of the public scoping process and to serve as a plan for the preparation of the PEIS. The Draft IP also states the alternatives and issues to be evaluated in the PEIS.

Background

On October 22, 1990, DOE issued a Notice of Intent (NOI) to prepare the EM PEIS, which identified the proposed scope of the PEIS and initiated the public scoping process. The proposed action is to formulate and implement an integrated EM program in a safe and environmentally sound manner and in compliance with applicable requirements. This proposed action will be achieved by defining a broad, systematic approach to DOE remedial activities and waste management practices. The PEIS will analyze the existing EM program (the no-action alternative) and evaluate alternatives for an integrated program.

In the NOI, DOE requested comments concerning the scope of the PEIS. The public comment period was from October 22, 1990 (the publication date of the NOI) to February 19, 1991. Beginning on December 3, 1990, DOE held 23 scoping meetings at various locations across the country to ensure adequate opportunity for participation by the public and other government agencies. During the public comment period, over 1,200 people provided approximately 7,000 comments, either by participating in the meetings or by submitting materials and letters to DOE. The majority of comments came from individuals. However, about 280 organizations also participated. A statistical analysis of scoping comments shows that most concerns were related to the public perception of the DOE culture and to environmental, health, and safety issues.

In the NOI, DOE stated that the IP would be issued for public comment. DOE has prepared the IP to record the results of the public comments on the scope of the PEIS and to serve as a plan for the preparation of the PEIS. The IP also states the alternatives and issues to be evaluated in the PEIS.

The IP contains seven chapters, seven appendices, and an executive summary. The bulk of the information is presented in chapters one through four and in Appendix C, which are briefly described below. Background, bibliographic, organizational, and administrative information are included in the other sections of the IP.

Chapter one, Introduction, provides historical and background information,

discusses the regulatory framework under which DOE operates and explains the relationship of the EM PEIS to other DOE activities. Chapter two, Purpose of and Need for the Proposed Action, relates the proposed action to the fundamental mission of DOE's EM program.

The third chapter, The Scoping Process and Results, describes the DOE scoping process and the results of the scoping meetings. This chapter describes how public comments will be addressed in the preparation of the PEIS.

Chapter four, Proposed Action and Alternatives, gives details on the proposed scope of the PEIS. The overall EM proposed action addresses both environmental restoration and waste management. The PEIS will analyze the current environmental restoration program (no action alternative) and three alternatives. The PEIS also will assess the current waste management program (no action alternative) and alternatives for each of six waste classifications and for DOE spent nuclear fuel. The alternatives will be analyzed in an integrated way since environmental restoration activities generate waste. The last section of chapter four, Alternatives Analysis, describes the approaches to be used in studying risks and impacts related to environmental restoration and waste management alternatives and the impacts of technology development.

Appendix C provides a proposed annotated outline for the PEIS.

Invitation to Comment

All interested parties are invited to comment on the IP. In an effort to encourage public involvement, copies of the IP, with an invitation to comment and notice of the workshops, were sent to all those who participated in the scoping process or who asked to be on the mailing list. Written comments should be directed to Mr. Glen L. Sjoblom at the address and by the date indicated below. Also, agencies, organizations, and the general public are invited to take part in any one of six planned regional public workshops. The dates, locations, and contact information for the six workshops, including the one added by this notice, are listed below and are being announced in local public notices in advance of the planned workshops. Following completion of the comment period and consideration of the written comments, DOE will revise the Draft IP as appropriate and issue an IP for the PEIS.

Addresses and Further Information

Written comments on the IP and questions concerning the program should be directed to: Glen L. Sjoblom, Special Assistant to the Assistant Secretary, Environmental Restoration and Waste Management (EM-1), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

To request copies of the IP, call (800) 862-8860.

For further information on the DOE NEPA process, contact: Carol M. Borgstrom, Director, Office of NEPA Oversight (EH-25), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-4600 or (800) 472-2756.

Dates

The comment period on the IP will continue until April 24, 1992. Written comments should be postmarked by April 24, 1992, to ensure consideration.

Public Workshops

Six regional public workshops on the IP are planned. They will be held at the following times and places:

Date: Tuesday, March 17, 1992.
Location: Atlanta Penta Hotel, 590 West Peachtree Street, NW., Atlanta, GA 30308-3586, (404) 881-6000, (800) 633-0000.

Date: Thursday, March 19, 1992.
Location: St. Tropez Hotel, 455 East Harmon Avenue, Las Vegas, NV 89109, (702) 369-5400, (800) 666-5400.

Date: Wednesday, March 25, 1992.
Location: Regency Hotel, 3900 Elati Street, Denver, CO 80216, (303) 458-0808, (800) 525-6748.

Date: Friday, March 27, 1992.
Location: Airport Ramada Inn, Spokane International Airport, Spokane, WA 99219, (509) 838-5211.

Date: Tuesday, March 31, 1992.
Location: Georgetown University Convention Center, 3800 Reservoir Road, NW, Washington, DC 20007, (202) 687-3200, (800) 446-9476.

Date: Thursday, April 2, 1992.
Location: The Cincinnati Terrace Hilton, 15 W. 6th Street, Cincinnati OH 45202, 513-381-4000.

These workshops will be different in format from the scoping meetings in order to facilitate interactive communication between participants and senior DOE representatives of the EM program and to solicit individual viewpoints. The workshops will be informal in nature and no formal transcript will be recorded. Anyone wishing to ensure that DOE will consider his or her comments in the preparation of the IP should submit them in writing.

Each workshop on the IP will consist of day and evening plenary sessions and four small-group breakout sessions during the day. These workshops will focus on DOE EM program-wide issues relating to the PEIS, not site-specific issues. The plenary sessions will consist of presentations of the PIES process and the IP. Registration is required for the small-group breakout sessions of the workshops, but not for the plenary sessions. Anyone who wishes to participate in the breakout sessions at one of the six workshops should call (800) 862-8860 to register at least two weeks before the date of the desired workshop.

The breakout sessions will focus on four topics related to the PEIS: The PEIS process, Waste Management, Environmental Restoration, and Technology Development. The breakout sessions will be repeated to allow the participants to cover all four topics. Registration will be on a first-come, first-served basis. The number of breakout attendees will be limited to approximately 60 persons (15 for each of the breakout sessions) to promote an interactive atmosphere.

The tentative agenda for the workshops is as follows:

Day Session

8:00-8:15—Welcome.
8:15-8:30—Presentation on the PEIS Process.
8:30-9:15—Presentation on the IP.
9:15-9:45—General Questions.
9:45-10—Break.
10-11—Breakout Sessions (Four Parallel sessions: PEIS Process, Waste Management, Environmental Restoration, and Technology Development).
11-12—Repeat Breakout Sessions.
12-1—Lunch.
1-2—Repeat Breakout Sessions.
2-3—Repeat Breakout Sessions.
3-3:30—Break (facilitators organize for final plenary session).
3:30-5—Breakout Summary Report (from facilitators) & comments.

Evening Sessions

6:30-6:45—Welcome.
6:45-7—Repeat of Presentation on the PEIS Process.
7-7:45—Repeat of Presentation on the IP.
7:45-8:15—Repeat of Breakout Summary Report (from facilitators) and comments.

8:15-8:30—Break.
8:30-9:30—General Questions and Comments.
9:30-10—Summary Remarks.

Issued in Washington, DC., this 13th day of March, 1992

Paul L. Ziemer,

Assistant Secretary Environment, Safety and Health

[FR Doc. 92-6442 Filed 3-18-92; 8:45 am]

BILLING CODE 6450-01-M

Morgantown Energy Technology Center, Financial Assistance Award, Cooperative Agreement

AGENCY: Department of Energy (DOE), Morgantown Energy Technology Center.

ACTION: Notice of Noncompetitive Financial Assistance Award.

SUMMARY: Based upon a determination made pursuant to 10 CFR 600.7(b)(2)(i)(A), the DOE, Morgantown Energy Technology Center, gives notice of its plans to award a 12-month cooperative agreement to Southern California Gas Company in the approximate amount of $305,000, approximately $100,000 of which will be funded by the Government.

FOR FURTHER INFORMATION CONTACT: Mark L. Estel, I-07, U.S. Department of Energy, Morgantown Energy Technology Center, P.O. Box 880, Morgantown, West Virginia 26507-0880, Telephone: (304) 291-4085, Procurement Request No. 21-92MC29227.000.

SUPPLEMENTARY INFORMATION: The pending award is based on an unsolicited proposal whose purpose it is to study the true cost of ownership of small distributed fuel cell-based electric power generating facilities. A product of this analysis will be a series of microcomputer-based models which will enable the user to examine capital costs, installation and operation in the context of the total cost of ownership. Furthermore, this study will identify the necessary regulations for a new, smaller class of "total energy" utility companies which can facilitate the business decisions required for a company to choose to become an energy provider to itself or others.

Issued: March 12, 1992.

Louie L. Calaway,

Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. No. 96-511, 44 U.S.C. 3501 *et seq.*). The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (a DOE component which term includes the Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed within 30 days of publication of this notice. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION CONTACT: Jay Casselberry, Office of Statistical Standards (EI-73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254-5348.

SUPPLEMENTARY INFORMATION:

The energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission.
2. FERC-516.
3. 1902-0096.
4. Electric Rate Schedule Filings.
5. Extension.
6. On occasion.
7. Mandatory.
8. Businesses or other for-profit.
9. 234 respondents.
10. 2.7 responses.
11. 976 hours per response.
12. 614,775 hours.
13. The Federal Power Act requires each public utility, certain hydroelectric project licensees and qualifying small power producers to file for approval rate schedules, together with related contracts and service conditions. Supporting data are required to determine the reasonableness of the rates.

Statutory Authority: Sec. 5(a), 5(b), 13(b) and 52, Pub. L. No. 93-275, Federal Energy Administration Act of 1974, 15 U.S.C. § 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, March 12, 1992.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 1417 and 1835]

Central Nebraska Public Power and Irrigation District and Nebraska Public Power District; Extending Time To Comment on the Kingsley Dam and North Platte/Keystone Diversion Dam Draft Environmental Impact Statement

March 13, 1992.

The Federal Energy Regulatory Commission (FERC) has received letters from the State of Nebraska, United States Department of the Interior, United States Environmental Protection Agency, and the National Audubon Society, requesting an extension of time to comment on the draft environmental impact statement (DEIS) for relicensing the Kingsley Dam, Project No. 1417 and

the North Platte/Keystone Diversion Dam, Project No. 1835 (Platte River Projects). The two hydropower projects are located on the North Platte, South Platte, and Platte Rivers in Nebraska.

The request is hereby granted to all who wish to comment on the DEIS. Comments that were due on March 31, 1992, are now due by April 30, 1992.

As noted in the DEIS, the Districts have submitted new information with the Commission that was not considered in the DEIS. The staff is preparing a report that will assess the Districts' new proposals and determine whether changes in the DEIS or the staff recommended alternative are needed.

All participants in the DEIS process are expected to independently assess the Districts' proposals and should be prepared to respond promptly to the staff report. Depending on the nature and extent of the conclusions reached in the staff report, however, a further extension of the comment period past the 30 days set in this notice may be warranted.

For further information please contact S. Ronald McKitrick at (202) 357-0783.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6331 Filed 3-18-92; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2336-008 Georgia]

Georgia Power Co.; Availability of Environmental Assessment

March 13, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application to amend the license for the Lloyd Shoals Hydroelectric Project to install a weir downstream of the powerhouse in the project tailrace. The weir will aid in enhancing dissolved oxygen levels in the tailrace during summer months. The project is located on the Ocmulgee River in Butts and Jasper Counties, Georgia. The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, the staff concludes that approval of the amendment would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP88-460-000, et al.]

Pacific Gas Transmission Co.; Environmental Site Visits

March 13, 1992

This is to inform all parties to the proceeding in the above docket that the enviromental staff of the Federal Energy Regulatory Commission (FERC) will conduct a number of site visits, over the next two years, along various portions of the Pacific Gas Transmission Company (PGT) Pipeline Expansion Project. These site visits will enable FERC environmental staff to evaluate PGT's proposed site-specific construction techniques, as well as to monitor PGT's compliance with the environmental conditions attached to its FERC Certificate. The first of these visits will occur on March 31 and April 1, 1992 along various portions of Spread 1A, and will evaluate PGT's site-specific Moyie River crossing procedures. Although future site visits will not be noticed, parties can obtain a schedule of proposed site visits to be conducted during a specific month by contacting the FERC Environmental Project Manager at the beginning of that month. All parties may attend the proposed site vistis; however, parties must provide their own transportation and should pre-register with the FERC Environmental Project Manager. For further information contact Mr. Mark C. Kalpin, Environmental Project Manager, at (202) 208-0918.

Louis D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 199-061 South Carolina]

South Carolina Public Service Authority; Availability of Environmental Assessment

March 13, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application for nonproject use of projects lands and waters to construct a waterfowl impoundment on Lake Moultrie of the Santee-Cooper Project, FERC No. 199. South Carolina Public Service Authority, licensee for Santee-Cooper Project, on behalf of the South Carolina Wildlife and Marine Resources Department (WMRD) requests the Commission's approval for WMRD to use project lands to construct a 100-acre waterfowl impoundment. The proposed impoundment is located on the Sandy Beach Waterfowl Management Area with the Moultrie Wildlife Management Area, Berkeley County, South Carolina. The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, staff concludes that approval of the nonproject use of project lands to construct the waterfowl impoundment would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's Offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-04370T Texas-51]

Texas; NGPA Determination by Jurisdictional Agency Designating Tight Formation

March 12, 1992

Take notice that on March 3, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Wilcox Formation in portions of Zapata and Jim Hogg Counties, Texas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The designated area in Zapata and Jim Hogg Counties, Texas, consists of the acreage listed in the attached appendix.

The notice of determination also contains Texas' findings that the referenced portion of the Wilcox Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

Appendix

Wilcox Formation in Zapata and Jim Hogg Counties, Texas.

1. All of the J.M. Cuellar Survey No. 278, A-423, located in Zapata County.
2. All of the T. & N.O. RR Survey No. 119, A-98, located in Zapata County.
3. All of the A. Stehle Survey No. 4, A-499, located in Zapata County.
4. All of the H. & G.N. RR Survey No. 3, A-51, located in Zapata County and A-183, located in Jim Hogg County.
5. All of the J.T. Vela Survey No. 108, A-548, located in Zapata County and A-362, located in Jim Hogg County.
6. All of the A. Stehle Survey No. 6, A-497, located in Zapata County.
7. All of the T. & N.O. RR Survey No. 5, A-100, located in Zapata County and A-318, located in Jim Hogg County.
8. All of the A. Stehle Survey No. 624, A-500, located in Zapata County.
9. All of the F.C. Guerra Survey No. 86, A-436, located in Zapata County and A-142, located in Jim Hogg County.

BILLING CODE 6717-01-M

[Docket No. PR92-13-000]

Arkansas Western Gas Co.; Petition for Rate Approval

March 12, 1992.

Take notice that on March 5, 1992, Arkansas Western Gas Company (AWG) filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable a maximum rate of $0.2023 per MMBtu for transportation and compression of natural gas on its system south of the Drake Compressor Station under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

AWG states that it owns and operates intrastate transmission facilities in various counties in Arkansas and is technically an intrastate pipeline within the meaning of section 2(16) of the NGPA. AWG is requesting approval of its existing maximum rate for transportation and compression which rate was established in Docket No. ST88-1-000. AWG states that the total rate of $0.2023 is comprised of a rate of $0.1176 per MMBtu for transportation and a charge of $0.0847 per MMBtu for compression at the Davis Station.

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's rules of practice and procedures. All motions must be filed with the Secretary of the Commission on or before April 1, 1992. The petition for rate approval is on file with the Commission and is available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP91-65-000 and CP89-2107-000]

Arkla Energy Resources, a Division of Arkla, Inc.; Informal Settlement Conference

March 12, 1991.

Take notice that an informal settlement conference will be convened in this proceeding on Thursday, March 19, 1992, at 10 a.m., at the office of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC, for the purpose of exploring the possible settlement of the above-referenced dockets.

Any party, as defined in 18 CFR 385.102(c), or any participant, as defined in 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations, 18 CFR 385.214.

For additional information, contact Williams J. Collins (202) 208-0248 or John P. Roddy (202) 208-1176.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6337 Filed 3-18-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-131-006]

Carnegie Natural Gas Co.; Compliance Filing

March 12, 1992.

Take notice that on March 11, 1992, Carnegie Natural Gas Company (Carnegie) tendered for filing the revised tariff sheets listed on Appendix A attached to the filing. Carnegie has proposed an effective date for these tariff sheets of March 23, 1992, or such effective date as authorized by the Commission in its forthcoming order addressing the compliance filing, but in no event later than April 1, 1992.

Carnegie states that it is filing the tariff sheets listed on Appendix A to comply with the Commission's Order issued on February 26, 1992, in which the Commission approved the Joint Settlement Agreement filed in the captioned proceeding. Carnegie states that the enclosed tariff sheets implement the following basic changes to Carnegie's existing FERC Gas Tariff, as provided in the Joint Settlement Agreement: (1) Reduced base tariff rates; (2) the tracking of Account No. 858 costs under a Transportation Cost Adjustment clause; (3) new interruptible sales service under Rate Schedule SEGSS; and (4) abandonment of service under Rate Schedule LVIS.

Carnegie states that copies of its filing were served on all jurisdictional customers and interested state commissions, as well as other parties in the captioned proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's rules of practice and procedure 18 CFR 385.211. All such protests should be filed on or before March 17, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Dockt No. TM92-9-21-000]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 12, 1992.

Take notice that Columbia Gas Transmission Corporation (Columbia) on March 6, 1992, tendered for filing the following proposed changes to its FERC Gas Tariff, First Revised Volume No. 1:

To Be Effective April 6, 1992

Second Revised Sheet Nos. 30C01 through 30C04

Third Revised Sheet Nos. 30C05 through 30C06

By this filing, Columbia proposes to flowthrough costs from Texas Gas Transmission Corporation (Texas Gas) as set forth in its annual reconciliation filing of take-or-pay settlement payments in Docket No. RP91-61-000, *et. al.*, pursuant to the Commission's Letter Order dated February 5, 1992, in Texas Gas' Docket No. TM92-3-18-000. By the instant filing, Columbia proposes to pass through a decrease in monthly charges to its customers from $102,745 to $90,004, to be effective April 6, 1992.

Columbia states that copies of the filing were served upon Columbia's jurisdictional customers interested state commission, and upon each person designated on the official service list compiled by the Commission's Secretary in Docket Nos. RP88-187 *et al.*, and Docket No. RP91-41 *et al.*

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 19, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a part must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6339 Filed 3-18-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM92-13-4-000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

March 12, 1992.

Take notice that on March 10, 1992, Granite State Gas Transmission, Inc. (Granite State) 300 Friberg Parkway, Westborough, Massachusetts 01581 tendered for filing Twelfth Revised Sheet No. 25 in its FERC Gas Tariff, Second Revised Volume No. 1, containing changes in rates for effectiveness on March 1, 1992.

According to Granite State, it provides a storage service for Bay State Gas Company under its Rate Schedule GSS with storage capacity provided in a facility operated by CNG Transmission Corporation (CNG). It is further stated that Granite State's Rate Schedule GSS tracks changes made by CNG under its Rate Schedule GSS pursuant to which Granite State obtains storage capacity from CNG.

Granite State further states that on February 13, 1992, CNG made a filing in Docket No. RP90-143 reducing several component charges in its Rate Schedule GSS in compliance with a Stipulation and Agreement approved by the Commission. According to Granite State, its filing tracks in its Rate Schedule GSS the changes proposed by CNG in its Rate Schedule GSS.

Granite State states that copies of its filing were served on Bay State Gas Company and the regulatory commissions of the states of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 19, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Louis D. Cashell,

Secretary.

[FR Doc. 92-6340 Filed 3-18-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA92-1-17-004]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 12, 1992.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on March 10, 1992 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies each of the following tariff sheets:

Proposed to be Effective February 1, 1992

2nd Sub 41st Revised Sheet No. 50.2
Sub Forty-second Revised Sheet No. 50.2

Proposed to be Effective March 1, 1992

Sub Forty-third Revised Sheet No. 50.2

Texas Eastern states that Texas Eastern filed tariff sheets on December 2, 1991 in Docket Nos. TA92-1-17 and TM92-5-17, on January 31, 1992 in Docket No. TF92-2-17, and on February 27, 1992 in Docket No. TM92-3-17. The tariff sheets filed December 2, 1991 and January 31, 1992 were accepted by the Commission on January 31, 1992 and February 27, 1992, respectively. The tariff sheets filed February 27, 1992 are currently pending Commission approval. Texas Eastern has discovered an error in the Minimum Space Charge of Rate Schedule ISS-1 on Sheet No. 50.2 of the three filings listed above. To correct such error, Texas Eastern submits the above listed tariff sheets.

Texas Eastern states that copies of the filing were served on Texas Eastern's juridictional customers and interested state commissions.

Any persons desiring to protest said filing should file a protest with the Federal Energy Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 19, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6341 Filed 3-18-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP92-108-000]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

March 12, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation ("Transco") on March 11, 1992, tendered for filing certain tariff sheets to Third Revised Volume No. 1 and Original Volume No. 2 of its FERC Gas Tariff. Transco states that the sole purpose of the instant filing is to propose two interdependent rate design changes (and resulting tariff sheet changes) to Transco's March 2, 1992 rate case filing in Docket No. RP92-137 and in all other respects—including cost of service—this filing is identical to and builds upon the Docket No. RP92-137 rate case filing.

Transco states that in its Docket No. RP92-137 rate case filing, Transco proposed, among other things, a change to Fixed-Variable (F-V) rate design to bring Transco into compliance with Commission policy objectives expressed in the Mega-NOPR proceeding in Docket No. RM91-11-000. In the instant filing, Transco proposes as part of an integrated rate design package (i) the adoption under Transco's blanket certificate of an Interruptible Pooling Service (IPS) Rate Schedule as an alternative to so-called "IT feeder" service together with (ii) the roll-in of the costs of Transco's onshore Mobile Bay facilities to systemwide cost of service and the development of generally applicable system rates for transportation service through such facilities.

Transco states that the proposed rate design package will promote Mega-NOPR goals by removing from Transco's transmission commodity rates an arbitrary allocation of fixed costs and by placing all shippers in Transco's production area under a uniform rate structure.

The proposed effective date of Transco's filing is April 11, 1992. Transco states that it has chosen this effective date because it is after the proposed effective date of April 10, 1992 in Transco's Docket No. RP92-137 rate case filing. The timing of the proposed effective dates is intended to indicate that the instant rate design filing proceeds from and builds upon Transco's Docket No. RP92-137 rate case. In that regard, Transco requests that the Commission accept the instant filing and suspend it for the full statutory period. Transco states that it is Transco's current intention not to move rates based on this filing into effect until after a merits determination in this docket on the interdependent rate design proposal of the IPS Rate Schedule and the Mobile Bay roll-in.

Transco request that the Commission adopt "paper hearing" procedures in order to reach a merits determination on these procompetitive rate design changes as soon as possible. As a suggestion for expedited paper hearing procedures which the Commission might adopt, Transco proposes that the Commission's suspension order in this Docket No. RP92-108 require parties to file statements of position with the Commission regarding the IPS Rate Schedule/Mobile Bay roll-in within thirty days of the Commission's suspension order. Transco proposes that, thereafter, Transco and interested parties would then be granted thirty days within which to submit reply statements. Transco submits that such a schedule would leave the Commission ample time within which to issue its merits determination on the Mobile Bay roll-in/IPS Rate Schedule prior to the winter heating season. Transco submits that the expedited Commission procedures in the Great Lakes Gas Transmission proceeding in Docket No. RP91-143 provide ample precedent for Transco's request for a paper hearing.

Transco states that copies of the filing were served upon Transco's customers and interested State Commissions. In accordance with the provisions of section 154.16 of the Commission's Regulations, copies of the filing are available for public inspection during regular business hours, in a convenient form and place in Transco's main office at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 and rule 214 of the Commission's rules of practice and procedure 18 CFR 385.211 and 385.214. All such notions or protests should be filed on or before March 19, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-51-4115-8]

VMT Forecasting and Tracking—Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of section 187 VMT forecasting and tracking guidance.

SUMMARY: Today's action provides notice of available guidance on how to forecast and track vehicle miles traveled (VMT) in Moderate and Serious carbon monoxide (CO) non-attainment areas with design values greater than 12.7 ppm at the time of classification. This guidance is required by section 187(a) of the Clean Air Act Amendments of 1990 (CAAA).

The guidance states that estimates of actual annual VMT in areas subject to the section 187 requirements should be obtained from the Highway Performance Monitoring System (HPMS). A state containing such an area should commit in its State Implementation Plan (SIP) to follow the Department of Transportation, Federal Highway Administration guidance in sampling for HPMS, with separate urbanized area sampling for the affected areas in 1993 and later calendar years. The HPMS VMT estimates will be used to track actual VMT.

The guidance also states that VMT forecasts should be based on a validated network-based travel demand modeling process meeting certain requirements, except that in Moderate areas without a currently validated travel demand model that meets these requirements, VMT forecasts may be based on the HPMS.

Further, the guidance discusses the criteria for determining whether actual VMT or an updated forecast is greater than a prior forecast.

Finally, the guidance discusses the linkage between forecasted VMT and the several CO emission inventories required by the Amendments.

As required by section 187 of the CAAA, the guidance was developed in consultation with the U.S. Department of Transportation.

TO OBTAIN A COPY OF THE GUIDANCE: Please send requests by FAX or by mail to Natalie Dobie. FAX: (313) 668-4368 or FTS 374-8368. Mailing address: Test and Evaluation Branch, U.S. EPA Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105.

FOR FURTHER INFORMATION CONTACT: Natalie Dobie or Mark A. Wolcott, Test and Evaluation Branch, U.S. EPA Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105. Telephone: (313) 741-7812 or (313) 668-4219, FTS 374-8812 or 374-8219.

SUPPLEMENTARY INFORMATION: Section 287(a)(2)(A) of the CAAA requires that states containing a Moderate and/or Serious CO non-attainment area with a design value greater than 12.7 ppm at the time of classification must forecast vehicle miles traveled in the non-attainment area for each year before the attainment year. The first forecast is due no later than November 15, 1992. The VMT forecast for the attainment year is the basis for the area's attainment demonstration. The intermediate forecasts act as milestones for progress towards attainment.

Annual updates of the annual VMT forecasts must be submitted to EPA along with annual reports regarding the extent to which such forecasts have proven to be accurate. These reports must contain estimates of actual vehicle miles traveled in each year for which the forecast was required.

Although the section 187 VMT Forecasting and Tracking Guidance does not identify the required contingency measures to be implemented if a VMT forecast is exceeded by either actual VMT or an updated forecast nor does it discuss the process for their implementation, the contingency measures and the implementation process will be discussed in future EPA guidance.

Dated: March 12, 1992.

William K. Reilly,

Administrator.

[FR Doc. 92-6300 Filed 3-18-92; 8:45 am]

BILLING CODE 6560-50-M

[FRL-4116-1]

Science Advisory Board; Clean Air Act Compliance Analysis Council and Environmental Economics Advisory Committee; Open Meetings

Under Public Law 92-463, notice is hereby given that meetings of the Clean Air Act Compliance Analysis Council (CAACAC) and the Environmental Economics Advisory Committee (EEAC) of the Science Advisory Board will be held on April 14 and 15, 1992 at the Sheraton National Hotel, 900 S. Orem St., Arlington VA 22204. The hotel telephone number is (703) 521-1900.

The meetings will start at 9:30 a.m. each day, and will adjourn no later 6 p.m. each day, and are open to the public. The CAACAC will meet on April 14, and the EEAC on April 15.

The main purpose of the CAACAC meeting is to receive briefings from Agency officials on current economic analysis issues addressed by EPA's Air program office and to initiate review of the work plan and methodologies developed by the Agency's Office of Policy, Planning and Evaluation to conduct a Congressionally-mandated study of the costs/benefits of implementing provisions of the Clean Air Act. Specific issues for review include: (1) The assessment paradigm; (2) cost estimation; (3) macroeconomic modeling; (4) emissions modeling; (5) air quality modeling; (6) estimation of changes in health and welfare endpoints; (7) estimation of economic damages; and (8) uncertainty analysis.

Anyone wishing specific information on the workplan or copies of the relevant documentation should contact Dr. Joel Scheraga, Office of Policy, Planning, and Evaluation (PM223X), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Dr. Scheraga may be called at (202) 260-4029. This documentation is not available from the Science Advisory Board.

The main purpose of the EEAC meeting is to receive briefings from Agency officials on economic analysis issues addressed by various EPA program offices, and to initiate review of the study Environmental and Resource Accounting in the Chesapeake Bay Region, developed by the Agency's Office of Policy, Planning and Evaluation. The study, referred to as the "Chesapeaka Study," was carried out to explore concerns about the ability of conventional economic accounting systems to reflect accurately resource depletion and degradation of environmental quality. Specific issues for review include: (1) Identification of appropriate environmental accounting approaches; (2) discussion of the most appropriate scale for environmental accounting—regional/political unit, national, or global; (3) environmental vs. economic orientation of accounts; (4) sustainability concepts; (5) linkage of economic activities and the environment; and (6) data needs for environmental accounting.

Anyone wishing specific information on the Chesapeaka study or copies of the document should contact Ms. Anne Grambsch, Office of Policy, Planning, and Evaluation (PM 223X), U.S. Environmental Protection Agency, 401 M Street, SW., Washington DC 20460. Ms. Grambsch may be called at (202) 260-2782. The document is not available from the Science Advisory Board.

Agendas for both meetings are available from Ms. Mary Winston, Staff Secretary, Science Advisory Board (A101F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 (202-260-6552). Members of the public desiring additional information about the conduct of either meeting should contact Mr. Samuel Rondberg, Designated Federal Official, Clean Air Act Compliance Analysis Council and Environmental Economics Advisory Committee, by telephone at the number noted above or by mail to the address noted above. Anyone wishing to make a presentation at either meeting should forward a written statement (35 copies) to Mr. Rondberg by April 6, 1992. The Science Advisory Board expects that the public statements presented at its meetings will not be repetitive of previously submitted written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes.

Dated: March 13, 1992.

Robert Flaak,

Assistant Staff Director, Science Advisory Board.

BILLING CODE 6560-50-M

[OPPTS-59934; FRL 4053-6]

Certain Chemical; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN(s) and provides a summary of each.

DATES: Close of review period:

Y 92-103, March 10, 1992.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-545, 401 M St., SW., Washington, DC, 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the TSCA Public Docket Office, NE-G004 at the above address between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

Y 92-103

Manufacturer. Confidential.

Chemical. (S) Alkyd resin, styrenated.

Use/Production. (G) Air dry alkyd polymer for paint and metal coatings. Prod. range: Confidential.

Dated: March 10, 1992.

BILLING CODE 6560-50-F

FARM CREDIT ADMINISTRATION

[BM-14-NOV-91-03]

Policy Statement Concerning the Disclosure of the Issuance and Termination of Enforcement Documents

AGENCY: Farm Credit Administration.

ACTION: Policy statement.

SUMMARY: On November 14, 1991, the Farm Credit Administration Board (Board) adopted a policy for the disclosure of certain information concerning enforcement documents that describes the mechanisms by which the disclosure would occur by stating that the disclosure shall be made by the Office of Congressional and Public Affairs, that the disclosure shall take place after the enforcement document is issued or terminated, and that the contents will be informative but will not identify the institutions and/or persons involved.

EFFECTIVE DATE: November 14, 1991.

FOR FURTHER INFORMATION CONTACT: Frances A. Pedersen, Senior Attorney, Litigation and Enforcement Division, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: The text of the Board's policy statement concerning the disclosure of the issuance and termination of enforcement documents is set forth below in its entirety.

Effective Date: 14-Nov-91

Effect on Previous Actions: None

Whereas, the Farm Credit Administration (FCA) Board finds that it is in the best interest of the Farm Credit System (FCS), the FCA, and the public, that certain information concerning the issuance and any subsequent termination of final enforcement orders, formal agreements and conditions imposed in writing (Enforcement Documents) be disclosed to the FCS and the public. Specifically, the basis for disclosing this information is to communicate to the FCS and the public that the FCA is effectively using its enforcement powers through the issuance of Enforcement Documents and the subsequent termination of such Enforcement Documents, when appropriate.

Therefore, the FCA Board adopts the following statement:

Upon issuance or termination of any Enforcement Document, the Office of Regulatory Enforcement shall notify the Director of the Office of Congressional and Public Affairs (OCPA) of such event. OCPA shall prepare, for release to the FCS and the public, a disclosure subject to the concurrence of the Office of General Counsel (OGC). If the OGC determines that a disclosure adversely affects a civil or criminal investigation, the disclosure will not be made. The disclosure shall include the information described below:

1. The type and date of action taken;

2. The type of institution to which the action pertains, or if the action pertains to an individual or entity, the relationship between the individual or entity and the institution; and

3. A description of the essential facts pertaining to the action, excluding information that would identify the institution and/or persons involved.

Dated this 14th day of November, 1991.

By Order of the Board.

Dated: March 13, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

March 11, 1992.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, (202) 452-1422. For further information on these submissions contract Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0107.

Title: Private Radio Application for Renewal, Reinstatement and/or Notification of Change to License Information.

Form Number: FCC Form 405-A.

Action: Revision.

Respondents: Individuals or households, state or local governments, nonprofit institutions and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 2,700 responses; .33 hours average burden per response; 891 hours total annual burden.

Needs and Uses: Radio station licensees are required to apply for renewal of their radio station authorization every five years. The Commission issues computer-generated renewal notices, however, this form will serve as a short form alternative for licensees who fail to receive that notice for whatever reason. This form is also provided for Land Mobile licensees who wish to reinstate their authorization, and for Land Mobile, General Mobile, Aviation Ground and Marine Coast licensees who wish to cancel their authorization, or file a name and/or address change. The form has been revised to include fee processing data. FCC personnel will use the data to determine eligibility for an authorization renewal or reinstatement, and issue a radio station license. Data is also used in conjunction with field engineers for enforcement purposes and for authorization cancellations.

OMB Number: 3060-0139.

Title: Request for Antenna Height Clearance and Obstruction Marking and Lighting Specifications.

Form Number: FCC Form 854.

Action: Revision.

Respondents: Individuals or households, non-profit institutions and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 500 responses; .50 hours average burden per response; 250 hours total annual burden.

Needs and Uses: The Communications Act of 1934, as amended, authorizes the Commission to require the painting and/or illumination of radio towers if and when in its judgment such towers constitute, or there is a reasonable possibility that they may constitute, a hazard to air navigation. This form will be used to: Evaluate the requirements for the painting and/or illumination of amateur, civil air patrol and satellite radio antenna that will exceed 200 feet or 1/100 of the minimum distance between the antenna site and any aircraft landing area, and approval for

the applicant to construct the antenna. The FCC will evaluate the antenna data submitted by the applicant when the antenna height will exceed 200 feet or 1/100 of the minimum distance between the antenna site and any public use landing area. The staff determines if part 17 of FCC rule requirements are met, and if any obstruction painting and/or lighting will be necessary.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

[FR Doc. 92-6449 Filed 3-18-92; 8:45 am]

BILLING CODE 6712-01-M

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

March 13, 1992.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, (202) 452-1422. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0430.

Title: Section 1.1206, Non-restricted proceedings; ex parte presentations generally permissible but subject to disclosure.

Action: Extension of a currently approved collection.

Respondents: Individuals or households, state or local governments, non-profit institutions, and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 800 responses; 0.5 hours average burden per response; 400 hours total annual burden.

Needs and Uses: In accordance with Commission rules, certain presentations made to decision-making personnel in non-restricted proceedings (such as rulemakings and requests for declaratory rulings) must be made available for viewing by all parties to the proceeding. Specifically, this section requires that written presentations on matters not reflected in written comments and that are not served on the parties to the proceeding or memoranda summarizing oral presentations made without advance notice to the parties and without opportunity for them to be present be made available for public viewing. Two copies are needed—one for the official records file and one for the duplicate file made available for public inspection. If each exparte presentation is not placed in the official record of the proceeding in a timely manner, there is the potential for Commission decisions to be made based on data that has not been made available for public review and comment. At a minimum, this could cause a delay in the proceedings or an adverse court action on due process grounds.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

[FR Doc. 92-6451 Filed 3-18-92; 8:45 am]

BILLING CODE 6712-01-M

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

March 12, 1992.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW, Washington, DC 20036, (202) 452-1422. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0329.

Title: Section 2.955, Equipment Authorization—Verification.

Action: Extension of a currently approved collection.

Respondents: Businesses or other for-profit (including small businesses).

Frequency of Response: Recordkeeping requirement.

Estimated Annual Burden: 5,675 recordkeepers; 18 hours average burden per recordkeeper; 102,150 hours total annual burden.

Needs and Uses: Commission rules require verification of compliance to establish technical standards for certain part 15 and part 18 devices. Technical data is gathered and retained by the equipment manufacturer in order to verify compliance, for each device operated under the applicable Rule part. Testing, and required verification, aids in controlling potential interference to radio communications. The data gathered may be used for investigating complaints of harmful interference, or for verifying the manufacturer's compliance with the Rules.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-953-DR]

California; Amendment to Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of California (FEMA-935-DR), dated February 25, 1992, and related determinations.

DATES: February 26, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

NOTICE: The notice of a major disaster for the State of California, dated February 25, 1992, is hereby amended to include Individual Assistance in the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of February 25, 1992.

The counties of Kern, Los Angeles, Orange, San Bernardino, and Ventura for Individual Assistance. (Previously designated for Public Assistance.)

(Catalog of Federal Domestic Assistance No. 83. SIC, Disaster Assistance.)

Grant C. Peterson,

Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

[FEMA-935-DR]

California; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of California (FEMA-935-DR), dated February 25, 1992, and related determinations.

DATES: February 25, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

NOTICE: Notice is hereby given that, in a letter dated February 25, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288, as amended by Pub. L. 100-707), as follows:

I have determined that the damage in certain areas of the State of California, resulting from severe rainstorms, snowstorms, wind, flooding, and mudslides on February 10, and continuing through February 18, 1992, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore declare that such a major disaster exists in the State of California.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administative expenses.

You are authorized to provide Public Assistance in the designated areas. Individual Assistance may be added at a later date, if warranted. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Pubic Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. A. Roy Kite of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster

I do herby determine the following areas of the State of California to have been affected adversely by this declared major disaster:

The counties of Kern, Los Angeles, Orange, San Bernardino, Ventura for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Wallace E. Stickney,

Director, Federal Emergency Management Agency.

[FR Doc. 92-6309 Filed 3-18-92; 8:45 am]

BILLING CODE 6718-02-M

[FEMA-936-DR]

New Jersey; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of New Jersey (FEMA-936-DR), dated March 3, 1992, and related determinations.

DATES: March 3, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3606.

NOTICE: Notice is hereby given that, in a letter dated March 3, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288, as amended by Pub. L. 100-707), as follows:

I have determined that the damage in certain areas of the State of New Jersey, resulting from a severe northeast coastal storm on January 4, 1992, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of New Jersey.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance will be limited to 75 percent of the total eligible costs.

Therefore, as part of its commitment under Section 409 for this event, the State of New Jersey will be required to evaluate both the State Hazard Mitigation Plan and the New Jersey Shore Protection Master Plan to identify short and long-term strategies that are cost-effective, environmentally sound, and compatible with the natural coastal processes, to mitigate the continuing damages caused by beach erosion and dune degradation and reduce the need for future disaster assistance in these areas.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Stephen Kempf, Jr. of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of New Jersey to have been affected adversely by this declared major disaster:

The counties of Atlantic, Cape May, and Ocean for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Wallace E. Stickney,

Director, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

[FEMA-930-DR]

Texas; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Texas (FEMA-930-DR), dated December 26, 1991, and related determinations.

DATES: February 21, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

NOTICE: The notice of a major disaster for the State of Texas, dated December 26, 1991, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 26, 1991:

The counties of Brazos, Coleman, Gonzales, Hill, Jones, and Wharton for Public

Assistance. (Previously designated for Individual Assistance.)

The counties of Matagorda and Robertson for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Grant C. Peterson,

Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Request for Additional Information

Agreement No.: 202-011259-003.

Title: United States/Southern Africa Conference Agreement.

Parties: Empresa de Navegacao International, Lykes Bros. Steamship Co., Inc., Safbank Line, Ltd.

Synopsis: Notice is hereby given that the Federal Maritime Commission, pursuant to section 6(d) of the Shipping Act of 1984 (46 U.S.C. app. 1705), has requested additional information from the parties to the Agreement in order to complete the statutory review of Agreement No. 202-011259-003 required by the Act. This action extends the review period as provided in section 6(c) of the Act.

By order of the Federal Maritime Commission.

Dated: March 16, 1992.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

GENERAL SERVICES ADMINISTRATION

Public Hearings for the Supplemental Draft Environmental Impact Statement for the Acquisition of Land on Which To Construct a Large-Scale Office Complex in Northern Virginia for Use by the Navy

Pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500-1508), the General Services Administration (GSA) has prepared and filed with the U.S. Environmental Protection Agency a Supplemental Draft Environmental Impact Statement (SDEIS) for the acquisition of interests in land to construct thereon buildings to house the Naval Systems Command in at least 1,000,000 (one million) occupiable square feet of office and related space. All sites must have the capacity to house at least an additional 1,000,000 (one million) square feet of office and related space available for purchase at the option of the Government.

The SDEIS has been distributed to various federal, state and local agencies, elected officials, civic associations, and interested individuals. In addition, a copy of the SDEIS has been placed in the following public libraries:

George Mason Library, 70001 Little River TP., Annandale, VA
John Marshal Library, 6209 Rose Hill Dr., Alexandria, VA
Martha Washington Library, 6614 Fort Hunt Road, Alexandria, VA
Sherwood Library, 2501 Sherwood Hall, Ln., Alexandria, VA
Alexandria City Library, 717 Queen St., Alexandria, VA
James Duncan Library, 2501 Commonwealth Ave., Alexandria, VA
Columbia Pike Library, 616 S. Walter Reed Dr., Arlington, VA
Cherrydale Library, 2190 N. Military Rd., Arlington, VA
Shirlington Library, 2700 S. Arlington Mill Dr., Arlington, VA
Fairfax City Library, 3915 Chain Bridge Road, Fairfax, VA
Ellen Coolidge Library, 4701 Seminary Rd., Alexandria, VA
Central Library, 1015 North Quincy St., Arlington, VA
Aurora Hills Library, 735 S. 18th St., Arlington, VA
Glencarlyn Library, 300 S. Kensington St., Arlington, VA
Westover Library, 1600 N. Lexington St., Arlington, VA

A limited number of single copies are available at the address listed at the end of this notice.

Public hearings to inform the public of the SDEIS findings and to solicit comments will be held on the following dates:

April 1, 1992, Aurora Hill Recreation Center, 735 S. 18th Street, Arlington, VA, 7 p.m. to 10 p.m.
April 2, 1992, Durant Senior Center, 1605 Cameron Street, Alexandria, VA, 7 p.m. to 10 p.m.

The public hearings will be jointly conducted by GSA and the Navy. Federal, state, and local agencies, and interested parties are invited and urged to be present or be represented at the hearings. Oral statements will be heard and transcribed by a stenographer; however, for the accuracy of the record, all statements should be submitted in writing as well. All statements, both oral and written, will become part of the public record for this project. Equal weight will be given to oral and to written statements.

In the interest of time, each speaker will be requested to limit her/his comments to no more than five (5) minutes. If longer statements are to be presented, the statement should be summarized at the public hearing and the full comment submitted in writing either at the hearing or mailed to the address listed at the end of this notice. All written statements MUST be postmarked by April 13, 1992, to become part of the official record.

As discussed in the SDEIS, GSA proposes to acquire land on which to construct a large-scale office development in northern Virginia (Arlington County, Cities of Alexandria and Falls Church); and that portion of Fairfax County encompassed by I-495 and I-95, and one and approximately 1.5 miles to the west of I-495, and approximately 1.5 south of I-495 and I-95.

Alternatives examined in the SDEIS include: no action; construction and/or rehabilitation of office space on developer-owned sites; and construction and/or rehabilitation of office space on government-owned sites. All government-owned sites capable of supporting large-scale office development were evaluated. To determine the level of interest from private property owners, GSA issued an Expression of Interest for the sale of privately-held land. Criteria evaluating both government- and privately-owned land were uniformly applied to all sites to determine the range of reasonable alternatives. The alternatives generated from this analysis are: Crystal City (government construction on a parcel near the intersection of Hayes and 15th Streets, and leasing of existing space in Crystal City in Arlington County); Eisenhower Avenue (government construction on a parcel near the intersection of Eisenhower Avenue and Mill road in Alexandria); and Van Dorn (government construction on a parcel near the intersection of Cleremont Drive and Eisenhower Avenue in Alexandria.).

Development of any of these sites as proposed could result in significant localized traffic impacts. In addition, significant community service impacts could occur as a result of the proposed action at the Eisenhower Avenue and Van Dorn sites as an additional fire station to serve the proposed development would be needed. Also, significant impacts to existing recreational facilities near the Eisenhower Avenue and Van Dorn sites could occur. Potentially significant impacts to archeological resources could occur at the Eisenhower Avenue site. Though not significant, impacts to land use plans could occur at the Eisenhower Avenue and Van Dorn sites.

Additional information concerning this notice may be obtained by contacting: Mr. George Chandler (WPL), General Services Administration, National Capital Region, 7th and D Streets, SW, room 7618, Washington, DC 20407, Telephone 202/708-5334, FAX 202/708-7671.

Dated: March 10, 1992.

Linda L. Eastman, Director,

NCR Planning Staff.

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

National Institute of Mental Health; Advance Notice of Request for Applications for ACCESS Grants

Background

Homelessness is an unacceptable condition for anyone, but particularly for individuals with severe mental illnesses. On any given night, up to 600,000 people are literally homeless, living and sleeping on our streets, in parks, in shelters, or in darkened corners of public transportation settings. About one-third of these homeless, single adults are suffering from severe mental illnesses such as schizophrenia or manic-depressive disorder. For a sizeable proportion of the homeless severely mentally ill population—estimated at one-half or more—the abuse of alcohol and/or other drugs complicates their already troubled lives.

As described in Outcasts on Mainstreet: The Report of the Task Force on Homelessness and Severe Mental Illness (1992),[1] homeless individuals with severe mental illnesses too often have difficulty obtaining access to and utilizing existing housing and services programs. The Task Force, sponsored by the Interagency Council on the Homeless, determined that such access is best provided through an integrated system of services to provide and coordinate the array of supports for homeless individuals disabled by severe mental illnesses, including those with co-occurring alcohol and/or other substance abuse disorders. The system must be integrated, but it must also be flexible enough to preserve and respect the diversity in this multi-need population. The critical question is exactly how to provide access and ensure integration and flexibility in a single system.

Purpose

To answer this question, the Department of Health and Human Services (HHS), in collaboration with the Departments of Housing and Urban Development (HUD), Labor (DOL), Education (DoEd), Veterans (VA) and Agriculture (USDA), plans to award Access to Community Care and Effective Services and Supports (ACCESS) grants in FY 1993. These grants would provide support to States and localities to develop comprehensive and integrated systems of treatment, housing, and support for homeless persons with severe mental illnesses. The long-term goal of the ACCESS program is to foster an enduring partnership to improve the integration of existing Federal, State, local, and private sector services to end homelessness among this disabled population. Award of these grants is dependent upon Congressional approval of funds requested in the President's FY 1993 budget.

ACCESS Program Description

To be eligible for an ACCESS grant, a State, working with several specific communities, will be required to develop and implement an integrated set of services, and participate in the evaluation of a plan to improve integration of all existing and potential resources relevant to the needs of homeless severely mentally ill people in those communities. States requiring immediate assistance in ending homelessness among severly mentally ill individuals residing in shelters, public transportation settings, parks, and on streets are encouraged to apply.

Applicants will be asked to specify methods for improving service system integration, at both State and local levels. All appropriate Federal, State, and local resources should be considered. Because the ACCESS grants are intended to test models that could be adapted and used in other communities nationally, a sound plan for evaluation and monitoring at each site will be required.

In addition, the specific evaluation objective of this grant program is to assess whether promising approaches to services integration within communities enhance the provision and efficacy of services to homeless individuals with severe mental illnesses. Therefore, the Federal government, in cooperation with the States, will conduct a systematic, multi-site evaluation to assess how the proposed service integration plans are being implemented, the specific nature and amount of each services provided, the characteristics and needs of recipients of the intervention, and client outcomes.

Successful applicants will have the added opportunity of participating in an array of Federal technical assistance, training, expedited review of waiver requests, and other intergovernmental partnership activities associated with the initiative.

[1] This report is available from the Office of Programs for the Homeless Mentally Ill, National Institute of Mental Health, room 7C-08, 5600 Fishers Lane, Rockville, MD 20857.

Availability of Pre-Award Technical Assistance

The timing of the proposed grant program will permit extensive pre-award technical assistance to potential applicants, including regional meetings of applicants with Federal Staff. Such assistance will include information on the service and housing needs for the homeless mentally ill population, advice on how to use mainstream and targeted Federal programs and relevant Federal waiver authorities; advice in preparing applications; and suggestions for evaluation methodolgy.

Further Information

Complete information on the ACCESS initiative and application procedures is expected to appear in the **Federal Register** during May, 1992.

Joseph R. Leone,

Associate Administrator for Management, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 92-6311 Filed 3-18-92; 8:45 am]

BILLING CODE 4160-20-M

Grant to the Arizona Department of Health Services

AGENCY: Office for Treatment Improvement, ADAMHA, HHS.

ACTION: Grant to support treatment activities for substance-abusing offenders in a correctional environment.

SUMMARY: This notice is to provide information to the public concerning a planned grant from the Office for Treatment Improvement/ADAMHA to the Arizona Department of Health Services to fund the Amity-Pima County Jail project. This is not a formal request for applications. Assistance will be provided only to the Arizona Department of Health Services.

Authority: The grant will be made under the authority of Public Law 102-141, the Treasury, Postal Services, and General Government Appropriations Act of 1992, as well as Public Law 100-690. An Award is being made on a sole source basis because the Conference Committee report for Public Law 102-141 provides directive language that the appropriation includes "$350,000 for the Office for Treatment Improvement to operate the Amity Jail Project in Pima County, Arizona." The report also notes that the project, "provides treatment to drug-abusing criminal offenders in the Pima County Adult Detention Center and has been used as a model for similar drug treatment programs throughout the country." This grant is the appropriate mechanism to fund this activity since it is our intent to provide support for a public purpose and agency involvement in the actual conduct of the activity is not required. The grant is not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Background

Previous research has empirically demonstrated the causal relationship between substance abuse and criminal activity. National Institute on Drug Abuse (NIDA) research showed a significantly lower recidivism rate for individuals participating in correctional therapeutic communities. Amity, Inc. has operated a modified therapeutic community for male and female substance abusers within the Pima County Adult Detention Center since 1987.

This grant will expand current services in four distinct areas:

(1) Provide a six-month transitional residential program for individuals reentering the community from the jail.

(2) Provide for one-year continuance groups to maintain a positive aftercare environment for program graduates.

(3) Implement and impact evaluation to measure post release treatment progress outcomes at six-month intervals (up to twenty-four months).

(4) Develop corrections-treatment cross training curriculum modules for national dissemination.

The Arizona Department of Health Services, through its Division of Behavioral Health Services, is the State agency statutorily responsible for the development and maintenance of substance abuse treatment services. Amity, Inc., is a non-profit community services organization founded in 1969. Amity, Inc., provides an array of substance abuse services ranging from prevention and early intervention school-based programs to long-term treatment programs for adolescents and adults. Amity, Inc., has targeted underserved and difficult to work with substance abusing populations. Among these are teenage mothers, abused adolescents, juvenile offenders, adult offenders with extensive criminal histories and individuals with HIV/AIDS. Amity also offers specialized care to members of minority groups such as Hispanics and Native Americans.

The Amity-Pima County Jail Project has been in existence for four years. The project was initially funded under an 18-month, $300,000 demonstration grant from the U.S. Department of Justice's Bureau of Justice Assistance (BJA). Evaluation data released in the final report to BJA indicated a number of positive treatment outcomes for program graduates including a decrease in rearrest rates and an increase in employment and aftercare involvement.

The project serves as a national demonstration site on the development and the implementation of therapeutic communities for incarcerated offenders and has served as a model for correctional substance abuse treatment programs in several jurisdictions including New York City, Alabama, California, and Florida. During periodic workshops and orientation sessions, the program has been visited by hundreds of public officials, corrections personnel, and drug treatment providers from across the United States and several foreign countries.

The Amity-Pima County Jail project has established itself as a center for national information transfer on correctional substance abuse programming. This grant will enhance the effectiveness of the current model and will provide the necessary resources for the Amity-Pima County Jail project to expand this mission. This grant is consistent with the state of Arizona drug abuse treatment plan.

Availability of Funds

The project will be for a three-year period with $350,000 avilable for the first year. Future year funding will depend on the availability of funds and program performance.

The Office for Treatment Improvement will administer the grant through the Arizona Department of Health Services to better coordinate the project with the State drug treatment system.

FOR FURTHER INFORMATION CONTACT: Nicholas L. Demos J.D., OTI/ADAMHA, Rockwall II, 10th Floor, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone (301) 443-6533.

The Catalog of Federal Domestic Assistance number for this program is 93.903.

Dated: March 16, 1992.

Joseph R. Leone

Associate Administrator for Management, Alcohol, Drug Abuse, Mental Health Administration.

[FR Doc. 92-6447 Filed 3-18-92; 8:45 am]

BILLING CODE 4160-20-M

Centers for Disease Control

Fernald Dosimetry Reconstruction Project; Draft Interim Report

AGENCY: Centers for Disease Control (CDC), Public Health Service, (PHS), Department of Health and Human Services.

ACTION: Request for public comment on the Fernald Dosimetry Reconstruction Project—Draft Interim Report.

SUMMARY: On December 18, 1991, CDC released the draft interim report on

source term from the Feed Materials Production Center (FMPC) near Ross, Ohio. The Agency requests comments on this report entitled, "Tasks 2 and 3: Radionuclide Source Terms and Uncertainties—1960–1962." Comments and recommendations should be concise, specific, and accompanied by supporting statements.

DATES: Comments must be received by April 20, 1992.

ADDRESSES: Comments should be sent to Mr. Paul Renard, Radiation Studies Branch, Division of Environmental Hazards and Health Effects (EHHE), National Center for Environmental Health and Injury Control (NCEHIC), CDC, 1600 Clifton Road, NE., (F-28), Atlanta, Georgia 30333, Telephone (404) 488-4613.

FOR FURTHER INFORMATION CONTACT: If you wish to have a copy of the Draft Interim Report, please contact Mr. Paul Rinard, Radiation Studies Branch, EHHE, NCEHIC, CDC 1600 Clifton Road, NE., (F-28), Atlanta, Georgia 30333, Telephone (404) 488-4613.

SUPPLEMENTARY INFORMATION: This report treats only the quantitation of radioactivity releases at the FMPC and only for the years 1960–1962. This report, known as the source term, is the first of several important steps in determining how much radiation reached the public and by what pathways. Additional work is in progress to determine radiation exposures or dose to those living in the vicinity of the facility, for example, determining the source term for the remaining years since the beginning of plant operations in 1951, modeling of the air and water pathways for transport of the radioactivity off-site, and validation of the source term and the modeling techniques.

Dated: March 13, 1992.

Ladene H. Newton,

Acting Director, Office of Program Support, Centers for Disease Control.

[FR Doc. 92-6352 Filed 3-18-92; 8:45 am]

BILLING CODE 4160-18-M

Food and Drug Administration

Advisory Committees; Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETINGS: The following advisory committee meetings are announced:

Gastrointestinal Drugs Advisory Committee

Date, time, and place. April 13 and 14, 1992, 9 a.m., Conference Rms. D and E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, April 13, 1992, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; closed committee deliberations, April 14, 1992, 9 a.m. to 1 p.m.; Joan C. Standaert, Center for Drug Evaluation and Research (HFD-180), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 419-259-6211, or Valerie M. Mealy, Advisors and Consultants Staff, 301-443-4695.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in gastrointestinal diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before March 31, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss new drug application (NDA) 20-210, Cisapride, Janssen Pharmaceutica, Inc., for the treatment of gastroesophageal reflux disease.

Closed committee deliberations. The committee will discuss trade secret and/or confidential commercial information relevant to pending investigational new drugs (IND's) and NDA's. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Generic Drugs Advisory Committee

Date, time, and place. April 23 and 24, 1992, 8 a.m., Bethesda Ramada Inn, Embassy Ballroom, 8400 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open committee discussion, April 23, 1992, 8 a.m. to 3:45 p.m., open public hearing, 3:45 p.m. to 4:30 p.m., unless public participation does not last that long; closed committee deliberations, 4:30 p.m. to 6 p.m.; open committee discussion, April 24, 1992, 8 a.m. to 3:30 p.m.; open public hearing, 3:30 p.m. to 4:45 p.m.; unless public participation does not last that long; Isaac F. Roubein, Center for Drug Evaluation and Research (HFD-9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5455.

General function of the committee. The committee gives advice on scientific and technical issues concerning the safety and effectiveness of human generic drug products for use in the treatment of a broad spectrum of human diseases and makes appropriate recommendations to the Secretary of Health and Human Services, the Assistant Secretary for Health, the Commissioner of Food and Drugs, and the Director of the Center for Drug Evaluation and Research. The committee may also review agency-sponsored intramural and extramural biomedical research programs in support of FDA's generic drugs regulatory responsibilities.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 10, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On April 23, 1992, the committee will discuss formulation development, biobatch manufacture and scale-up, production manufacturing and validation, post-approval changes, and quality and performance controls. On April 24, 1992, the committee will discuss regulatory history and current methods, pharmacodynamics, dermatopharmacokinetics, in vitro release methods, and bioequivalence of topical corticosteroids.

Closed committee deliberations. The committee will review trade secret and/or confidential commercial information relevant to a pending abbreviated new drug application. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Cardiovascular and Renal Drugs Advisory Committee

Date, time, and place. April 30, 1992, 9 a.m., Jack Masur Auditorium, Clinical Center, Bldg. 10, National Institutes of

Health, 9000 Rockville Pike, Bethesda, MD; (Parking in the Clinical Center visitor area is reserved for Clinical Center patients and their visitors. If you must drive, please use an outlying lot such as Lot 41B. Free shuttle bus service is provided from Lot 41B to the Clinical Center every 8 minutes during rush hour and every 15 minutes at other times) and May 1, 1992, 9 a.m., Conference Rm. B, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, April 30, 1992, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; closed committee deliberations, May 1, 1992, 9 a.m. to 1 p.m.; Joan C. Standaert, Center for Drug Evaluation and Research (HFD–110), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 419–259–6211, or Valerie M. Mealy, Advisors and Consultants Staff, 301–443–4695.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in cardiovascular and renal disorders.

Agenda—Open pulbic hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 22, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss NDA's 20–136 (tablets), and 20–137 (for injection), torsemide (Presaril), Boehringer Mannheim, for use in hypertension and edema.

Closed committee deliberations. The committee will discuss trade secret and/or confidential commercial information relevant to pending IND's and NDA's. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2, 10(d)), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative session to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. App. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: March 12, 1992.

David A. Kessler,

Commissioner of Food and Drugs.

BILLING CODE 4160–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–92–3415]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Jennifer Main, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 10, 1992.

John T. Murphy,

Director, Information Resources Management Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: HOPE Grant Programs-Notice of Program Guidelines, FR–2967.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: Under the HOPE program, HUD makes planning grants and implementation grants to selected eligible applicants to assist them in developing and carrying out homeownership programs for eligible families. These guidelines outline application, review and selection for awards.

Form Number: HUD–91170, 91171 and 91172.

Respondents: Individuals or Households, State or Local Governments, Federal Agencies or Employees, Non-Profit Institutions, and Small Businesses or Organizations.

Frequency of Submission: Annually and Recordkeeping.

Reporting Burden:

	No. of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Form HUD–91170	200		1		23		4,600
Form HUD–91171	250		1		17		4,250
Form HUD–91172	50		1		63		3,150
Recordkeeping	95		1		44		4,180

Total Estimated Burden Hours: 16,180.

Status: Extension.

Contact: Margaret Milner, HUD, (202) 708–4542. Jennifer Main, OMB, (202) 395–6880.

[CA–060–00–4351–12]

Closure and Restrictions on Public Land

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of closure and restrictions on public land for the protection of sensitive water and wildlife resources.

SUMMARY: Pursuant to the regulations contained in 43 CFR 8364.1 the Bureau of Land Management is closing to motorized vehicle travel approximately 360 acres of public lands in and around Gucci Spring, located within the Orocopia Mountains Wilderness Study Area (WSA CDCA #344). This closure includes all dry wash beds leading into Gucci Spring from the intersection with the main canyon route, which remains open from November 1 to June 1. The legal description of the closure is as follows:

T. 7S., R 12E. SBBM., Riverside County, California;
Sec. 24: NE¼, NE¼SE¼;
Sec. 13: SW¼.

A map of the area described above may be viewed in the Resource Area office. This closure is necessary to

prevent further impacts to sensitive wildlife habitat and water source.

Personnel that are exempt from the area closure include any Federal, State or local officer, or member of any organized rescue or fire-fighting force in the performance of an official duty, or any person authorized by the Bureau.

DATES: This closure is effective on March 19, 1992 and shall remain in effect until rescinded by the authorized officer.

PENALTIES: Violators are subject to fines and/or imprisonment.

FOR FURTHER INFORMATION CONTACT: Russell L. Kaldenberg, Palm Springs-South Coast Resource Area Manager, 63-500 Garnet Avenue, P.O. Box 2000, North Palm Springs, CA 92258-2000. (619) 251-0812.

Dated: March 6, 1992.

Phoenix District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting of the Phoenix District Advisory Council.

DATES: May 8, 1992.

SUMMARY: The Phoenix District Advisory Council of the Bureau of Land Management meets May 8, 1992 at the Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona at 9 a.m. to discuss and make recommendations on various public land issues.

The Council has been established by and will be managed according to the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The agenda for the meeting includes:

—Introduction of New Advisory Council Members.
—Kingman Resource Area Resource Management Plan.
—Hohokam Heritage Center.
—BLM Management Updates.
—Business from the Floor.
—Comments and Statements.
—Future Meetings and Agenda Topics.

SUPPLEMENTARY INFORMATION: This is a public meeting and the Bureau of Land Management welcomes the presentation of oral statements or the submission of written statements that address the issues on the meeting agenda or related matters.

Dated: March 13, 1992.

Joint Meeting for the Safford District Advisory Council and the Gila Box Riparian National Conservation Area Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: The Bureau of Land Management (BLM), Safford District announces a joint meeting of the Safford District Advisory Council and the Gila Box Riparian National Conservation Area Advisory Committee.

DATES: Tuesday, April 14, 1992, at 8:30 a.m.

ADDRESSES: Safford District BLM Office, 425 E. 4th St., Safford, Arizona 85546.

SUPPLEMENTARY INFORMATION: This meeting is held in accordance with Public Laws 92-463 and 94-579 and 43 CFR part 1784. The agenda for the joint meeting will include:

1. Introduction of new members.
2. Update on Gila Box Riparian NCA planning effort.
3. Report on Sanchez Copper Project EIS.
4. Update on resolution of Safford District RMP protests.
5. Management Updates.

Following the joint meeting, the Gila Box Committee will participate in a tour of the grazing allotments within the NCA. The regular business meeting for the Council will continue at the Safford District Office.

The meeting is open to the public. Interested parties may make oral statements between 10:30 a.m. and 11 a.m. Written statements may also be filed for consideration by the Council and Committee. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546, by 4:15 p.m., Monday, April 13, 1992.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hour) within thirty (30) days following the meeting.

Dated: May 11, 1992.

Ray A. Brady,

District Manager.

[AK-080-02-4333-02]

Modification of Designated Off-Road Vehicle (ORV) Use Areas for the White Mountains National Recreation Area (White Mountains NRA) and Associated Lands

This notice of modification of designated ORV use areas applies to lands and water surfaces within the White Mountains National Recreation Area in the Mount Prindle area as shown on the White Mountains National Recreation Area Off-Road Vehicle Use Area Amendments Map that are managed by the Bureau of Land Management, and is subject to valid existing rights.

This order is issued pursuant to 43 CFR subpart 8342 and in accordance with the authority and requirements of Executive Order 11644 and 11989, and implements provisions of the White Mountains NRA Gateway Project Record of Decision signed on March 9, 1990. It modifies an earlier order, published July 15, 1988. This order will become effective May 1, 1992 and remain in effect until rescinded or modified by the District Manager, Steese/White Mountains District.

Definitions

The term *winter use* refers to the period of time between October 15 and April 30, inclusive. The term *summer use* refers to the remaining period of time between May 1 and October 14. The terms *gross vehicle weight* and *GVW* refer to the loaded weight of the vehicle, including gear, passengers, and fuel.

A. Modifications of Limited ORV Use Designations

1. The foothills area, as defined in the order published July 15, 1988, has been reduced in size by the expanded highlands area between the Quartz Creek Trail and the Mount Prindle Research Natural Area.

The revised boundary is shown in detail on the March 1992 Quartz Creek Trail Map, on file at the Steese/White Mountains District Office in Fairbanks, Alaska. A written description of the new portion of the eastern boundary of the foothills area follows:

Beginning at the intersection of the Quartz Creek Trail and Quartz Creek in T.8 N., R.6 E., sec. 8, Fairbanks Meridian, following the Quartz Creek Trail

generally south through secs. 17, 18, 19, 30 and 31, into T. 7 N., R. 6 E., sec. 6, across Champion Creek into sec. 7, then continuing into T. 7 N., R. 5 E., through secs. 12, 13, 24, 25, 35 and 36, into T. 6 N., R. 5 E., through secs. 1 and 12 to the Nome Creek Road in the Nome Creek valley. This is the end of the established Quartz Creek Trail, and the boundary continues from the Nome Creek Road in a straight line westerly through secs. 7 and 8 to peak 3740 in T. 6 N., R. 6 E., sec. 9, which is on the eastern boundary of the White Mountains National Recreation Area.

The foothills area is open to use of ORVs that weigh less than 1,500 pounds GVW. Subject to valid existing rights, the use of ORVs weighing over 1,500 pounds GVW is prohibited in this area without written authorization from the District Manager, Steese/White Mountains District. Written authorization is not required by this notice for use of ORVs that weigh over 1,500 pounds GVW on the U.S. Creek Road, the Nome Creek Road, and the mining tailings along Nome Creek.

2. The highlands area, as defined in the order published July 15, 1988, has been expanded in size to include the area between the Quartz Creek Trail and the Mount Prindle Research Natural Area. The new boundary is shown in detail on the March 1992 Quartz Creek Trail Map, on file at the Steese/White Mountains District Office in Fairbanks, Alaska. This new boundary divides the foothills area from the highlands area, and a written description in given above.

Subject to valid existing rights, the highlands area is open to winter use by snowmachines that weigh less than 1,500 pounds GVW. All ORV use is prohibited in the Windy Creek drainage, and the Fossil Creek drainage below the Windy Gap cabin, from April 15 to August 31, inclusive, in order to avoid disturbance to known peregrine falcon nesting areas. Written authorization is not required by this notice for use of ORVs that weigh over 1,500 pounds GVW on the U.S. Creek Road, the Nome Creek Road, and the mining tailings along Nome Creek. All other ORV use is prohibited without written authorization from the District Manager, Steese/White Mountains District.

The foregoing provisions are not applicable to any Federal, State, or local law enforcement officer, or any member of any organized rescue or fire suppression force in the performance of an official duty.

Signs will be placed at major access points showing ORV use restrictions. Maps identifying these designated use areas are available at the office listed below. Operators of ORVs in violation of these designations are subject to the penalties prescribed in 43 CFR subpart 8340.0-7.

Direct questions and responses to: Steese/White Mountains District Manager, Bureau of Land Management, 1150 University Avenue, Fairbanks, Alaska 99709-3844, (907) 474-2350.

Dated: March 6, 1992.

Jack Mellor,

Acting District Manager, Steese/White Mountains District.

[MT-930-4212-13; MTM 75701]

Notice of Conveyance of Certain Lands in Phillips County, MT, and Order Providing for Opening of Public Land in Phillips County, MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This order will open lands reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 et seq. (FLMPA), to the operation of the public land laws. The land that was acquired in the exchange provides additional wetlands, wildlife habitat, and increased opportunity for habitat improvement projects. The exchange also allows for increased management efficiency of public land in the area. No minerals were exchanged by either party. The public interest was well served through completion of this exchange.

EFFECTIVE DATE: April 29, 1992.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406-255-2935.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that pursuant to Sec. 206 of FLPMA the following described lands were transferred to William French and Lela M. French:

Principal Meridian, Montana

T. 29 N., R. 29 E.,
Sec. 12, all;
Sec. 13, N½NW¼.
T. 28 N., R. 30 E.,
Sec. 25, N½SW¼.
T. 29 N., R. 30 E.,
Sec. 18, SE¼.
T. 24 N., R. 31 E.,
Sec. 1, lots 1 through 4, inclusive S½S½;
Sec. 3, SW¼SE¼;
Sec. 10, W½NE¼, NW¼, NW¼SW¼, NW¼SE¼;
Sec. 11, E½NE¼;
Sec. 12, all;
Sec. 13, E½NW¼.
T. 25 N., R. 31 E.,
Sec. 25, SE¼NE¼.
T. 26 N., R. 31 E.,
Sec. 30, lots 3, 4, E½SW¼.
T. 24 N., R. 32 E.,
Sec. 6, lots 3, 4, and 5, SE¼SW¼;
Sec. 7, lots 1 through 4, inclusive, E½W½.
T. 25 N., R. 32 E.,
Sec. 30, lot 2, SW¼NE¼, SE¼NW¼.

Total acreage conveyed: 3152.45 acres.

2. In exchange for the above selected land, the United States acquired the following described surface estate from William French and Lela M. French:

Principal Meridian, Montana

T. 25 N., R. 30 E.,
Sec. 6, S½NE¼.
T. 26 N., R. 30 E.,
Sec. 14, S½;
Sec. 15, SE¼;
Sec. 20, SW¼SW¼;
Sec. 22, N½, SE¼;
Sec. 23, N½;
Sec. 26, S½SE¼;
Sec. 29, E½NW¼, NE¼SW¼.
T. 25 N., R. 31 E.,
Sec. 2, NW¼SE¼NW¼, N½SW¼NW¼;
Sec. 3, lot 1.
T. 26 N., R. 31 E.,
Sec. 27, SW¼;
Sec. 29, N½;
Sec. 30, NE¼;
Sec. 33, S½NE¼, N½S½;
Sec. 34, E½W½, SW¼NW¼NE¼, NW¼SW¼NE¼, S½SW¼NE¼, NW¼SE¼, W½NE¼SE¼, S½SE¼.

Containing 2889.53 acres.

3. The value of the Federal public land was appraised at $92,800 and the private land was appraised at $87,000. A cash equalization payment was made to the United States for $5,800.

4. At 9 a.m. on April 29, 1992, the lands described in paragraph 2 above that were conveyed to the United States will be opened only to the operation of the public land laws generally, subject to valid existing rights and requirements of applicable law. All valid applications received at or prior to 9 a.m. on April 29, 1992, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Dated: March 12, 1992.

James Binando,

Acting Deputy State Director, Division of Lands and Renewable Resources.

[NV-930-92-4212-11; N-36905]

Termination of Recreation and Public Purposes Classification and Limited Opening Order; Nevada

March 9, 1992.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates Recreation and Public Purposes Classification N-36905 in its entirety and provides for opening the land to disposal by noncompetitive sale to the Clark County Housing Authority, pursuant to section 203 and section 209 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1713, 1719).

EFFECTIVE DATE: March 19, 1992.

FOR FURTHER INFORMATION CONTACT: Mary Clark, Nevada State Office, Bureau of Land Management, 850 Harvard Way, Reno, NV 89520, (702) 785-6520.

SUPPLEMENTARY INFORMATION: On September 25, 1984, a lease was issued to the Clark County Board of County Commissioners, for a fire station, pursuant to the Recreation and Public Purposes Act (43 U.S.C. 869, 869-1 to 869-4), for the following described land, comprising 10 acres:

Mount Diablo Meridian, Nevada

T. 32 S., R. 66 E.,
Sec. 15, SW¼SW¼SW¼.

The fire station was never constructed and the lease expired on September 24, 1989.

The Clark County Housing Authority would like to purchase the subject land, pursuant to section 203 and section 209 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1713, 1719) for development of 100 units of conventional public housing.

Pursuant to section 7 of the Taylor Grazing Act (48 Stat. 1272) and the authority delegated by appendix 1 of Bureau of Land Management Manual 1203, Recreation and Public Purposes Classification N-36905 is hereby terminated in its entirety.

At 10 a.m. on March 19, 1992 the above-described land will become open only to disposal pursuant to section 203 and section 209 of the Act of October 21, 1976 (43 U.S.C. 1713, 1719), for the purpose of consummating a noncompetitive sale to the Clark County Housing Authority, subject to any valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws, rules, and regulations.

The land will remain closed to all other forms of appropriation including the mining and the mineral leasing laws.

Billy R. Templeton,
State Director, Nevada.

Firearms Use Restriction and Closure Order Established; Squaw Leap Management Area, Hollister Resource Area, Bakersfield District, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of Firearms Use Restriction and Closure Order on Public Land within the Squaw Leap Management Area of the Hollister Resource Area, Bakersfield District, California.

SUMMARY: Certain described public lands within the Hollister Resource Area in and around the Squaw Leap Management Area in Fresno and Madera Counties, California are hereby closed to the shooting or discharge of any firearm, air or gas gun, sling, elastic or spring gun, slingshot, bow, crossbow, dart or any implement or mechanical appliance by which any bullet, shot, stone, dart or other projectile may be propelled, sprung or thrown from one place to another for any reason. This closure and use restriction will be in effect on all of the below described public lands:

Mount Diablo Meridian, California

T. 9 S., R. 22 E.
Sec. 28: SE¼ SW¼, SE¼ SE¼;
Sec. 27: SE¼ SE¼;
Sec. 33: SE¼ SE¼, S½ SW¼;
Sec. 34: ALL;
Sec. 35: W½, W½ SE¼, SW¼ NE¼, E½ E½.
T. 10 S., R. 22 E.
Sec. 1: Lots 4, 20, 21;
Sec. 2: Lots 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, S½ NW¼, NW¼ SW¼, SW¼ NE¼;
Sec. 3: Lots 5, 6, 7, 8, 9, 10, 11, 12, 13, SE¼ NW¼, NE¼ SW¼, N½ SE¼, S½ NE¼;
Sec. 4: Lots 11, 12;
Sec. 9: Lots 19, 20, 23, 24, 25, 30, E½ SE¼;
Sec. 10: ALL;
Sec. 11: NW¼ NW¼, SW¼ SW¼;
Sec. 15: N½, NE¼ SE¼;
Sec. 16: That portion of NE¼ above high water line of Millerton lake.
Approx. Total = 4,374.92 acres.

The Following Persons are Exempted From the Closure or Restrictions: Any person(s) with a written permit in possession that specifically authorizes the otherwise prohibited activity. Any Federal, State or Local Law Enforcement Officer, or any member of an organized rescue or fire fighting force while in the performance and execution of an official duty. Any person shooting or discharging a firearm or other implement in an attempt to take or the taking of game birds or game mammals during the open hunting season for that game bird or game mammal as specified by the State of California, provided said person has in possession a valid California hunting license and/or tags and stamps as required by Federal and/or California State laws and regulations, *and* said person's hunting activities and shooting or discharge of a firearm, bow, or other implement are in conformity with applicable Federal and State of California hunting regulations and laws.

DATES: This order is in effect March 19, 1992, and will remain in effect until amended or cancelled.

FOR FURTHER INFORMATION CONTACT: Robert Beehler, Area Manager, Hollister Resource Area, Bureau of Land Management, #20 Hamilton Court, Hollister, Ca. 95023; (408) 637-8183.

SUPPLEMENTARY INFORMATION: This order is necessary for public safety and for the protection of persons, public and private property, lands and resources within and adjacent to the closed area.

Authority for Closure orders is provided under 43 CFR 8364.1. Any person who fails to comply with this closure or restriction order shall be subject to the penalties provided in 43 CFR 8360.0-7. Violations of this closure or restriction order are punishable by a fine not to exceed $100,000 and/or imprisonment not to exceed 12 months. Any firearm, ammunition or instrumentality of an offense involved in or used or intended to be used in, any violation of this order, shall be subject to seizure, forfeiture and disposal.

Dated: March 10, 1992.

Robert E. Beechler,
Area Manager.

Proposed Continuation of Withdrawal; ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service, Department of Agriculture, proposes that a 4.50 acre withdrawal in the Salmon National Forest be continued for 20 years and a 50 acre withdrawal in the Sawtooth National Forest for 30 years. The lands are now being utilized for recreation site purposes and contain valuable capital improvements. The lands would remain closed to the mining laws, but have been and would remain open to mineral leasing.

EFFECTIVE DATE: Comments should be received by June 17, 1992.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208 384-3162.

The U.S. Forest Service proposes that the existing land withdrawal made by public land order 4021 be continued for the sites and time periods indicated below, pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714:

Boise Meridian

(Salmon National Forest)

Footbridge Flat Recreation Area—20 years.
T. 23 N., R. 17 E.,
Sec. 13, metes and bounds.

Lightfoot Bar Recreation Area—30 years.
T. 3 N., R. 13 E.,
Sec. 7, SE¼SW¼NE¼, E½NW¼SE¼ and E½SW¼SE¼.

The areas described aggregate 54.50 acres in Camas and Lemhi Counties.

The withdrawal is essential for protection of substantial capital improvements on the sites. The withdrawal closed the land to mining, but not to mineral leasing. No changes in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the lands and their resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination of the withdrawals will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Dated: March 11, 1992.

William E. Ireland,
Chief, Realty Operations Section.

Partial Termination of Proposed Withdrawal and Reservation of Lands; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, has canceled its application in part to withdraw certain lands for protection of the scenic, recreational, water quality, and fishery resource values of the North Fork John Day River-Elkhorn Drive Scenic Byway Corridor. This action will terminate a portion of the proposed withdrawal.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Linda Sullivan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208-0039, 503-280-7171.

SUPPLEMENTARY INFORMATION: The notice of the U.S. Department of Agriculture, Forest Service, application OR-47551 for withdrawal was published as FR Doc. 91-22663 of the issue of September 20, 1991, and corrected as FR Doc. 91-24930 of the issue of October 17, 1991. The purpose of the proposed withdrawal is to protect the scenic, recreational, water quality, and fishery resource values of the North Fork John Day River-Elkhorn Drive Scenic Byway Corridor. The applicant agency has determined that a portion of the proposed withdrawal is no longer needed and has canceled the application insofar as it effects the following described land:

Willamette Meridian

Umatilla National Forest

T. 7 S., R. 35½ E.,
Sec. 34, that portion of the SE¼NE¼ outside the boundary for the North Fork John Day Wilderness.

The area described contains approximately 36.20 acres in Grant County, Oregon.

Pursuant to the regulation 43 CFR 2310.2-1(c), at 8:30 a.m., on April 20, 1992, the proposed withdrawal will be terminated in part. The above described land is included in an existing Forest Service recreation withdrawal and will not be opened to such forms of disposition as may by law be made of National Forest System lands, including location and entry under the mining laws.

The lands remaining in the proposed withdrawal aggregate approximately 1,189.37 acres in Grant County, Oregon.

Dated: March 5, 1992.

Robert E. Mollohan,
Chief, Branch of Lands and Minerals Operations.

Fish and Wildlife Service

Availability of a Draft Recovery Plan for Dudley Bluffs Bladderpod (Lesquerella Congesta) and Dudley Bluffs Twinpod (Physaria Obcordata) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for Dudley Bluffs bladderpod (*Lesquerella congesta*) and Dudley Bluffs twinpod (*Physaria obcordata*). These plants occur mostly

on public lands administered by the Bureau of Land Management in Piceance Basin in Rio Blanco County, Colorado. The Service solicits review and comment from the public on this draft recovery plan.

DATES: Comments on the draft recovery plan must be received on or before May 18, 1992 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the State Supervisor's Office, Fish and Wildlife Enhancement, 730 Simms Street, suite 290, Golden, Colorado 80401 (303/231–5280) or the Western Colorado Fish and Wildlife Enhancement Suboffice, 529 25½ road, suite B–113, Grand Junction, Colorado 81505 (303/243–2778). Written comments and materials regarding this draft recovery plan should be sent to the State Supervisor at the Golden address given above. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the Colden address above.

FOR FURTHER INFORMATION CONTACT: Keith Rose at the Grand Junction Suboffice (see **ADDRESSES** above).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Fish and Wildlife Service's (Service) endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal Agencies also will take these comments into account in the course of implementing approved recovery plans.

Lesquerella congesta and *Physaria obcordata* are endemic to the Piceance Basin in Rio Blanco County, Colorado. These members of the mustard family are known from five major populations each, two of which occur together. Most sites are on public land administered by the Bureau of Land Management, with the remainder on private land or on Colorado Division of Wildlife's land. Both species grow on oil shale outcrops in the multimineral oil shale zone, an area containing rich deposits of oil shale and sodium minerals (nahcolite and dawsonite). Both species could be significantly impacted by development of these deposits for mineral extraction. Recovery activities planned for these species will focus on protecting existing and potential habitats, conducting surveys to locate additional habitats or populations, and conducting studies on the species' ecology. Given the species' limited habitat, it is unlikely that delisting of the species will occur in the foreseeable future.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the recovery plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 5, 1992.

Galen L. Buterbaugh,

Regional Director.

Minerals Management Service

Information Collection Submitted for Review

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the collection of information and related forms and explanatory material may be obtained by contacting Jeane Kalas at 303–231–3046. Comments and suggestions on this information collection should be made directly to the Bureau Clearance Officer at the telephone number listed below and to the Office of Management and Budget Paperwork Reduction Project (1010–0040), Washington, DC 20503, telephone 202–395–7340.

Title: Production Accounting and Auditing System Oil and Gas Reports.

Abstract: Production Accounting and Auditing System information is needed to provide comprehensive production and disposition data on oil and gas produced from Federal onshore and offshore leases, and from Indian leases. The Minerals Management Service (MMS) uses the data to monitor production, for audits, and to compare reported production with sales data reported in the MMS Auditing and Financial System.

Bureau Form Numbers: MMS–3160, MMS–4051, MMS–4052, MMS–4053, MMS–4054, MMS–4055, MMS–4056, MMS–4057, MMS–4058, and MMS–4061

Frequency: Monthly, quarterly, annually.

Description of Respondents: Companies producing and processing oil and gas from Federal onshore and offshore leases, and from Indian leases.

Estimated Completion Time: One-quarter to one-half hour.

Annual Responses: 377,984

Annual Burden Hours: 106,192.

Bureau Clearance Officer: Dorothy Christopher 703–787–1239.

Dated: January 28, 1992.

Jimmy W. Mayberry,

Acting Associate Director for Royalty Management.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Malaria Vaccine Program Advisory Committee; Meeting

AGENCY: Agency for International Development, IDCA.

ACTION: Notice of partially closed meeting.

COMMITTEE: Malaria Vaccine Program Advisory Committee.

DATES AND LOCATIONS: VBC Conference Room, 1901 North Fort Myer Drive, Arlington, VA 22209.

1. April 6, 9 am–12 pm, suite 400.
2. April 6, 1 pm–4:30 pm, suite 400, (closed session).
3. April 7, 9 am–12 pm, suite 400.

Agenda: The committee will (1) review progress towards malaria vaccine development by A.I.D.–funded and other invited investigators and (2) review procurement actions, both current and planned.

Closed Meeting: Portions of the meeting are closed under exemption 9(B) of 5 U.S.C. 552(b) to discuss proposals, scopes of work, cost estimates, and other sensitive procurement information. Disclosure of such information would be likely to significantly frustrate implementation of current and future procurements by A.I.D.

FOR FURTHER INFORMATION CONTACT: Kirk Miller, Malaria Vaccine Program Development, A.I.D. Office of Health, Washington, DC 20523–1817, (703) 875–5693. Robert L. Wrin, Chief, Communicable Diseases Division, Office of Health, Bureau for Research and Development.

Dated: March 16, 1992.

Jan W. Miller,

Assistant General Counsel for Employee and Public Affairs.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Office of Special Counsel for Immigration Related Unfair Employment Practices

Immigration Related Employment Discrimination Public Education Grants

AGENCY: Office of Special Counsel for Immigration Related Unfair Employment Practices, U.S. Department of Justice.

ACTION: Notice of availability of funds and solicitation for grant applications.

SUMMARY: The Office of Special Counsel for Immigration Related Unfair Employment Practices ("OSC") announces the availability of up to $3,000,000 for grants to conduct public education programs about the rights afforded potential victims of employment discrimination and the responsibilities of employers under the antidiscrimination provision of the Immigration Reform and Control Act of 1986 ("IRCA"), 8 U.S.C. 1324b, as amended by title V, section C of the Immigration Act of 1990.

It is anticipated that a number of grants will be competitively awarded to applicants who can demonstrate a capacity to design and successfully implement public education campaigns to combat immigration—related employment discrimination. Grants will range in size from $50,000 to $150,000. Additionally, OSC may selectively consider awarding grants for a very limited number of proposals of exceptional quality, of regional or national scope, ranging in size to $250,000. Such proposals may be submitted as supplements to, and not in lieu of, individual proposals with a $150,000 limit.

OSC will accept proposals from applicants who have access to potential victims of discrimination or whose experience qualifies them to educate employers about the antidiscrimination provision of IRCA. OSC welcomes proposals from diverse sources, such as not-for-profit community-based organizations and local, regional or national ethnic and immigrants' rights advocacy organizations which serve potential victims of discrimination. OSC also welcomes proposals from trade associations, industry groups, professional organizations, and other entities providing information services to employers. Applications will not be accepted from public entities, including state and local government agencies, and public educational institutions.

APPLICATION DUE DATE: Monday, May 18, 1992.

FOR FURTHER INFORMATION CONTACT: Juan Maldonado, Senior Trial Attorney or Patita McEvoy, Public Affairs Specialist, Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW., suite 800, P.O. Box 65490, Washington, DC 20035–5490. Tel. (202) 653–8121, or (202) 296–0168 (TDD for the hearing impaired).

SUPPLEMENTARY INFORMATION: The Office of Special Counsel for Immigration Related Unfair Employment Practices of the Department of Justice announces the availability of funds to conduct public education programs concerning the antidiscrimination provision of the IRCA. Funds will be awarded to selected applicants who propose cost effective ways of disseminating information to employers and members of the protected class or to those who can fill a particular need not currently being met.

Background

On November 6, 1986, President Reagan signed into law the Immigration

Reform and Control Act of 1986, Public Law No. 99-603. IRCA makes hiring aliens without work authorization unlawful, and it requires that employers verify the identity and work authorization of all new employees. Employers who violate this law are subject to sanctions including fines and possible criminal prosecution.

During Congressional debate of IRCA, Congress foresaw the possibility that employers, fearful of sanctions, would refuse employment to individuals simply because they looked or sounded foreign. Consequently, Congress enacted section 102 of IRCA, an antidiscrimination provision. Section 102 prohibits employers of three or more employees from discriminating on the basis of citizenship status in hiring, firing, recruitment or referral for a fee. The antidiscrimination provision protects citizens and certain classes of work authorized aliens. Protected non-citizens include permanent residents, temporary residents under the amnesty, the Special Agricultural Workers (SAWs) or the Replenishment Agricultural Workers (RAWs) programs, refugees and asylees who apply for naturalization within six months of being eligible to do so. National origin discrimination in hiring, firing, recruitment or referral for a fee, against citizens and any work authorized alien is also prohibited. This prohibition applies to employers with four to fourteen employees. National origin discrimination complaints against employers with fifteen or more employees remain under the jurisdiction of the Equal Employment Opportunity Commission under title VII of the Civil Rights Act of 1964.

Congress created the OSC to enforce Section 102. OSC is responsible for receiving and investigating discrimination charges and, when appropriate, filing complaints with a specially designated administrative tribunal. OSC also initiates independent investigations of possible section 102 violations.

While OSC has established a record of vigorous enforcement, studies by the U.S. General Accounting Office and other sources have shown that there is an extensive lack of knowledge on the part of protected individuals and employers about the antidiscrimination provision. Enforcement cannot be effective if potential victims of discrimination are not aware of their rights. Moreover, discrimination can never be eradicated so long as employers are not aware of their responsibilities.

Purpose

OSC seeks to educate both potential victims of discrimination about their rights and employers about their responsibilities under the antidiscrimination provision of IRCA.

Program Description

The program is designed to develop and implement cost effective approaches to disseminate information regarding IRCA's antidiscrimination provision. The campaign should focus on educating potential victims of employment discrimination about their rights and educating employers about their responsibilities under IRCA. Applications may proposed to educate potential victims only, employers only, or both in a single campaign. Proposals should outline the following key elements of the program:

Part I: Targeted Population

The educational efforts under the grant should be directed to (1) work authorized non-citizens who are protected individuals, since this group is especially vulnerable to employment discrimination; (2) those citizens who are especially likely to become victims of employment discrimination; and/or to (3) employers. The proposals should define the characteristics of the work authorized alien population or the employer group(s) targeted for the educational campaign, and the applicant's qualifications to credibly and effectively reach large segments of the campaign targets.

The proposals should also detail reasons for targeting each group of protected individuals or employers by describing particular needs or other factors to support the selection.

In defining the campaign targets and supporting the reasons for the selection, applicants may use studies, surveys, or any other sources for information of generally accepted reliability.

Part II: Campaign Strategy

We encourage applicants to devise effective and creative means of public education and information dissemination that are specifically designed to reach the widest possible targeted audience. Those applicants proposing educational campaigns addressing potential victims of discrimination should keep in mind that some of the traditional methods of public communication may be less than optimal for disseminating information to members of national or linguistic groups that have limited community-based support and communication networks.

Proposals should discuss the components of the campaign strategy, detail the reasons supporting the choice of each component, and explain how each component will effectively contribute to the overall objective of cost effective dissemination of useful and accurate information to a wide audience of protected individuals or employers. Discussions of the campaign strategies and supporting rationale should be clear, concise, and based on sound evidence and reasoning.

A key element of the campaign is the accuracy of information disseminated about the OSC and its mission. Accordingly, any original outreach and educational materials developed by a grantee, as well as any material derived from other sources, must be reviewed by OSC for legal accuracy and proper emphasis prior to production. All information distributed should also include mention of the OSC as a source of assistance, information and action and the correct address and telephone numbers of the OSC (including the toll-free and TDD toll-free numbers for the hearing impaired).

Part III: Evaluation of the Strategy

One of the central goals of this program is determining what public education strategies are most effective in dispersing information about the antidiscrimination provision. To be effective in planning future public education efforts, OSC needs to know what works and what does not. Measuring the effectiveness of the campaign strategy and public education materials is therefore crucial, and the methods of measurement and their results must be carefully detailed.

Full evaluation of a project's effectiveness should be performed at the midpoint and within sixty days of the conclusion of the campaign. The midpoint report, due thirty days after the end of the second quarter of implementation, is intended to encourage productive alternations to a campaign, when necessary, based on experience and knowledge gained in the first half of the project. Applicants are encouraged to discuss in their proposal the means they will use to devise alternate campaign strategies, if needed.

Selection Criteria

The final selection of grantees for award will be made by the Special Counsel for Immigration Related Unfair Employment Practices after a careful evaluation of each proposal received by OSC.

After a preliminary screening, proposals will be submitted to a panel of specialists. OSC anticipates seeking assistance from sources with specialized knowledge in evaluating proposals, including the agencies that are members of the IRCA Antidiscrimination Outreach Task Force: the Department of Labor, the Equal Employment Opportunity Commission, the Small Business Administration and the Immigration and Naturalization Service. Each panelist will evaluate the proposals for effectiveness and efficiency with emphasis on the various factors enumerated below. The panel's results are advisory in nature and not binding on the Special Counsel. Letters of support, endorsement, or recommendation will not be accepted or considered.

Applicants should be aware that some states are currently conducting IRCA antidiscrimination outreach and education programs with funds made available under the Immigrant Nurses Relief Act of 1989, Pub. L. 101-238. Unnecessary duplication of specific efforts under those programs should be avoided. OSC will take steps to coordinate these efforts but expects that, to the extent practicable, grantees will do so as well.

In determining which applications to fund, OSC will consider the following (based on a one-hundred point scale):

1. Program Design (50 Points)

Sound program design and cost effective strategies for dissemination of information to the targeted population are imperative. Consequently, areas that will be closely examined include the following:

a. Evidence of in-depth knowledge of the goals and objectives of the project. (10 points)

b. Selection and definition of the target group(s) for the campaign, and the factors that support the selection, including special needs, and the applicant's qualification to effectively reach the target. (10 points)

c. A cost effective campaign strategy for wide dissemination of information to targeted employers and/or members of the protected class, with a justification for the choice of strategy. (10 points)

d. Proposal should include a preliminary and general description of any printed, audio or video public education materials (whether original or adapted from other sources) the applicant proposes to use and distribute during the campaign. Points will be awarded to those applicants that demonstrate an ability to create original educational materials, or to skillfully combine materials from other sources in a way that is specifically designed to most effectively meet the needs of the targeted group(s). (10 points)

e. The evaluation methods proposed by the applicant to measure the effectiveness of the campaign and their precision in indicating to what degree the campaign succeeds in meeting its goals. (10 points)

2. Administrative Capability (20 Points)

Proposals will be rated in terms of the capability of the applicant to implement the targeting, public education and evaluation components of the campaign:

a. Evidence of proven ability to provide high quality results. (10 points)

b. Evidence that the applicant can implement the campaign, and complete the evaluation component within the time lines provided. **Note:** OSC's experience during previous grant cycles has shown that a number of applicants choose to apply as a consortium of individual entities; or, if applying individually, propose the use of sub-contractors to undertake certain limited functions. It is essential that these applicants demonstrate the proven management capability and experience to ensure that, as lead agency, they will be directly accountable for the successful implementation, completion, and evaluation of the project. (10 points)

3. Staff Capability (10 Points)

Applications will be evaluated in terms of the degree to which:

a. The duties outlined for grant-funded positions appear appropriate to the work that will be conducted under the award. (5 points)

b. The qualifications of the grant-funded positions appear to match the requirements of these positions. (5 points)

4. Previous Experience (20 Points)

The proposals will be evaluated on the degree to which the applicant demonstrates that it has successfully carried out programs or work of a similar nature in the past.

Eligible Applicants

This grant competition is open to not-for-profit community-based organizations, local, regional or national ethnic and immigrants' rights advocacy organizations which serve potential victims of discrimination, trade associations, industry groups, professional organizations, and other entities providing information services to employers. Applications will not be accepted from public entities, including state and local government agencies, and public educational institutions.

Grant Period and Award Amount

It is anticipated that several grants will be awarded and will range in size from $40,000 to $150,000.

OSC is also considering, on a trial basis, selectively awarding grants to a very limited number of proposals of exceptional quality, of regional or national scope, ranging in size to $250,000. Such proposals must set forth a broad-range and comprehensive public education campaigns designed to educate large numbers of employers or potential victims of discrimination nationwide, or in localized regions of the country. For purposes of this proposal, "region" means a multi-jurisdictional area consisting of two or more contiguous states with a high concentration of work-authorized aliens. The term "region" shall also mean the states of California and Texas individually. During evaluation, the panel will closely examine those proposals that guarantee maximum exposure and penetration in the employer or potential victims target populations. Thus, a campaign designed to reach a very large proportion of employers (or potential victims) in the state of Texas would take precedence over a campaign designed to reach a more limited number of employers (or potential victims) nationwide.

Final decision whether to award any grants at the $250,000 funding level will be made by the Special Counsel only after all proposals are evaluated by the selection panel. To ensure that OSC receives an adequate number of applications in the normally acceptable funding range (up to $150,000), no proposals for the larger amount (up to $250,00) will be accepted unless submitted as a supplement, or in addition to an independent proposal, of at least comparable quality, with a $150,000 limit. Companion applications may propose similar campaigns, differing only in scope and reach; or they may propose substantially different campaign designs. In all cases, however, both proposals submitted by an applicant must be considered acceptable by the selection committee before OSC will consider awarding a $250,000 request for a grant.

Publication of this announcement does not require OSC to award any specific number of grants, to obligate the entire amount of funds available, or to obligate any part thereof. The period of performance will be twelve months from the date of the grant award. Those grantees who successfully achieve their goals may be considered for

supplementary funding for a second year based on the availability of funds.

Application Deadline

All applications must be received by the close of business (6 p.m. e.d.t.) on Monday, May 18, 1992 at the Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW., suite 800, P.O. Box 65490, Washington, DC 20035–5490. Applications submitted via facsimile machine will not be accepted or considered.

Application Requirements

Applicants should submit an original and two (2) copies of their completed proposal by the deadline established above. All submissions must contain the following items in the order listed below:

1. A completed and signed Application for Federal Assistance (Standard Form 424) and Budget Information (Standard Form 424A).
2. OJP Form 4061/6 (Certification Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements).
3. An abstract of the full proposal, not to exceed one page.
4. A program narrative of not more than fifteen (15) double-spaced typed pages which include the following:

a. A clear statement describing the approach and strategy to be utilized to complete the tasks identified in the program description;

b. A clear statement of the proposed goals and objectives, including a listing of the major events, activities, products and timetables for completion;

c. The proposed staffing plan; and

d. Description of how the project will be evaluated.

5. A proposed budget outlining all direct and indirect costs for personnel, fringe benefits, travel, equipment, supplies, subcontracts, and a short narrative justification of each budgeted line item cost. If an indirect cost rate is used in the budget, then a copy of a current fully executed agreement between the applicant and the Federal cognizant agency must accompany the budget.
6. Copies of resumes for the professional staff proposed in the budget. NOTE: If the grant project manager is to be hired later as part of the grant, hiring is subject to review and approval by OS at that time.
7. Detailed technical materials that support or supplement the description of the proposed effort should be included in the appendix.

In order to facilitate handling, please do not use covers, binders or tabs.

Application forms may be obtained by writing or telephoning: Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW.-suite 800, P O box 65490, Washington, DC 20035–5490. Tel. (202) 653–8121, or (202) 296–0168 (TDD for the hearing impaired).

Dated: March 12, 1992.

Approved:

William Ho-Gonzales,

Special Counsel, Office of Special Counsel for Immigration Related Unfair Employment Practices.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Business Research Advisory Council; Meetings and Agenda

The regular Spring meetings of the Board and Committees of the Business Research Advisory Council will be held on April 8 and 9, 1992. All of the meetings will be held in the General Accounting Office Building, 441 G Street, NW., Washington, DC. The meeting will be open to the public.

The Business Research Advisory Board and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of technical officers from American business and industry.

The schedule and agenda for the meetings are as follows:

Wednesday, April 8, 1992

10 a.m.—Committee on Compensation and Working Conditions—Room 2736

1. Introduction of cost levels for health insurance.
2. Reflecting births in the Employment Cost Index (ECI)/Employee Benefits Survey (EBS) sample.
3. Discussion of the EBS/ECI integration.
4. Discussion of the uses of locality benefits data to assist in the Occupational Compensation Survey Program.
5. Elect new vice chair.

10 a.m.—Committee on Economic Growth—Room 2734

. Projections of the supply and demand for scientists, engineers, and technicians 1990–2005.

2. Supply and demand for college graduates and research on the returns to education.
3. Evaluation of the projections to 1990 of the labor force, economic trends, and employment by industry and occupation.
4. Alternative projections: Micro and macro variables.

1:30 p.m.—Committee on Employment and Unemployment—Room 2736

1. Overview and budget issues.
2. Automated Review of Industry Employment Statistics (ARIES).
3. Issues in the Current Employment Statistics Survey (CES): Comparison to the Current Population Survey (CPS) and benchmark to ES–202.
4. Laptop CPS and impacts of the redesign.
5. Employee Turnover and Job Openings Survey.
6. Technical assistance programs in Mexico.

1:30 p.m.—Committee on Price Indexes—Room 2734

1. Interarea price index research.
2. Adjustment for quality changes in the CPI.
3. Consumer Expenditure Survey.
4. Other business.
5. Elect new vice chair.

Thursday, April 9, 1992

10 a.m.—Committee on Productivity-Foreign Labor—Room 2734

1. Major sector productivity measures:

—Incorporation of the Bureau of Economic Analysis' (BEA's) benchmark revisions in January.
—Productivity trends since the beginning of the recession.

2. Report on the industry multifactor productivity measurement program.
3. Update on BLS programs for Eastern Europe and Mexico.

10 a.m.—Committee on Occupational Safety and Health Statistics—Room 2736

1. Status report on the redesign of the Annual Survey of Occupational Injuries and Illnesses.
2. Status report on the Census of Fatal Occupational Injuries.
3. Other business.

2 p.m.—Board of the Business Research Advisory Council—Room 2736

1. Chairperson's opening remarks.
2. Deputy Commissioner's remarks.
3. Committee reports:

a. Committee on Compensation and Working Conditions.

b. Committee on Productivity-Foreign Labor.

c. Committee on Employment and Unemployment.

d. Committee on Price Indexes.

e. Committee on Economic Growth.

f. Committee on Occupational Safety and Health Statistics.

4. Other Business.
5. Chairperson's closing remarks.

For further information, contact Constance B. DiCesare, Liaison, Business Research Advisory Council, on Area code (202) 523–1090.

Signed at Washington, DC, the 13th day of March 1992.

William G. Barron, Jr.,

Deputy Commissioner.

Employment and Training Administration

[TA-W-26, 748]

Conagra Fruen Mill Minneapolis, MN; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 21, 1992 in response to a worker petition which was filed on January 21, 1992 on behalf of workers at Conagra Fruen Mill, Minneapolis, Minnesota.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, D.C. this 12th day of March, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-26,911]

Exploration Employment Services, Inc., Livingston, TX; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on March 2, 1992, in response to a worker petition which was filed on March 2, 1991, on behalf of workers at Exploration Employment Services, Inc., Livingston, Texas.

A negative determination application to the petitioning group of workers was issued on December 19, 1991 (TA–W–26,535). No new information is evident which would result in a reversal of the Department's previous determination. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC this 10th day of March, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-26,624]

GEO Western Drilling Fluids, Bakersfield, CA; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administration reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Geo Western Drilling Fluids, Bakersfield, California. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA–W–26,624; Geo Western Drilling Fluids, Bakersfield, California (March 12, 1992).

Signed at Washington, DC, this 12th day of March 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

NATIONAL EDUCATION GOALS PANEL

Meeting

AGENCY: The National Education Goals Panel.

ACTION: Notice of meeting.

SUMMARY: The National Education Goals Panel was established by a Joint Statement between the President and the Nation's governors dated July 31, 1990. The panel will determine how to measure and monitor progress toward achieving the national education goals and report to the nation on the progress toward the goals.

TENTATIVE AGENDA ITEMS: The agenda for the meeting includes a discussion of options for goal one indicators, a progress report on goal two assessment, and a discussion of options for the 1992 National Education Goals Report indicators.

DATES: The twelfth meeting is scheduled for Friday, March 27, 1992, 1:30–4:30 p.m.

ADDRESSES: The Washington Court Hotel, Capitol Hill, 525 New Jersey Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: The National Education Goals Panel office at (202) 632–0952. Please give your name to indicate attendance.

Dated: March 12, 1992.

Roger B. Porter,

Assistant to the President for Economic and Domestic Policy.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities; Meetings

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: David C. Fisher, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/786–0322. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Endowment's TDD terminal on 202/786–0282.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose

of panel review, discussion, evaluation and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; or (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated September 9, 1991, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), and (6) of section 552b of title 5, United States Code.

1. *Date:* April 16–17, 1992.
Time: 8:30 a.m. to 5:30 p.m.
Room: 415.
Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of Public Programs, for projects beginning after October 1, 1992.

2. *Date:* April 21, 1992.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Elementary and Secondary Education, submitted to the Division of Education Programs, for projects beginning after October 1, 1992.

3. *Date:* April 22, 1992.
Time: 9 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review proposals for Special Opportunity in Foreign Language Education in the Higher Education in the Humanities Program, Submitted to the Division of Education Programs, for projects beginning after September 1, 1992.

4. *Date:* April 23, 1992.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Elementary and Secondary Education, submitted to the Division of Education Programs, for projects beginning after October 1, 1992.

5. *Date:* April 23–24, 1992.
Time: 8:30 a.m.to 5:30 p.m.
Room: 415.
Program: This meeting will review applications for Humanities Projects in Media, submitted to the Division of Public Programs, for projects beginning after October 1, 1992.

6. *Date:* April 23–24, 1992.
Time: 9 a.m. to 5:30 p.m.
Room: 430.
Program: This meeting will review applications for Humanities Projects in Libraries and Archives, submitted to the Division of Public Programs, for projects beginning after October 1, 1992.

7. *Date:* April 24, 1992.
Time: 9 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review proposals for Special Opportunity in Foreign Language Education in the Higher Education in the Humanities Program, submitted to the Division of Education Programs, for projects beginning after September 1992.

8. *Date:* April 27, 1992.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Elementary and Secondary Education, submitted to the Division of Education Programs, for projects beginning after October 1, 1992.

9. *Date:* April 27–28, 1992.
Time: 9 a.m. to 5:30 p.m.
Room: 430.
Program: This meeting will review applications for the Humanities Projects in Libraries and Archives, submitted to the Division of Public Programs, for projects beginning after October 1, 1992.

10. *Date:* April 29, 1992.
Time: 9 a.m. to 5 p.m.
Room: M–14.
Program: This meeting will review applications in Special Opportunity in Foreign Language Education, submitted to the Division of Education Programs, for projects beginning after October 1, 1992.

11. *Date:* April 30, 1992.

Contact Person: Dr. Eve Ida Barak, Acting Program Director, Cell Biology Program, room 325, National Science Foundation, Washington, DC 20550.

Purpose of Advisory Panel: To provide advice and recommendation concerning support for research in cell biology.

Agenda: Open—General discussion of current status and future plans of the Cell Biology Program; Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary of confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of U.S.C. 552b (c), Government in the Sunshine Act.

Dated: March 16, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Advisory Panel for Cellular Biochemistry; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Cellular Biochemistry.

Date & Time: April 9, 10 & 11, 1992, 8:30 a.m. to 5 p.m.

Place: Room 1242, National Science Foundation, 1800 G Street NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Ernest G. Uribe, Program Director, room 321 and Dr. Robert P. Burchard, Program Director, room 325 National Science Foundation, Washington, DC. 20550. Telephone (202) 357-7987.

Purpose of Advisory Panel: To provide advice and recommendations concerning support for research in cellular biochemistry and metabolism.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 USC 552b(c), Government in the Sunshine Act.

Dated: March 16, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Meeting; DOE/NSF Nuclear Science Advisory Committee

The National Science Foundation announces the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date and Time: April 10, 1992 from 9 a.m. to 5:30 p.m., April 11, 1992 from 8:30 a.m. to 12 noon.

Place: National Science Foundation, 1800 G Street, NW., rm. 540, Washington, DC 20550.

Type of Meeting: Open (*).

Contact Person: John W. Lightbody, Program Director for Nuclear Physics, National Science Foundation, Washington, DC 20550, (202) 357-7993.

Minutes: May be obtained from contact person.

Purpose of Meeting: To advise the National Science Foundation and the Department of Energy on scientific priorities within the field of basic nuclear science research.

Agenda: April 10, 1992

- Statements from the Agencies.
- Discussion of the Revised Nuclear Data Sub-Committee Report.
- Presentation and Discussion of the Draft Report of the Long Range Plan Implementation Sub-Committee.
- Public Comment (**).
- Further Discussion and Preparation of the NSAC. Draft Report to the DOE/NSF Charge on Budget Priorities.

April 11, 1992

- Continued Discussion and Preparation of NSAC Draft Report to DOE/NSF Charge on Budget Priorities.

(*) Because of weekend security, persons wishing to attend the meeting on Saturday April 11, will have to call the Contact Person in advance to arrange for out-of-hours entry to the building.

(**) Persons wishing to speak should make arrangements through the Contact Person identified above.

Dated: March 16, 1992.

M. Rebecca Winkler,

Committee Management Officer.

Special Emphasis Panel in Design and Manufacturing Systems; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Design and Manufacturing Systems.

Date and Time: April 8, 1992, 8:30 a.m. to 5 p.m.

Place: Room 500-D, National Science Foundation, 1110 Vermont Ave., NW., Washington, DC.

Type of Meeting: Closed.

Contract Person: Dr. Suren B. Rao, Program Director, Division of Design and Manufacturing Systems, National Science Foundation, 1800 G St., NW., room 1128, Washington, DC 20550. Telephone: (202) 357-7676.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Young Investigator Award Nominations submitted to the Division of Design and Manufacturing Systems.

Reason for Closing: The nominations being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the government in the Sunshine Act.

Dated: March 16, 1992.

M. Rebecca Winkler,

Committee Management Officer.

Special Emphasis Panel in Earth Sciences; Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Public Law 92-463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meetings is to review and evaluate proposals and provide advice and recommendations as part of the selection process for awards. Because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with proposals, the meetings are closed to the public. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Name: Special Emphasis Panel in Earth Sciences.

Date: April 10, 1992.

Time: 8 a.m. to 5 p.m.

Place: Room 536, National Science Foundation, 1800 G Street, NW. Washington, DC.

Type of Meeting: Closed.

Agenda: Review and evaluate National Science Foundation Young Investigator (NYI) Applications.

Contact: Dr. Marvin Kauffman, Program Director, Education and Human Resources Program, National Science Foundation, room 602, Washington DC 20550 (202-357-7950).

Dated: March 16, 1992.

Advisory Committee for Industrial Science and Technological Innovation; Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92–463, the National Science Foundation announces the following meeting.

Name: Advisory Committee for Industrial Science and Technological Innovation.

Date and Time: April 8, 1992; 8:30 a.m.–5 p.m.; April 9, 1992; 8:30 a.m.–12 noon.

Place: National Science Foundation, 1110 Vermont Avenue, rm. V500 A, Washington DC 20550

Type of Meeting: Open.

Contract Person: Ms. Carolyn J. Smith, Staff Associate, Division of Industrial Innovation Interface, room V–502, National Science Foundation, Washington, DC, 20550 (202) 653–5202.

Summary of Minutes: May be obtained from the contact person at the above address.

Purpose of Committee: To provide advice and recommendations concerning support of research programs administered in the Division.

Agenda:

April 8, 1992
8:30 a.m.–12:00 noon
Review & discussion of current III activities
Outlook for III for 1992
Budget for FY 1993
Restructuring of Program Initiatives
12:00 noon–1:30 p.m. Lunch
1:30 p.m.–5:00 p.m.
Future Directions for III
Engineering Directorate Initiatives
Dissussion of III/Engineering Interface Activities
Update/Discussion of Long Range Goals/Objectives
April 9, 1992
8:30 a.m.–12:00 noon
Presentation of Committee of Visitors Report
Drafting of the Advisory Committee Recommendations.

Dated: March 16, 1992.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–302]

Florida Power Corp.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–72 issued to Florida Power Corporation (FPC) for operation, and FPC, et al. for possession, of Crystal River Unit 3 Nuclear Generating Station, located in Crystal River, Florida.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the operating license to delete Sebring Utilities Commission (Sebring) as a participating owner of CR–3 and as a licensee (possession only) under this license, in order to recognize the purchase of Sebring's 0.4473 percent ownership share by FPC. Presently, FPC owns 90% of CR–3, with portions of the remaining 10% owned by 11 municipalities and cooperatives, including Sebring. FPC alone is licensed to operate CR–3. FPC and Sebring have entered into an agreement under which FPC would purchase the 0.4473 percent share owned by Sebring, which would increase FPC's ownership share to 90.4473 percent. Ownership shares of the other 10 participants would not change. The proposed action is in accordance with the licensee's application dated August 16, 1991.

The Need for the Proposed Action

The proposed action is required to reflect the ownership change discussed above. The amendment reflecting the transfer of Sebring's possession-only interest in the license will have minimal impact on the operation of the facility by FPC. The transfer and amendment will not affect the facility's Technical Specifications, license conditions, or the organization and practices of FPC.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed license amendment and concludes that there will be no changes to CR–3 or the environment as a result of this action. The transfer of Sebring's possession-only interest in the license and the associated license amendment will not affect the numbers, qualifications, or organizational affiliation of the personnel who operate the facility, as FPC will remain the holder of the operating license and continue to be responsible for the operation of CR–3. Accordingly, the Commission concludes that this proposed action would result in no radiological or non-radiological environmental impact.

The Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination was published in the Federal Register on February 5, 1992 (57 FR 4487). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in no benefits to the public or the parties involved.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Crystal River Unit 3 Nuclear Generating Plant, issued in May, 1973.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons regarding this environmental assessment.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing enviromental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the applicant for the license amendment dated August 16, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida 32029.

Dated at Rockville, Maryland, this 12th day of March, 1992.

For The Nuclear Regulatory Commission.

Jan A. Norris,

Acting Director, Project Director II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards Subcommittee on Planning and Procedures; Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on March 19, 1992, at the Sheraton Grand Hotel at Dallas Ft. Worth Airport, 2d Floor Mezzanine Level, 4440 West Carpenter Freeway, Irving, TX.

This meeting will be open to public attendance except for portions during which the qualifications of prospective candidates for appointment to the ACRS will be discussed. These portions will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy per 5 U.S.C. 552b(c)(6).

The agenda for the subject meeting shall be as follows:

Thursday, March 19, 1992—8:30 a.m. Until the Conclusion of Business

The Subcommittee will discuss proposed reassignment of responsibilities for review of NRC research activities to cognizant topical Subcommittees and preliminary plans to address ACRS assignments made during the meeting with NRC Commissioners on March 5, 1992. Qualifications of candidates proposed for consideration as ACRS members will also be discussed, as appropriate.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notifiy the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Raymond F. Fraley (telephone 301/492–4516) between 7:30 a.m. and 4:15 p.m., e.s.t. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: March 13, 1992.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

BILLING CODE 7590–01–M

[Docket No. 50–312]

Sacramento Municipal Utility District; Consideration of Issuance of an Order Authorizing Decommissioning a Facility and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an order to the Sacramento Municipal Utility District (SMUD, the licensee), which holds Facility Operating License No. DRP–54 for the Rancho Seco Nuclear Generating Station (Rancho Seco) located in Sacramento County, California. The order would involve approval of the Rancho Seco Decommissioning plan and authorize decommissioning.

On June 7, 1989, Rancho Seco was permanently shut down. All spent fuel has been transferred from the reactor to the Spent Fuel Storage Pool and the Commission has authorized that License No. DRP–54 be amended to possess-but-not-operate status. This Order would approve the licensee's Decommissioning Plan which involves 10 to 20 years of onsite storage of residual radioactivity followed by its removal (SAFSTOR). The licensee also proposes to retain spent fuel onsite in an Independent Spent Fuel Storage Installation (ISFSI) until a Federal repository is available for spent fuel disposal The Decommissioning Plan analyzes the proposed monitoring, maintenance, and operation of the spent fuel pool; and the monitoring and maintenance of the remainder of the facility.

The Plan also analyzes potential accidents at the facility and the controls established for radiation protection and the prevention of the release of radioactivity from the site. A supplement to the Rancho Seco Environmental Report submitted by letter of October 21, 1991, analyzes the environmental impacts of the SAFSTOR decommissioning option.

Before issuance of the proposed order, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 20, 1992, the licensee may file a request for a hearing with respect to issuance of the order to the subject facility and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing

Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room, the Martin Luther King Regional Library, 7340 24th Street Bypass, Sacramento, California 95822. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters with in the scope of the order under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A hearing for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner so inform the Commission by a toll-free telephone call to Western Union at 1–800–325–6000 (in Missouri 1–800–342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Seymour H. Weiss: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Thomas A. Baxter, Esq., Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or request for hearing will not be entertained absent a determination by the Commission, the presiding office for the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application dated May 20, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Buildings 2120 L Street, NW., Washington, DC 20555, and at the Martin Luther King Regional Library, 7340 24th Street Bypass, Sacramento, California 95822.

Dated at Rockville, Maryland, this 12th day of March 1992.

Richard F. Dudley, Jr.,

Acting Director, Non-Power Reactors, Decommissioning and Environmental Project Directorate, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket Nos. 50–259, 50–260, and 50–296]

Tennessee Valley Authority, Browns Ferry Nuclear Plant, Units 1, 2, and 3; Withdrawal of an Amendment Request to Facility Operating License

The U.S. Nuclear Regulatory Commission (NRC) has approved the withdrawal of a Technical Specification (TS) amendment request by the Tennessee Valley Authority (TVA or the licensee) for an amendment to Facility Operating License Nos. DPR–33, DPR–52, and DPR–68, issued to the Browns Ferry Nuclear Plant, Units 1, 2, and 3, respectively. The plant is located in Limestone County, Alabama. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on January 24, 1984 (49 FR 2974).

The application being withdrawn was originally submitted by an amendment request dated March 4, 1982 as modified by letters dated September 3, 1982 and January 6, 1983. The licensee proposed to revise the Browns Ferry Technical Specifications to permit unit operation at reduced power with only a single recirculation loop in service. By letter dated January 24, 1992, the licensee withdrew its license amendment application.

For further details with respect to this action, see (1) the application for amendments dated March 4, 1982 as modified by letters dated September 3, 1982 and January 6, 1983, and (2) the licensee's letter dated January 24, 1992.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Athens Public Library, South Street, Athens, Alabama 35611.

Dated at Rockville, Maryland this 12th day of March 1992.

For the Nuclear Regulatory Commission.

Thierry M. Ross,

Senior Project Manager, Project Directorate II–4, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy; Procurement Regulatory Activity Report; Availability

AGENCY: Office of Management and Budget, Office of Federal Procurement Policy.

ACTION: Notice of availability of the Procurement Regulatory Activity Report, Number 6.

SUMMARY: Subsections 25(g) (1) and (2) of the Office of Federal Procurement Policy (OFPP) Act, as amended by Public Law 100–679, codified at 41 U.S.C. 421(g), require the Administrator for Federal Procurement Policy to publish a report within six months after the date of enactment and every six months thereafter relating to the development of procurement regulations.

Accordingly, OFPP has prepared the sixth Procurement Regulatory Activity Report. This report is designed to satisfy all aspects of subsections 25(g) (1) and (2) of the OFPP Act, and includes information on: The status of each regulation; a description of those regulations required by statute; a description of the methods by which public comment was sought; regulations, policies, procedures, and forms under review by the OFPP; whether the regulations have paperwork requirements; the progress made in promulgating and implementing the Federal Acquisition Regulation; and such other matters as the Administrator determines to be useful.

ADDRESSES: Those persons interested in obtaining a copy of the Procurement Regulatory Activity Report may contact the Executive Office of the President Publications Service, room 2200, 725 17th Street NW., Washington, DC 20503, or phone (202) 395–7332.

Dated: March 13, 1992.

Allan V. Burman,

Administrator.

OFFICE OF PERSONNEL MANAGEMENT

Request for Extension of OPM Forms 1203 and 1280 Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (Title 44, U.S. Code, chapter 35), this notice announces a proposed unchanged extension of a form whtch collects information from the public. OPM Form 1203, Occupational Supplement Series—Form B, and OPM Form 1280, Applicant Data Sheet, are optical scan and key entry documents, respectively. These forms are used by our automated processing center to create basic applicant records for an automated examining system. We will be using these forms to carry out our responsibility for open competitive examining for admission to the competitive service in accordance with section 3304, 5 U.S.C. Approximately 468,438 forms are completed each year with an average completion time of 27 minutes per form, for a total burden of 211,432 hours. For copies of this proposal, call C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be recieved on or before April 20, 1992.

ADDRESSES: Send or deliver comments to:

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, room CHP 500, 1900 E Street, NW., Washington, DC 20415 and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Armond A. Grant, (202) 606–0980.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

BILLING CODE 6325–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–30448; File No. SR–CBOE–92–06]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Exchange Decorum Policies

March 6, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 20, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE hereby amends rule 17.50(g)(6), Violations of Trading Conduct and Decorum Policies, to include fines for smoking in unauthorized areas of the Exchange. The proposal also amends the Regulatory Circular concerning trading conduct and decorum policies to provide for the imposition of fines for smoking in unauthorized areas. The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the placed specified in Item IV below. The CBOE has prepared summaries, set for in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

On March 2, 1992, the Exchange instituted a smoke-free environment policy. The purpose of this filing is to include fines for violations of the policy under rule 17.50(g)(6), Violations of Trading Conduct and Decorum Policies. For smoking in unauthorized areas, members and persons associated with members will be fined $50 for the first offense, $250 for the second offense, and $500 for each subsequent offense within a calendar year. This fine schedule is the same as that imposed for violations of the CBOE Dress Code.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act, in general, and furthers the objectives of Sections 6(b) (6) and (7), in particular, in that it is designed to provide for the fair and appropriate disciplining of members and persons associated with members for violation of Exchange policy.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change with impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change constitutes a stated policy, practice or interpretation with regard to the administration of an existing CBOE rule, the foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commision that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–92–06 and should be submitted by April 9, 1992.

For the Commission, by the Division of Market Regulation, pursuant to the delegated authority.[1]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–6328 Filed 3–18–92; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–30477; International Series Release No. 372; File No. SR–ISCC–92–01]

Self-Regulatory Organizations; International Securities Clearing Corporation; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Concerning Revised Service Fees

March 12, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on February 27, 1992, the International Securities Clearing Corporation ("ISCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

ISCC is filing the proposed rule change to revise its fee schedule in accord with its estimated 1992 service costs. The revised fee schedule is set forth as Exhibit A.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ISCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. ISCC has prepared summaries, set forth in section (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The proposed rule change consists of a revised fee schedule which reflects three categories of fees: Instruction Processing, Reporting, and Pass Through fees. These fees will enable ISCC to recover from members the cost of providing the various services to members.

Instruction processing fees have been divided into 3 categories: Receipt of instructions from a member or self-regulatory organization (such as the National Association of Securities Dealers), rejection of instructions for failure to meet edit criteria, and processing of instructions. Each of the fees is based on the expense incurred by ISCC in processing these transactions and results from operation of the communication and mainframe facilities and clerical intervention for participant servicing.

The reporting fees reflect the costs associated with providing information to members which results from their use of a service. The cost is based on the method of receipt, *i.e.*, MRO, print image, or hard copy.

In order to more accurately capture membership costs associated with providing different services, the membership fee is being changed and will be based on the number of services used by a member. The minimum charge will be $100 per month and the maximum charge $300 per month.

A new fee, designed to recover expenses incurred by ISCC in developing the Global Clearance Network service, is being added. The collection of this fee, which members agree to in signing on for the service, will be based on the number of transactions submitted by each member. If a member submits instructions in excess of his committed amount he will be billed for the excess transactions. However, at year end that member will receive a rebate equal to the excess fees collected over the course of the year. This fee will be charged to members until such time as the development expenses have been recovered.

The new fees are effective as of March 1, 1992, and will be reflected on the bills produced in April, 1992.

(b) The proposed rule change is consistent with Section 17A of the Act and the rules and regulations thereunder since it will provide for the equitable allocation of reasonable fees among members.

(B) Self-Regulatory Organization's Statement on Burden on Competition

ISCC does not believe that the proposed rule change will have an impact or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written commens have been solicited or received. ISCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder because the proposed rule change establishes or changes a due, fee, or other charge imposed by the self-regulatory organization. At any time within 60 days of the filing of this rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Room at the address above. Copies of such filing will also be available for inspection and copying at the principal office of ISCC. All submissions should refer to the File Number SR–ISCC–92–01 and should be submitted by April 7, 1992.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[2]

Margaret H McFarland,

Deputy Secretary.

EXHIBIT A—INTERNATIONAL SECURITIES CLEARING CORPORATION; FEE STRUCTURE

I. Instruction Processing Fees	
A. Receipt of transaction instructions from a participant (per item)	
1. Via CPU/CPU or P.C. Platform	1.50
2. Via Telex, Mail, Fax	3.00
B. Receipt of transaction instructions from an interfacing SR (per item)	.50
C. Rejects—each instruction submitted resulting in a rejection	.75
D. Processing of Accepted Instructions	
1. London Stock Exchange—each matched bargain	3.50
2. Cedel—forwarding of instruction	.75
3. Global Clearance Network—forwarding of instruction to agent bank	.75
4. PORTAL	
(a) instruction sent to foreign financial institution	,75
(b) instruction sent to DTC for IID system processing	.50
II. Reporting Fees	
A. Receipt of Reports—fee charged each day a participant is sent a set of reports per service, per location, based on the method of distribution	
1. Machine Readable Output (MRO)	5.00
2. Print Image Output	10.00
3. Hardcopy, telex, mail	25.00
B. Duplicate Copy of Prior Day Reports per request, per set of reports, per service	25.00
III. Pass Through and Other Fees	
A. Participant Fee (per service with a maximum of $300 per month/per member)	100.00

EXHIBIT A—INTERNATIONAL SECURITIES CLEARING CORPORATION; FEE STRUCTURE—Continued

B. Pass-Through Expense	
1. Communications—the cost of communications services requested by participants	At Cost
2. Other Direct Expenses incurred by ISCC or billed to ISCC by other financial institutions	At Cost
3. Miscellaneous expenses incurred on behalf of a member at a member's request	At Cost
C. Recovery of Development Expenses*	
1. Recovery of GCN development expense, per instruction submitted for processing	1.75
D. P.C. Access/Hunt group Fee (monthly) per access line	125.00

*Fees billed in excess of planned recovery schedule will be debated on an annual basis.

Collection Charge

The Corporation may, but shall not be obligated, to include from time to time on Members' settlement statements, charges which may be imposed on such Members by banks and trust companies in conjunction with the Global Clearance Network Service. Any amounts so collected shall, in accordance with agreements between the Corporation and the respective organization or entity, be remitted to the appropriate organization or entity imposing the charge.

BILLING CODE 8010–01–M

[Release No. 34–30470; File No. SR–ICC–92–01]

Self-Regulatory Organizations; the Intermarket Clearing Corporation; Notice of Proposed Rule Change Relating to Revisions to the Standard Form of Letter of Credit

March 12, 1992

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 4, 1992, The Intermarket Clearing Corporation ("ICC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to

[1] 17 CFR 200.30–3(a)(12) (1988).
[1] 15 U.S.C. 78s(b)(1).
[2] 17 C.F.R. § 200.30–3(a)(12).

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change modifies certain terms of ICC's standard form of letter of credit. In general, the proposed rule change would require that letters of credit deposited by Clearing Members as margin with ICC must be irrevocable and, unless otherwise agreed, must expire on a quarterly basis. In addition, the proposed rule change would clarify that ICC may draw upon a letter of credit whether or not the Clearing Member that deposited such letter of credit has defaulted on any obligation to ICC.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

ICC proposes to amend rule 502(a)(3) in a number of respects. First, rule 502(a)(3) currently provides that the issuer of a letter of credit must pay ICC immediately upon demand. However, under the Uniform Commercial Code as enacted in most states, the issuer of a letter of credit, except as otherwise agreed, may defer honor of such letter of credit until the close of the third business day after demand for payment is made.[1] The Uniform Customs and Practice for Documentary Credits, 1983 Revision, International Chamber of Commerce Publication 400 ("Uniform Customs") provides that, unless otherwise expressly agreed, a "bank shall have a reasonable time" in which to determine whether the drawing documents are in order. In order to avoid any ambiguity as to the latest time for payment in the case of letters of credit incorporating the Uniform Customs, ICC intends to require that letters of credit state expressly that payment must be made prior to the close of the third banking day following demand.

Second, rule 502(a)(3) currently permits the issuer of a letter of credit to revoke the letter of credit upon two business days written notice. ICC believes that the issuer of a letter of credit is more likely to exercise its revocation rights at a time when the Clearing Member for whom such letter is issued is experiencing financial difficulty. Accordingly, ICC believes that the two-day notice period imposes time constraints that may limit its flexibility in resolving such difficulties. As a result, ICC proposes to amend rule 502(a)(3) to eliminate the issuer's right to revoke the letter of credit.[2]

Third, rule 502(a)(3) provides that letters of credit shall expire on an annual basis. However, the financial condition of a Clearing Member may change significantly within a shorter period of time. Thus, ICC believes that it would be preferable to structure its letter of credit program in such a manner that permits issuers to make more frequent credit judgements about Clearing Members for whom they issue letters of credit. Accordingly, ICC's proposal requires letters of credit deposited as margin to expire on a quarterly basis rather than on an annual basis.

In addition, ICC proposes to amend rule 502(a)(3) to make explicit ICC's authority to draw upon a letter of credit at any time ICC determines that such draw is advisable to protect ICC, other Clearing Members, or the general public. Such draw may be made whether or not the Clearing Member that deposited the letter of credit has been suspended or is in default with respect to any obligation to ICC. Any funds so drawn will be treated as cash margin. The authority permits ICC, in effect, to increase the liquidity of its margin deposits by substituting cash collateral for a Clearing Member's letter of credit. In doing so, ICC also would eliminate its bank credit risk. ICC anticipates that it would use this authority very rarely and only under unusual circumstances.

Finally, ICC proposes to amend rule 502(a)(3) to allow the Chairman of ICC limited discretion to vary from the requirements stated in the rule. The discretion is limited by the following factors. First, the Chairman cannot use this discretion unless the Chairman consults with the staff of its regulatory agencies which include the Securities and Exchange Commission and the Commodity Futures Trading Commission. Second, the discretion can only be used for "unusual circumstances" and only on a temporary basis. Third, the Chairman, after exercising such discretion, will advise ICC's Board of Directors of the exercise of such discretion. Finally, the Corporation will provide notice within an appropriate period of time to any Clearing Member affected by the exercise of such discretion.

ICC believes that the proposed rule change is consistent with the requirements of section 17A of the Act. Specifically, ICC believes that proposed rule change promotes the protection of investors by enhancing ICC's ability to safeguard the securities and funds in its possession or subject to its control.

B. Self-Regulatory Organization's Statement on Burden on Competition

ICC does not believe that the proposed rule change will have an adverse impact upon competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the

[1] See, e.g., 26 Ill. Rev. Stat. 5-112 (1990).

[2] Although ICC's proposal would require a letter of credit deposited on behalf of a Clearing Member to be irrevocable, ICC may, of course, consent to the withdrawal of such letter of credit if the Clearing Member deposits other forms of margin with ICC or the letter of credit is otherwise no longer needed to satisfy the Clearing Member's margin requirement.

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the File Number SR-ICC-92-01 and should be submitted by April 19, 1992.

For the Commission by the Division of Market Regulation, Pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-30456; File No. SR-PSE-92-08]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Pacific Stock Exchange, Inc. Relating to Designating PSE Technology Index Options as European-Style Options

March 10, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 12, 1992, the Pacific Stock Exchange ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE proposes to amend PSE rules 7.1 and 7.5 to permit options on the PSE Technology Index to be exercised in the same manner as other European-style index options.[1] In addition, for clarification purposes, the PSE proposes to add four entries to the list of definitions contained in the PSE rules on index options. These definitions clarify the meaning of "European-style" and "American-style" options.

The text of the proposed rule change is available at the Office of the Secretary, PSE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed changes to the PSE rules on index options are intended to permit options on the PSE Technology Index to be exercised in the same manner as other European-style index options. In addition, for clarification purposes, the PSE proposes to add four entries to its list of definitions contained in the PSE rules on index options. These entries provide the definition for "European-style options" and "American-style options." Under the proposal, European-style options will be defined as option contracts that can be exercised only on the last business day prior to the day it expires. American-style options will be defined as options contracts that can be exercised on any business day prior to expiration.

The PSE believes that the proposed rule changes are consistent with section 6(b)(5) of the Securities Act in that they will promote just and equitable principles of trade, will foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, and will remove impediments to and perfect the mechanism of a free and open market and a national market system.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PSE believes that the proposed rule change will not impose an inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 9, 1992.

[1] The Commission notes that the PSE has not begun trading options on the Technology Index.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2553]

Declaration of Disaster Loan Area; CA

As a result of the President's major disaster declaration on February 25, 1992, I find that the counties of Kern, Los Angeles, Orange, San Bernardino, and Ventura in the State of California constitute a disaster area as a result of damages caused by severe rainstorms, snowstorms, winds, flooding, and mudslides beginning on February 10 and continuing through February 18, 1992. Applications for loans for physical damage may be filed until the close of business on April 27, 1992, and for loans for economic injury until the close of business on November 25, 1992, at: U.S. Small Business Administration, Disaster Area 4 Office, P.O. Box 13795, Sacramento, CA 95853-4795; or other locally announced locations. In addition, applications for economic injury loans for small businesses located in the contiguous counties of Inyo, Kings, Monterey, Riverside, San Diego, San Luis Obispo, Santa Barbara, and Tulare in the State of California; Clark County in the State of Nevada; and La Paz and Mohave Counties in the State of Arizona may be filed until the specified date at the above location.

The interest rates are:

For Physical Damage:	
Homeowners with Credit Available Elsewhere	8.000%
Homeownders without Credit Available Elsewhere	4.000%
Businesses with Credit Available Elsewhere	6.500%
Businesses and Non-Profit Organizations without Credit Available Elsewhere	4.000%
Others (including Non-Profit Organizations) with Credit Available Elsewhere	8.500%
For Economic Injury:	
Businesses and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000%

The number assigned to this disaster for physical damage is 255300 and for economic injury the numbers are 756900 for California; 757000 for Nevada; and 757100 for Arizona.

Notice: Due to SBA's present shortage of operating funds for the current fiscal year (through September 30, 1992), SBA cannot provide assurance of our ability to continue to accept or process disaster loan applications or make disbursements on loans until additional funds are available.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008).

Dated: February 29, 1992.

Bernark Kulik,

Assistant Administrator for Disaster Assistance.

BILLING CODE 8025-01-M

Notice of Shortage of Operating Funds for a Disaster in New York

As a result of the Secretary of Agriculture's disaster designation S-272 for counties in the State of New York, the Small Business Administration (SBA) is accepting economic injury disaster loan applications from eligible nonfarm small business concerns. However, due to SBA's present severe shortage of operating funds for the disaster program for the current fiscal year (through September 30, 1992), SBA cannot provide assurance of its ability to continue to accept or process disaster loan applications or make disbursements on disaster loans until additional funds are available.

Dated: March 12, 1992.

Bernard Kulik,

Assistant Administrator for Disaster Assistance.

[FR Doc. 92-6405 Filed 3-18-92; 8:45 am]

BILLING CODE 8025-01-M

Notice of Shortage of Operating Funds for a Disaster in Texas

As a result of the Secretary of Agriculture's disaster designation S-573 for counties in the State of Texas and contiguous counties in the States of New Mexico and Oklahoma, the Small Business Administration (SBA) is accepting economic injury disaster loan applications from eligible nonfarm small business concerns. However, due to SBA's present severe shortage of operating funds for the disaster program for the current fiscal year (through September 30, 1992), SBA cannot provide assurance of its ability to continue to accept or process disaster loan applications or make disbursements on disaster loans until additional funds are available.

Dated: March 12, 1992.

Bernard Kulik,

Assistant Administrator for Disaster Assistance.

BILLING CODE 8025-01-M

[License No. 05/05-0217]

White Pines Capital Corp.; Issuance of a Small Business Investment Company License

On November 22, 1991, a notice was published in the **Federal Register** (Vol. 56, No. 226, Page 58956) stating that an application has been filed by White Pines Capital Corporation, Ann Arbor, Michigan, with the Small Business Administration (SBA) pursuant to the Regulations governing small business investment companies (13 CFR 107.102 (1991)) for a license as a small business investment company.

Interested parties were given until close of business December 23, 1991, to submit comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 05/05-0271 on February 25 1992, to White Pines Capital Corporation to operate as a small business investment company.

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

[1] 17 CFR 200.30-3(a)(12) (1991).

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, Sec. 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J. W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W. M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Var fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

BILLING CODE 8120-03-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Notice; Ezeiza International Airport, Buenos Aires, Argentina

Pursuant to section 1115(d) of the Federal Aviation Act; on November 22, 1991, former Secretary Skinner notified the government of Argentina that he had determined that Ezeiza International Airport, Buenos Aires, Argentina, did not maintain and administer effective security measures. The designated period of time given the government of Argentina has elapsed since his determination, and I have found that Ezeiza International Airport still does not maintain and administer effective security measures. My determination is based on Federal Aviation Administration assessments which reveal that security measures used at the airport do not meet the standards established by the International Civil Aviation Organization.

Pursuant to section 1115 of the Federal Aviation Act. (49 U.S.C. 1515), I have directed that a copy of this notice be published in the **Federal Register**, that my determination be displayed prominently in all U.S. airports regularly being served by scheduled air carrier operations, and that the news media be notified of my determination. In addition, as a result of this determination, all U.S. air carriers and foreign air carriers (and their agents) providing service between the United States and Ezeiza International Airport must provide notice of my determination to any passenger purchasing a ticket for transportation between the United States and Buenos Aires, with such notice to be made by written material included on or with such ticket.

Dated: March 12, 1992.

Andrew H. Card, Jr.,

Secretary.

BILLING CODE 4910-62-M

Federal Aviation Administration

[Summary Notice No. PE-92-8]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before April 8, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-3132.

FOR FURTHER INFORMATION CONTACT: Mr. C. Nick Spithas, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9704.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on March 13, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Petitions for Exemption

Docket No.: 26658.
Petitioner: Fox Valley Technical College.
Sections of the FAR Affected: 14 CFR 147.36.
Description of Relief Sought: To allow Fox Valley Technical College to have specialized instructors, who are not certificated mechanics, to teach Basic Electricity and Basic Welding Subjects.

Dispositions of Petitions

Docket No.: 100CE.
Petitioner: Beech Aircraft Corporation.
Sections of the FAR Affected: 14 CFR 23.473(c) and 23.1001.
Description of Relief Sought/ Disposition: To allow the petitioner to modify the type certificate for its model 2000 airplane to permit a landing weight less than 95 percent of the maximum takeoff weight without installing a fuel jettisoning system. Grant, February 27, 1992, Exemption No. 5411.

Docket No.: 13199.
Petitioner: American Airlines.
Sections of the FAR Affected: 14 CFR 61.56(b)(1), 61.57 (c) and (d); 61.58 (c)(1) and (d); 61.63(d) (2) and (3); 61.67(d)(2); 61.157 (d) (1) and (2) and (e) (1) and (2); appendix A of part 61; and appendix H of part 121.
Description of Relief Sought/ Disposition: To renew Exemption No. 4652B which permits American Airlines to establish training programs using FAA-approved simulators to meet certain pilot training and certification requirements of §§ 61.56(b)(1), 61.57 (c) and (d); 61.58 (c)(1) and (d); 61.63(d) (2) and (3); 61.67(d)(2); 61.157 (d) (1) and (2) and (e) (1) and (2); appendix A of part 61; and appendix H of part 121 of the FAR. Grant, March 5, 1992, Exemption No. 4652C.

Docket No.: 26326.
Petitioner: T.B.M., Inc.

Sections of the FAR Affected: 14 CFR 91.611.
Description of Relief Sought/ Disposition: To allow the pilots of T.B.M., Inc., and Butler Aircraft, Inc., to take off in a Lockheed C130A aircraft with one engine inoperative and to fly the aircraft to a maintenance base for repairs without obtaining a special flight permit. Denial, March 5, 1992, Exemption No. 5415.

Docket No.: 26329.
Petitioner: Braniff International Airlines, Inc.
Sections of the FAR Affected: 14 CFR appendix H to part 121.
Description of Relief Sought/ Disposition: To permit the 1 year instructor employment requirement of the appendix H, Advanced Simulator Training Program (ASTP) to be acquired with either Braniff or another part 121 certificate holder. Grant, March 9, 1992, Exemption No. 5412.

Docket No.: 26398.
Petitioner: AMR Eagle, Inc.
Sections of the FAR Affected: 14 CFR 135.63(a)(4) and subparts E, G, and H of part 135.
Description of Relief Sought/ Disposition: To permit AMR Eagle, Inc., to train and check its pilots under §§ 121.681, 121.683 and all sections of subparts N and O, and appendices E, F and H of part 121 of the FAR. Grant, March 9, 1992, Exemption No. 5414.

Docket No.: 28661.
Petitioner: McDonnell Douglas Corporation.
Sections of the Far Affected: 14 CFR 25.813(e).
Description of Relief Sought/ Disposition: To permit installation of a door between passenger compartments on the MD–11 airplane. Grant, February 11, 1992, Exemption No. 5405.

BILLING CODE 4910–13–M

Solicitation for Airway Science Grant Proposals

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of solicitation for Airway Science grant proposals.

SUMMARY: This solicitation represents a continuation of the Federal Aviation Administration's AWS Grant Program. The Federal Aviation Administration (FAA) is authorized by Public Laws 101–516 and 102–143 to solicit competitive proposals for Airway Science (AWS) grants from accredited 4-year public or nonprofit private colleges and universities with recognized FAA AWS Curriculum programs. The FAA expects to award most, if not all, of an available $5,036,384 in the form of grants, to a select number of these recognized institutions. A portion of the available funds will be awarded to eligible minority institutions with recognized AWS curricula. Awards typically will range from $100,000 to a maximum of $300,000. In no event shall the total Federal share of any AWS project exceed 50% of the cost of the project.

The grant funds may be used for the purchase, lease with intent to purchase, or construction of academic buildings and associated facilities to be used in support of an FAA recognized AWS curriculum. In addition, grants funds may be used for unexpendable instructional materials or instructional equipment to be used in the actual teaching of the AWS curriculum. No federal grant funds shall be used for salaries, operating expenses, research and development, travel, consultant fees, indirect costs, office supplies or other expendable items, automobiles, aircraft, maintenance agreements, printing costs, promotional and marketing materials or equipment, general purpose parking lots, land, commercial airport facilities, taxiways, runways, or any project in support of a commercial activity.

FOR FURTHER INFORMATION CONTACT: Virginia Hancock Krohn, Manager, Airway Science Grant Program, Federal Aviation Administration, Office of Training and Higher Educatiuon, AHT–30, room PL–100, 400 7th St. SW., Washington, DC 20590, Telephone: (202) 366–7003.

CLOSING DATE: Six identical copies of the Proposal must be received by the FAA no later than June 30, 1992 (4 p.m. e.s.t.). One copy of the proposal must contain original signatures on the cover sheet. Applications received after the closing date will not be accepted.

Proposals submitted by Mail: A mailed proposal must be sent to the address listed above. Applicants are strongly encouraged to use registered or first class mail. Any grant application received after 4 p.m. on the closing date will be treated as a late application and will not be considered for a grant award. Proposals Submitted By Messengers: A hand delivered proposal must be taken to the FAA at the address listed above. The office of the AWS Grant Program Manager will accept hand delivered proposals between the hours of 8 a.m. and 4 p.m. e.s.t., except weekends and Federal Holidays. A hand delivered proposal will not be accepted after 4 p.m. on the closing date.

Each institution will be notified when its application is received. No supplemental materials received after 4 p.m. on the application deadline date will be considered unless such material is requested by the FAA.

Background

The FAA is engaged in a comprehensive program to modernize the Nation's airway system to meet the challenge of aviation growth in the coming decades. The modernization program takes advantage of current technological advances to increase the capacity of the Nation's airway system while reducing relative costs to the Nation's taxpayers.

The FAA recognizes the increasing complexity of technical and mangerial skills that will be needed to accommodate the technological advances in equipment, systems, and configurations being planned and implemented throughout the aviation industry. The FAA sponsors the AWS curriculum to assure that future aviation work force needs are adequately met.

In 1982, the FAA, in collaboration with the University Aviation Association, developed and recommended a specific college-level AWS curriculum. The AWS curriculum was designed (1) to satisfy academic and accreditation requirements, (2) to easily adapt to existing aviation related programs, and (3) to allow individual educational institutions the option of offering any of five areas of concentration.

The five areas of concentration of the AWS curriculum are: (1) Airway science management, (2) airway computer science, (3) aircraft systems management, (4) airway electronics systems, and (5) aviation maintenance mangement.

The FAA currently recognizes 50 institutions which offer approved AWS curricula. The AWS curriculum directly supports the human resource needs of both the FAA and the aviation industry by producing graduates with the necessary knowledge and skills to pursue aviation-related technical careers in the public and private sectors. Interested institutions which do not already offer recognized AWS curricula, may contact the FAA for further information.

References

For futher background information, refer to the following Federal Register Notices: 48 FR 116872, March 18, 1983, (FAA proposed AWS curriculum demonstration project plan), 48 FR 32490, July 15, 1983, (Office of Personnel Management approval of the FAA demonstration final plan), 49 FR 222903, June 1, 1984, 50 FR 37612, September 16, 1985, 52 FR 3195, February 2, 1987, 54 FR 8617, March 1, 1989, and 56 FR 22504, May 15, 1991, (notices announcing the competitive criteria employed by the FAA in selecting the AWS grant recipients under the previous 5 solicitations).

The Airway Science Grant

Authority

This solicitation represents a continuation of the FAA's AWS Grant Program. This program funds projects at selected institutions of higher education which have evidenced a commitment to the agency's AWS curriculum program. The grants are authorized by Public Laws 101–516 and 102–143 with a total amount of $5,036,384 available for competitive grant awards. The funds may be used for allowable direct costs in the following categories, to the extent that such items are in direct support of aviation and/or computer courses in the required core or area of concentration of an institution's recognized AWS curriculum option(s): (a) The purchase, lease with intent to purchase, or construction of academic buildings and associated facilities, and (b) nonexpendable instructional materials and equipment to be used in the actual teaching of the AWS curriculum. Monies are not available for salaries, operating costs, research and development, travel, consultant fees, indirect costs, office supplies or other nonexpendable equipment, automobiles, aircraft, maintenance agreements, printing and marketing materials or equipment, general purpose parking lots, land, commercial airport facilities, taxiways, runways, or any project in support of commercial activities.

Eligibility

Eligible institutions must be accredited 4-year public and non-profit colleges and universities in the United States and its possessions. To be eligible, an applicant institution must have an established FAA-recognized AWS curriculum in place and available to students. The curriculum must have been recognized by the FAA no later than December 31, 1991.

Proposal Format and Content

Each FAA-sponsored, AWS grant project is subject to the provisions of applicable FAA regulations and OMB Circulars A–21, A–73, A–88, A–110, and A–133. Proposals must contain the following information in the order listed.

1. Cover Sheet

Type the title "Airway Science Grant Proposal" near the top of the Cover Sheet. Type the legal name of the proposed grantee institution, its mailing address, and IRS Employer Identification Number in the center of the Cover Sheet. Type the names, titles, telephone numbers and FAX numbers of the proposed Project Director and of an official authorized to sign for the proposed grantee institution in the lower left and right corners, respectively, of the Cover Sheet. The Cover Sheet of one copy of the proposal must bear the original signatures of the above individuals and dates of signatures. The signatures of the authorized individuals signify institutional requirements, and a commitment to provide the specific support, including fiscal obligations, for the proposed activities in the event the grant is made.

2. Standard Form 424

Submit the standard forms listed below with each grant application. These forms may be obtained by writing to the AWS Grant Program Manager at the address listed above. Applications without these forms will be disqualified.

(1) Standard Form 424 (Rev. 4–88), Application for Federal Assistance,

(2) FAA/AWS, Certifications Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements.

3. Table of Contents

Include a table of contents with page numbers.

4. Project Summary

Include a concise summary of the proposed project. State the goals and objectives and the long-range benefits of the project and the associated costs including cost sharing figures. The reader should be able to quickly identify the nature of the project and the requested funding level. The summary should not exceed two (2) double-spaced typewritten pages.

5. Narrative

The Narrative should be clearly written and not exceed forty (40) double-spaced typewritten pages in length. The Narrative must contain the following:

(a) Introduction

Present a brief description of the institution, including: historical background, full time graduate and undergraduate student enrollment, student body profile, location (rural, urban, etc.), fields of emphasis and degrees awarded.

(b) AWS Background

Describe the evolution of the institution's involvement in the AWS Program. Provide a detailed discussion of the institution's current recognized AWS program. Provide information and statistics on the occupational areas AWS graduates and current AWS students have entered or will be entering within the aviation industry and the FAA. Provide the following information in an "easy to read" chart format (a) recognized AWS curriculum options, (b) recognition dates by curriculum option, (c) declared majors by AWS option for current academic year in categories of minority, female, others, and total, (d) expected AWS enrollment figures by option for next five years, (e) number of degrees awarded by AWS option, (f) number of degrees expected to be awarded by AWS option for the next five years. (This information may be presented in several different charts).

Describe the institution's aviation degree options other than AWS and discuss how they interface with the AWS program. Provide a chart(s) for the institution's other aviation degree options which contain the same information requested for AWS Program as explained above.

Include an institutional organization chart to show how the AWS Program and other aviation programs fit into the institutional structure.

Describe institutional activities to recruit AWS and other aviation students, including minority and female recruitment activities. Describe annual recruitment expenditures for both AWS and other aviation majors.

Submit one copy of an official course catalog and/or other brochure(s) showing the AWS course offerings to students during the 1991–1992 academic year. Institutions which do not submit the above information will be disqualified.

(c) Strategic Plan

Present a 5-year Stategic Plan for the institution's AWS Program. Discuss the components of the plan and how the institution anticipates achieving the goals and objectives of the Strategic Plan. Justify the feasibility of the plan in relation to the projected work force needs of the aviation industry and FAA, over-all direction of the institution, fiscal concerns, etc.

(d) Project Plan

Discuss in detail the proposed Project Plan with stated goals and objectives. Relate the project plan to the Strategic Plan.

Explain how the project will directly support the aviation and/or computer courses in the required core and the areas of concentration of an institution's recognized AWS curriculum options. Explain whether the project will enhance current recognized AWS courses or, rather, provide for the development of new AWS courses to be included in the institution's recognized AWS option(s) within the curriculum guidelines. Provide a similar discussion for other aviation programs.

Note: Development of new AWS courses refers to courses to be included in an existing recognized AWS curriculum option. It does not include courses for the development of a new curriculum option to be submitted for recognition at a future date.

Applicants may submit photographs, architectural drawings, site plans, or other visual representation that would aid the reviewing panel in assessing the relative merits of the proposed project.

Explain how AWS students and other aviation majors, respectively, will directly or indirectly benefit from the project. Provide a chart indicating the number of students who will benefit from the grant project by AWS option and other aviation degree options over the next five years.

Present a detailed discussion from project design to conclusion on the components of the Project Plan and the activities and tasks necessary to bring the project to a successful conclusion. The project is completed when the measurements discussed under the Evaluation Plan have been applied and analyzed. This should occur within 12 months of the time the facility and/or equipment becomes available to students. Provide a milestone chart for the project.

Identify the sources of non-Federal funding and show evidence that the funds will be available, i.e., provide a letter of commitment for funds which will be given to the institution by an outside source. Institutions will be held accountable for all cost sharing funds.

Describe and explain the mechanism that will be used to manage and monitor the progress of the project in terms of the milestones and budget expenditures.

(e) Project Personnel Plan

Identify and describe the relevant skills of those individuals who will have major responsibilities for the proposed project. Include a discussion of their relevant skills in terms of the project and the amount of time each person will be required to devote to the project. Discuss the role of the Project Director. Provide information indicating the director has appropriate qualifications, well defined responsibilities, sufficient time, and adequate academic and institutional authority and support to effectively manage the project.

Discuss the number and qualifications of faculty necessary to adequately utilize the funded facility/equipment in teaching of AWS courses after conclusion of project. Demonstrate institutional commitment to provide necessary faculty positions. Indicate if personnel are current faculty members or must be hired. If the latter, provide a discussion of planned activities to staff the position(s).

(f) Budget Plan

The proposal must contain a Budget Plan that includes a detailed itemization of proposed expenditures for direct costs associated with the project according to the following categories:

Item	Fed $	Percentage	Non-Fed $	Percentage	Total
(a) Facilities					
(1) Construction					
(2) Renovation					
(3) Stationary equipment					
(b) Equipment					
(1) Flight					
(2) Air Traffic Control					
(3) Electronics					
(4) Maintenance					
(5) Computers					
(6) Meteorology					
(7) Office equipment					
(8) Classroom equipment					
(9) Distance Learning					
(10) Resource materials					
(c) Travel [1]					
(d) Consultant services [1]					
(e) Salaries [1]					
(f) Other direct costs [1]					
Total					

[1] Costs directly related to grant project, though not qualified for Federal funding.

Each category must contain line item entries of allowable costs and be subtotalled. (See OMB Circular A-21 for discussion of allowable costs). The line item entries must be allocated appropriately between Federal and non-Federal funding. FAA grant funds may only be dedicated to categories "a" and "b". Cost sharing funds include allowable grant project costs (categories "a" thru "f") which are incurred by the institution, funds donated by an outside source, or the value of in-kind contributions. Federal costs may not occur prior to the official award of the grant. Nonfederal funds may occur from the planning stages through the evaluation period but do not include operating costs, faculty teaching costs, or the development time for an institution's grant application. In no event shall the total Federal grant funds provided for an AWS project exceed 50% of the total allowable cost of the project. A sample itemized budget is available from the AWS Grant Program Manager upon request. Budgets which do not include an itemization of expenditures will be disqualified. Budgets which include construction activities with a general cost per square foot will be disqualified.

(g) Institutional Need

Provide a detailed justification for the requested grant funding in terms of financial need. Discuss the consequences of not funding the proposed project. Explain and identify the funding sources and levels which support the institution's current AWS Program. Illustrate the amount of incoming funds over the past three years which have been dedicated to the institution's AWS Program. Provide the same information for funds dedicated to the institution's other aviation programs. Include a discussion of FAA sponsored AWS grants previously awarded to the institution including funding level, project, date of award, and status.

(h) Evaluation/Assessment Plan

Provide a project Evaluation/Assessment Plan. The plan must include a strategy and measurement component for each goal and objective of the grant project. The actual evaluation/assessment may be performed by the institution's staff or in collaboration with outside consultants within 12 months of the time the project facility and/or equipment is available to students. The results of the completed evaluation/assessment will determine whether the goals and objectives of the project have been achieved and the impact of the project upon the AWS program at the institution. These results shall be submitted to the FAA as part of the final project report.

(6) Local Review Statement

Attach a statement, signed by an appropriate official of the institution, that contains: (a) an endorsement of the proposed project; (b) a description of how the proposed project supports the institution's long range goals and objectives in AWS; and (c) a commitment to provide the institutional resources necessary to meet cost sharing obligations, complete the proposed project, maintain the facilities and equipment to an acceptable standard, and continue financial support for the AWS Curriculum Program after the grant funds have been expended.

Reporting Requirements

Until the proposed project is completed, the FAA requires that each award institution prepare an Annual Project Report, not to exceed twenty (20) double-spaced typewritten pages in length. The Annual Project Report shall be submitted to the FAA within 90 days of the close of each institution's fiscal year. The report should include a summary of project progress, highlights and accomplishments, personnel changes and a status report on expenditures and account balances for each of the line items presented in the proposed Budget Plan.

In addition, a Final Project Report must be submitted to the FAA within 90 days of the project completion. The Final Project Report shall include summaries of project activities, accomplishments, outcomes of the implemented Evaluation Plan, and Budget Plan expenditures. The FAA anticipates that FAA representatives will make site visits to each grant institution during the lifetime of the project.

Proposal Review

Proposals will be reviewed, evaluated, and ranked against the evaluation criteria by a panel of educational and aviation specialists from the public and private sectors, including: academia private industry and/or the Federal Government. This review will be used by the FAA in the selection of applicants for grant awards.

For purposes of review, all proposals received by the FAA will be placed into one of two competitive classes: (1) Minority institutions (see June 1, 1984, 49 FR 22903) and (2) majority institutions. Grant awards will be made on a competitive basis within each competitive class. The awards within a given competitive class typically will range from $100,000 to $300,000 maximum. Each proposal will be reviewed, evaluated and ranked, within the competitive class to which it is assigned by the FAA.

The FAA does not intend to fund all proposed projects or necessarily all components of a proposed project. FAA expects to award at least 20 grants

Evaluation Criteria

The evaluation criteria are designed to enable the reviewing panel and FAA officials to effectively evaluate the relative merit of submitted proposals. The proposals will be scored on a 100-point scale and will be evaluated based on the following factors:

1. *Institutional Commitment* (15 points maximum)

Each proposal will be evaluated as to the extent of the institution's commitment to the AWS Program, in relation to the date of curriculum recognition and overall size of program, as follows:

(a) Number of recognized AWS curriculum options.

(b) Number of students pursuing AWS degrees.

(c) Number of AWS degrees awarded since curriculum recognition.

(d) Recruitment activities including outreach programs for minority and female students.

(e) Projected growth of AWS Program over next 5 years. Extent to which projected growth is realistic in comparison to current enrollment figures and strategic plan.

(f) Amount of institutional cost sharing funds provided toward the project.

(g) Demonstrated continued support and growth of the institution's AWS Program.

(h) Quality of Local Review Statement.

2. *Strategic Plan* (15 points maximum)

The feasibility of the Strategic Plan will be evaluated in terms of the following:

(a) Institution's current AWS Program.

(b) Institution's planned approach to meet future aviation work force needs.

(c) Potential resources, including fiscal, instructional, and administrative elements, necessary for achievement of planned goals.

3. *Project Plan* (20 points maximum)

The Project Plan will be evaluated as follows:

(a) Appropriateness of the project in terms of institution's current AWS Program.

(b) Relationship between the project and the strategic plan.

(c) Extent to which project adequately supports recognized curriculum.

(d) Number of AWS students to benefit in relation to size of institution's AWS Program.

(e) Benefits to students.

(f) Evidence that institution has good understanding of activities and tasks required to bring project to conclusion.

(g) Appropriateness of proposed facilities and/or equipment in terms of project goals and objectives.

(h) Extent to which milestones are realistic and attainable.

(i) Extent to which applicant demonstrates that non-Federal funds required for the project are available.

(j) Extent to which adequate management mechanisms provide for the effective administration and technical direction of the project.

4. *Project Personnel* (10 points maximum)

The professional qualifications and experience of the institution's present AWS personnel, especially the AWS Project Director, and other key officials who will be involved in the proposed AWS grant project, will be evaluated as follows:

(a) Qualifications and experience of the Project Director.

(b) Qualifications and experience of project personnel in relation to the goals and objectives of the project.

(c) How well the institution scheduled and allocated project personnel time to perform duties associated with project.

(d) How well AWS personnel responsibilities are defined.

(e) Adequate faculty on board to utilize facilities and/or equipment *or* institutional commitment to provide necessary faculty positions and adequate staffing plan developed.

5. *Budget Plan* (10 points maximum)

The Budget Plan will be evaluated as follows:

(a) Proposed expenditures itemized by budget category and mathematical calculations correct.

(b) Entries detailed and consistent with project narrative.

(c) Budget figures appropriate for goods and services being procured.

5. *Institutional Need* (15 points maximum)

Each proposal will be evaluated to determine the extent to which the applicant institution has demonstrated the following:

(a) An overrall financial need for funding.

(b) Consequences to the institution's AWS Program if Federal funding not obtained.

7. *Evaluation/Assessment Plan* (15 points maximum)

The Evaluation Plan will be evaluated to determine the extent to which it demonstrates the following:

(a) Plan is adequately tied to goals and objectives of the project.

(b) Strategy and measurement components are appropriate for stated project goals and objectives.

(c) Evaluation will produce information which would be useful to other institutions in implementing similar projects.

Issued in Washington, DC, on March 12, 1992.

Belinda R. Zamer,

Deputy Director, Office of Training and Higher Education.

BILLING CODE 4910-13-M

Federal Transit Administration

[Docket No. 91-B]

Metric Conversion Policy

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of proposed policy.

SUMMARY: This document solicits comments on a proposed policy to pursue and promote an orderly conversion to the metric system on a recommended schedule for all Federal Transit Administration (FTA) Programs in accordance with statutory mandates. The action would involve the setting of metric conversion timetables for FTA manuals, documents, publications, data collection and reporting, and administration of grants and procurement contracts. It would implement legislation approved in 1988 and would comply with the policy established by the Department of Commerce, the lead agency under the statute, and the Department of Transportation (DOT). It will affect State and local governments, the transit industry and the public.

DATES: Comments must be received on or before May 18, 1992.

ADDRESSES: Submit written, signed comments to FTA Docket No. 91-B, Federal Transit Administration, Office of the Chief Counsel, room 9316, 400 Seventh St., SW., Washington, DC 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. John Durham, Program Analyst, Office of Technical Assistance and Safety, TTS-12, (202) 366-0255 or Linda Watkins, Office of the Chief Counsel, TCC-34, (202) 366-1936.

SUPPLEMENTARY INFORMATION: Section 5164 of the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100-418, 102 Stat. 1107, 1451 (codified at 15 U.S.C. 205(a)), which amended the voluntary metric conversion provisions of the Metric Conversion Act of 1975 (Pub. L. 94-168, 89 Stat. 1007), declares the metric system to be the "preferred system of weights and measures for United States trade and commerce" and that "each agency of the Federal Government, by date certain prior to the end of fiscal year 1992, use the metric system of measurement in its procurements, grants, and other business-related activities except to the extent that such use is impractical or is likely to cause significant inefficiencies or loss of markets to United States firms, such as when foreign competitors are producing competing products in non-metric units". The DOT has determined that all FTA programs authorized under title (49), United States Code, and related mass transportation acts shall be converted to metric.

The U.S. Department of Commerce (DOC), as the lead Federal agency for metric conversion, promulgated its guidance for Federal agencies on January 2, 1991, 56 FR 160 (15 CFR part 19), and earlier issued its Systems of Units (metric system) for the United States at 55 FR 55242 on December 20, 1990. That guidance, in part, requires Federal agencies to: (1) Establish metric conversion plans and dates for use of the metric system to procurements, grants, and other business-related activities; (2) Coordinate with other Federal agencies, State and local governments and the private sector.

The DOC guidance further requires that Federal agencies

> * * * shall give due consideration to known effects of their actions on State and local governments and the private sector, * * * paying particular attention to effects on small business. (15 CFR 19.22; 56 FR 161).

The U.S. DOT has issued implementing guidance under DOT Order 1020.1C dated May 8, 1990, and its Attachment dated January 31, 1991 (available for inspection and copying in the files of the FTA public docket in room 9316 as stated under heading **ADDRESSES** above). The DOT guidance in part states:

> The Department of Commerce interprets the 1992 deadline for metric conversion to mean that plans scheduling such conversion should be in place by then, with some conversion underway and other conversion scheduled as appropriate for later dates. For purposes of these guidelines, such scheduled conversion should be completed where possible by 1997, and where necessary to go beyond that year, firm conversion schedules should be in place.

In response to this DOT Order, FTA has proposed and submitted a metric conversion plan to the Office of the Secretary on September 3, 1991. This plan foresees that FTA activities most affected by metric conversion will be those related to its grant programs. The net effect will be felt in the use of metric rather than conventional specifications; any real cost or effectiveness impacts on FTA grantees, contractors and equipment suppliers in converting to metric should be minor. FTA holds this view because we are encouraging the use of the metric system, rather than mandating a conversion in a manner that would add unreasonable costs to the industry. Thus, it is our expectation that grantees will work with suppliers in achieving an orderly conversion—one that is low in cost yet enhances the ability of the transit industry to compete in the world marketplace.

In terms of its own activities, the plan calls for FTA immediately to begin to welcome information in metric units from its grantees and other constituents. During FY 1992, FTA also intends to develop computer programs internally to translate Section 15 data into corresponding metric units and to identify metric training needs of its employees. Beginning in FY 1993 the agency plans to use metric units predominantly in its reports and correspondence. Other aspects of FTA's metric conversion are to be accomplished over a 5-year period. FTA recognizes that total industry conversion to the metric system, especially regarding facilities construction, may take decades to accomplish.

Purpose

The purpose of this notice is to solicit comments on this action and the proposed timetable for conversion to using the metric system for all FTA programs. Of particular interest to the Government is quantifiable information on the costs and benefits of metric conversion.

Metric conversion for FTA (and other Federal agencies) is no longer voluntary; it is now mandatory for FTA's procurements, grants, and other business-related activities, except to the extent that such use is impractical or is likely to cause significant addressed they should relate to an identifiable element or programs activity involved.

Definitions

Metric System means the International System of Units (SI) established by the General Conference of Weights and Measures in 1960, as interpreted or modified from time to time for the United States by the Secretary of Commerce under the authority of the Metric Conversion Act of 1975 and the Metric Education Act of 1978, Pub. L. 95-561, section 311(a), 92 Stat 2211.

Other Business-Related Activities means measurement sensitive commercial or business directed transactions or programs, *ie.*, standard or specification development, procedure or practice requirements of an agency.

Measurement Sensitive means the choice of a measurement unit is a critical component of the activity, *i.e.*, an agency rule/regulation to collect samples or measure something at specific distances or to specified depths; specifications requiring intake or discharge of a product to certain volumes or flow rates; guidelines for clearances between objectives for safety, security or environmental purposes, etc.

General Policy

It is FTA's policy to pursue and promote an orderly changeover to the metric system for all the programs in accordance with the statutory requirements, DOC policy guidance and DOT guidance. Metric conversion of FTA's procurement operations will be governed by the Federal Acquisition Regulations issued by the General Services Administration (GSA) and DOT regulations and policies.

In the development of the proposed transition timetable, which addresses only major areas of concern, FTA has attempted to be sensitive to all parties affected by the planned actions, recognizing that various industries and sectors of the economy will differ widely in the timing of their transition to the use of metric measurement.

Program Exclusions

Metric usage shall not be required to the extent such use is impractical or is likely to cause significant inefficiencies or loss of markets to United States firms in accordance with 15 CFR 19.22; 56 FR 161. At this time FTA does not propose any exceptions to metric conversion.

PROPOSED METRIC CONVERSION TIMETABLE

Program elements/activities	Target date
I. Incorporate public comments into final FTA plan and policy.	June 1, 1992.
II. Convert Section 15 data to metric (internal to FTA).	Sept. 1992.
III. Implement FTA employee training program.	Sept. 1993.
IV. Conversion of FTA manuals, documents, and publications.	Sept. 1997.

Authority: (Sec. 5164, Pub. L. 100-418, 102 Stat. 1107, 1451 (codified at 15 U.S.C. 205(a)); Pub. L. 94-168, 89 Stat 1007; Sec. 311(a), Pub. L. 95-561, 92 Stat 2211: 49 CFR 1.51.)

Issued on: March 13, 1992.

Brian W. Clymer,

Administrator.

BILLING CODE 4910-57-M

UNITED STATES INFORMATION AGENCY

Hubert H. Humphrey Fellowship Program

AGENCY: United States Information Agency.

ACTION: Notice, request for proposals.

SUMMARY: The Bureau of Educational and Cultural Affairs seeks to secure the services of a Washington-based non-profit organization to assist in the administration of the Hubert H. Humphrey Fellowship Program Washington Workshop. The organization shall plan and implement a seven-day conference for the Humphrey Fellows from October 24-30, 1992. The goal of the workshop is to enhance Fellows' understanding of social, cultural, and political institutions in the U.S., provide opportunities for interaction among Fellows, provide opportunities for professional networking, introduce the Fellows to the organization responsible for administering the Humphrey Program, the Institute for International Education (IIE), and introduce Fellows to Washington, DC.

Each year the Hubert H. Humphrey Fellowship Program brings approximately 145 accomplished professionals from developing countries to the U.S. at a mid-point in their careers. The program involves a year of non-degree graduate-level study and related professional experiences. Fellows are nominated by U.S. embassies or binational educational commissions because of their academic qualifications and potential for national leadership. By providing these future leaders with exposure to U.S. society and culture, and to current U.S. approaches to the fields in which they work, the program provides a basis for establishing lasting ties among U.S. citizens and their professional counterparts in other countries.

Fellowships are granted competitively to public- and private-sector candidates with a commitment to public service in the fields of planning and resource management, public policy analysis and public administration, public health, and agricultural development. Fields pursued by Fellows could include such diverse sub-categories as the following: international finance; marketing; trade; personnel administration; environmental policy; water management; higher education administration; information management; journalism; justice administration; urban planning; regional development; hospital administration; and substance abuse treatment and prevention.

DATES: Deadline for proposals:

Proposals must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on April 20, 1992. Proposals received by the Agency after this deadline will not be eligible for consideration. Faxed documents will not be accepted, nor will documents which are postmarked on April 20, 1992 but received at a later date. It is the responsibility of each grant applicant to ensure that the proposal is received by

that deadline. The grant should begin about June 29, 1992.

ADDRESSES: The original and fifteen (15) copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: Hubert H. Humphrey Fellowship Program, Grant Management Division, E/XE, room 357, 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Representatives of interested organizations must contact Ms. Aleta Wenger or Ms. Deborah Trent at the U.S. Information Agency, 301 4th Street, SW., Hubert H. Humphrey Fellowship Program, Office of Academic Programs, room 349, (202) 619–5289, to request detailed application packets. The packet includes program requirements, award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific information for budget preparation.

SUPPLEMENTARY INFORMATION:

Overview

Authority for the Hubert H. Humphrey Fellowship Program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256 (Fulbright-Hays Act). The Fulbright Program seeks to increase mutual understanding between the people of the U.S. and people of other countries.

Pursuant to the Bureau's authorizing legislation, programs must maintain their scholarly integrity and non-political character and should be balanced and representative of the diversity of American political, social, and cultural life.

Guidelines

Eligibility

Non-profit organizations with key program staff based in the Washington, DC metropolitan area and available for frequent meetings with Washington D.C.-based Agency staff are invited to submit proposals for a cooperative agreement award from the Agency. Organizations must also have experience in conference management, professional exchanges, and international exchanges.

Only organizations with at least four years of experience in international exchange activities are eligible to apply for this grant.

Proposed Budget

A comprehensive, line-item budget must be submitted with the proposal by the application deadline. Specific guidelines for budget preparation are contained in the application packet. Budget requests should be presented in the format indicated in the application packet.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not adhere to the guidelines established herein and in the application packet.

Eligible proposals will be forwarded to a panel of USIA officers for advisory review. All eligible proposals will also be reviewed by the Agency's budget and contracts offices. Proposals may be reviewed by the Agency's Office of the General Counsel.

Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

1. Quality/responsiveness—The quality of the workshop plan and adherence to the criteria and conditions described in the application packet. Proposals should clearly demonstrate how the organization will meet the workshop's objectives.

2. Institutional capacity—Proposed staffing levels and experience, as well as the quality and quantity of all institutional resources, should be adequate and appropriate for achieving the workshop's goals.

3. Cost-effectiveness—The overhead and administrative components of the grant, as well as salaries and honoraria, should be kept as low as possible. All budget items should be necessary and appropriate. Proposals should demonstrate cost-sharing and in-kind support. The level of cost-sharing and in-kind support reflected in each proposal will be key selection factors.

4. Track record/potential—Proposals should describe the experience of the applicant organization. The Agency will consider the performance of previous and current USIA grant recipients in addition to the potential of new applicants.

5. Evaluation plan—Proposals should provide a sound plan for evaluation to be undertaken by the selected organization.

Notification

All applicants will be notified of he results of the review process on or about June 22, 1992. Awarded grant(s) will be subject to periodic reporting and evaluation requirements.

Application Disclaimer

The terms and conditions of this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of this request for proposals does not constitute an award commitment on the part of the government. Final award cannot be made until funds have been allocated and committed through internal USIA procedures.

Dated: March 12, 1992.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 92–6414 Filed 3–18–92; 8:45 am]

BILLING CODE 8230–01–M

American Overseas Research Centers

AGENCY: United States Information Agency.

ACTION: Notice—Request for Proposal.

SUMMARY: The Bureau of Educational and Cultural Affairs seeks requests for financial assistance from American overseas research centers (ORCs). The authority for this activity is the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256 (Fulbright-Hayes Act). Through its support of ORCs, USIA seeks to enhance its mission of achieving long-term mutual understanding and mutual exchange of scholarly information and knowledge between the people of the United States and people of other countries.

DATES: Proposals must be received at the U.S. Information Agency by 5 p.m. Washington, DC, time May 15, 1992. Faxed documents will not be accepted, nor will documents postmarked on May 15, 1992, but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline.

ADDRESSES: The original and fifteen copies (all with original signatures and date) of the completed application, should be submitted to: U.S. Information Agency, American Overseas Research Centers, Grants Management Division, E/XE, Room 357, 301 4th Street, SW., Washington, DC 20547.

FOR APPLICATION MATERIAL AND ADDITIONAL INFORMATION (BUDGET GUIDANCE, ETC.) CONTACT: Mr. Michael Graham, (E/AEN), Academic Exchange Programs Division, Near East/South Asia Branch, (202) 619–5368.

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life.

Overview

For this competition, an ORC is defined as a non-profit, independent U.S. institution of higher education and research, affiliated with or accredited by relevant recognized higher education bodies in the U.S. (e.g., American Schools of Oriental Research, Council for American Overseas Research Centers, Middle East Studies Association of North America).

An ORC may be a free-standing organization, independent of any other group or body, or may comprise a consortium of U.S. colleges, universities, museums and libraries. Applicants must demonstrate capability in facilitating advanced research abroad in the social sciences and humanities (not only archeological research) by both U.S. and foreign scholars and students; maintain an educational facility and full-time staff representation overseas; show a record of achievement in engaging the participation of all relevant segments of the local scholarly community; demonstrate mechanisms for active, ongoing non-Federal fund-raising; demonstrate capability in administering fellowships for advanced scholarly research abroad by U.S. scholars and students; and be actively undertaking innovative programs that further research, preferably collaborative research, with foreign scholars, in the social sciences and humanities.

Guidelines

The competition is limited to the following countries:

A. North Africa—Tunisia, Morocco, Algeria, Mauritania.

B. South Asia—Bangladesh, Pakistan.

These countries represent USIA's geographic priorities for development of academic exchange relationships through overeas research centers. Subject to the availability of funding, grants will be awarded in Fiscal Year 1992. Applicants may request funding for two years, but are requested to present two one-year budgets.

The Agency will review performance at the conclusion of the first year of the grant, and pending availability of funds, may extend the grant for one year without requesting a new proposal.

Restrictions: Proposals for feasibility studies to plan new ORCs will not be considered.

Review Process:

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not adhere to the guidelines established herein, and amplified in the application package. Ineligible proposals will not be considered for funding. Eligible proposals will be forwarded to panels of USIA officers for advisory review. Proposals also may be reviewed by the Agency's Office of the General Counsel.

The Associate Director for Educational and Cultural Affairs identifies and approves potential grant recipients. Final technical authority for awarding a grant resides with the Office of Contracts.

Proposal requirements are described below:

1. A cover sheet with the name of the institution, U.S. and overseas project directors, addresses, telephone and fax numbers and major field(s) of the project (e.g., Middle Eastern studies). Applicants are required to answer all questions on the cover sheet.

2. An executive summary or abstract of the proposal not to exceed two double-spaced pages.

3. A Narrative not to exceed 10 double-spaced pages, including evidence of institutional standing and academic quality, established record and achievements of the ORC, clear statement of goals and objectives for USIA-supported activities and the means to accomplish the objectives, justification of intellectual or institutional importance of programs, research output, and scholarly services; description of the nature of institutional and individual membership, and governing structure; a sampling of past research output; evidence of the relationship of the ORC to host country academic environment and plans for expanding local academic ties; a statement of how exchange-of-persons programs for which USIA funding is requested will be implemented and how participants are evaluated and selected; clear identification of the program innovation for which funding is being sought; a statement of how the ORC will evaluate activities supported by USIA; a summary of USIA-supported activities in the most recent year.

4. Financial management data outlining the total ORC budget, detailing expenditures and sources from which funds are anticipated. (Detailed information concerning budget format and eligible and ineligible items is included in the financial assistance application guidelines sent by USIA.)

5. Appendices: (a) Copy of charter, bylaws and articles of incorporation; (b) list of board of directors, or similar body, and officers; (c) vita of U.S. and overseas project directors not to exceed two pages each; (d) list of member institutions; (e) sources and amounts of Federal funds received in most recent fiscal year; (f) sources and amounts of non-Federal funds received in most recent fiscal year ; (g) copy of fellowship application; (h) copy of fellowship publicity; (i) list of recipients, if applicable, of USIA-sponsored fellowships in most recent three-year period, including academic fields and research topics; (j) a list of foreign scholars, and their projects, who have worked in collaboration with the ORC.

Review Criteria

Applications for this competition will be reviewed according to the following criteria and funding will be allocated on the basis of a panel's judgment regarding the degree to which these criteria are met:

1. Quality of program plan and adherence to criteria and conditions described above.

2. Reasonableness, feasibility, and flexibility of objectives. Proposals should clearly demonstrate how the ORC will meet its objectives.

3. Multiplier effect/impact. A particular priority is that proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual scholarly linkages for collaborative research and graduate education in host country.

4. Value to U.S. binational relations. The potential impact and significance of the ORC's operations in the host country and in the region.

5. Cost effectiveness. Overhead and administrative components of grants, including salaries and honoraria, should be kept as low as possible, and are not allowed to exceed 20% of the total grant.

6. Cost-sharing. Proposals should maximize cost-sharing through non-Federal support.

7. Potential for program excellence and/or track record. Relevant evaluation results of previous projects are part of this assessment.

8. Innovativeness of the program for which funding is sought.

9. Promise of the general advancement of U.S. scholarly research abroad.

10. Evidence of strong mutual benefits to the U.S. and foreign institutions and individuals involved.

11. Evidence of strong commitment by U.S. participating and member institutions.

Note: Inasmuch as each ORC is competing against all the others in the pool of applicants, it is possible that not all will be successful in receiving funding and more likely still that the full amount requested will

not be awarded. Some grants may only be made for one year in order to redistribute the future pools of applicants more evenly over a two-year cycle of competitions.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review of full proposals on or about May 15, 1992. Grant awards will be subject to standard periodic reporting and evaluation requirements.

Dated: March 13, 1992.

William P. Glade,

Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Curriculum Consultant/Faculty Development Exchange with the Commonwealth of Independent States and Georgia

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions for the development of a two component program for educators from the United States, Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. These exchanges are subject to the availability of funding for Fiscal Year 1992.

Support is offered for two categories: Category A, the Curriculum Consultant Exchange; and Category B, the Faculty Development Program. Both categories have separate conditions and requirements, which are stated in this announcement. Institutions may compete in one or both categories, but must submit a separate proposal for each category.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Friday, April 17, 1992. Faxed documents will not be accepted, nor will documents postmarked on April 17, 1992 but received at a later date. It is the responsibility of each grant applicant to ensure that its proposals are received by the above deadline. Duration: *Category A:* Proposals for the Curriculum Consultant Exchange must be for an entire academic year. Programs may not start before July 1, 1992, and must end before September 1, 1993. *Category B:* Proposals for the Faculty Development Program should provide for a six-week program, and must not begin before July 1, 1992, and must end before September 31, 1992.

ADDRESSES: The original and 15 copies of the completed application, including required forms, should be submitted by April 17, 1992 to: U.S. Information Agency, Reference: (Program Category and Title), Office of Grants Management, E/XE, room 357, 301 4th Street, SW, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested U.S. organizations should write or call: Ted Kniker or Mara Moldwin, U.S. Information Agency, 301 4th Street, SW., European Branch, Academic Exchanges Division, E/AEE room 208, Washington, DC 20547; telephone (202) 619-5341, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Overall authority for these programs is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87-256 (Fulbright-Hays Act). The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." Pursuant to the Bureau of Educational and Cultural Affairs authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. Programs should also "maintain their scholarly integrity and shall meet the highest standards of academic excellence or artistic achievement."

Overview

The Office of Academic Programs encourages the development of current and accurate information about U.S. culture, institutions, society and language to be incorporated in the educational curricula of the countries of the Commonwealth of Independent States and Georgia through a wide range of exchange programs. Specifically, the Office of Academic Programs sponsors exchanges that bring foreign educators involved in the development and direction of teaching materials and curricula that focus on U.S. culture, institutions, society, and lanugage to the United States for study programs that will enhance their first-hand knowledge of those subject areas. The Office also sponsors the strengthening of Russian language and central Eurasians area studies in American educational institutions through various components of the Fulbright Exchange Program. Each component of the Curriculum Consultant/Faculty Development Program serves both objectives in an effective and lasting fashion.

Category A

The Curriculum Consultant exchange program will involve the two-way exchange of (a) up to 15 foreign educators who are involved in the study of Russian as a second language, and (b) up to 15 American studies/English teaching educators from the United States. The participants must spend a full academic year working as consultants in their counterpart universities.

Category B

The Faculty Development Program (the summer component) will be a six-week, U.S.-sited study program for up to 25 senior foreign educators from Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, or Uzbekistan. The study programs should focus on U.S. culture, institutions and society, American English, American linguistics theory and second language acquisition.

Guidelines

Language Qualifications

Foreign participants must be fluent in English and American participants must have sufficient fluency in Russian. Escort/interpreters are therefore not provided.

Institutional Commitment

Proposals must include documentation of institutional support for the proposed program in the form of signed letters of endorsement from the U.S. and foreign partners' presidents, chancellors, or directors, or in the form of a signed agreement by the same persons. Letters of endorsement must describe each institution's commitment and activities in support of an on-going partner linkage and make specific reference to the proposed program and each institution's activities in support of that program. Applicants must submit this documentation as part of the completed application. Applying institutions are expected to make their own arrangements with the appropriate foreign institutions.

Orientation Programs

Participants should be provided with a substantive and comprensive orientation to the country of their visit,and proposals shold describe these orientation programs, including costs, in detail.

Proposed Budget

Project awards to U.S. institutions and organizations will be made in a wide range of amounts but for Category A (Curriculum Consultants), awards will not exceed $65,000 except for consortia of three or more member colleges or universities; and Category B (Faculty Development), awards will not exceed $85,000 except for consortia of three or more member colleges or universities. The Agency reserves the right to reduce, revise or increase proposal budgets in accordance with the needs of the program. For organizations with less than four years of experience in international exchange activities, grants will be limited to a maximum of $60,000, and proposed bugets should not exceed this amount. All organizations must submit a comprehensive line item budget, the details and format of which are contained in the application packet.

Allowable Costs

Category A and Category B

Grant-funded items of expenditure will be limited to the following categories:

—International Travel (via American flag carrier);
—Domestic travel;
—Excursionary travel and lodging for cultural enrichment (not to exceed $200.00 per participant);
—Maintenance and per diem;
—Academic program costs (e.g. tuition, book allowance);
—Travel and partial maintenance costs (not to exceed 50 percent of U.S. Government per diem rates for stays of 30 days or less, or 35 percent for stays over 30 days) for accompanying faculty or resident directors, for no more than one program supervisor per fifteen participants.
—Orientation costs (speaker honoraria are not to exceed $150 per day per speaker);
—Cultural enrichment expenses (admissions, tickets, etc., limited to $150 per participant);
—Administration (salaries, benefits, communications, other direct and indirect costs)*;
—Application should demonstrate substantial cost-sharing (dollar and in-kind) in both program and administrative expenses, including tuition waivers and overseas partner contributions.

***Please Note:** It is required that requested administrative funds not exceed 20 percent of the total amount requested, including administrative expenses for orientation; administrative expenses should be cost-shared.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet, including the Guidelines for Preparing Proposals (EAEE-92-02). Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Quality of program plan—including academic rigor and excellence, thorough conception of project, demonstration of meeting participants' needs, contributions to understanding the partner country, proposed follow-up, and qualifications of program staff and participants.

b. Reasonable, feasible, and flexible objectives—the capacity of the organization to conduct the program. Proposals should clearly demonstrate how the insitution will meet the program objectives and plan.

c. Track record—relevant Agency and outside assessments of the organization's experience with international programs; for organizations that have not worked with USIA, the demonstrated potential to achieve program goals will be evaluated.

d. Multiplier effect/impact—the positive effect of the program on long-term mutual understanding, the inclusion of maximum sharing of information, and the establishment of long-term institutional and individual linkages.

e. Value of U.S.-partner country relations—the assessment by USIA's geographic area office of the need, potential impact, and significance of the project with the partner country.

f. Cost effectiveness—greatest return on each grant dollar, degree of cost-sharing exhibited.

g. Diversity and pluralism—preference will be given to proposals that demonstrate efforts to include participants from diverse regions, and of different socio-economic and ethnic backgrounds, to the extent feasible for the applicant institutions.

h. Adherence of proposed activities to the criteria and conditions described above.

i. Institutional commitment as demonstrated by financial and other support to the program.

j. Follow-on Activities—proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

k. Evaluation plan—proposals should provide a plan for evaluation by the grantee institution.

Notice

The terms and conditions published in this RFP binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of this request for proposals does not constitute an award commitment on the part of the government. Final award cannot be made until funds have been fully appropriated by Congress, allocated, and committed through internal USIA procedures.

Notification

All applicants will be notified in writing of the results of the review process on or about June 15, 1992. All funded proposals will be subject to

periodic reporting and evaluating requirements.

Dated: March 11, 1992.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 92-6415 Filed 3-18-92; 8:45 am]

BILLING CODE 8230-01-M

Czech and Slovak Federal Republic Summer Language Exchange

AGENCY: United States Information Agency.

ACTION: Notice—Request for Proposals.

SUMMARY: Subject to the availability of funds, the United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions to conduct a summer language exchange with the Czech and Slovak Federal Republic. Applications for substantive academic exchanges will be accepted from accredited, degree-granting U.S. universities or colleges, university systems, and not-for-profit organizations engaged in international educational exchange programs.

DATES: Deadlines for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Wednesday, April 15, 1992. Faxed documents will not be accepted, nor will documents postmarked on April 15, 1992, but received at a later date. It is the responsibility of each grant applicant to ensure that its proposal is received by the appropriate deadline. Grants should begin no earlier than June 15, 1992. The duration of the grant should be from 6 to 14 weeks.

ADDRESSES: The original and fifteen (15) complete copies of the application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: Czech and Slovak Federal Republic Summer Language Program, Office of Grants Management, E/XE, Room 357, 301 4th Street, SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested U.S. organizations should contact: Ted Kniker at U.S. Information Agency, 301 4th Street, SW., European Branch, Division of Academic Exchanges, E/AEE room 208, Washington, DC 20547; telephone (202) 619-5341 to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Overall authority for these exchanges is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87-256 (Fulbright-Hays Act). The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and the other countries of the world." Pursuant to the Bureau of Educational and Cultural Affairs authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. Programs shall also "maintain their scholarly integrity and shall meet the highest standards of academic excellence or artistic achievement."

Overview

This exchange is to be conducted in pursuit of the goals established in the Agreement between the Government of the United States of America and the Government of the Czech and Slovak Federal Republic (formerly the Czechoslovak Socialist Republic) on Cooperation in Culture, Education, Science and Technology, and Other Fields. The purpose of this exchange program is to conduct an intensive summer language program for up to 20 participants from each country. Support is offered for programs which bring Czech and Slovak English language educators to the United States and send American students and/or language educators specializing in Czech and Slovak languages, to the Czech and Slovak Republic for advanced language instruction. Programs for study in fields other than those mentioned above will not be considered. Programs must be reciprocal; while it is desired that an equal number of participants be exchanged, it is not a requirement. Proposals must include participants from both Czech and Slovak republics. Participants must be citizens of the United States or of the Czech and Slovak Federal Republic. Programs in the U.S. are expected to be conducted in English. Programs in the Czech and Slovak Federal Republic are expected to be conducted in the language of the host republic. Applying institutions are expected to make their own arrangements directly with appropriate Czech and Slovak institutions. Proposals should include documentation of institutional support for the proposed program from the participating U.S. and foreign institutions.

Language Qualifications: Participants should have sufficient fluency in the language of the host country (or republic) to be able to pursue university level study and be able to converse with citizens of the country without the aid of interpreters. Generally, the equivalent of two years of college-level study is considered the minimum.

Cultural Enrichment: Proposals should include a thorough description of cultural enrichment activities. Programs for the Czech and Slovak teachers should include an American studies component.

Proposed Budget

One or two project awards will be made in a range of amounts but will not exceed $80,000. The Agency reserves the right to reduce, revise or increase proposal budgets in accordance with the needs of the program. For organizations with less than four years experience in international exchange activities, grants will be limited to a maximum of $60,000, and proposed budgets should not exceed this amount. All organizations must submit a comprehensive line item budget, the details and format of which are contained in the application packet. Grant-funded items of expenditure will be limited to the following categories:

—International Travel (via American Flag Carriers);
—Domestic travel;
—Maintenance and Per Diem;
—Academic program costs (e.g. tuition, university fees, book allowance);
—Orientation costs (speaker honoraria are not to exceed $150 per day per speaker);
—Cultural enrichment expenses (admissions, tickets, etc.; limited to $150 per participant);
—Administration (salaries, benefits, communications, other direct and indirect costs.*
—Applications should demonstrate substantial cost-sharing (dollar and in-kind) in both program and administrative expenses, including tuition waivers and overseas partner contributions.

*Please Note: It is required that requested administrative funds not exceed 20 percent of the total amount requested, including administrative expenses for orientation and indirect costs applied to all administrative and program costs; additional administrative expenses should be cost-shared.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet, including the Guidelines for Preparing Proposals [E/AEE-92-02]. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with the USIA's contracting officer.

Review Criteria:

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Adherence of proposed activities to the conditions described in the bilateral agreement and the program of cooperation (Article I, Paragraph V) between the United States and the Czech and Slovak Federal Republic.

b. Quality of program plan, including academic rigor, thorough conception of project, demonstration of meeting participant needs, contributions to understanding the partner country, proposed follow-up, and qualifications of program staff and participants.

c. Feasibility of the program plan and the capacity of the organization to conduct the exchange. Proposals should clearly demonstrate how the institution will meet the program objectives and plan.

d. Track record—relevant Agency and outside assessments of the organization's experience with international exchange; for organizations that have not worked with USIA, the demonstrated potential to achieve program goals will be evaluated.

e. Multiplier effect/impact—the impact of the exchange activity on the wider community and on the development of continuing ties, as well as the contribution of the proposed activity in promoting mutual understanding.

f. Value of U.S.-partner country relations—the assessment by USIA's geographic area office of the need, potential impact, and significance of the project with the partner country.

g. Cost effectiveness—greatest return on each grant dollar; degree of cost-sharing exhibited.

h. Diversity and pluralism—preference will be given to proposals that demonstrate efforts to provide for the participation of individuals from diverse regions and of different socio-economic and ethnic backgrounds, to the extent feasible for the applicant institutions.

i. Institutional commitment as demonstrated by financial and other support to the program.

j. Follow-on activities—proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA-supported programs are not isolated events.

k. Evaluation plan—proposals should provide a plan for evaluation by the grantee institution.

Preference Factors: Preference will be given to proposals that:

1. Include an area studies component;
2. Include a thorough orientation component for all participants; and
3. Provide an approximately equal number of American and Czech and Slovak participants.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of this request for proposals does not constitute an award commitment on the part of the government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the result of the review process on or about June 1, 1992. Funded proposals will be subject to periodic reporting and evaluation requirements.

Dated: March 11, 1992.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:02 a.m. on Tuesday, March 17, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Matters relating to the probable failure of certain insured banks.

Recommendations concerning administrative enforcement proceedings.

Matters relating to the Corporation's assistance agreement with an insured bank.

Matters relating to certain financial institutions.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), concurred in by Vice Chairman Andrew C. Hove, Jr., Director Stephen R. Steinbrink (Acting Comptroller of the Currency), and Chairman Taylor, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B), of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550-17th Street, N.W., Washington, DC.

Dated: March 17, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[Meeting No. 1446]

TIME AND DATE: 1 p.m. (EST), March 23, 1992.

PLACE: TVA Knoxville Office Complex, 400 West Summit Hill Drive, Knoxville, Tennessee.

STATUS: Open.

AGENDA: Approval of minutes of meeting held on February 19, 1992.

ACTION ITEMS:

New Business

C—Power

C1. Financing Assistance for Distributors as Part of TVA's Power Program.

C2. Low Density Credit for TVA Power Distributors in Rural Areas with High Operating Costs.

C3. Changes in the Rates for TVA Power.

E—Real Property Transactions

E1. Public Auction Sale of Sewer Line Easement and Sewage Treatment Plant Site Affecting 11.42 Acres of Bellefonte Nuclear Plant Property in Hollywood, Alabama.

E2. Sale of Permanent Easement Affecting 0.11 Acre of Cherokee Reservoir Land in Grainger County, Tennessee.

E3. Sale by the U.S. Department of Agriculture, Forest Service, Affecting 0.05 Acre of Former TVA Land in Carter County, Tennessee.

F—Unclassified

F1. Contracts with CDI Corporation-Southeast and American Technical Associates, Inc.

F2. Filing of Condemnation Item.

INFORMATION ITEMS:

1. Revisions to the Reservation Charge for the Interruptible Standby Power Option 1.
2. Supplement No. 3 to Contract No. TV-76866T with Coopers & Lybrand for the Design and Implementation of the TVA Quality Improvement Program.
3. Jobs and Education Bill Credit.

CONTACT PERSON FOR MORE INFORMATION: Alan Carmichael, Manager of Media Relations, or a member of his staff can respond to requests for information about this meeting. Call (615) 632-6000, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 479-4412.

Dated: March 16, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

Corrections

Federal Register
Vol. 57, No. 54
Thursday, March 19, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 675

[Docket No. 911177-2016]

Groundfish of the Bearing Sea and Aleutian Islands Area

Correction

In rule document 92-1665, beginning on page 2688, in the issue of Thursday, January 23, 1992, make the following correction:

On page 2688, in the first column, under **EFFECTIVE DATES:**, in the second line, delete "filing".

BILLING CODE 1505-01-D

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 92N-0094]

Drug Export; Corzide Tablets (40mg/5mg, 80mg/5mg)

Correction

In notice document 92-4866, beginning on page 7592, in the issue of Tuesday, March 3, 1992, make the following correction:

On page 7593, in the first column, in the tenth line, "1992" should read "1991".

BILLING CODE 1505-01-D

[Docket No. R-92-1514; FR-2855]

RIN 2502-AF04

Single Family Development Acceptance of Individual Residential Water Purification Equipment

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule sets out the circumstances under which the Department will agree to provide FHA mortgage insurance on single family properties for which a loan-to-value ratio (LTV) greater than 90% is proposed, and when certain of the requirements associated with water supply systems set out in 24 CFR 200.926d(f), and usually applied to such properties, cannot be met. This rule also codifies requirements already applicable to the insuring of existing single family properties. The purpose of this rule is to expand the availability of FHA mortgage insurance while assuring appropriate safeguards to protect the health and safety of potential occupants.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Donald Fairman, Manufactured Housing and Construction Standards Division, room 6207, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone, voice: (202) 708–0718; (TDD) (202) 708–4594. (These are not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). No person may be subjeced to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**. Public reporting burden for the collection of information requirements contained in this rule are estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided under the Preamble heading, *Other Matters*. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., room 10276, Washington, DC 20410–0500; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for HUD, Washington, DC 20503.

Background

On February 14, 1991, the Department published a proposed rule (56 FR 6216) designed to set out the circumstances under which FHA would agree to provide mortgage insurance on single family properties otherwise eligible for insurance, when certain of the requirements associated with water supply systems set out in 24 CFR 200.926d(f) cannot be met. This final rule makes effective, with changes described in the preamble, the February 14, 1991 proposed rule.

The National Housing Act, 12 U.S.C. 1702 *et seq.*, authorizes the Secretary of Housing and Urban Development to prescribe standards for determining the acceptability of one and two family residential structures (and other structures) for mortgage insurance. 12 U.S.C. 1715*l*(f). In addition, the standards must be consistent with the national housing policy of realizing the goal of "a decent and suitable living environment for every American family* * *." 42 U.S.C. 1441.

The Secretary has prescribed Minimum Property Standards (MPS) in 24 CFR part 200, subpart S, for determining the acceptability of one and two family (and other) housing. In addition, subpart S currently references additional standards contained in HUD Handbooks 4910.1 and 4930.2, which are incorporated into the Department's regulations by authority of 24 CFR 200.927.

Water quality standards, applicable to newly constructed single family structures for which the loan-to-value ratio is greater than 90 percent, are set out in 24 CFR 200.926d(f). The cited paragraph generally sets out the requirements for acceptability of public or private water supply systems providing safe drinking water.

Section 424 of the Housing and Community Development Act of 1987, 12 U.S.C. 1701z–15, provides that when an existing water supply does not meet HUD's minimum property standards and a permanent alternative acceptable water supply is not available, approved residential water treatment equipment or a water purification unit that provides bacterially and chemically safe drinking water may be used to provide a continuous supply of water.

Under section 424, the Department is authorized to provide terms and conditions under which residential treatment equipment may be found to meet the conditions for mortgage insurability. Cognizant of the mandate in section 424, the Department is providing, in this rule, a means by which mortgage insurance can be made available despite the lack of a supply of bacterially and chemically safe drinking water. The procedures in the rule are designed to assure, by means of an agreement between mortgagor and mortgagee (and with the assistance of health and water quality professionals), that water purification equipment to be used in the dwelling will provide continuing availability of safe and potable water.

The Department has reviewed the Environmental Protection Agency's (EPA) data and rules for the use of water treatment equipment and purification units (commonly referred to as "point of entry treatment devices"), and specifically those proposed in the **Federal Register** at 50 FR 46915 (November 13, 1985) and published in final form at 52 FR 25690 (July 8, 1987). (See 40 CFR 141.100 and 142.62(g).) The Safe Drinking Water Act provides authority for EPA to establish the conditions under which treatment devices may be used, if necessary to assure protection of public health. The Department also has reviewed a report to the Congress by the Farmers Home Administration in response to section 1304(b)(1) of the Food Security Act of 1985, 7 U.S.C. 1281, entitled "Individual Facilities for Rural Water and Waste Disposal." Additionally, HUD staff has consulted with the staff of the EPA Office of Drinking Water, and has reviewed data from the Water Quality Association.

This rule provides a means for mortgagees and mortgagors, in an area that lacks a source of safe and potable water available to otherwise-insurable dwelling units, to:

1. Arrange, by means of a contract and through the enlistment of assistance from local health authorities, for an approved means of assuring a continuous supply of drinking water;

2. Demonstrate to the satisfaction of the Department that the water supply is and will continue to be safe; and

3. Make possible the provision by the Department of mortgage insurance under the National Housing Act.

The procedures in this rule are similar to those in Mortgagee Letter 91–4, issued January 25, 1991, regarding requirements applicable to properties not covered by the Minimum Property Standards. This rule amends the MPS to cross-reference the above-described special procedures. This rule provides a uniform regulatory standard applicable to all single family FHA insurance transactions—both new and existing single family dwellings.

Concurrently with the adoption of new §§ 203.52 and 234.64, the Department is amending § 203.550. Section 203.550, relating to a mortgagee's responsibility for collecting, managing, and disbursing escrowed monies, provides in paragraph (c) that the mortgagee's estimate of escrow requirements must be based on the best information available as to probable payments that will be required to be made from the escrow account "in the coming year." This provision as originally drawn contemplated only the accrual of monies for expenditures such as taxes and insurance that require outlays at least annually. The escrow is established under §§ 203.52(e) and 234.64(e). It includes not only monies to be expended periodically during each year for servicing and maintenance costs, but includes also a reserve for repair and replacement of equipment, as needed. Section 203.550 is revised in this rule to permit the collection and escrow of monies that may not be disbursed until some years after collection.

The escrow described in §§ 203.52(e) and 234.64(e) is exempt from the prohibition in section 10 of the Real Estate Settlement Procedures Act (RESPA), in accordance with the Secretary's authority to grant exemption under section 19(a) of that Act.

Public Comments

The Department received nine public comments on the proposed rule. Several of the comments were detailed in their criticisms of the rule and made explicit recommendations for change. The commenters, although few in number, appeared to represent a diverse cross-section of relevant interests, including an environmental engineer; an association representing water well and pump installation contractors; an association of drinking water administrators; counsel for the National Water Quality Association, representing manufacturers of water treatment devices; an individual manufacturer of water quality devices; the Member of Congress who sponsored the amendment giving rise to the rule; a mortgage lender; the Mortgage Bankers Association; and a state conference of directors of environmental health.

A summary of the principal comments and responses, organized by subject matter, is set out below.

I. Requests for Clarification of the Rule

Comment: An environmental engineer suggested that clarification is needed on the term "purification" as used in the proposed rule. As written, the commenter said, the rule indicates that the use of purification equipment will produce a safe and potable water supply. Only disinfection with an agent such as chlorine will destroy, neutralize or inhibit the growth of pathogenic microorganisms which cause disease. Purification equipment (merely) tends to make water more aesthetically acceptable, but not necessarily to produce a safe water supply.

Response: Section 203.52(3) of the HUD proposed rule requires the system equipment to provide a water supply that meets the state or local health authority standards for water quality. Where no state or local standards exist, EPA standards arising out of the Safe Drinking Water Act must be met. Neither of these standards can be complied with without disinfecting the system. For point of entry and point of use equipment, EPA requires the system to be certified by the state. This includes a plan using effective technology to provide microbiological safety of the water. Either system must provide health protection equivalent to a central water treatment system. ("Equivalent" means the water will meet all primary and secondary drinking water standards). An approved monitoring plan, (the state or its agency) must be in place (monitoring includes physical measuring of flow rate and mechanical condition of the equipment). Attention is also provided to possible increases in heterotrophic bacteria concentrations in water treated with activated carbon. Frequent backwashing, disinfection and heterotrophic plate count monitoring may be necessary.

Comment: An environmental health organization commented that the rule was not sufficiently specific about what water quality standard was to be applied to individual water supplies. If the rule intends that a well serving a single family dwelling must meet the Safe Drinking Water Act (SDW) standards, quality testing alone would cost up to $2000. In addition, the commenting organization said, point-of-entry devices suitable for private wells may not exist or be economically feasible for some of the contaminants that may be detected by water quality testing for SDW Act compliance.

Response: Under the SDW Act, EPA has developed drinking water requirements that are required by law to be enforced by the states. Section 203.52(3) of the proposed rule provides that the water supply must meet the state or local water quality standards for drinking. These are EPA requirements that a state enforces to assure acceptable drinking water for a locality.

II. Doubts About Reliability of Available Disinfection Units

Comment: According to the environmental engineer's comments, at present, disinfection units available for individual home use leave "a lot to be desired" from the standpoint of reliability.

Response: Water purification equipment must be approved by a nationally recognized testing laboratory. In addition, the local health or state authority must certify that a system is in place that will assure safe potable water and a plan exists for the monitoring, servicing, maintenance and replacement of the water equipment. Finally, the water supply, when treated by the equipment, must meet the requirements of the health authority. The Department believes that these requirements provide reasonable assurance of a continuing supply of safe, potable water.

III. Concerns About Costs

Comment: The environmental engineer claimed that the rule's required "plan" will be cost-prohibitive to some mortgagors, thereby preventing them from purchasing a home in some areas.

Response: There will be situations where this is true. However, the Department is left with no choice. There is no alternative to carrying out the intention of the statutory amendment with a rule that will assure a constant supply of bacterially and chemically safe drinking water. HUD believes it is essential to apply the same high standard to individual water systems as is applied by EPA to water systems serving 25 or more persons.

IV. Amount of Responsibility Placed on Local Health Authorities

Comment: A national trade association expressed its concern about the lack of definition of "local health authority" included in the proposed rule. If the term is limited to governmental

departments and agencies at the local level, the commenter indicated that some states may be at a disadvantage. As an example, the commenter stated that Nebraska had only two or three counties with local health authorities. Elsewhere, reliance upon a state health agency would be the only available resource for working out the plan and the contracts contemplated by the rule.

The commenter requested that the final rule make clear that statewide health authorities, e.g., the agency responsible for drinking water programs, would be acceptable. Such a statewide authority, the commenter suggested, could set management standards and then work through other local or regional organizations, e.g., natural resources districts.

Response: The term "local health authority" is intended to include the state agency responsible for drinking water programs as well as appropriate town and city agencies. This has been clarified in the rule.

Comment: The rule, as written, will place a lot of responsibility on local health authorities who may not have the resources to carry it out, the environmental engineer commented.

Response: As a result of the SDW Act, EPA requires each state, through one of its agencies, to protect the consumer by providing safe drinking water that conforms to EPA standards. In a number of states, this responsibility is delegated to the local health authority, which in turn oversees the local water department. The states are required to have adequate monitoring, testing and performance to protect the consumer. This procedure is currently in existence for public water systems, and it is the Department's position that this process can be extended to this program by the voluntary action of health authorities. It is the only practical and safe way that this program can be managed.

Comment: A manufacturers' association focused its concern on the "far too wide-ranging and nebulous powers granted local public health authorities." The requirement that a local authority certify that a point-of-entry system is in operation on the property would be, the commenter said, a prime deterrent to the use of point-of-entry equipment. Since the requirement makes it necessary to install the equipment on-site before certification, the rule would make it necessary to purchase and install expensive equipment with no certainty that the product will be certified by the local authority. The commenter recommended instead that prospective certification be permitted, based on product data supplied by the manufacturer.

Response: If the procedure outlined in this rule is followed, the only reason a local authority would have to refuse certification would be those cases where the equipment failed to provide safe potable water. The local health authorities have several matters about which they must certify, now including acceptability of the testing laboratory that approves the water purification equipment. The Department does not expect certification to occur without ample justification. Finally, this requirement for certification before occupancy allows all concerned to be assured that the correct technical decisions have been adopted. Clearly, water from the site where equipment is to be installed can be tested in advance of the equipment's installation, to afford local health authorities (and the mortgagor) an adequate demonstration that the equipment is effective before the expense of on-site installation is incurred. Nevertheless, the commenter is essentially correct in stating that the equipment must be certified as in operation on-site.

Comment: The same commenter suggested that the health authority's power to certify created the possibility that the local authority could add requirements of its own—unspecified in the rule—to the basic requirement that the water quality provided by the equipment be satisfactory.

Response: With reference to a state agency or local health authority's adding requirements, local knowledge will be required to control local problems. EPA has established the requirements, but the states are responsible for enforcement. The normal procedure for local requirements is to compare them with HUD criteria and enforce the higher standard. HUD will not object or interfere with the enforcement of higher local or state requirements.

Comment: Installation, monitoring, and servicing are limited by the rule to an "approved" entity selected by the local health authority. The commenter urged that, again, this placed too much discretion in local authority, and recommended that the rule instead provide that a list of acceptable installers, monitors and servicers be specified. (The commenter asserted that only one nationwide certification program exists for identifying qualified servicers—the Certified Water Specialist program administered by the Water Quality Association—the commenting organization.)

Response: The Department believes that mortgage insurance that can be in force on a property for thirty years and beyond must provide the protection afforded by this rule in the most permanent manner possible. This results in placing basic responsibilities with state and local governments, rather than with business or industry groups that can change with little or no notice. The Department has inadequate information on the ever-changing universe of local water purification industry members. This function is better suited to local agencies with first hand information available on the activities of nearby businesses.

The question on the number of certifying organizations available to serve the needs of these requirements currently presents a small problem. However, the promulgation of this rule can be expected to result in the activation of a number of companies with skills in this area.

Comment: An association representing state drinking water administrators expressed some concern about the impact of the rule on state and territorial drinking water programs. The commenter observed that the responsibilities placed on health authorities came at a time when drinking water agencies are experiencing a shortfall in resources to adopt and implement Safe Drinking Water Act amendments. Additionally, some doubt was expressed whether some health agencies had the legal authority to certify point-of-entry water purification systems, or to enforce the performance of service contractors.

Response: This comment reintroduces the problem of cost from the government aspect. Again, the Department believes that it has no choice. If local or state governments lack either resources or authority, the Department will be unable to provide mortgage insurance for properties with water access problems of this type, while providing necessary protection for the mortgagors. The Department recognizes that the rule is not likely to result in availability, in all localities, of mortgage insurance for properties requiring water purification systems.

Comment: A manufacturer argued that the rule's requirement that local health authorities certify the equipment's sufficiency to assure an uninterrupted supply of safe and potable water was unnecessary in light of the requirements for a monitoring and maintenance plan. The commenter questioned how a local authority would be able to make the determination, given the need to maintain the equipment in accordance with a monitoring and maintenance plan. It was urged that the local health authority's role be dropped from the rule.

Response: The Department feels that the importance of the functions required by this rule necessitates participation by the local health authority. There is no alternative agency or group with the assured staying power of local and State governments. These agencies possess the skills, are closer to the problem and will have the facilities to accomplish the work where they agree to take part in this program. It is expected that assurances of continuing acceptable water quality will involve both review of monitoring records and making provision of water analysis tests.

Comment: A lender who said that he had contacted three health departments stated that none of the three would agree to approve a Plan of the kind described in the proposed rule, because to do so, they said, would risk legal liability in the event of system failure of future contamination to the water consumed by the homeowner.

Response: The Department is not able to determine the degree or extent of liability risk associated with this regulation. This regulation is designed to provide safeguards that will minimize these risks if all the requirements are observed. Undeniably, it is possible that some local health authorities might decline to undertake the role outlined in the rule. Nothing in the rule compels a local authority to carry out this function.

Comment: The health authorities also stated (according to the commenting lender) that contractors would be unable to afford the cost of product liability insurance in an amount necessary to provide insurance to the health authority as well as to the contractor performing inspections. The cost of such insurance, the lender-commenter observed, would have to be passed on to the purchasing homeowner.

Response: Again, where local resources or the willingness to assume responsibility are unavailable to observe the requirements of this regulation, necessary protection cannot be provided for the mortgagor, and the Department will not be in a position to offer mortgage insurance for properties requiring individual water systems.

Comment: Finally, according to the commenter, the health authorities he interviewed said that they would not act to provide "approval" of selected contractors to provide inspections, servicing, etc., because this, too, would risk legal liability for the health authority.

Response: Identification and approval of contractors to provide the necessary services to individual water systems is an essential part of the program. Someone from the local jurisdiction, or from the state, must be willing to assume responsibility for a monitoring plan for this type of equipment. Where P.O.E. or P.O.U. equipment is used by local water companies, EPA rules at 40 CFR parts 141 and 142 require the state or its agency to review and approve a monitoring plan that includes a service plan for the equipment. While in the case of this rule, state/local government participation will be voluntary, the parallel process under the EPA rules should mean that experience with similar monitoring responsibilities exists, and this experience should pave the way for state/local participation in monitoring processes like those outlined in today's rule.

Comment: Given the circumstances he described (summarized above), the lender suggested the adoption of the regulation as proposed would "appear to be an exercise in futility." The commenter recommended a more informal approach—requiring the installation of an appropriate treatment device when contamination is apparent, and having the mortgagor execute a certificate acknowledging his awareness of the contamination and agreeing to maintain the treatment equipment in the future. Going beyond these minimal requirements, the lender said, will prove to be impractical.

Response: The Department has an obligation under the law to act in a cautious and prudent manner in establishing this new procedure. Both life safety and health are at risk for mortgagors or occupants of these properties. In addition, lenders, and the Department as insurer, are entitled to procedures that are designed to assure more than minimal attention to the future livability of the insured property. These considerations are too important to allow either equipment or procedures that are less safe than can be provided through the best available means.

Comment: A state organization representing environmental health officials commented that while a program to allow point-of-entry devices for the financing of existing dwellings might be justifiable, "we find no justification for allowing the financing of new housing under the same criteria." It is inappropriate, the commenter stated, "to knowingly allow new housing stock to be created and financed where the water supply is unsafe. This is a practice contrary to sound public health policy, creating new populations-at-risk which previously did not exist."

With reference to existing housing stock, the commenter did not oppose the use of point-of-entry devices, but stated that the certification process proposed (whether for existing or new housing) is "unworkable and unacceptable to local environmental health authorities in California."

Lender and borrower, the commenter continued, are placed in a "Catch 22" position: While the rule leaves local health officials free not to participate, it suggests to borrowers that a procedure exists for permitting insured financing to be secured.

Response: The thrust of these comments appears to be opposition to the legislation, rather than the methods HUD will employ to comply with the Act.

Comment: The commenter stated that liability and practical concerns would lead to the unwillingness of local health authorities to participate in the certification process—expecially in California. The rule would place local health authorities in a role not authorized by law, and local legal counsels will advise against any such role. Similarly, the commenter said, local health authorities would be unwilling to certify that a point-of-entry system would provide an uninterrupted supply of safe and potable water. Additionally, in California, all point-of-entry devices must have the approval of the State Department of Health Services. Unless a particular device was on the State's approved list, local authorities would have no authority to approve it.

Response: Where a state or locality is not able to participate in this program, mortgage insurance cannot be provided for properties with these particular problems. The local or state health authority is absolutely necessary to the provision of protection of life safety and health afforded by the procedures outlined in this regulation.

V. Requests for Changes in the Rule

Comment: An environmental engineer for a state health and rehabilitative service recommended withdrawing the rule as now written, in order to allow "more time to analyze the situation." The commenter suggested that different areas of the country might require specific plans to meet their needs.

Response: Different types of water contamination require different types of treatment devices and may need individual plans to meet their needs. However, this is not new. Water contamination of different types is being treated on a daily basis, using the necessary equipment to provide safe drinking water. Monitoring plans are in effect and the equipment is being serviced. The Department does not agree that waiting longer to implement a rule to carry out the statutory direction would lead to a better rule.

Comment: Another commenter asked for more information about the estimated number and location of single family developments that would be affected by the rule, and for clarification of how the standards would be applied to developments of single family homes.

Response: No means exists accurately to estimate the number of properties that will apply for mortgage insurance under this authority. Under information collection requirements in the proposed rule, the Department has estimated 1000 applicants per year, nationwide. This may well be a generous estimate—especially after the needs of an initial group of mortgagors, who may have a present need, have been satisfied.

Comment: A commenter representing an association of safe drinking water administrators asked whether the rule would authorize local health authorities to apply drinking water standards that were specific to single family developments, or whether they would be called upon to apply the requirements applicable to public water systems. The commenter observed that 1986 Safe Drinking Water Act amendments required public systems to comply with standards for 83 drinking water contaminants, as well as filtration and disinfection requirements. While application of this standard to single family developments would be "admirable," the commenter said, additional research would be required to determine the costs, to the home buyer and to the state agency, of doing so.

Response: The requirements of the SDW Act only apply to private or public systems that serve more than 25 persons. To assure that all mortgagors have access to potable water, HUD has decided that, to qualify for FHA insurance, homes in systems serving fewer than 25 persons (including individual homes with their own water systems) must comply either with local or state water quality standards or, in the absence of these standards, with the relevant EPA standard.

Comment: An equipment manufacturer recommended that service contractors, rather than manufacturers, be called upon to provide maintenance information, because local service contractors will be more knowledgeable about the specific water quality, and thus more qualified to determine maintenance and replacement needs.

In general, the manufacturer asked for a rule that allowed for more flexibility regarding product testing, and one that permitted point-of-use devices.

Response: The Department believes that the basic responsibility for the manufacture, establishment of maintenance needs, as well as directions for installation and use of the equipment lies with the equipment manufacturer. The role of the service contractor should be to follow the directions and repeat any necessary instructions supplied by the equipment manufacturer. Proper maintenance or servicing of the equipment must be assured.

Point-of-Use devices have been included in this final rule, as discussed under part VII of the preamble.

VI. Support for Use of Residential Water Treatment Systems

Comment: A trade association representing the ground water industry stated its full support for the rule's intention to provide a realistic option to "the importation of water by sometimes extraordinarily expensive water pipelines."

VII. Point of Entry and Point of Use

Comment: Considerable comment was received from industry sources and from the sponsoring Member of Congress on this issue. In general, it was urged that point of use devices be authorized by the rule, in circumstances where dangers from ingestion were the only water-related health concerns present.

A manufacturers' association asked that the rule be expanded to permit "point-of-use" as well as point-of-entry devices. The commenter expressed its view that the rule's prohibition of point-of-use devices "undercuts the plain language of the enabling statute." According to the commenting association, the limitation would deprive consumers of a safe alternative in circumstances when it would prove too costly—and unnecessary—to remove a particular contaminant from all household water, rather than just drinking water.

Quoting the statute (12 U.S.C. 1701z-15(a)), the commenter asserted that the key provision was that the water purification equipment be capable of providing bacterially and chemically safe drinking water. The commenter quoted the following EPA regulations:

"A State may require a public water system to use bottled water or point-of-use devices as a condition for granting an exemption from the requirements of § 141.61(a) of this part." (40 CFR 142.57)

"The State may require a public water system to use bottled water or point of use devices or other means as a condition of granting a variance or an exemption from the requirements of § 141.61(a), to avoid an unreasonable risk to health." (40 CFR 142.62(e))

Finally, the association quoted the amendment's sponsor, Representative Douglas Bereuter of Nebraska, in an August 11, 1988 floor statement about his intention in introducing the amendment earlier. Mr. Bereuter made clear that his intention had been that point-of-use devices providing safe drinking water would be acceptable, unless a contaminant posed a health risk (when the water was used for non-drinking purposes). Remarks of Rep. Bereuter, 134 Cong. Rec. H6969 (Daily Ed.) August 11, 1988.

Summarizing, the commenter urged that the rule allow point-of-use devices when the only contaminant which was of concern in a particular fact situation was drinking water-related. The association "readily acknowledges" that point-of-use equipment will not protect against contaminants contained in water provided at other outlets. "(However) if there is a contaminant which is not removed or reduced by a point-of-use device, then the local public health authority would not certify its use."

The congressional sponsor of the amendment on which HUD's proposed rule is based, Douglas Bereuter of Nebraska, provided comments on the point-of-use issue as well. Mr. Bereuter affirmed that it was his intention as sponsor that point-of-use systems be allowed.

An equipment manufacturer urged that HUD abandon the prohibition on point-of-use equipment, on grounds that the limitation was unrealistic and costly to consumers. It was suggested that point-of-entry requirements should be applied only where a contaminant poses a significant health risk from "non-ingestion exposure routes."

Response: The Department has given careful consideration to the question of point-of-use devices. After reviewing the comments on this subject, HUD has determined that, under proper circumstances, point-of-use devices will afford the same level of protection that will be obtained with point-of-entry devices. This level of protection can only be provided by supplying one of these devices for each water faucet connected to the residential water system. Without this kind of thorough protection, uninformed people—new occupants or visitors—may be exposed to unnecessary danger. Accordingly, the final rule has been modified to permit point-of-use devices where their use is employed on all water outlets in a residential water system.

VIII. Regulations Too Onerous

Comment: An association representing manufacturers and sellers of water quality treatment products expressed its concern that the rule would impose so many unnecessary and onerous requirements on potential users of water treatment products that is would be "highly unlikely that many homes will be equipped with these devices." The commenter quoted the rule as evidence that HUD itself recognized this fact.

Response: The Department is aware that this is a complex rule. The essence of this rule is the protection of life safety and health through the use and application of highly sophisticated technical equipment on an individual home basis. The only responsible approach to this problem on a national scale is through the use of proven procedures employing the best available trained personnel. Any reduction in the level of protection afforded would be less than responsive to section 424 of the Housing and Community Development Act of 1987.

Comment: The same commenter argued that the rule's provision for approval of water purification equipment by a nationally recognized testing laboratory was objectionable. The commenter asserted that only one private foundation laboratory exists, and that organization, the National Sanitation Foundation, certifies products to standard for removal of only 40 of more than 200 contaminants on the EPA list of primary drinking water contaminants. That laboratory, according to the commenter, can only certify point-of-use equipment. Accordingly, the commenter believes that the combination of the third-party certification requirement and the point-of-entry requirement in the rule would prevent the use of any point-of-entry purification systems.

If HUD insists on equipment certification, the commenter continued, it should permit either third party approval (it is unclear what the commenter believed this would entail) or "self-certification by the unit's manufacturer."

The regulation's failure to define a "nationally recognized testing laboratory" or to identify any such facilities creates an ambiguity, the commenter said, that would give too much discretionary power to local health officials. This power could lead to an effective monopoly for product testing and approval services—at the expense of consumer choice and cost.

In summary, the association recommended that testing be conducted by the manufacturer using "scientifically valid test methods," and that the installer provide the consumer with a water test to show that the product is performing as promised. The installer should also be required to provide the consumer with a maintenance schedule for filter changes, the commenter suggested.

A water purification equipment manufacturer expressed similar concerns. The commenter stated that it had numerous products certified under the standards of the only nationally recognized laboratory, the National Sanitation Foundation, but that NSF standards do not cover all products. For that reason, the commenter urged that it would be inappropriate to mandate that certification by a testing entity be a universal requirement. The manufacturer asked that the rule be modified to provide that equipment must be approved either by a nationally recognized testing laboratory or "tested using scientifically valid test methods."

Response: The Department has discussed this matter with staff at the National Sanitation Foundation, including the question of the number of contaminants for whose removal the Foundation can certify products. The response is that the Foundation is in the process of developing tests and protocols for the entire current list of contaminants published by EPA, and will continue to develop these methodologies for contaminants identified on future lists published by EPA. These tests and protocols extend to both point-of-use and point-of-entry equipment. Foundation personnel explain that lack of requirements has resulted in lack of demand in this area, and that new attention to these needs (such as this regulation) can be expected to result in greater demand, technical attention and laboratory participation in the development of treatment facilities for individual wells.

The question of third party certification on the manufacture of this equipment, as opposed to self-certification, has been considered by the Department. Third party certification serves to provide a periodic check on the quality control procedures of the manufacturer to help assure safe functional equipment. The Department has decided that equipment providing protection to life safety and health fully justifies this level of inspection.

The question of providing a definition for "nationally recognized testing laboratory" poses a different problem. "Nationally recognized testing laboratory" is a term of art used at times to describe a professionally competent organization with licensed personnel, appropriate, properly calibrated equipment and a record of successful experience in analysis and approval of the work described. To reduce the apparent ambiguity of this requirement, the Department has added that such a laboratory must be acceptable to the local or State health authority.

Comment: Representative Bereuter also criticized this aspect of the rule. "My understanding is that no lab test is able to duplicate the many and varied conditions of non-potable water, and thus that any lab test will not accurately reflect whether a purification system will work in all cases. Only a test of the device on the site in which it is to be used would seem to prove accurate."

Response: There is no question that untreated water will have to be tested to provide guidance in the selection of appropriate treatment devices. The final proof of the availability of bacterially and chemically safe drinking water can only be made after treatment devices are in operation. This is the intent of §§ 203.52(b)(3) and 234.64(b)(3).

IX. Notice to Applicant Mortgagors

Comment: A manufacturers' association also questioned the rules's proposed requirement that mortgagors be given notice that a property has a "hazardous water supply." Many public water systems, the commenter asserted, operated under variances from the EPA because of the presence of one or more contaminants in their water supply, but these cities are not required to state that their water is "hazardous." The commenter recommended that no such notice be required, or, alternatively, that the term "hazardous" be replaced with a notice that the "water supply does not meet applicable federal, state or local standards."

Response: The commenter's observation concerning public water systems is correct. However, public systems are required to have a state-approved monitoring plan certified that indicates their maintenance schedule for the system. These monitoring plans include testing and maintenance on a regular basis to assure the state that the water system is safe for human consumption. Copies of the water tests must be submitted to the state on a regular basis. The state is required by EPA to require adequate certification of performance and field testing. In the case of private systems, with no public organization to undertake these functions, it appears both reasonable and prudent to provide case-by-case notice to the occupant of a property with a water supply that may be hazardous to the health of a family.

X. Administration of Escrow Account for Maintenance, Repair and Reserves for Replacement

Comment: A loan servicer commented that while administering an escrow

account for maintenance, repair and reserves for replacement of water purification equipment would be a "servicing nightmare," as a technical matter it could be done.

Response: The Department is aware that servicing escrow accounts—particularly accounts of the type involved in this rule—presents difficulties for a mortgagee. However, there is no practical alternative.

Comment: The Mortgage Bankers Association commented that while the rule proposes that mortgagees escrow estimated amounts for maintenance of the equipment, no remedy is proposed for handling costs that exceed the amount in escrow. In addition, the Association observed that the plan requirements outlined in the rule, if not flexibly administered, carried the potential to be abused by service contractors to the detriment of mortgagors and mortgagees.

Escrow shortages caused by repair or replacement expenses that exceeded the amount escrowed for this purpose would only be acceptable to the mortgagee if the rule provided flexibility to collect the additional funds needed within 30 days. Otherwise, it would be unreasonable to expect lenders to assume liability for expenses over which they have no control, and no expert knowledge in estimating.

Response: Escrow overruns should occur relatively infrequently in this program. When overruns do occur, they are expected to be handled through routine procedures. These include increased payments by the mortgagor, and in some cases, direct assessments.

XI. Maintenance Contracts

Comment: A mortgage lender from California suggested that the organization or individual who contracts to provide maintenance would have to be well-acquainted with the equipment to be serviced, and at least in some states, would need appropriate licensing.

Response: Servicing organizations will have to be fully acquainted with manufacturers instructions for the installation and maintenance of water purification equipment. The certification requirements for local health authorities are intended, insofar as possible, to assure that only qualified organizations will be accepted. Assuring that state licensing requirements are met will be the joint responsibility of local health authorities and the servicing organizations themselves.

Comment: The same commenter estimated that annual testing fees could run as high as $500, depending on the level of testing required. Since this expense would have to be a part of the escrowed account for maintenance, repair and replacement, it would appear that the escrow might prove overly burdensome for the average FHA buyer.

Response: The Department is aware of this potential problem. However, HUD sees no alternative to equipment and upkeep costs necessary to provide chemically and bacterially safe drinking water. Presumably the problem will be self-correcting: If the water supply available to a particular property poses equipment and upkeep costs beyond the mortgagor's willingness to pay, the suitability of the property for residential housing will be judged negatively.

Comment: The MBA reflected that the rule places mortgagors and mortgagees at the mercy of specialized manufacturers, installers and consultants. Particularly in rural areas, the commenter stated, where the number of qualified water contractors may be limited, the tendency may be to make very conservative judgments of potability. This could lead to abuses by contractors. Water that is perfectly safe with a point-of-use system, for example, may be deemed unsafe—not because it is hazardous to mortgagors, but because it would be more profitable to contractors to install a point of entry system.

The maintenance, disclosure and escrow requirements outlined in HUD's proposal, the MBA stated, would be very difficult for lenders to administer. HUD field offices must be absolutely certain that the addition of water purification equipment is in the best interest of mortgagors.

Response: Health authority participation, and laboratories run by professional and usually licensed personnel, should, in HUD's view, generally avert the problem of fraudulent representation of water quality.

Dependency on state and local governments, and the use of qualified laboratories will serve the purpose of assuring the need for water purification equipment, as well as assuring the designation of correct equipment and procedures to remove water impurities.

Other Matters

Paperwork Reduction Act

The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Sections 203.52 and 234.64 of this rule have been determined by the Department to contain collection of information requirements. Information on these requirements is provided as follows:

Description of the Need for Information and its Proposed Use: This information collection will enable HUD to assure that the parties to an insured mortgage transaction involving property without a water supply that is safe and potable in the absence of treatment have taken adequate steps to safeguard the health and safety of inhabitants of the insured dwelling. Submission of the required information to HUD will provide a means for the Department to monitor the efficacy of the procedures provided in the rule, and will ensure that these procedures are carried out as a prerequisite to the availability of mortgage insurance.

The Department solicits comments on the reporting and recordkeeping burdens associated with the "Plan" set out as a feature of this rule, including comments on the Department's estimates of the time required to complete the Plan. Comments are invited on Ways that this burden could be reduced.

Form Number: None.

Respondents: Mortgagors and mortgagees (jointly) who proposed to enter into insured mortgage transactions involving single family dwellings in areas with water supplies requiring treatment.

Frequency of Submission: One submission per insured mortgage transaction.

Reporting Burden:

No. of Respondents	X	Frequency of Response	X	Hours Per Response
7000		1 per year		1.357 hrs.

Total Burden Hours: 9500 hours.

(These estimates assume: 1000 applicants per year, each requiring a total of 9.5 hours in the first year to complete collection of information responses required by the rule. The 9.5 hours includes time for preparation of plans, certifications, service contracts, preparation of escrow reviews, mortgagee certifications, and annual water analyses.

Thereafter, in "out" years, previous year applicants would require one hour per year to complete water analysis—i.e., to obtain samples and tests. Accordingly, in year one the total information burden is estimated at 9500 hours, in year two, 10500 hours (9500 for estimated 1000 applicants + 1000 hours for annual water analysis for previous year's applicants). Burden thereafter would increase by 1000 hours annually, because of accumulation of applicants requiring follow-up testing.

NEPA

A Finding of No Significant Impact with respect to the environment has been made with reference to the content of this final rule (as revised) in accordance with HUD regulations at 24 CFR part 50, with implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of Rules Docket Clerk at the above address.

Executive Order 12291

This rule does not constitute a "major rule" as that term is defined in section 1(d) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The per-unit cost of installing water purification equipment can vary greatly, in a range running from a few hundred dollars to several thousand dollars. However, the estimated cumulative cost of this equipment—even assuming the maximum of 1000 insurance applications under this program in a year's time—could not even approach the dollar costs necessary to cause an economic effect of the magnitude described in Executive Order 12291. The Department estimates that gross equipment costs for the maximum 1000 homes seeking insurance would fall within a range of $1.5 to $2 million per year. In any event, the total cost of this equipment would be an inappropriate measure of the economic burden imposed by the rule, since some portion of these homes would be constructed and equipped with water purification equipment, whether or not FHA mortgage insurance was sought in the financing of the mortgage.

Regulatory Flexibility

The Secretary, in accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), has reviewed this rule before its publication and by approving it certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule will provide an opportunity, to mortgagors in areas with poor access to public water supplies, to secure FHA mortgage insurance upon demonstrating that an effective means has been arranged to secure safe drinking water through the use of individual water purification systems. Only a relatively small number of mortgagees are expected to be provided mortgage insurance under the circumstances described in the rule. While the requirements associated with the insurance of mortgages under these circumstances are more strenuous than those facing mortgagors and mortgagees in other single family transactions, they are considered the minimum necessary for accomplishing the goal of affording access to mortgage insurance only under circumstances that will assure the safety of the water supply serving the dwelling unit. Given the subject matter, no effective means exist to reduce the regulatory burden to be applied, as it relates to small mortgagees or other small entities affected by the rule.

Semiannual Agenda

This rule was listed as sequence number 1399 on the Department's Semiannual Agenda of Regulations published on October 21, 1991 (56 FR 53380, 53407) in accordance with Executive Order 12291 and Regulatory Flexibility Act.

Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order. While the rule provides for the exercise of certain important responsibilities by local or state health authorities, associated with the provision of mortgage insurance, the functions described in the rule are not mandated; local or state health authorities will remain free to participate in the process described in the rule, or to refrain from so participating.

Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule provides a means, under special circumstances, for securing FHA mortgage insurance for otherwise-uninsurable properties, and a means to assure the safety and potability of drinking water serving the premises. Any effect on the family would likely be indirect and insignificant.

Accordingly, the Department proposes to amend 24 CFR parts 200, 203 and 234 as follows:

PART 200—INTRODUCTION

1. The authority citation for part 200 would continue to read as follows:

Authority: Titles I and II, National Housing Act (12 U.S.C. 1701–1715z–18); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. Section 200.926d would be amended by revising paragraph (f)(2)(ii) to read as follows:

§ 200.926d Construction requirements.

* * * * * *

(f) * * *

(2) * * *

(ii) Water that, to be potable, requires continuing or repetitive treatment to be safe bacterially or chemically shall also comply with the requirements of 24 CFR 203.52 or 24 CFR 234.64, whichever is applicable.

* * * * * *

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

3. The authority citation for part 203 would continue to read as follows:

Authority: Secs. 203, 211, National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d). In addition, subpart C is issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

4. A new § 203.52 would be added to subpart A, to read as follows:

§ 203.52 Acceptance of individual residential water purification equipment.

If a property otherwise eligible for insurance under this part does not have access to a continuing supply of safe and potable water without the use of a water purification system, the requirements of this section must be complied with as a condition to acceptance of the mortgage for insurance. The mortgagee must provide appropriate documentation with the submission for insurance endorsement to address each of the requirements of this section.

(a) *Equipment.* Water purification equipment must be approved by a nationally recognized testing laboratory acceptable to the local or state health authority.

(b) *Certification by local (or state) health authority.* A local (or state)

health authority certification must be submitted to HUD which certifies that:

(1) A point-of-entry or point-of-use water purification system is currently in operation on the property. If the system in operation employs point-of-use equipment, the purification system must be employed on each water supply source (faucet) serving the property. Where point-of-entry systems are used, separate water supply systems carrying untreated water for flushing toilets may be constructed.

(2) The system is sufficient to assure an uninterrupted supply of safe and potable water adequate to meet household needs.

(3) The water supply, when treated by the equipment, meets the requirements of the local (or state) health authority, and has been determined to meet local or state quality standards for drinking water. If neither state nor local standards are applicable, then quality shall be determined in accordance with standards set by the Environmental Protection Agency (EPA) pursuant to the Safe Drinking Water Act. (EPA standards are prescribed in the National Primary Drinking Water requirements, 40 CFR parts 141 and 142.)

(4) There exists a Plan providing for the monitoring, servicing, maintenance, and replacement of the water equipment, which Plan meets the requirements of paragaph (f) of this section.

(c) *Mortgagor notice and certification.* (1) The prospective mortgagor must have received written notification, before the mortgagor signed a sales contract, that the property has a hazardous water supply that requires treatment in order to remain safe and acceptable for human consumption. The notification to the mortgagor must identify specific contaminants in the water supply serving the property, and the related health hazard arising from the presence of those contaminants.

(2) The mortgagor must have received, with the notification described in paragraph (c)(1) of this section, a written good faith estimate of the maintenance and replacement costs of the equipment necessary to assure continuing safe drinking water.

(3) A copy of the notification statement (including cost estimates), dated before the date of the sales contract, and signed by the prospective mortgagor to acknowledge its receipt, must accompany the submission for insurance endorsement. If a sales contract is signed in advance of the disclosure required by this paragraph, another sales contract must be executed after the information is provided to the prospective mortgagor and he or she has acknowledged receipt of the disclosure.

(4) The prospective mortgagor must sign a certification, substantially in the form set out in this paragraph (c)(4), at the time the application for mortgage credit approval is signed. This certification must be submitted to HUD:

Mortgagor's Certificate. I hereby acknowledge and understand that the home I am purchasing has a water purification system which I am responsible for maintaining.

I understand that the individual water supply is unsafe for consumption unless the system is operating properly. I am aware that if I do not properly maintain the system, the water supply will not be purified or treated properly, thereby rendering the water supply unsafe for consumption.

I also understand that the Department of Housing and Urban Development does not warrant the condition of the property, will not give me any money for repairs to the water purification system, and has relied upon the local (or state) health authority to assure that the water supply, when processed by properly maintained equipment, is acceptable for human use and consumption.

[Mortgagor's signature and date]

(d) *Service contract.* Before mortgage closing, the mortgagor must enter into a service contract with an organization or individual specifically approved by the local (or state) health authority to carry out the provisions of the required Plan for servicing, maintenance, repair and replacement of the water purification equipment. A copy of the signed service contract must be provided to HUD.

(e) *Escrow for maintenance and replacement.* The mortgagee must establish and maintain an escrow account which provides for the accumulation of funds paid with the mortgagor's monthly mortgage payment adequate to assure proper servicing, maintenance, repair and replacement of the water purification equipment. The amount to be collected and escrowed by the mortgagee shall be based upon information provided by the manufacturer for the maintenance and replacement of the water purification equipment and for other charges anticipated by the service contractor. The initial monthly escrow amount shall be stated in the Plan. Disbursements from the account will be limited to costs associated with the normal servicing, maintenance, repair or replacement of the water purification equipment. Disbursements may only be made to the service contractor or its successor, to equipment suppliers, to the local (or state) health authority for the performance of testing or other required services, or to another entity approved by the health authority. So long as water purification remains necessary and the mortgage is insured by HUD, the mortgagee must maintain the escrow account.

(f) *Approved Plan.* A Plan, in the form of a contract entered into by the mortgagor and mortgagee and approved by the local (or state) health authority, must set out conditions that must be met by the parties as a condition to insurance of the mortgage by HUD. To be approved by the health authority:

(1) The Plan must set forth the respective responsibilities to be assumed by the mortgagor and the mortgagee, as well as the other entities who will implement the Plan, i.e., the health authority and the service contractor. In particular:

(i) The Plan must set out the responsibilities of the health authority for monitoring and enforcing performance of the service contractor, including any successor contractor that the health authority may later have occasion to name. By its approval of the Plan, the health authority documents its acceptance of these responsibilities, and the Plan should so indicate;

(ii) The Plan must provide for the monitoring of the operation of the water purification equipment, as well as for servicing (including disinfecting), and for repairing and replacing the system, as frequently as necessary, taking into consideration the system's design, anticipated use, and the type and level of contaminants present. Installation, servicing, repair and replacement of the water purification system must be performed by an individual or organization approved for the purpose by the local (or state) health authority and identified in the Plan. In meeting the requirements of paragraph (f)(1)(ii) of this section, the Plan may incorporate by reference specific terms and conditions of the service contract required under paragraph (d) of this section.

(iii) Under the Plan, responsibility for monitoring the performance of the service contractor and for assuring that the water purification system is properly serviced, repaired, and replaced rests with the local (or state) health authority that has given its approval to the Plan. The Plan must confer on the health authority all powers necessary to effect compliance by the service contractor. The health authority's powers shall include the authority to notify the mortgagor of any noncompliance by the service contractor. The plan must provide that, upon any notification of noncompliance received from the health authority, the mortgagor shall have the right to discharge the service contractor for cause and to appoint a successor organization or individual as service contractor; and

(iv) The Plan must provide for the mortgagor to make periodic escrow payments necessary for the servicing, maintenance, repair and replacement of the water purification system, and for the mortgagee to disburse funds from the escrow account as required, to the appropriate party or parties.

(2) The Plan must provide that if the dwelling served by the water purification system is refinanced, or is sold or otherwise transferred with a HUD-insured mortgage, the Plan will:

(i) continue in full force and effect;

(ii) impose an obligation on the mortgagor to notify any subsequent purchaser or transferee of the necessity for the water purification system and for its proper maintenance, and of the obligation to make escrow payments; and

(iii) require the mortgagor to furnish the purchaser with a copy of the Plan, before any sales contract is signed.

(g) *Periodic analysis.* Any Plan developed in accordance with this section must provide that an analysis of the water supply shall be obtained from the local (or state) health authority no less frequently than annually, but more frequently, if determined at any time to be necessary by the health authority or by the service contractor.

5. In subpart C, § 203.550 would be amended by revising the first sentence in paragraph (c), and by adding a new second sentence to paragraph (c), to read as follows:

§ 203.550 Escrow accounts.

* * * * *

(c) Except in the case of escrow accounts established for the purpose of monitoring, servicing, maintenance and replacement of water purification equipment in accordance with § 203.52 or § 234.64 of this chapter, the mortgagee's estimate of escrow requirements shall be based on the best information available as to probable payments which will be required to be made from the account in the coming year. Mortgagees may, in the case of escrow accounts created for purposes of § 203.52 or § 234.64, estimate escrow requirements based on the best information available as to probable payments which will be required to be made from the account on a periodic basis throughout the period during which the account is maintained.

* * * * *

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

6. The authority citation for part 234 continues to read as follows:

Authority: Secs. 211, 234, National Housing Act (12 U.S.C. 1715b, 1715y); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)) Section 234.520(a)(2)(ii) is also issued under sec. 201(a), National Housing Act (12 U.S.C. 1707(a)).

7. A new § 234.64 would be added to subpart A, to read as follows:

§ 234.64 Acceptance of individual residential water purification equipment.

If a property otherwise eligible for insurance under this part does not have access to a continuing supply of safe and potable water without the use of a water purification system, the requirements of this section must be complied with as a condition to acceptance of the mortgage for insurance. The mortgagee must provide appropriate documentation with the submission for insurance endorsement to address each of the requirements of this section.

(a) *Equipment.* Water purification equipment must be approved by a nationally recognized testing laboratory acceptable to the local or state health authority.

(b) *Certification by local (or state) health authority.* A local (or state) health authority certification must be submitted to HUD which certifies that:

(1) A point-of-entry or a point-of-use water purification system is currently in operation on the property. If the system in operation employs point-of-use equipment, the purification system must be employed on each water supply source (faucet) serving the property. Where point-of-entry systems are used, separate water supply systems carrying water for flushing toilets may be constructed.

(2) The system is sufficient to assure an uninterrupted supply of safe and potable water.

(3) The water supply, when treated by the equipment, meets the requirements of the local (or state) health authority, and has been determined to meet local or state quality standards for drinking water. If neither state or local standards are applicable, then quality shall be determined in accordance with standards set by the Environmental Protection Agency (EPA) pursuant to the Safe Drinking Water Act. (EPA standards are prescribed in the National Primary Drinking Water requirements, 40 CFR parts 141 and 142.).

(4) Ther exists a Plan providing for the monitoring, servicing, maintenance, and replacement of the water equipment, which Plan meets the requirements of paragraph (f) of this section.

(c) *Mortgagor notice and certification.* (1) The prospective mortgagor must have received written notification, before the mortgagor signed a sales contract, that the property has a hazardous water supply that requires treatment in order to remain safe and acceptable for human consumption. The notification to the mortgagor must identify specific contaminants in the water supply serving the property, and the related health hazard arising from the presence of those contaminants.

(2) The mortgagor must have received, with the notification described in paragraph (c)(1) of this section, a written good faith estimate of the maintenance and replacement costs of the equipment necessary to assure continuing safe drinking water.

(3) A copy of the notification statement (including cost estimates), dated before the date of the sales contract, and signed by the prospective mortgagor to acknowledge its receipt, must accompany the submission for insurance endorsement. If a sales contract is signed in advance of the disclosure required by this paragraph, another sales contract must be executed after the information is provided to the prospective mortgagor and he or she has acknowledged receipt of the disclosure.

(4) The prospective mortgagor must sign a certification, substantially in the form set out in this paragraph (c)(4), at the time the application for mortgage credit approval is signed.

This certification must be submitted to HUD:

Mortgagor's Certificate. I hereby acknowledge and understand that the home I am purchasing has a water purification system which I am responsible for maintaining.

I understand that the individual water supply is unsafe for consumption unless the system is operating properly. I am aware that if I do not properly maintain the system, the water supply will not be purified or treated properly, thereby rendering the water supply unsafe for consumption.

I also understand that the Department of Housing and Urban Development does not warrant the condition of the property, will not give me any money for repairs to the water purification system, and has relied upon the local (or state) health authority to assure that the water supply, when processed by properly maintained equipment, is acceptable for human use and consumption.

[Mortgagor's signature and date]

(d) *Service contract.* Before mortgage closing, the mortgagor must enter into a service contract with an organization or

individual specifically approved by the local (or state) health authority to carry out the provisions of the required Plan for servicing, maintenance, repair and replacement of the water purification equipment. A copy of the signed service contract must be provided to HUD

(e) *Escrow for maintenance and replacement.* The mortgagee must establish and maintain an escrow account which provides for the accumulation of funds paid with the mortgagor's monthly mortgage payment adequate to assure proper servicing, maintenance, repair and replacement of the water purification equipment. The amount to be collected and escrowed by the mortgagee shall be based upon information provided by the manufacturer for the maintenance and replacement of the water purification equipment and for other charges anticipated by the service contractor. The initial monthly escrow amount shall be stated in the Plan. Disbursements from the account will be limited to costs associated with the normal servicing, maintenance, repair or replacement of the water purification equipment. Disbursements may only be made to the service contractor or its successor, to equipment suppliers, to the local (or state) health authority for the performance of testing or other required services, or to another entity approved by the health authority. So long as water purification remains necessary and the mortgage is insured by HUD, the mortgagee must maintain the escrow account.

(f) *Approved Plan.* A Plan, in the form of a contract entered into by the mortgagor and mortgagee and approved by the health authority, must set out conditions that must be met by the parties as a condition to insurance of the mortgage by HUD. To be approved by the health authority:

(1) The Plan must set forth the respective responsibilities to be assumed by the mortgagor and the mortgagee, as well as the other entities who will implement the Plan, i.e., the health authority and the service contractor. In particular:

(i) The Plan must set out the responsibilities of the health authority for monitoring and enforcing performance of the service contractor, including any successor contractor that the health authority may later have occasion to name. By its approval of the Plan, the local (or state) health authority documents its acceptance of these responsibilities, and the Plan should so indicate;

(ii) The Plan must provide for the monitoring of the operation of the water purification equipment, as well as for servicing (including disinfecting), and for repairing and replacing the system, as frequently as necessary, taking into consideration the system's design, anticipated use, and the type and level of contaminants present. Installation, servicing, repair and replacement of the water purification system must be performed by an individual or organization approved for the purpose by the local (or state) health authority and identified in the Plan. In meeting the requirements of paragraph (f)(1)(ii) of this section, the Plan may incorporate by reference specific terms and conditions of the service contract required under paragraph (d) of this section.

(iii) Under the Plan, responsibility for monitoring the performance of the service contractor and for assuring that the water purification system is properly serviced, repaired, and replaced rests with the local (or state) health authority that has given its approval to the Plan. The Plan must confer on the health authority all powers necessary to effect compliance by the service contractor. The health authority's powers shall include the authority to notify the mortgagor of any noncompliance by the service contractor. The plan must provide that, upon any notification of noncompliance received from the health authority, the mortgagor shall have the right to discharge the service contractor for cause and to appoint a successor organization or individual as service contractor; and

(iv) The Plan must provide for the mortgagor to make periodic escrow payments necessary for the servicing, maintenance, repair and replacement of the water purification system, and for the mortgagee to disburse funds from the escrow account as required, to the appropriate party or parties.

(2) The Plan must provide that, if the dwelling served by the water purification system is refinanced, or is sold or otherwise transferred with a HUD-insured mortgage, the Plan will:

(i) continue in full force and effect;

(ii) impose an obligation on the mortgagor to notify any subsequent purchaser or transferee of the necessity for the water purification system and for its proper maintenance, and of the obligation to make escrow payments; and

(iii) require the mortgagor to furnish the purchaser with a copy of the Plan, before any sales contract is signed.

(g) *Periodic analysis.* Any Plan developed in accordance with this section must provide that an analysis of the water supply shall be obtained from the local (or state) health authority no less frequently than annually, but more frequently, if determined at any time to be necessary by the health authority or by the service contractor.

Dated: March 12, 1992.

Arthur J. Hill,

Assistant Secretary for Housing–Federal Housing Commissioner.

Department of Education

Graduate Academic Facilities Program; Notice Inviting Applications for One New Award for Fiscal Year (FY) 1992

DEPARTMENT OF EDUCATION

[CFDA No: 84.172]

Graduate Academic Facilities Program; Notice Inviting Applications for One New Award for Fiscal Year (FY) 1992

Purpose of Program: Provide grants for not more than fifty (50) percent of the development cost of the construction, reconstruction, or renovation of graduate academic facilities. This program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by funding the construction, reconstruction, or renovation of facilities for providing training for emerging technologies and skills. National Education Goal 5 calls for every American to possess the knowledge and skills necessary to compete in a global economy.

Eligible Applicants: Graduate institutions of higher education.

Deadline for Transmittal of Applications: July 15, 1992.

Deadline for Intergovernmental Review: September 14, 1992.

Applications Available: May 15, 1992.

Available Funds: $3,903,319.

Estimated Range of Awards: $3,903,319.

Estimated Average Number of Awards: One.

Project Period: Until completion.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85, and 86; and program regulations in 34 CFR part 619, subparts A, C, E, and F.

Priorities:

Absolute Priority: Under 34 CFR 75.105(c)(3) and sec. 701(a)(5) of title VII of the Higher Education Act of 1965, as amended, the Secretary gives an absolute preference to applications that meet the following absolute priority. The Secretary funds under this competition only an application that meets this absolute priority:

Provision of facilities for advanced skill-training programs that relate to emerging technologies and skill needs.

Competitive Priority: Under 34 CFR 75.105(c)(2)(ii) and sec. 701(b) of the Higher Education Act of 1965, as amended, the Secretary gives preference to applications that meet the following competitive priority. An application that meets this competitive priority is selected by the Secretary over applications of comparable merit that do not meet the priority:

Renovation of academic facilities.

Selection Criteria: Since the Higher Education Amendments of 1986 have not been implemented by regulation, in evaluating grant applications in this competition, the Secretary uses the selection criteria in 34 CFR 75.210.

The regulations in 34 CFR 75.210 provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the Secretary distributes these points as follows:

Budget and cost effectiveness: (34 CFR 75.210(b)(5)). Fifteen points are added to this criterion for a possible total of 20 points.

For Applications or Information Contact: Sarah Babson, U.S. Department of Education, 400 Maryland Avenue, SW., room 3022, ROB 3, Washington, DC 20202-5339. Telephone: (202) 708-8865. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1132c.

Dated: March 9, 1992.

Carolynn Reid-Wallace,

Assistant Secretary for Postsecondary Education.

Department of Education

Training Program for Special Programs Staff and Leadership Personnel; Inviting Applications for New Awards for Fiscal Year 1992; Notice

DEPARTMENT OF EDUCATION

[CFDA No: 84.103]

Training Program for Special Programs Staff and Leadership Personnel; Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: Provides grants to institutions of higher education, and other public and private nonprofit institutions and organizations, for projects that improve the operation of the Special Programs for Students from Disadvantaged Backgrounds (Student Support Services, Upward Bound, Talent Search, Educational Opportunity Centers, and the Ronald E. McNair Post-Baccalaureate Achievement programs) by providing training for staff and leadership personnel employed in, or preparing for, employment in such projects. The Training Program for Special Programs Staff and Leadership Personnel (Training Program) supports AMERICA 2000, the President's strategy to move the Nation toward achieving the National Education Goals and educational excellence for all Americans. Training the staff of projects funded under the Special Programs for Students from Disadvantaged Backgrounds improves the effectiveness of these projects in preparing disadvantaged persons for successful entry into and completion of postsecondary education.

Eligible Applicants: Institutions of higher education and other public and private nonprofit institutions and organizations.

Deadline for Transmittal of Applications: May 4, 1992.

Deadline for Intergovernmental Review: July 6, 1992.

Applications Available: March 20, 1992.

Available Funds: $1,800,000.

Estimated Range of Awards: $80,000–$280,000.

Estimated Average Size of Awards: $150,000.

Estimated Number of Awards: 12.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 24 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations, 34 CFR parts 74, 75, 77, 79, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 642.

Priorities: Under 34 CFR 75.105(c)(2)(i) and 34 CFR 642.34, the Secretary gives preference to applications that meet one or more of the following competitive priorities. Under 34 CFR 642.31(f)(2)(iii), the Secretary awards up to 8⅓ points to an application that meets one or more of these priorities in a particularly effective way.

(1) Student financial aid.

(2) Reporting student and project performance.

(3) General project management for new directors.

(4) Coordinating project activities with other available resources and activities.

(5) Assessment of student needs.

(6) Strategies for preparing students for doctoral studies.

For Applications or Information Contact: May J. Weaver, Chief, Special Services Branch, Division of Student Services, U.S. Department of Education, 400 Maryland Avenue, SW., room 3060, ROB #3, Washington, DC 20202–5249. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Services at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1070d, 1070d–1d.

Dated: March 11, 1992.

Carolynn Reid-Wallace,

Assistant Secretary for Postsecondary Education.

Higher Education Programs in Modern Foreign Language Training and Area Studies—Group Projects Abroad Program; Proposed Rule

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

34 CFR Part 664

RIN 1840-AB54

Higher Education Programs in Modern Foreign Language Training and Area Studies—Group Projects Abroad Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes amendments to the regulations governing the Higher Education Programs in Modern Foreign Language Training and Area Studies—Group Projects Abroad Program (34 CFR part 664). The purpose of these proposed regulations is twofold: (1) To improve program quality, efficiency, and flexibility by establishing a funding period of up to three years for the advanced overseas intensive language projects; and (2) To correct a numbering error in a section of the regulations.

DATES: Comments must be received on or before April 20, 1992.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Mr. Ralph Hines, Chief, International Studies Branch, Center for International Education (room 3052, ROB-3), U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202-5332.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Hines, Telephone: (202) 708-7283. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION:

Background

The Group Projects Abroad Program is one of several programs authorized under section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act), Public Law 87-256. It provides grants to institutions of higher education, State departments of education, and private nonprofit educational organizations to support overseas projects in training, research, and curriculum development in modern foreign languages and area studies by teachers, students, and faculty engaged in a common endeavor. One type of project supported under the Group Projects Abroad Program is an advanced overseas intensive language project.

Explanation of Changes

The Secretary proposes to amend § 664.14 of the existing regulations to improve the administration of the program. Specifically, the Secretary proposes to eliminate a restriction of project periods to a one-year duration. This will enable the Secretary to establish a multi-year funding cycle for advanced overseas intensive language projects. A multi-year funding cycle, under which a grantee would conduct activities during each of several consecutive twelve-month periods, would contribute to improved planning, development, and implementation of these complex, nationally-recruited projects by establishing a more predictable funding pattern. Projects funded under an expanded performance period have proven successful in establishing a more effective administrative structure and in attracting outside financial support. The Department also would save the cost of convening an annual academic review panel.

The second proposed amendment would correct a typographical error in the heading "§ 664.2 Who is eligible to participate in projects funded under the Group Projects Abroad Program?" That section number should read "§ 664.3".

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. These regulations merely make a typographical correction and a minor modification in provisions contained in existing regulations.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in room 3052, Regional Office Building #3, 7th & D Streets, SW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week, except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comments on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 664

Colleges and universities, Education, Educational study programs, Teachers.

(Catalog of Federal and Domestic Assistance Number 84.021, Group Projects Abroad Program)

Dated: February 12, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary proposes to amend part 664 of title 34 of the Code of Federal Regulations as follows:

PART 664—HIGHER EDUCATION PROGRAMS IN MODERN FOREIGN LANGUAGE TRAINING AND AREA STUDIES—GROUP PROJECTS ABROAD PROGRAM

1. The authority citation for part 664 is revised to read as follows:

Authority: 22 U.S.C. 2452(b)(6), unless otherwise noted.

2. The section designation "§ 664.2" preceding the heading "Who is eligible to participate in projects funded under the Group Projects Abroad Program?" in the text of the regulations is removed and "§ 664.3" is added in its place.

3. In § 664.14, paragraph (a)(2) is revised to read as follows:

§ 664.14 What is an advanced overseas intensive language training project?

(a) * * *

(2) Project activities may be carried out during a full year, an academic year, a semester, a trimester, a quarter, or a summer.

* * * * * *

Environmental Protection Agency

Premanufacture Notices; Monthly Status Report for OCTOBER 1991

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–53148; FRL 4052–5]

Premanufacture Notices; Monthly Status Report for OCTOBER 1991

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substance Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) and exemption request pending before the Agency and the PMNs and exemption requests for which the review period has expired since publication of the last monthly summary. This is the report for OCTOBER 1991.

Nonconfidential portions of the PMNs and exemption request may be seen in the TSCA Public Docket Office NE–G004 at the address below between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

ADDRESSES: Written comments, identified with the document control number "(OPPTS–53148)" and the specific PMN and exemption request number should be sent to: Document Processing Center (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., rm. L–100, Washington, DC 20460, (202) 382–3532.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB–44, 401 M St., SW., Washington, DC 20460 (202) 382–3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during OCTOBER; (b) PMNs received previously and still under review at the end of OCTOBER; (c) PMNs for which the notice review period has ended during OCTOBER; (d) chemical substances for which EPA has received a notice of commencement to manufacture during OCTOBER; and (e) PMNs for which the review period has been suspended. Therefore, the OCTOBER 1991 PMN Status Report is being published.

Dated: March 10, 1992.

Steven Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

Premanufacture Notice Monthly Status Report for OCTOBER 1991.

IV. 123 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture

PMN No.	Identity/Generic Name	Date of Commencement
P 84-1024	G Alkyl substituted 4-amino, 1–8 naphthalimide	October 10, 1991.
P 85-0578	G Substituted stilbene	September 16, 1991.
P 85-1507	(4-Sulphonamido-benzene-ethyl sulfonyl sulfuric ester-sodium salt)(1,4)(sulfonic acid sodium salt)(2,6) of nickel phthalocyanine	September 21, 1991.
P 86-1048	G *N,N*-dimethyletanedithiomide	February 23, 1987
P 87-0214	G Polyester with neopenyl glycol	March 2, 1987
P 87-0217	G Copolymer with neopenty glycol	March 25, 1991.
P 87-1086	G Isopropoxyethylsalicylat	December 8, 1987.
P 88-0430		August 6, 1991.
P 88-0933	G Cycloaliphatic amine adduct	August 26, 1991
P 88-1269	G 5,5',7-Indigotrisulfonic acid	August 30, 1991.
P 88-1270	Propanedioic acid, neopotassium salt	August 10, 1988.
P 88-2180	G Aliphtatic epoxy monomer	August 16, 1991
P 88-2183	G Polyamide modified acrylic resin	January 9, 1989.
P 88-2188	Poly(oxy-1,2-ethanediyl),a|pha-hydro-omega-(oxiranylmethoxy)-ether with 2-ethyl-2-(hydroxymethyl)-1,3-propanediol (3:1)	August 7, 1991
P 88-2362	G Alkoxylated ammonium sulfonated	September 12, 1991.
P 88-2519	G Isocyanate terminated polyester polyol	August 26, 1991
P 89-0004	2-(2-(2-Hydroxyethoxy)ethoxy)ethoxy)ethylamine	September 15, 1991.
P 89-0671	G Aromatic hydrocarbon	December 10, 1989.
P 89-0696	Tetraethalene glycol and ammonia	September 15, 1991.
P 89-0719	G Acrylic resin solution	September 23, 1991.
P 89-0837	G Phosphorylated polyester	March 5, 1990.
P 89-0941	G Ethylene vs methyacrylate	September 11, 1991.
P 89-0961	G Substituted aniline	June 6, 1990.
P 90-0142	G Tris(disubstitutedalkyl)heterocycle	August 14, 1991
P 90-0337	G Rosin maleic anhydride substituted phenol formaldehyde pentaerythritol polymer	September 5, 1991.
P 90-0482	G Hexanedioic acid, polymer with branched alkyldiol	September 9, 1991.
P 90-0533	G Adhesion promoter	August 14, 1991
P 90-0671	G Polyalkylene glycol	October 1, 1991
P 90-1362	G Polyester	September 12, 1991.
P 90-1456	G Acrylate copolymer	September 25, 1991.
P 90-1536	G Polyhydantion	September 4, 1991.
P 90-1551	Soyabean oil, linseed oil, glycerine, chlorendic anhydride alkyd resin modified with styrene, vinyl-toluene, and methyl methacrylate	October 15, 1991.
P 90-1563	2-Naphthalene sulfonamide, 6-amino-*N*-methyl	October 2, 1991
P 90-1697	G Metal carboxyl carboxylate	August 21, 1991
P 90-1866	G Metal alkyl chloride	September 12, 1991.
P 90-1917	G Modified polyvinylbutyral	July 31, 1991.
P 90-1935	G Acrylated polyester	October 2, 1991.
P 90-1979	G Acrylated polysiloxane	August 7, 1991.
P 90-1980	G Acrylated polysiloxane	August 7, 1991.
P 91-0025	G Blocked polyisocyanate	September 5, 1991.
P 91-0047	G DPD salt, i.e. salt of *N,N*-diethyl-*P*-phenylenedia mine	July 31, 1991
P 91-0050	G Epoxy terminated polymer of polyetheramine and bisphenol A	March 15, 1991
P 91-0073	Carboxylic acid, C_7–C_9 branched	September 24, 1991.

IV 123 CHEMICAL SUBSTANCES FOR WHICH EPA HAS RECEIVED NOTICES OF COMMENCEMENT TO MANUFACTURE—Continued

PMN No.	Identity/Generic Name	Date of Commencement
P 91-0079	G Fatty acids, C_{18}-unsaturated,dimers,polymers with etylenediamine,diamines, a dicarboxylic acid and a monocarboxylic acid	September 23, 1991.
P 91-0083	G Polyamide	July 12, 1991.
P 91-0090	G Glycol half ester of mhhp/hhp acid	January 30, 1991.
P 91-0093	G Acrylic copolymer intermediate	February 26, 1991
P 91-0121	G Zinc carboxylate	September 6, 1991.
P 91-0139	G Urethane modified epoxy resin	September 19, 1991.
P 91-0188	G Substituted ethyl alkyl ester	September 10, 1991.
P 91-0216	G Dimethylethanolamine salt of styrene-acrylate copolymer with epoxy ester	September 5, 1991.
P 91-0272	G Functionalized acrylic copolymer	August 8, 1991.
P 91-0288	G Alkoxylated dialky-diethylene triamine, alkyl sulfate salt	September 17, 1991.
P 91-0299	G Amine salt of acrylic polymer	August 29, 1991.
P 91-0315	G Copolymer of butylmethacrylate,methacrylate, exthoxylated, an aromaic and A heterocyclic vinyl compound	October 9, 1991.
P 91-0322	G Salt of alkene substituted with alkyl carboxyaryl oxo substituted pyrazoles	August 27, 1991.
P 91-0344	3-Methylphenoxyethanol	September 18, 1991.
P 91-0346	G Fatty acid ester	October 1, 1991.
P 91-0383	G Unsaturated, cyclic siloxane polymers	August 26, 1991.
P 91-0403	G Brominated triazine derivative	September 17, 1991.
P 91-0418	G Fluorinated polyurethane	August 28, 1991.
P 91-0430	G Acrylated shellac	August 8, 1991.
P 91-0442	G Ethylene oxide adduct of fatty acid ester with pentaerythritol	September 17, 1991.
P 91-0502	G Urethane acrylate	September 3, 1991.
P 91-0512	G Monosubstituted benzylic isocycnate, urehane with hydroxyalkyl substituted heterocycle	September 12, 1991.
P 91-0533	G Perfluoropolyether	August 30, 1991
P 91-0560	G Polyacrylate resin	October 7, 1991.
P 91-0562	4,4'-Diphenylmethane diisocyanate; trimethylol propane; 1,3-benzenedicarboxylic acid, polymer with 2,2-dimethyl-1,3 propanediol and hexanedioic acid 1,3-benzenedicarboxylic acid, polymer with hexanedioicacid and 2,2'-oxobis(ethanol)	August 17, 1991.
P 91-0579	L-lysine, N6-(1-oxododecyl)-	September 16, 1991.
P 91-0583	G Propargylalcoholpropoxylate	August 28, 1991
P 91-0586	G Alkyl siloxane	August 26, 1991.
P 91-0604	Acetic acid, (((3,5-bis(1,1-dimethylethyl)-4-hydroxyphenyl)thio)-, C_{18-24}-isoalkyl)esters	October 7, 1991.
P 91-0627	Modified maleic anhydride/terpentine resin	June 22, 1991.
P 91-0637	G Silane modified ethylene polymer	September 10, 1991.
P 91-0659	G Silicone polymer	August 20, 1991.
P 91-0673	G Polyether polyol	September 8, 1991.
P 91-0682	G Polyacrylate ester	August 15, 1991.
P 91-0743	G Fatty acid ester	August 19, 1991.
P 91-0781	G Polyamic acid	August 12, 1991.
P 91-0782	G Polyimide	August 19, 1991.
P 91-0793	Bisphenol A diglycidyl ether; bis-(3-aminopropyl)-methylamine; isophorone diamine	August 8, 1991.
P 91-0794	G Polyurea-epoxy composite polymer	August 13, 1991.
P 91-0804	G Silyl phosphate	August 25, 1991.
P 91-0805	G Silyl phosphate	August 25, 1991.
P 91-0806	G Poloxyalkylene glycol ether	September 22, 1991.
P 91-0816	G Homopolymer of 4-ethenylphenol plus initiator end groups/fragments	September 19, 1991.
P 91-0821	G Cresol novolak resin	August 20, 1991.
P 91-0829	G Diazo naphthoquinone sulfonic ester	August 20, 1991.
P 91-0830	G Diazo naphthoquinone sulfonic ester	July 31, 1991.
P 91-0835	G Metal arsenate	September 26, 1991.
P 91-0847	G Polyamide resin	September 25, 1991.
P 91-0890	G Phenylazo-N-phenylazophenylbenzamide, alkyl derivative	August 21, 1991.
P 91-0917	G Epoxidized polyaromatic resin	August 30, 1991.
P 91-0919	G Styrene acrylic copolymer	August 23, 1991.
P 91-0933	G Amine reacted polymer of an alipatic with a polycaprolacetone diol	August 26, 1991.
P 91-0965	G Organopolysiloxane	September 19, 1991.
P 91-0967	G Modified organosilane	September 19, 1991.
P 91-0969	G Aryl substituted copper phthalocyanie	September 12, 1991.
P 91-0971	G Epoxy ester of C_{18} fatty acids	September 10, 1991.

IV. 123 CHEMICAL SUBSTANCES FOR WHICH EPA HAS RECEIVED NOTICES OF COMMENCEMENT TO MANUFACTURE—Continued

PMN No.	Identity/Generic Name	Date of Commencement
P 91-0974	G Hydroxy functional acrylic polymer	September 13, 1991.
P 91-0991	G Copolymer of acrylic acid, acrylamide, styrene andacrylic esters	September 5, 1991.
P 91-0996	G Poly oxy propyl bis cyclohexyl-amine functional polymer	August 29, 1991.
P 91-1001	G Aqueous aliphatic polyurethane dispersion	September 20, 1991.
P 91-1007	G Alkyd	September 24, 1991.
P 91-1008	G Alkyd	September 24, 1991.
P 91-1082	G Amine-terminated polyurethane	September 23, 1991.
P 91-1083	G Aluminum isopropoxide, reaction products with alcohol and ester	October 11, 1991.
P 91-1092	G Sulfurized liquid wax esters	September 10, 1991.
P 91-1093	Reaction product of unsaturated fatty esters(C_{14-18}, C_{18-22} fatty acids and 2-octyl-1-dodecanyl) with di-butyl hydrogen phosphite	September 26, 1991.
P 91-1100	1,1,2,3,3,-Hexofluoro-1-propane, oxidizd, polymerized, modified	September 12, 1991.
P 91-1121	G Polyoxyalkylene polyester urethane block polymer	October 9, 1991.
P 91-1160	G Amine mono and di-dodecyl phenoxy benzene sulfonate	September 23, 1991.
P 91-1169	G Hydrogenated dimerized C_{18}, unsaturated fatty acid, hexamethylene diamine, alkane diamine, acid functional hydroocarbon, sebasic acid polymer..	October 3, 1991.
P 91-1172	G Alpha alkene copolymer with alpha alkene	October 4, 1991.
Y 87-0221	G Isophthalic acid resin	September 27, 1991.
Y 90-0017	G Acrylic polymer	June 25, 1991.
Y 90-0026	G Polymer of aromatic diacid, cycloaliphatic diacid and diol	August 26, 1991.
Y 91-0070	G Polyimide resin	October 1, 1991.
Y 91-0102	G Polymers: alkyl acrylate, styrene	September 24, 1991.
Y 91-0120	G Polycaprolactone-based polyurethane-urea	September 18, 1991.
Y 91-0170	G Rosin polymer, glycol ester	September 9, 1991.
Y 91-0177	G Poly(methyl methacrylate-co-imide)	August 22, 1991.
Y 91-0184	G Crosslinked rubber	August 20, 1991.

Environmental Protection Agency

Premanufacture Notices; Monthly Status Report for NOVEMBER 1991

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-53149; FRL 4052-6]

Premanufacture Notices; Monthly Status Report for NOVEMBER 1991

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substance Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) and exemption request pending before the Agency and the PMNs and exemption requests for which the review period has expired since publication of the last monthly summary. This is the report for NOVEMBER 1991.

Nonconfidential portions of the PMNs and exemption request may be seen in the TSCA Public Docket Office NE–G004 at the address below between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

ADDRESSES: Written comments, identified with the document control number "(OPPTS–53149)" and the specific PMN and exemption request number should be sent to: Document Processing Center (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., rm. L–100, Washington, DC 20460, (202) 382–3532.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB–44, 401 M St., SW., Washington, DC 20460 (202) 382–3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during NOVEMBER; (b) PMNs received previously and still under review at the end of NOVEMBER; (c) PMNs for which the notice review period has ended during NOVEMBER; (d) chemical substances for which EPA has received a notice of commencement to manufacture during NOVEMBER; and (e) PMNs for which the review period has been suspended. Therefore, the NOVEMBER 1991 PMN Status Report is being published.

Dated: March 10, 1992.

Steven Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

Premanufacture Notice Monthly Status Report for NOVEMBER 1991.

Environmental Protection Agency

Premanufacture Notices; Monthly Status Report for DECEMBER 1991

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-53150; FRL 4052-7]

Premanufacture Notices; Monthly Status Report for DECEMBER 1991

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substance Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) and exemption request pending before the Agency and the PMNs and exemption requests for which the review period has expired since publication of the last monthly summary. This is the report for DECEMBER 1991.

Nonconfidential portions of the PMNs and exemption request may be seen in the TSA Public Docket Office NE–G004 at the address below between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

ADDRESSES: Written comments, identified with the document control number "(OPPTS–53150)" and the specific PMN and exemption request number should be sent to: Document Processing Center (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M Street, SW., rm. L–100, Washington, DC 20460, (202) 382–3532.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB–44, 401 M Street, SW., Washington, DC 20460 (202) 382–3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during DECEMBER; (b) PMNs received previously and still under review at the end of DECEMBER; (c) PMNs for which the notice review period has ended during DECEMBER; (d) chemical substances for which EPA has received a notice of commencement to manufacture during DECEMBER; and (e) PMNs for which the review period has been suspended. Therefore, the DECEMBER 1991 PMN Status Report is being published.

Dated: March 10, 1992.

Steven Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

Premanufacture Notice Monthly Status Report for DECEMBER 1991.

IV. 31 Chemical Substances for which EPA has received Notices of Commencement to Manufacture

PMN No.	Identity/Generic Name	Date of Commencement
P 85-0482	G Polyamic acid polymer b.	October 21, 1991.
P 88-0061	G Organopolysiloxane containing metals.	June 27, 1988.
P 88-0252	Maleic anhydride; alpha olefin C^{20} + greater; tertiary butyl peroxide; hydrogenated tallow amine.	January 19, 1989.
P 89-0697	G Alkenoic acid, trisubstituted benzyl-disubstituted-phenyl ester.	October 23, 1990.
P 90-1614	G Substituted naphthalene sulfonic acid.	November 14, 1991.
P 90-1981	Polymer of ethyl acrylate, methyl methacrylate, & *N*-vinyl pyrrolidinone.	October 22, 1991.
P 91-0117	G Acrylate derivative polymer.	March 3, 1991.
P 91-0331	G Aryl isocyanate acyl chloride.	November 13, 1991.
P 91-0332	G Aryl polyamideurea.	November 14, 1991.
P 91-0523	G Heterocyclic sulfate.	October 28, 1991.
P 91-0611	Melamine amyl phosphate.	October 15, 1991.
P 91-0770	2-Ethoxyethyl-2-cyanoacrylate.	October 21, 1991.
P 91-0875	G Ammonium salt of a grafted and crosslinked acrylicacid terpolymer.	November 18, 1991.
P 91-0891	G Polymer modified polyisocyanate, reaction product with a diamine.	November 12, 1991.
P 91-0897	G Polyethylene glycol diester of a saturated fatty acid.	November 18, 1991.
P 91-0937	G Vinyl ester.	November 7, 1991.
P 91-0938	G Polyurethane/aryl polyglycol ether.	November 7, 1991.
P 91-1085	G Water reducible polyester polymer.	October 21, 1991.
P 91-1259	G Aromatic polyurethane polyol.	November 11, 1991.
P 91-1278	G Copper arsenic.	November 5, 1991.
P 91-1344	G Polyamide.	November 23, 1991.
P 91-1345	G Alkyd resin.	November 23, 1991.
Y 88-0232	G Alkyd resin.	November 11, 1991.
Y 88-0279	G Polyester polyol.	October 28, 1991.
Y 90-0038	G Polyester resin.	November 8, 1991.
Y 91-0157	G Carboxylated styrene-acrylate copolymer, salt.	October 16, 1991.
Y 91-0187	G Polyester.	November 19, 1991.
Y 91-0194	G Aqueous acrylic polymer.	October 18, 1991.
Y 91-0226	G Aqueous acrylic polymer.	October 18, 1991.
Y 91-0227	G Aqueous acrylic polymer.	October 21, 1991.
Y 91-0232	G Modified polyester.	November 6, 1991.

Environmental Protection Agency

Hazardous Waste Management; Land Disposal Restrictions; Notice of Intent to Approve Case-by-Case Applications

ENVIRONMENTAL PROTECTION AGENCY

[SWH-FRL-4115-7]

Hazardous Waste Management System; Land Disposal Restrictions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent to approve case-by-case applications.

SUMMARY: EPA is proposing to approve the applications submitted by two Olin Corporation facilities in Augusta, Georgia and Charleston, Tennessee, requesting an extension of the May 8, 1992 effective date of the land disposal restrictions applicable to wastes with the hazardous waste codes D009 and K106. EPA also proposes to grant approval of an extension of the effective date of the land disposal restrictions applicable to D009 and K106 wastes generated at the following five facilities: BFGoodrich Company, Calvert City, Kentucky; PPG Industries, Lake Charles, Louisiana; PPG Industries, New Martinsville, West Virginia; Pioneer Chlor Alkali Company, Inc., St. Gabriel, Louisiana and Vulcan Chemicals, Port Edwards, Wisconsin. However, for these facilities approval is contingent upon receipt of, notice and comment upon, and approval of documentation of a binding contractual commitment to construct or otherwise provide treatment capacity for each facility. This action responds to the applications submitted by these seven facilities, in conjunction with the Chlorine Institute, under 40 CFR 268.5, which allows any person to request the Administrator to approve, on a case-by-case basis, an extension of the applicable effective date of the land disposal restrictions treatment standards. To obtain an extension, the applicant must demonstrate that there is insufficient capacity to manage his waste and that he has entered into a binding contractual commitment to construct or otherwise provide such capacity but due to circumstances beyond his control, such capacity cannot reasonably be made available by the effective date. If this proposed action is finalized, each of the seven above mentioned chlorine manufacturing facilities can continue to treat, store or dispose of its D009, and K106 wastes, using current practices, for an additional one year without being subject to the land disposal restrictions applicable to such wastes. If warranted, EPA may grant a renewal of this extension, for up to one year, which, at a maximum, would extend the effective date of the LDR for these wastestreams to May, 8, 1994.

DATES: Comments on this notice must be received on or before April 20, 1992.

ADDRESSES: The public must send an original and two copies of their comments to the EPA RCRA Docket (OS-305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Place the Docket Number F-92-CCPP-FFFFF on all copies of the comments. The EPA RCRA Docket is located in Room 2427, 401 M Street, SW., Washington, DC 20460. The docket is open from 9 a.m. to 4 p.m., Monday through Friday, except for Federal holidays. The public must make an appointment to review docket materials by calling (202) 260-9327. The public may copy a maximum of 100 pages from any regulatory document at no cost. Additional copies cost $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information contact the RCRA Hotline at (800) 424-9346 toll-free or (202) 382-3000, locally. For information on specific aspects of this notice contact William J. Kline, Office of Solid Waste, Capacity Programs Branch (OS-321W), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (703) 308-8440.

SUPPLEMENTARY INFORMATION:

I. Background

A. Congressional Mandate

Congress enacted the Hazardous and Solid Waste Amendments (HSWA) of 1984 which amended the Resource Conservation and Recovery Act (RCRA). Among other things, HSWA required EPA to develop regulations that would impose, on a phased schedule, restrictions on the land disposal of hazardous wastes. In particular, sections 3004(d) through (g) prohibit the land disposal of certain hazardous wastes by specified dates in order to protect human health and the environment. More specifically, section 3004(g) scheduled the prohibition of the land disposal of those hazardous wastes included in the Third Third group (which includes hazardous wastes D009, and K106), effective 66 months after the enactment of HSWA (May 8, 1990). In addition, section 3004(m) requires EPA to set "levels of methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and long-term threats to human health and the environment are minimized." Wastes that meet the treatment standards established by EPA are not prohibited and may be land disposed.

In developing such a broad program, Congress recognized that adequate alternative treatment, recovery, or disposal capacity which is protective of human health and the environment may not be available by the applicable statutory effective dates. Therefore, section 3004(h)(2) authorized EPA to grant a national capacity variance (based on the earliest date that such capacity will be available but not to exceed two years) from the effective date which would otherwise apply to specific hazardous wastes. In addition, under section 3004(h)(3), EPA can grant an additional capacity extension of the statutory deadline on a case-by-case basis for up to one year beyond the applicable deadline. Such an extension is renewable once for up to one additional year.

On November 7, 1986, EPA published a final rule (51 FR 40572) establishing the regulatory framework to implement the land disposal restrictions (LDR) program, including the procedures for submitting case-by-case extension applications.

Also, on June 1, 1990, EPA published a final rule (55 FR 22520) establishing land disposal restrictions for Third Thirds wastes. Among other things, EPA published treatment standards for wastes D009 and K106. Because of a determination that available treatment, recovery, or disposal capacity did not exist at that time for these wastes, EPA granted a two-year national capacity variance for K106 and D009 wastes. As such, these wastes are prohibited from being land disposed beginning May 8, 1992.

B. 40 CFR 268.5 Demonstrations for Case-by-Case Applications

Case-by-case extension applications must satisfy the requirements outlined in 40 CFR 268.5. Each of the chlorine manufacturing facilities requesting an extension of the effective date of the LDRs must address each of the following seven demonstrations of 40 CFR 268.5(a):

- *40 CFR 268.5(a)(1).* The applicant has made a good-faith effort to locate and contract with treatment, recovery, or disposal facilities nationwide to manage its waste in accordance with the effective date of the applicable restriction (i.e., May 8, 1992).
- *40 CFR 268.5(a)(2).* The applicant has entered into a binding contractual commitment to construct or otherwise provide alternative treatment, recovery, or disposal capacity that meets the treatment standards specified in 40 CFR part 268, subpart D or, where treatment standards have not been specified, such

treatment, recovery, or disposal capacity is protective of human health and the environment.

- *40 CFR 268.5(a)(3).* Due to circumstances beyond the applicant's control, such alternative capacity cannot reasonably be made available by the applicable effective date. This demonstration may include a showing that the technical and practical difficulties associated with providing the alternative capacity will result in the capacity not being available by the applicable effective date.
- *40 CFR 268.5(a)(4).* The capacity being constructed or otherwise provided by the applicant will be sufficient to manage the entire quantity of waste that is the subject of the application.
- *40 CFR 268.5(a)(5).* The applicant provides a detailed schedule for obtaining operating and construction permits or an outline of how and when alternative capacity wil be available.
- *40 CFR 268.5(a)(6).* The applicant has arranged for adequate capacity to manage his waste during an extension, and has documented the location of all sites at which the waste will be managed.
- *40 CFR 268.5(a)(7).* Any waste managed in a surface impoundment or landfill during the extension period will meet the requirement of 40 CFR 268.5(h)(2).

After an applicant has been granted a case-by-case extension, he must immediately notify EPA of any change in the demonstrations made in the petition (40 CFR 268.5(f)). He must also submit progress reports at specified intervals that describe the progress being made towards obtaining adequate alternative capacity, identify any delay or possible delay in developing the capacity, and describe the mitigating actions being taken in response to the event (40 CFR 268.5(g)).

II. Evaluation of Subject Applications

The following seven chlorine manufacturing facilities, in conjunction with the Chlorine Institute, requested that EPA grant a one-year extension of the May 8, 1992, effective date of the LDRs applicable to hazardous wastes D009 and K106 consisting of residual wastewaters and other solid wastes derived from the electrolytic mercury cell processes that are used at these facilities for the production of chlorine:

1. BFGoodrich Company in Calvert City, KY
2. Olin Corporation in Augusta, GA
3. Olin Corporation in Charleston, TN
4. PPG Industries in Lake Charles, LA
5. PPG Industries in New Martinsville, WV
6. Pioneer Chlor-Alkali Company, Inc. in St. Gabriel, LA
7. Vulcan Chemicals in Port Edwards, WI

The Best Demonstrated Available Technology (BDAT) for D009 and K106 is thermal treatment or retorting. The Chlorine Institute [1] and its members submitted comments to EPA during the rulemaking process, expressing their belief that retorting was not available for treatment of the subject wastes due to differences between the mercury mine ores used in establishing BDAT and electrolytic mercury cell wastes. They argued that data used in developing BDAT based on wastes generated by a mercury producer was not directly transferable to K106 and D009 mercury cell waste without further extensive development. Failing to convince EPA to change the proposed BDAT for K106 and D009, the Chlorine Institute and some of its members contracted with Hazen Research of Golden, Colorado in June 1990 to develop a thermal mercury recovery process for K106 and selected D009 wastes that would allow the Institute's members to comply with the LDR regulations. The project consists of three phases. Phase I, which has been completed, consisted of characterizing representative waste, evaluating the effects of variables, selecting potential technologies for evaluation, and preliminary design and economics. Phase II, which has also been completed, was the construction and operation of a pilot plant. The primary goal of this Phase was to demonstrate the feasibility of the process to recover mercury from these wastes and meet BDAT for the K106 and D009 wastes. Construction of the pilot plant was completed in June 1991. Phase II of the Hazen Project successfully demonstrated that the thermal mercury recovery process could treat D009 and K106 wastes to meet BDAT.

Phase III is the development of engineering design and construction of full-scale treatment units on an individual or joint basis by each of the chlorine manufacturers. Initial estimates from the chlorine manufacturers indicate that the earliest operation of these treatment units will be in the first quarter of 1993.

A. Applicants' Demonstrations

Each of the seven applicants submitted to EPA a separate petition requesting an extension of the effective date of the LDRs for its D009 and K106 wastes. However, two of the required demonstrations, 40 CFR 268.5(a)(1) and (a)(3), being identical for all of the seven facilities [2], were conducted and submitted in conjunction with the Chlorine Institute. The demonstrations in 40 CFR 268.5(a)(2), (a)(4), and (a)(5) also initially were the same for each of the seven facilities and submitted as such under the auspices of the Chlorine Institute. However, as discussed in more detail below, subsequent to the successful completion of Phase II of the Hazen Research project, each of the applicants must provide EPA the additional documentation necessary to show when and how the demonstrated technology will be constructed and put into operation to treat their subject wastes.

A discussion of the generic demonstrations, as submitted in conjunction with the Chlorine Institute, along with a description of each facility and a review of each the applicant's facility-specific demonstrations follows.

1. Applicants' Generic Demonstrations

40 CFR 268.5(a)(1). The Chlorine Institute identified 47 facilities with thermal treatment services that may be able to accept the subject wastes. Of these 47 facilities, only four were identified as capable of metal recovery and therefore potentially capable of treating these wastes using BDAT. Of the four facilities, two could not accept the wastes. One facility, Bethlehem Apparatus, indicated it can accept 150 tons per year of D009 wastes. The other facility, Mercury Refining Company (MERECO), has stated that it can currently accept a total of 200 drums of D009 wastes per year from the petitioning facilities; however, it also indicated that it is expanding its treatment capacity such that it eventually will at least double its current treatment capacity in late 1992 when the new facility expansion is complete. Written responses from the four treatment facilities were provided and are available in the public docket established for today's notice.

The quantity of D009 waste being generated (more than 1000 tons/year) by the seven facilities applying for this extension far exceeds the available commercial capacity (less than 200 tons/year) to treat this waste. The applicants, as a group, stated they would utilize this limited available commercial treatment capacity. It is EPA's expectation that the applicants requesting this case-by-case extension will use this treatment capacity, to the extent it is available.

[1] The Chlorine Institute Inc., is an association of chlorine manufacturers and related companies. The Institute's members are responsible for 98% of the U.S. production of chlorine.

[2] The chlorine manufacturers, as members of the Chlorine Institute, have combined their resources over the past several years to address compliance with the regulations.

until the applicants have otherwise provided treatment capacity, i.e., the planned treatment units are put into operation. EPA intends to monitor this situation and, if appropriate, require that each facility, for which an extension of the LDRs is approved, explain how and when such available capacity will be used. Commercial treatment capacity for the K106 wastes was found to be non-existent.

EPA agrees that there is very limited available treatment capacity to treat the D009 wastes generated at the seven petitioning facilities to BDAT standards. It is clear that the total available treatment capacity is greatly exceeded by demand, therefore making it virtually certain that each of the applicants will be unable to find treatment capacity for all of its wastes. Given the restricted treatment capacity for D009 wastes and the lack of any capacity for K106 wastes, EPA believes that a lack of sufficient available treatment capacity, despite a good faith effort to locate such capacity, has been adequately demonstrated by the applicants.

40 CFR 268.5(a)(3). On behalf of the chlorine manufacturers, the Chlorine Institute, as part of the Third Third rulemaking process, provided EPA with data on thermal desorption treatment of K106 chlorine production wastes in December 1989 to support their recommendation for BDAT. They also provided comments on the proposed BDAT for K106 and D009. Failing to convince EPA to modify the proposed BDAT for D009 and K106, the Institute promptly contracted with Hazen Research to develop their own treatment facility capable of meeting BDAT. Hazen Research stated, in their December 6, 1991, report to the Chlorine Institute, that they successfully demonstrated that the thermal process was capable of meeting BDAT.

EPA believes the seven applicants, acting with the Chlorine Institute, cannot reasonably provide treatment capacity by the effective date, due to technical difficulties in treating these wastes to BDAT standards. The applicants have aggressively pursued the development of technology capable of treating their wastes to BDAT standards. As such, EPA believes this demonstration of non-availability of capacity, due to circumstances beyond each applicant's control, is adequate.

2. Facility-Specific Demonstrations

In addition to having addressed the 40 CFR 268.5 (a)(1) and (a)(3) demonstrations in a generic manner, each applicant likewise addressed the remaining five demonstrations in 40 CFR 268.5(a)(2), (a)(4), (a)(5), (a)(6) and (a)(7), as follows:

(a) *BFGoodrich.* BFGoodrich is located in Calvert City, Kentucky. The facility generated approximately 111 tons of K106 waste, 137 tons of low mercury D009, and 32 tons of high mercury D009 waste in 1990. K106 sludge and other wastes identified as D009 are currently disposed of at Chemical Waste Management's landfills in Emelle, Alabama and Ft. Wayne, Indiana.

40 CFR 268.5(a)(2). BFGoodrich has awarded a contract to develop the engineering design for the retort unit, employing the technology developed as part of the Hazen Research project discussed above; this unit is scheduled to be constructed at its Calvert City facility. BFGoodrich advised EPA that by April 15, 1992, it will purchase at least 20% of the equipment necessary to construct this unit and will provide EPA with copies of the purchase order. However, BFGoodrich does not expect to award the contract to construct the retort unit until approximately July 15, 1992.

EPA believes that BFGoodrich has made a substantial commitment to construct a treatment unit that will treat the D009 and K106 wastes generated at its Calvert City, Kentucky facility to BDAT standards. Documentation regarding the design of this unit has been provided to EPA. The receipt of purchase orders for equipment will provide further confirmation of BFGoodrich's commitment to construct the retort unit. However, EPA will not view the 40 CFR 268.5(a)(2) demonstration as having been fully met and will not grant final approval of a case-by-case extension for the D009 and K106 wastes generated at the BFGoodrich Calvert City, Kentucky facility until appropriate documentation is submitted to EPA showing that a binding contractual commitment has been entered into the construct this treatment unit. BFGoodrich has stated that documentation that demonstrates a binding contractual commitment to construct the treatment unit that meets the BDAT standards specified for the D009 and K106 wastes generated at the Calvert City, Kentucky facility will be provided to EPA as soon as it becomes available. When such a contract has been received and approved by EPA, it will be docketed and made available for public notice and comment. Unless this contract is submitted by April 3, 1992, EPA, upon docketing of the contract, will publish a supplemental notice and provide 15 days for comment on the contract, prior to taking final action on this application. (The deadline for comments stated above will remain effective for all aspects of this proposal other then the contract).

40 CFR 268.5(a)(4). BFGoodrich has stated that the thermal treatment unit to be constructed will have a capacity of approximately 300 tons/year to treat the K106 and D009 waste generated at its Calvert City, Kentucky facility. The engineering and design plans have been submitted by BFGoodrich to EPA. EPA believes that BFGoodrich has adequately demonstrated that the treatment unit to be constructed will provide the necessary treatment capacity to manage the entire quantity of these wastes covered by this case-by-case application.

40 CFR 268.5(a)(5). BFGoodrich has submitted a schedule that provides details regarding the construction and permitting of the retort unit to be installed at its Calvert City, Kentucky facility. As shown in the schedule, BFGoodrich plans to commence construction of the retort unit by August 1, 1992 and expects construction to be completed by March 1, 1993. BFGoodrich then estimates that compliance testing of the unit will begin by April 1, 1993. The final permit approval to operate this unit is anticipated to be granted by October 1, 1993. EPA believes that BFGoodrich has submitted the documentation necessary to meet this requirement.

40 CFR 268.5(a)(6). The D009 and K106 wastes generated at BFGoodrich's Calvert City, Kentucky facility will continue to be disposed of in Chemical Waste Management's (CWM) hazardous waste landfills in Emelle, Alabama and Fort Wayne, Indiana. However, until such time that EPA gives its final approval of an extension for any facility, that facility is bound by the effective date of the land disposal restrictions applicable to its D009 and K106 wastes. CWM has provided written assurance to BFGoodrich that CWM will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation is sufficient to make the necessary demonstration.

40 CFR 268.5(a)(7). BFGoodrich will continue to use the CWM landfills in Emelle, Alabama and Fort Wayne, Indiana. CWM has provided a letter certifying that its landfills meet the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation is sufficient to make the necessary demonstration.

Olin Corporation

Olin Corporation (Olin) has submitted case-by-case applications requesting an extension of the LDR for the D009 and K106 wastes generated at two if its facilities, one located in Augusta, Georgia and the other in Charleston, Tennessee.

(b) *Olin (Augusta, Georgia).* The Augusta facility generated approximately 190 lbs per day of K106 waste and 1,200 lbs per day of D009 waste in 1990. The facility also generates D009 soil and debris, which Olin considers not amenable to thermal treatment. Olin stated that it will prepare a separate request for a treatability variance for this waste. K106 sludge and other wastes identified as D009 are currently combined together and transported for disposal at the GSX hazardous waste landill in Pinewood, South Carolina.

40 CFR 268.5(a)(2). Olin plans to construct one thermal retort unit at its Charleston, Tennessee facility at which the D009 and K106 wastes from both the Augusta, Georgia and Charleston, Tennessee facilities would be treated.

To support its demonstration of a binding contractual commitment to construct the retort unit, Olin has provided EPA a copy of the contract between Olin Corporation and Blount, Inc. to perform work as required by Olin at its Charleston, Tennessee facility. Under Olin's existing contract with Blount, Olin has provided a signed release order between Olin and Blount, Inc. to construct the retort unit.

Additional documentation provided by Olin to demonstrate its commitment to the construction of the retort unit includes: (1) a signed approval by Olin's CEO of funds to design, purchase, and construct the retort unit at the Charleston, Tennessee facility to handle the D009 and K106 wastes from both the Augusta, Georgia and Charleston, Tennessee facilities, (2) a copy of the purchase orders for the furnace and off-gas handling system, and (3) a copy of the design specifications, including process flow diagrams, piping and instrument diagrams, and equipment.

EPA is satisfied that Olin has made a binding contractual commitment to construct a treatment unit that will treat the D009 and K106 wastes generated at its Augusta, Georgia and Charleston, Tennessee facilities to BDAT standards. EPA believes Olin has provided the necessary documentation to meet this requirement.

40 CFR 268.5(a)(4). Olin has stated that the thermal treatment unit to be constructed will have sufficient capacity to adequately handle all the K106 and D009 wastes generated by both the Augusta, Georgia and Charleston, Tennessee facilities. The retort unit to be constructed at Olin's Charleston, Tennessee facility is designed for 300 lbs./hour with an estimated actual annual throughput (including wastes from both Augusta and Charleston) of 1.13 million lbs. As such, the planned retort unit is expected to have excess capacity. Therefore, EPA believes that Olin has adequately demonstrated that the treatment unit to be constructed will provide the necessary treatment capacity to manage the entire quantity of D009 and K106 wastes covered by this case-by-case application.

40 CFR 268.5(a)(5). Olin has provided EPA with a detailed schedule for the construction and permitting of the retort unit to be constructed at its Charleston, Tennessee facility. As indicated in the schedule, Olin expects to receive the construction permit by June 1992, and begin construction in July 1992. Construction is anticipated to be completed by January 1993 followed by testing of the unit in January-March 1993. A permit to begin operation of the retort unit is expected to be granted in April 1993. EPA believes that Olin has provided the necessary construction and permitting milestones for bringing its retort unit on-line and therefore meets the requirements of this demonstration.

40 CFR 268.5(a)(6). Olin's (Augusta, GA) wastes will continue to be disposed of in the GSX Services of South Carolina, Inc. (GSX) hazardous waste landfill located in Pinewood, South Carolina. GSX has provided written assurance to Olin that GSX will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation is sufficient to provide this demonstration.

40 CFR 268.5(a)(7). Olin (Augusta, GA) will continue to use the GSX landfill, located in Pinewood, South Carolina. GSX has provided a letter, certifying that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation is sufficient for the required demonstration.

(c) *Olin (Charleston, Tennessee).* The Olin Charleston, Tennessee facility generated approximately 1,000 lbs per day of K106 waste and 3,150 lbs per day of D009 waste in 1990. The facility also generates D009 soil and debris, which Olin considers not amenable to thermal treatment. Olin stated that it will prepare a separate request for a treatability variance for this waste. This facility currently disposes of its K106 sludge and other wastes identified as D009 in an on-site landfill.

40 CFR 268.5(a)(2). As described above, Olin plans to construct one thermal retort unit at the Charleston, Tennessee facility at which the wastes from both the Charleston, Tennessee and the Augusta, Georgia facilities would be treated. (See the discussion under Olin, Augusta, Georgia, 40 CFR 268.5(a)(2) to support its demonstration of a binding contractual commitment to construct the retort unit.)

40 CFR 268.5(a)(4). Olin has stated that the thermal treatment unit to be constructed will have sufficient capacity to adequately handle all the K106 and D009 wastes generated by both the Augusta, Georgia and Charleston, Tennessee facilities. (See the discussion under Olin, Augusta, Georgia, 40 CFR 268.5(a)(4) to support its demonstration that the retort unit will have sufficient capacity to handle all its D009 and K106 waste.)

40 CFR 268.5(a)(5). Olin has provided EPA with a detailed schedule for the construction and permitting of the retort unit to be constructed at its Charleston, Tennessee facility. (See the discussion under Olin, Augusta, Georgia, 40 CFR 268.5(a)(5) to support its demonstration that a detailed schedule for the construction and permitting of the retort unit has been provided.)

40 CFR 268.5(a)(6). Olin's (Charleston, TN) wastes will continue to be disposed of on-site. Olin has provided assurance that its on-site landfill will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation satisfies this requirement.

40 CFR 268.5(a)(7). Olin (Charleston, TN) will continue to use its on-site landfill. Olin has certified that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this certification is included in the public docket established for this notice. EPA believes that this documentation satisfies this requirement.

PPG Industries, Inc.

PPG Industries, Inc. (PPG) has submitted case-by-case applications, requesting an extension of the LDR for the D009 and K106 wastes generated at two of its facilities, one of which is located in Lake Charles, Louisiana and the other in New Martinsville, West Virginia.

(d) *PPG (Lake Charles, Louisiana).* The Lake Charles facility generated approximately 180 tons of K106 wastewater treatment sludge and 150 tons of D009 mercury contaminated

waste in 1990. The facility also generated approximately 180 tons of D009/D002 mercury-contaminated caustic wastes and small quantities of D009/D001 low level mercury-contaminated solvent waste in 1990. In addition, PPG is requesting a separate treatment variance for D009 soil and debris, which PPG considers not amenable to thermal treatment. Wastes generated at the Louisiana facility currently are disposed of at the Chemical Waste Management landfill in Emelle, Alabama.

40 CFR 268.5(a)(2). PPG plans to construct one thermal retort unit at the Lake Charles facility at which the D009 and K106 wastes from both the Lake Charles and New Martinsville, West Virginia facilities would be treated. This treatment unit will employ the technology developed as part of the Hazen Research project discussed above. PPG has submitted a copy of a purchase order to be used for preliminary engineering, preparation of estimates, initial procurement, and to start detail design engineering and a copy of a purchase order to purchase the retort furnace.

PPG also has stated that in March 1992, it will submit documentation of approved authorization for funds to construct, start-up, and operate this unit. Actual award of two lump sum contracts to construct a retort unit at PPG's Lake Charles, Louisiana facility are not expected to be issued until the June-August timeframe, however. PPG intends to award the necessary contracts in two phases: one for the foundation work on approximately July 1, 1992, the second by September 1, 1992 for the mechanical, structural, and electrical work. EPA is convinced that PPG has made a substantial commitment to construct a treatment unit that will treat its D009 and K106 wastes to BDAT standards. However, EPA will not view the 40 CFR 268.5(a)(2) demonstration as having been fully met and will not grant final approval of a case-by-case application for the wastes generated at the PPG Lake Charles, Louisiana and New Martinsville, West Virginia facilities until final approval of documentation showing that the binding contractual commitments has been entered into to construct this treatment unit. When such a contract has been received and approved by EPA, it will be docketed and made available for public notice and comment. Unless this contract is submitted by April 3, 1992, EPA, upon docketing of the contract, will publish a supplemental notice and provide 15 days for comment on the contract, prior to taking final action on this application. (The deadline for comments stated above will remain effective for all aspects of this proposal other than the contract).

40 CFR 268.5(a)(4). PPG has stated that the retort unit to be constructed will have a capacity of up to 400 lbs/hour to treat the almost 400 tons/year of D009 and K106 wastes generated by both the Lake Charles, Louisiana and New Martinsville, West Virginia facilities. Likewise, PPG states that its future unit will possess sufficient treatment capacity to treat the more than 550 tons/year of D009 and K106 wastes that Pioneer intends to treat at PPG's retort unit. EPA believes that PPG's planned retort unit to be constructed at its Lake Charles, Louisiana facility will have sufficient capacity to treat all the D009 and K106 wastes covered by its case-by-case applications, as generated by both the Lake Charles, Louisiana and New Martinsville, West Virginia facilities as well as the D009 and K106 wastes generated by Pioneer's St. Gabriel, Louisiana facility.

40 CFR 268.5(a)(5). PPG has provided EPA with a detailed schedule for the construction and permitting of the retort unit to be constructed at its Lake Charles, Louisiana facility. As indicated in the schedule, PPG estimates that construction of the unit will be completed by March 1993. Testing of the unit is anticipated for April 1993 with actual on-line operation beginning in May 1993. EPA believes that PPG has provided the necessary construction and permitting milestones for bringing its retort unit on-line and therefore meets the requirements of this demonstration.

40 CFR 268.5(a)(6). PPG's (Lake Charles, LA) wastes will continue to dispose of its wastes at the CWM hazardous waste landfill in Emelle, Alabama. However, until such time that EPA gives its final approval of an extension, PPG is bound by the effective date of the land disposal restrictions applicable to its D009 and K106 wastes. CWM has provided written assurance to PPG that it will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation satisfies the requirement of making this demonstration.

40 CFR 268.5(a)(7). PPG's Lake Charles facility will use the CWM landfill, located in Emelle, Alabama. CWM has provided a letter, certifying that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation satisfies the requirement of making this demonstration.

(e) *PPG (New Martinsville, West Virginia).* PPG's New Martinsville, West Virginia facility generated approximately 18 tons of K106 wastewater treatment sludge and 34 tons of D009 mercury contaminated waste in 1990. In addition, PPG generates a small amount of D009 soil and debris, which PPG considers not amenable to BDAT. The New Martinsville facility currently disposes of all K106 sludge and other wastes identified as D009 in a CWM landfill in Model City, New York.

40 CFR 268.5(a)(2). PPG plans to construct one thermal retort unit at the Lake Charles facility at which the D009 and K106 wastes from both the Lake Charles and PPG's New Martinsville, West Virginia facilities would be treated. (See the discussion under PPG, Lake Charles, Louisiana, 40 CFR 268.5(a)(2) to support its demonstration of a binding contractual commitment to construct the retort unit.)

40 CFR 268.5(a)(4). PPG has stated that the thermal treatment unit to be constructed will have a capacity of 200 lbs./day (max. of 400 lbs./day) to treat all the D009 and K106 wastes generated by both the Lake Charles, Louisiana and New Martinsville, West Virginia facilities. (See the discussion under PPG, Lake Charles, Louisiana, 40 CFR 268.5(a)(4) to support its demonstration that the retort unit will have sufficient capacity to handle all the D009 and K106 wastes.)

40 CFR 268.5(a)(5). PPG has provided EPA with a detailed schedule for the construction and permitting of the retort unit to be constructed at its Lake Charles, Louisiana facility. (See the discussion under PPG, Lake Charles, Louisiana, 40 CFR 268.5(a)(5) to support its demonstration that a detailed schedule for the construction and permitting of the retort unit has been provided.)

40 CFR 268.5(a)(6). The D009 and K106 wastes generated at PPG's New Martinsville, West Virginia facility will continue to be disposed of at the CWM hazardous waste landfill in Model City, New York. CWM has provided written assurance to PPG that it will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation is sufficient to make this demonstration.

40 CFR 268.5(a)(7). PPG's New Martinsville, West Virginia will continue to use the CWM landfill, located in Model City, New York. However, until such time that EPA gives its final approval of an extension for any facility, that facility is bound by the effective date of the land disposal restrictions applicable to its D009 and K106 wastes. CWM has provided a letter, certifying that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation is sufficient to make this demonstration.

(f) *Pioneer Chlor-Alkali Company.* Pioneer Chlor Alkali Company (Pioneer) is located in St. Gabriel, Louisiana. The St. Gabriel facility generates approximately 300 tons per year of K106 waste and up to 251 tons per year of D009 waste. The facility generates some D009 waste that Pioneer considers not amenable to thermal treatment; Pioneer has stated that it will prepare a separate request to EPA requesting a treatability variance for this waste. K106 sludge and other wastes identified as D009 are combined together in bulk containers, solidified, and disposed of at a Rollins Environmental Services hazardous waste landfill in Louisiana.

40 CFR 268.5(a)(2). Pioneer is planning to use the retort unit to be constructed at PPG's Lake Charles, Louisiana facility to treat the D009 and K106 wastes generated at its St. Gabriel, Louisiana facility. Pioneer has provided a letter from PPG to Pioneer stating that PPG is committing sufficient treatment capacity at its planned Lake Charles facility to treat Pioneer's St. Gabriel D009 and K106 wastes. Pioneer has stated that it will provide to EPA documentation that demonstrates a binding contractual commitment to use the treatment capacity that has been offered by PPG to treat to BDAT standards the D009 and K106 wastes generated at the St. Gabriel, Louisiana facility.

EPA is satisfied that Pioneer has made a substantial commitment to arrange for the treatment capacity needed to treat its D009 and K109 wastes to BDAT standards. However, EPA will not view the 40 CFR 268.5(a)(2) demonstration as having been satisfactorily met and cannot grant final approval of the case-by-case application for the D009 and K106 wastes generated at Pioneer's St. Gabriel, Louisiana facility. Any such contract must indicate that certain contingencies referred to in PPG's letter, relating to the nature of Pioneer's waste and whether the State of Louisiana objects to treatment at PPG's facility, have been resolved. In addition, the PPG letter indicates that it has sufficient capacity to treat Pioneer's waste as well as its own, and EPA accepts that representation for purposes of this proposal. However, the data available to EPA leave some uncertainty as to the adequacy of this capacity, and EPA will require more detailed information in this regard to be provided as part of, or simultaneously with, the final contract between PPG and Pioneer. When such a contract has been received and approved by EPA, it will be docketed and made available for public notice and comment. Unless this contract is submitted by April 3, 1992, EPA, upon docketing of the contract, will publish a supplemental notice and provide 15 days for comment on the contract, prior to taking final action on this application. (The deadline for comments stated above will remain effective for all aspects of this proposal other than the contract).

40 CFR 268.5(a)(4). Pioneer has stated that the PPG thermal treatment unit to be constructed at Lake Charles, Louisiana will have sufficient capacity to adequately handle all the K106 and D009 waste that is generated at its St. Gabriel, Louisiana facility. PPG has provided a letter confirming that it has sufficient capacity and will commit such capacity to Pioneer to treat the D009 and K106 wastes generated at Pioneer's St. Gabriel, Louisiana facility. EPA believes that this documentation is sufficient to make this demonstration.

40 CFR 268.5(a)(5). Since Pioneer will use PPG's planned Lake Charles, Louisiana retort unit, the schedule submitted by PPG regarding the construction and permitting of its treatment unit likewise is applicable for this demonstration. As such, EPA believes the requirements of this demonstration to have been met.

40 CFR 268.5(a)(6). Pioneer Chlor-Alkali Company's wastes will continue to be disposed of in the Rollins Louisiana hazardous waste landfill. Rollins has provided their written assurance to Pioneer that Rollins will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation satisfies the requirement of making this demonstration.

40 CFR 268.5(a)(7). Pioneer will use the Rollins landfill in Louisiana. Rollins has provided a letter, certifying that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation satisfies the requirement of making this demonstration.

(g) *Vulcan Chemicals.* Vulcan Chemicals (Vulcan) is located in Port Edwards, Wisconsin. The Port Edwards facility generates approximately 75,000 lbs per year of K106 waste, 50,000 lbs per year of low mercury D009, and 12,000 lbs of high mercury D009 waste. The facility generates some D009 waste that Vulcan considers not amenable to thermal treatment; Vulcan stated that it will prepare a separate request to EPA requesting a treatability variance for this sub-category of D009 waste. K106 sludge and other wastes identified as D009 are containerized in lined 55 gallon steel drums and shipped to the Chemical Waste Management Adams Center landfill.

40 CFR 268.5(a)(2). Vulcan has provided EPA a copy of an approved authorization for expenditure to purchase and install a retort unit at its Port Edwards, Wisconsin facility. Vulcan has stated that it will provide to EPA, on or before April 1, 1992, documentation, including purchase orders for procurement of the retort unit and contractor construction and installation services that demonstrates a binding contractual commitment to construct the treatment unit to treat to BDAT standards the D009 and K106 wastes generated at the Port Edwards, Wisconsin facility. This treatment unit will employ the technology developed as part of the Hazen Research project discussed above.

EPA is satisfied that Vulcan has made a substantial commitment to construct a treatment unit that will treat its D009 and K106 wastes to BDAT standards. Additional documentation regarding the procurement and construction of this unit is expected to be submitted by Vulcan no later than April 1, 1992. EPA will not view the 40 CFR 268.5(a)(2) demonstration as having been satisfactorily met, however, until appropriate documentation is submitted to EPA showing that a binding contractual commitment has been entered into to construct this treatment unit. When such a contract has been received and approved by EPA, it will be docketed and made available for public notice and comment. Unless this contract is submitted by April 3, 1992, EPA, upon docketing of the contract, will publish a supplemental notice and provide 15 days for comment on the contract, prior to taking final action on this application. (The deadline for comments stated above will remain effective for all aspects of this proposal other than the contract).

40 CFR 268.5(a)(4). Vulcan has stated that the retort unit to be constructed will have a capacity of approximately 1000 lbs./day and thus more than adequate capacity to treat the approximately 100,000 lb./year of K106 and D009 waste generated by its Port Edwards facility.

EPA believes that Vulcan has met the requirements of this demonstration.

40 CFR 268.5(a)(5). Vulcan has provided EPA with a detailed schedule for the construction and permitting of the retort unit to be constructed at its Port Edwards, Wisconsin facility. As indicated in the schedule, Vulcan estimates that a construction and operating air permit will be approved by August 1992 with construction of the unit completed by April of 1993. It is further estimated that a final permit approval to operate this unit will be obtained by October 1993. EPA believes that Vulcan has submitted the documentation necessary to meet this requirement.

40 CFR 268.5(a)(6). The D009 and K106 wastes will continue to be disposed of in Chemical Waste Management's (CWM) Adams Center hazardous waste landfill. CWM has provided written assurance to Vulcan that it will have the necessary capacity available to manage these wastes during the extension, if approved. EPA believes that this documentation is sufficient to make this demonstration.

40 CFR 268.5(a)(7). Vulcan will use CWM's Adams Center landfill. CWM has provided a letter, certifying that this landfill meets the requirements of 40 CFR 268.5(h)(2). A copy of this letter is included in the public docket established for this notice. EPA believes that this documentation is sufficient to make this demonstration.

B. Consultations With States

In accordance with 40 CFR 268.5(e), EPA consulted with the appropriate State agencies for the States in which the seven facilities applying for a case-by-case extension are located. In particular, EPA consulted with the States of Georgia, Kentucky, Louisiana, Tennessee, West Virginia, and Wisconsin to determine whether these States had any permitting, enforcement, or other concerns regarding the respective facilities within their boundaries that EPA should take into consideration in deciding to grant or deny these case-by-case applications. No such concerns were identified by the States.

III. EPA's Proposed Action

For the reasons discussed above, EPA believes that each of the seven chlorine manufacturing facilities has made and is continuing to make a good-faith effort towards providing sufficient and appropriate treatment capacity for the D009 and K106 wastes that are the subject of its case-by-case application. EPA believes that two of the facilities, i.e., Olin's Augusta, Georgia and Charleston, Tennessee facilities have met all the 40 CFR 268.5 demonstrations. Therefore, EPA is proposing to grant a one-year extension of the May 8, 1992 effective data of the land disposal restrictions date for D009 and K106 wastes generated at these two facilities. If the extension is granted, these wastes could continue to be managed in the manner that they are currently handled until May 8, 1993 (unless the extension is renewed for up to one additional year, in which case it would be until May 8, 1994), while the proposed treatment facilities are being constructed.

The other five facilities, i.e., BFGoodrich's facility in Calvert City, Kentucky, Pioneer's facility in St. Gabriel, Louisiana, PPG's facilities in Lake Charles, Louisiana and New Martinsville, West Virginia, and Vulcan's facility in Port Edwards, Wisconsin have met six of the required seven demonstrations in 40 CFR 268.5, but still need to execute actual contracts to construct or otherwise provide the necessary treatment capacity. To expedite processing of these applications, EPA is announcing its intent to propose (at this time) that all requirements in each of these five facilities' case-by-case applications have been met, other than the requirement of a binding contractual commitment. For these five facilities, EPA proposes to grant an extension of the effective data of the LDRs following EPA approval of documentation submitted by each of these five facilities that it has secured a binding contractual agreement to construct its retort unit or otherwise provide treatment capacity that will be capable of treating its D009 and K106 wastes to meet the established BDAT standards. As discussed above under the 40 CFR 268.5(a)(2) demonstration for each facility, EPA will ensure that 15 days are allowed for public comment on the documentation of a contractual commitment before taking final action on the relevant application. Until such time that EPA gives its final approval of an extension for any facility, that facility is bound by the effective date of the land disposal restrictions applicable to its D009 and K106 wastes.

For any application that is granted, the applicant must comply with the provisions of 40 CFR 268.5 (f) and (g), and must submit monthly progress reports addressing progress being made toward providing the necessary treatment capacity. EPA must also be notified of any change in the conditions specified in the application. The extension remains in effect unless the facility fails to make a good-faith effort to meet the schedule for completion, the Agency denies or revokes any required permit, conditions certified in the application change, or the facility violates any law or regulations implemented by EPA.

(Sections 1006, 2002(a), 3001, and 3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6924)).

Dated: March 12, 1992.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

Part X

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Airspace Reclassification; Final Rule; Technical Amendment

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. 24456; Amendment No. 71-15]

RIN 2120-AB95

Airspace Reclassification

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; technical amendment.

SUMMARY: This action amends § 71.1 of the Federal Aviation Regulations to clarify the incorporation by reference of FAA Order 7400.7, Compilation of Regulations. This action explains how the FAA will amend the listings of Federal airways, area low routes, jet routes and other airspace incorporated by reference in part 71 during the incorporation by reference period.

EFFECTIVE DATE: This amendment is effective as of March 19, 1992, through September 15, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. William Mosley, Air Traffic Rules Branch (ATP-230), Airspace Rules and Aeronautical Information Division, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-9251.

SUPPLEMENTARY INFORMATION:

Background

FAA Order 7400.7 lists the airspace descriptions for all jet routes, area high routes, Federal airways, control areas, control area extensions, area low routes, control zones, transition areas, terminal control areas, airport radar service areas, positive control areas, and reporting points. Due to the length of these descriptions, the FAA requested approval from the Office of the Federal Register to incorporate the material by reference in § 71.1. The Director of the Federal Register approved the incorporation by reference of FAA Order 7400.7 in § 71.1 as of December 17, 1991 through September 15, 1993. However, § 71.1 did not describe how the FAA would handle changes to the airspace designations incorporated by reference in part 71. This rule explains how the FAA will amend these listings.

The Rule

During the incorporation by reference period, the FAA will process all proposed changes of the airspace listings in FAA Order 7400.7 in full text as proposed rule documents in the **Federal Register**. Likewise, all amendments of these listings will be published in full text as final rules in the **Federal Register**. The FAA will periodically integrate all final rule amendments into a revised edition of FAA Order 7400.7, and submit the revised edition to the Director of the Federal Register for approval for incorporation by reference in § 71.1.

The FAA has determined that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

This action is an amplification and clarification of an existing rule and does not place any new restriction or requirements on the public. Further, the FAA finds that this amendment does not involve a change in the dimensions or operating requirements of the airspace listings incorporated by reference in part 71. Consequently, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

Because this action merely describes how the FAA will amend the listings contained in FAA Order 7400.7, the FAA finds that good cause exists, pursuant to 5 U.S.C. 553(d), for making the amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 71

Airspace, Airways, and Jet routes, Incorporation by reference.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

2. Section 71.1 is revised to read as follows:

§ 71.1 Applicability.

The complete listing for all jet routes, area high routes, Federal airways, control areas, control area extensions, area low routes, control zones, transition areas, terminal control areas, airport radar service areas, positive control areas, and reporting points can be found in FAA Order 7400.7, Compilation of Regulations, which was last published April 30, 1991, and effective November 1, 1991. This incorportion by reference was approved by the Director the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The approval to incorporate by reference FAA Order 7400.7 is effective as of December 17, 1991 through September 15, 1993. During the incorporation by reference period, proposed changes to the listings of jet routes, area high routes, Federal airways, control areas, control area extensions, area low routes, control zones, transition areas, terminal control areas, airport radar service areas, positive control areas, and reporting points will be published in full text as proposed rule documents in the **Federal Register**. Amendments to the listings of jet routes, area high routes, Federal airways, control areas, control area extensions, area low routes, control zones, transition areas, terminal control areas, airport radar service areas, positive control areas, and reporting points will be published in full text as final rules in the **Federal Register**. Periodically, the final rule amendments will be integrated into a revised edition of the compilation and submitted to the Director of the Federal Register for approval for incorporation by reference in this section. Copies of this order may be obtained from the Document Inspection Facility, APA-220, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, (202) 267-3484. Copies may be inspected in Docket Number 24456 at the Federal Aviation Administration, Office of the Chief Counsel, AGC-10, room 915G, 800 Independence Avenue, SW., Washington, DC 20591 weekdays between 8:30 a.m. and 5 p.m., or at the Federal Register, 1100 L Street, NW., room 8401, Washington, DC. This section is effective as of December 17, 1991, through September 15, 1993.

Issued in Washington, DC, on March 13, 1992.

Harold W. Becker,

Acting Director, Air Traffic Rules and Procedures Service.

The President

Proclamation 6412—National Women in Agriculture Day, 1992

Proclamation 6413—Extending United States Copyright Protections to the Works of the People's Republic of China

Federal Register
Vol. 57, No. 54
Thursday, March 19, 1992

Presidential Documents

Title 3—

The President

Proclamation 6412 of March 17, 1992

National Women in Agriculture Day, 1992

By the President of the United States of America

A Proclamation

As we Americans observe Women's History Month this March, we remember in a special way women who were pioneers in their respective fields—including women who were the first to pursue jobs and degrees traditionally held by men. Women have always played leading roles in American agriculture, however, and today they remain full working partners on our Nation's farms. On this occasion, we gratefully recognize their contributions and achievements.

In every generation, in times of adversity as well as in times of plenty, women have demonstrated the hardy spirit and the finely honed skills necessary to ensure the survival of the American farm. On the frontier, women helped to raise crops and care for livestock while meeting the numerous demands of home and family. During periods of conflict in our Nation's history—and, in particular, during the long and difficult years of the Second World War—women played critical roles in the management and operation of our farms and ranches.

Today new challenges confront American farm women as they strive to apply innovative agricultural methods and technology while meeting demands for better business practices. Women in agriculture are meeting those challenges with an increasing array of new skills and knowledge—and with the remarkable resilience and resolve that have long characterized the American farmer.

Through the grace of Almighty God and through the daily labors of the men and women who till the soil, plant the seeds, nourish the tender shoots, and reap the harvest, our Nation's farms are the most efficient and most productive in the world. In fact, America's farmers produce enough food and fiber to meet our Nation's needs and those of millions of people around the globe.

On this occasion, we offer special thanks to the women who serve on our Nation's farms. In agriculture as in virtually every other field of endeavor, women are making vital contributions to our families, communities, and country.

The Congress, by Senate Joint Resolution 176, has designated March 19, 1992, as "National Women in Agriculture Day" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim March 19, 1992, as National Women in Agriculture Day. I invite all Americans to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this seventeenth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

Presidential Documents

Proclamation 6413 of March 17, 1992

Extending United States Copyright Protections to the Works of the People's Republic of China

By the President of the United States of America

A Proclamation

Section 104(b)(5) of title 17 of the United States Code provides that when the President finds that a particular foreign nation extends, to works by authors who are nationals or domiciliaries of the United States of America or to works first published in the United States, copyright protection on substantially the same basis as that on which the foreign nation extends protection to works of its own nationals and domiciliaries and works first published in that nation, the President may extend protection under that title to works of which one or more of the authors is, on the date of first publication, a national, domiciliary, or sovereign authority of that nation, or which are first published in that nation.

Satisfactory assurances have been received that as of March 17, 1992, as provided in Article 3(9) of the Memorandum of Understanding Between the Government of the United States of America and the Government of the People's Republic of China on the Protection of Intellectual Property (hereinafter the "Memorandum of Understanding"), China will grant to works of United States nationals and domiciliaries and works first published in the United States protection in the People's Republic of China on the same basis as works of Chinese nationals and domiciliaries and works first published in China which are not in the public domain.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by the authority vested in me by section 104 of title 17 of the United States Code, do find and proclaim that effective March 17, 1992, the conditions specified in section 104(b)(5) of title 17 of the United States Code have been satisfied in the People's Republic of China with respect to works of which one or more of the authors is, on the date of first publication, a national or domiciliary of the United States of America, or which are first published in the United States, and as of March 17, 1992, works of Chinese nationals and domiciliaries and works first pblished in the People's Republic of China are entitled to protection under title 17 of the United States Code.

I hereby request the Secretary of State to notify the Government of the People's Republic of China that the date on which works of Chinese nationals and domiciliaries and works first published in the People's Republic of China are entitled to protection under title 17 of the United States Code, is March 17, 1992, 60 days after the date of signature of the Memorandum of Understanding.

IN WITNESS WHEREOF, I have hereunto set my hand this seventeenth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 18, 1992

Public Laws

102d Congress, 1st Session, 1991

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 1st Session, 1991.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO

Rules and Regulations

Federal Register
Vol. 57, No. 55
Friday, March 20, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revisions of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document restates the delegations of authority from the Secretary of Agriculture and the General Officers of the Department of Agriculture (USDA) to the Assistant Secretary for Science and Education and restates the delegations of authority from the Assistant Secretary for Science and Education to the heads of those agencies that report to the Assistant Secretary. These delegations reflect changes made by Public Law 101–624, the Food, Agriculture, Conservation, and Trade Act of 1990, that affect programs administered by the Assistant Secretary.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: C. Michael Hoback, Office of the Assistant Secretary of Agriculture for Science and Education, USDA, Washington, DC 20250, (202) 720–5035.

SUPPLEMENTARY INFORMATION: This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is exempt from the notice and comment procedures of the Administrative Procedure Act, and this rule may be effective less than 30 days after publication in the **Federal Register**.

Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order No. 12291. This action is not a rule as defined by Public Law 96–354, the Regulatory Flexibility Act, (5 U.S.C. 601 *et seq.*) and thus is exempt from its provisions. This rule also is exempt from the requirements of the National Environmental Policy Act, as amended (42 U.S.C. 4321 *et seq.*) and the requirements of the Paperwork Reduction Act (44 U.S.C. chapter 35).

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, part 2, subtitle A, title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for part 2 continues to read as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Sections 2.30 and 2.30a are revised to read as follows:

§ 2.30 Delegations of Authority to the Assistant Secretary for Science and Education.

The following delegations of authority are made by the Secretary of Agriculture to the Assistant Secretary for Science and Education.

(a) *Related to science and education.*

(1) Direct, coordinate and provide national leadership and support for research, extension and teaching programs in the food and agricultural sciences to meet major needs and challenges in development of new food and fiber; food and agriculture viability and competitiveness in the global economy; enhancing economic opportunities and quality of life for rural America; food and agricultural system productivity and development of new crops and new uses; the environment and natural resources; or the promotion of human health and welfare pursuant to the National Agricultural Research, Extension, and Teaching Policy of 1977, as amended (7 U.S.C. 3101, *et seq.*).

(2) Provide national leadership and support for research, extension, and teaching programs in the food and agricultural sciences to carry out sustainable agriculture research and education; a national plant genetic resources program; a national agricultural weather information system; research regarding the production, preparation, processing, handling, and storage of agricultural products; a plant and animal pest and disease control program; and any other provisions pursuant to Title XVI of the Food, Agriculture, Conservation, and Trade Act of 1990 (Pub. L. 101–624, 104 Stat. 3703), except the provisions relating to the USDA Graduate School in Section 1669 and the provisions relating to alternative agricultural research and commercialization under sections 1657–1664 (7 U.S.C. 5801 *et seq.*).

(3) Coordinate USDA policy and conduct programs relative to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136 *et seq.*) and coordinate the Department's integrated pest management programs and the pesticide assessment program (7 U.S.C. 136–136y).

(4) Carry out research, technology development, technology transfer, and demonstration projects related to the economic feasibility of the manufacture and commercialization of natural rubber from plants containing hydrocarbons. (7 U.S.C. 178–178n).

(5) Conduct research on the control of undesirable species of honey bees in cooperation with specific foreign governments (7 U.S.C. 284).

(6) Administer the appropriation for the endowment and maintenance of colleges for the benefit of agriculture and the mechanical arts (7 U.S.C. 321–328a).

(7) Administer teaching funds authorized by section 22 of the Bankhead Jones Act, as amended (7 U.S.C. 329).

(8) Administer a cooperative agricultural extension program in accordance with the Smith-Lever Act, as amended (7 U.S.C. 341–349).

(9) Cooperate with the States for the purpose of encouraging and assisting them in carrying out research related to the problems of agriculture in its broadest aspects under the Hatch Act, as amended (7 U.S.C. 361a–361i).

(10) Support agricultural research at eligible institutions in the States through the provision of Federal-grant funds to help finance physical research facilities (7 U.S.C. 390–390k).

(11) Conduct research concerning domestic animals and poultry, their protection and use, the causes of

contagious, infectious, and communicable diseases, and the means for the prevention and cure of the same (7 U.S.C. 391).

(12) Conduct research related to the dairy industry and to the dissemination of information for the promotion of the dairy industry (7 U.S.C. 402).

(13) Conduct research and demonstrations at Mandan, ND, and Lewisburg, TN, related to dairy livestock breeding, growing, and feeding, and other problems pertaining to the establishment of the dairy and livestock industries (7 U.S.C. 421–422).

(14) Conduct research on new uses for cotton and on cotton ginning and processing (7 U.S.C. 423–424).

(15) Administer and conduct research into the basic problems of agriculture in its broadest aspects, including, but not limited to, production, marketing (other than statistical and economic research but including research related to family use of resources), distribution, processing, and utilization of plant and animal commodities; problems of human nutrition; development of markets for agricultural commodities; discovery, introduction, and breeding of new crops, plants, and animals, both foreign and native; conservation development; and development of efficient use of farm buildings, homes, and farm machinery except as otherwise delegated in § 2.17(a)(2) and § 2.50(a)(2) (7 U.S.C. 427, 1621–1627, 1629, 2201, and 2204).

(16) Conduct research on varietal improvement of wheat and feed grains to enhance their conservation and environmental qualities (7 U.S.C. 428b).

(17) Advance the livestock and agricultural interests of the United States, including the breeding of horses suited to the needs of the United States (7 U.S.C. 437).

(18) Enter into agreements with and receive funds from any State, other political subdivision, organization, or individual for the purpose of conducting cooperative research projects (7 U.S.C. 450a).

(19) Carry out a program (IR–4 Program) for the collection of residue and efficacy data in support of minor use pesticide registration or reregistration and to determine tolerances for minor use chemical residues in or on agricultural commodities (7 U.S.C. 450i).

(20) Administer and direct a program of competitive and special grants to State agricultural experiment stations, colleges and universities, other research institutions and organizations, Federal agencies, private organizations or corporations, and individuals and of facilities grants to State agricultural experiment stations and designated colleges and universities to promote research in food, agriculture and related areas (7 U.S.C. 450i).

(21) Provide resource information concerning rural electric and telephone use and rural development efforts (7 U.S.C. 917).

(22) Act as a catalyst to provide access to leadership training and services programs encompassing private, public, business, and government entities (7 U.S.C. 950aa–1).

(23) Conduct research related to soil and water conservation, engineering operations, and methods of cultivation to provide for the control and prevention of soil erosion (7 U.S.C. 1010 and 16 U.S.C. 590a).

(24) Maintain four regional research laboratories and conduct research at such laboratories to develop new scientific, chemical, and technical uses and new and extended markets and outlets for farm commodities and products and the byproducts thereof (7 U.S.C. 1292).

(25) Conduct a special cotton research program designed to reduce the cost of producing upland cotton in the United States (7 U.S.C. 1441 note).

(26) Conduct a research and development program to formulate new uses for farm and forest products (7 U.S.C. 1632(b)).

(27) Conduct research to develop and determine methods for the humane slaughter of livestock (7 U.S.C. 1904).

(28) Administer a competitive grant program for non-profit institutions to establish and operate centers for rural technology or cooperative development (7 U.S.C. 1932(f)).

(29) Administer a nutrition education program for Food Stamp recipients and for the distribution of commodities on reservations (7 U.S.C. 2020(f)).

(30) Conduct education and extension programs and a pilot project related to nutrition education (7 U.S.C. 2027(a) and 5932).

(31) Provide for the dissemination of appropriate rural health and safety information resources possessed by the National Agricultural Library (NAL) Rural Information Center, in cooperation with State educational program efforts (7 U.S.C. 2662).

(32) Develop and maintain national and international library and information systems and networks and facilitate cooperation and coordination of the agricultural libraries of colleges, universities, USDA, and their closely allied information gathering and dissemination units in conjunction with private industry and other research libraries (7 U.S.C. 2201, 2204, 3125a, and 3126).

(33) Accept gifts and order disbursements from the Treasury for the benefit of NAL or for the carrying out of any of its functions (7 U.S.C. 2264–2265).

(34) Conduct education and outreach programs for socially disadvantaged farmers and ranchers (7 U.S.C. 2279).

(35) Administer, in cooperation with the States, a cooperative rural development and small farm research and extension program under the Rural Development Act of 1972, as amended (7 U.S.C. 2661–2667).

(36) Administer a cooperative extension program under the Farmer-to-Consumer Direct Marketing Act of 1976 (7 U.S.C. 3004).

(37) Coordinate the development and carrying out by Department agencies of all matters and functions pertaining to agricultural research conducted or funded by the Department involving biotechnology, including the development and implementation of guidelines for oversight of research activities, acting as liaison on all matters and functions pertaining to agricultural research in biotechnology between agencies within the Department and between the Department and other governmental, educational, or private organizations and carrying out any other activities authorized by (7 U.S.C. 3121 (7 U.S.C. 3121).

(38) Establish a Joint Council on Food and Agricultural Sciences to bring about more effective research, extension, and teaching in the food and agricultural sciences (7 U.S.C. 3122).

(39) Establish and oversee the National Agricultural Research and Extension Users Advisory Board and the Agricultural Science and Technology Review Board (7 U.S.C. 3123 and 3123A).

(40) Appoint a Director of NAL to administer the programs and services of NAL consistent with its charge to serve as the primary agricultural information resource of the United States and to enter into agreements and receive funds from various entities to conduct NAL activities (7 U.S.C. 3125a).

(41) Provide and distribute information and data about Federal, State, local, and other rural development assistance programs and services available to individuals and organizations. To the extent possible, NAL shall use telecommunications technology to disseminate such information to rural areas (7 U.S.C. 3125b).

(42) Assemble and collect food and nutrition educational material, including the results of nutrition research, training methods, procedures, and other materials related to the purposes of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended; maintain such information; and provide for the dissemination of such information and materials on a regular basis to State educational agencies and other interested parties (7 U.S.C. 3128).

(43) Conduct programs related to composting research and extension (7 U.S.C. 3130).

(44) Conduct a program of grants to States to expand, renovate, or improve schools of veterinary medicine (7 U.S.C. 3151).

(45) Formulate and administer higher education programs in the food and agricultural sciences and administer grants to colleges and universities (7 U.S.C. 3152).

(46) Administer the National Food and Agricultural Sciences Teaching Awards program for recognition of educators in the food and agricultural sciences (7 U.S.C. 3152).

(47) Administer the National Agricultural Science Award for research or advanced studies in the food and agricultural sciences (7 U.S.C. 3153).

(48) Administer grants to colleges, universities, and Federal laboratories for research on the production and marketing of alcohols and industrial hydrocarbons from agricultural commodities and forest products (7 U.S.C. 3154).

(49) Establish a national food science and research center for the Southeast Region of the United States and administer a national food and human nutrition research and extension program under the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3171–3175).

(50) Administer and direct an animal health and disease research program under the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3191–3201).

(51) Support continuing agricultural and forestry extension and research, resident instruction, and facilities improvement at 1890 land-grant colleges, including Tuskegee University, and administer a grant program for five National Research and Training Centennial Centers (7 U.S.C. 3221, 3222, and 3222a–3222c).

(52) Support agricultural research at the 1890 land-grant colleges, including Tuskegee University, through Federal-grant funds to help finance physical facilities (7 U.S.C. 3223).

(53) Make grants, under such terms and conditions as the Assistant Secretary determines, to eligible institutions for the purpose of assisting such institutions in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings, to provide adequate facilities to conduct extension work, and issue rules and regulations as necessary to carry out this authority (7 U.S.C. 3224).

(54) Provide policy direction and coordinate the Department's work with national and international institutions and other persons throughout the world in the performance of agricultural science, education and development activities (7 U.S.C. 3291).

(55) Administer grants to States in support of the establishment and operation of International Trade Development Centers (7 U.S.C. 3292).

(56) Conduct program evaluations to improve the administration and effectiveness of agricultural research, extension, and teaching programs (7 U.S.C. 3317).

(57) Enter into contracts, grants, or cooperative agreements to further research, extension, or teaching programs in the food and agriculture sciences (7 U.S.C. 3318).

(58) Enter into cost-reimbursable agreements with State cooperative institutions for the acquisition of goods or services in support of research, extension, or teaching activities in the food and agricultural sciences, including the furtherance of library and related information programs (7 U.S.C. 3319a).

(59) Conduct research and develop and implement a pilot project program for the development of supplemental and alternative crops (7 U.S.C. 3319d).

(60) Administer an aquaculture assistance program, involving centers, by making grants to eligible institutions for research and extension to facilitate or expand production and marketing of aquacultural food species and products; making grants to States to formulate aquaculture development plans for the production and marketing of aquacultural species and products; conducting a program of research, extension and demonstration at aquacultural demonstration centers; and making grants to aquaculture research facilities to do research on intensive water recirculating systems (7 U.S.C. 3321–3323).

(61) Administer a cooperative rangeland research program (7 U.S.C. 3331–3336).

(62) Conduct a program of basic research on cancer in animals and birds (7 U.S.C. 3902).

(63) Design and implement educational programs and distribute materials in cooperation with the cooperative extension services of the States emphasizing the importance of productive farmland, and designate a farmland information center, pursuant to section 1544 of the Farmland Protection Policy Act (7 U.S.C. 4205).

(64) Conduct programs of education, extension, and research related to water quality, agrichemicals and nutrient management (7 U.S.C. 5503–5506).

(65) Administer programs and conduct projects for research, extension, and education on sustainable agriculture (7 U.S.C. 5811–5813).

(66) Conduct research and cooperative extension programs to optimize crop and livestock production potential, integrated resource management, and integrated crop management (7 U.S.C. 5821).

(67) Design, implement, and develop handbooks, technical guides, and other educational materials emphasizing sustainable agriculture production systems and practices (7 U.S.C. 5831).

(68) Administer a competitive grant program to organizations to carry out a training program on sustainable agriculture (7 U.S.C. 5832).

(69) Administer a national research program on genetic resources to provide for the collection, preservation, and dissemination of genetic material important to American food and agriculture production (7 U.S.C. 5841–5844).

(70) Conduct remote-sensing and other weather-related research (7 U.S.C. 5852).

(71) Establish an Agricultural Weather Office and administer a national agricultural weather information system, including a competitive grants program for research in atmospheric sciences and climatology (7 U.S.C. 5852–5853).

(72) Administer a research and extension grant program to States to administer programs for State agricultural weather information systems (7 U.S.C. 5854).

(73) Administer grants and conduct research programs to measure microbiological and chemical agents associated with the production, preparation, processing, handling, and storage of agricultural products (7 U.S.C. 5871–5874).

(74) Administer and conduct research and extension programs on integrated pest management, including research to benefit floriculture (7 U.S.C. 5881).

(75) Establish a national pesticide resistance monitoring program and disseminate information on materials and methods of pest and disease control available to agricultural producers through the pest and disease control database (7 U.S.C. 5882).

(76) Administer and conduct research and grant programs on the control and eradication of exotic pests (7 U.S.C. 5883).

(77) Conduct research and educational programs to study the biology and behavior of chinch bugs (7 U.S.C. 5884).

(78) Administer research programs and grants for risk assessment research to address concerns about the environmental effects of biotechnology (7 U.S.C. 5921).

(79) Administer a special grants program to assist efforts by research institutions to improve the efficiency and efficacy of safety and inspection systems for livestock products (7 U.S.C. 5923).

(80) Establish and coordinate USDA grant programs and conduct basic and applied research and technology development in the areas of plant genome structure and function (7 U.S.C. 5924).

(81) Administer research and extension grants for the development of agricultural production and marketing systems to service niche markets (7 U.S.C. 5925).

(82) Administer a grants program to States on immunoassay as it is used to detect agricultural pesticide residues on agricultural commodities and to diagnose plant and animal diseases (7 U.S.C. 5925).

(83) Conduct research programs for the development of technology to determine animal lean content (7 U.S.C. 5925).

(84) Conduct and support research programs to determine the presence of aflatoxin in the food and feed chains (7 U.S.C. 5925).

(85) Administer grants and conduct research programs to develop production methods and commercial uses for mesquite (7 U.S.C. 5925).

(86) Administer grants and conduct research programs to investigate enhanced genetic selection and processing techniques of prickly pears (7 U.S.C. 5925).

(87) Conduct a research program and administer grants and contracts for research on the disease of scrapie in sheep and goats (7 U.S.C. 5925).

(88) Support and conduct basic and applied research in the development of new commercial products from natural plant materials for industrial, medical, and agricultural applications (7 U.S.C. 5925).

(89) Establish and administer a program for the development and utilization of an agricultural communications network (7 U.S.C. 5926).

(90) Establish an Argicultural Research Facilities Planning and Closure Study Commission to review currently operating and planned facilities, and to develop recommendations (7 U.S.C. 5927).

(91) Administer research programs to establish national centers for agricultural product quality research (7 U.S.C. 5928).

(92) Administer education programs on Indian reservations and tribal jurisdictions (7 U.S.C. 5930).

(93) Administer a special grants program to study constraints on agricultural trade (7 U.S.C. 5931).

(94) Administer a demonstration grants program for support of an assistive technology program for farmers with disabilities (7 U.S.C. 5933).

(95) Conduct research on diseases affecting honeybees (7 U.S.C. 5934).

(96) Control within USDA the acquisition, use, and disposal of material and equipment that may be a source of ionizing radiation hazard.

(97) Conduct programs of research, technology development, and education related to global climate change (7 U.S.C. 6701–10).

(98) Administer the Small Business Innovation Development Act of 1982 for USDA (15 U.S.C. 638(e)–(k)).

(99) Coordinate Departmental policies under the Toxic Substances Control Act (15 U.S.C. 2601–2629).

(100) Provide educational and technical assistance in implementing and administering the conservation reserve program authorized in sections 1231–1244 of the Food Security Act of 1985 (Pub. L. 99–198, 99 Stat. 1509) (16 U.S.C. 3831–3844).

(101) Enter into cooperative research and development agreements with industry, universities, and others; institute a cash award program to reward scientific, engineering, and technical personnel; award royalties to inventors; and retain and use royalty income (15 U.S.C. 3710a–3710c).

(102) Coordinate USDA activities delegated under 15 U.S.C. 3710a through 3710c.

(103) Conduct educational and demonstrational work in cooperative farm forestry programs (16 U.S.C. 568).

(104) Cooperate with the States for the purposes of encouraging and assisting them in carrying out programs of forestry, natural resources, and environmental research (16 U.S.C. 582a–8).

(105) Establish and administer the Forestry Student Grant Program to provide competitive grants to assist the expansion of the professional education of forestry, natural resources, and environmental scientists (16 U.S.C. 1649).

(106) Provide for an expanded and comprehensive extension program for forest and rangeland renewable resources (16 U.S.C. 1671–1676).

(107) Provide technical, financial, and educational assistance to State foresters and State extension directors on rural forestry assistance (16 U.S.C. 2102).

(108) Provide educational assistance to State foresters under the Forest Stewardship Program (16 U.S.C. 2103a).

(109) Implement and conduct an educational program to assist the development of urban and community forestry programs (16 U.S.C. 2105).

(110) Provide staff support to the Secretary of Agriculture in his role as permanent Chair for the Joint Subcommittee on Aquaculture established by the National Aquaculture Act of 1980 and coordinate aquacultural activities within the Department (16 U.S.C. 2805).

(111) Perform research, development, and extension activities in aquaculture (16 U.S.C. 2804 and 2806).

(112) Provide educational assistance to farmers regarding the Agricultural Water Quality Protection Program (16 U.S.C. 3838b).

(113) Copy and deliver on demand selected articles and other materials from the Department's collections by photographic reproduction or other means within the permissions, constraints, and limitations of sections 106, 107, and 108 of the Copyright Act of October 19, 1976, (17 U.S.C. 106, 107, and 108).

(114) Authorize the use of the 4–H Club name and emblem (18 U.S.C. 707).

(115) Maintain a National Arboretum for the purposes of research and education concerning tree and plant life; accept and administer gifts or devices or real and personal property for the benefit of the National Arboretum; and order disbursements from the Treasury (20 U.S.C. 191–195).

(116) Conduct research on foot-and-mouth disease and other animal diseases (21 U.S.C. 113a).

(117) Conduct research on the control and eradication of cattle grubs (screwworms) (21 U.S.C. 114e).

(118) Obtain and furnish Federal excess property to eligible recipients for use in the conduct of research and extension programs (40 U.S.C. 483(d)(2)).

(119) Conduct research demonstration and promotion activities related to farm dwellings and other buildings for the purposes of reducing costs and adapting and developing fixtures and appurtenances for more efficient and economical farm use (42 U.S.C. 1476(b)).

(120) Carry out research, demonstration, and educational activities authorized in section 202(c) of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)).

(121) Conduct research on losses of livestock in interstate commerce due to injury or disease (45 U.S.C. 71 note).

(122) Administer a cooperative agricultural extension program related to agriculture, uses of solar energy with respect to agriculture, and home economics in the District of Columbia (D.C. Code 31–1409).

(123) Provide leadership and direct assistance in planning, conducting and evaluating extension programs under a memorandum of agreement with the Bureau of Indian Affairs dated May, 1956.

(124) Exercise the responsibilities of the Secretary under regulations dealing with Equal Employment Opportunity in the Cooperative Extension Service (part 18 of this subtitle).

(125) Represent the Department on the Federal Interagency Council on Education.

(126) Assure the acquisition, preservation, and accessibility of all information concerning food and agriculture by providing leadership to and coordination of the acquisition programs and related activities of the library and information systems, with the agencies of USDA, other Federal departments and agencies, State agricultural experiment stations, colleges and universities, and other research institutions and organizations.

(127) Formulate, write, or prescribe bibliographic and technically related standards for the library and information services of USDA.

(128) Determine by survey or other appropriate means, the information needs of the Department's scientific, professional, technical, and administrative staffs, its constituencies, and the general public in the areas of food, agriculture, the environment, and other related areas.

(129) Represent the Department on all library and information science matters before Congressional Committees and appropriate commissions, and provide representation to the coordinating committees of the Federal and State governments concerned with library and information science activities.

(130) Represent the Department in international organizational activities and on international technical committees concerned with agricultural science, education, and development activities, including library and information science activities.

(131) Prepare and disseminate computer files, indexes and abstracts, bibliographies, reviews, and other analytical information tools.

(132) Arrange for the consolidated purchasing and dissemination of printed and automated indexes, abstracts, journals, and other widely used information resources and services.

(133) Provide assistance and support to professional organizations and others concerned with library and information science matters and issues.

(134) Pursuant to the authority delegated by the Administrator of General Services to the Secretary of Agriculture in 34 FR 6406, 36 FR 1293, 36 FR 18440, and 38 FR 23838, appoint uniformed armed guards and special policemen, make all needful rules and regulations, and annex to such rules and regulations such reasonable penalties (not to exceed those prescribed in 40 U.S.C. 318(c), as will ensure their enforcement, for the protection of persons, property, buildings, and grounds of the Arboretum, Washington, DC; the U.S. Meat Animal Research Center, Clay Center, NE; the Agricultural Research Center, Beltsville, MD; and, the Animal Disease Center, Plum Island, NY, over which the United States has exclusive or concurrent criminal jurisdiction, in accordance with the limitations and requirements of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 *et. seq.*), the Act of June 1, 1948, as amended (40 U.S.C. 318 *et. seq.*), and the policies, procedures, and controls prescribed by the General Services Administration. Any rules or regulations promulgated under this authority shall be approved by the Director, Office of Operations, and the General Counsel prior to issuance.

(135) Represent the Department on the Federal Coordinating Council for Science, Engineering, and Technology.

(136) Administer the Department's Patent Program except as delegated to the General Counsel in § 2.31(g).

(137) Review cooperative research and development agreements entered into pursuant to 15 U.S.C. 3710a–3710c, with authority to disapprove or require the modification of any such agreement.

(b) *Related to committee management.* Establish or reestablish regional, state and local advisory committees for the activities authorized. This authority may not be redelegated.

(c) *Related to defense.* Administer the responsibilities and functions assigned under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 *et seq.*), and the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 *et. seq.*) concerning scientific and educational programs.

(d) *Related to rural development activities.* Provide guidance and direction for the accomplishment of activities authorized under the Rural Development Act of 1972, as amended (7 U.S.C. 1921 *et seq.*), for programs under the control of the Assistant Secretary for Science and Education, coordinating the policy aspects thereof with the Under Secretary for Small Community and Rural Development.

(e) *Related to immigration.* Serve as the designee of the Secretary pursuant to section 212(e) of the Immigration and Nationality Act, as amended (8 U.S.C. 1182(e)) and 22 CFR 514.31(c).

(f) *Related to Environment Response.* With respect to lands and facilities under the Assistant Secretary's authority, exercise the functions delegated to the Secretary by Executive Order No. 12580 (3 CFR, 1987 Comp., p. 193) under the following provisions of the Comprehensive Environmental Response Compensation, and Liability Act of 1980 ("the Act"), as amended (42 U.S.C. 9601 *et seq.*):

(1) Sections 104(a), (b), and (c)(4) of the Act (42 U.S.C. 9604(a), (b) and (c)(4), with respect to removal and other remedial action in the event of the release or threatened release of a hazardous substance, pollutant, or contaminant into the environment.

(2) Sections 104 (e) through (h) of the Act (42 U.S.C. 9604(e)–(h)), with respect to information gathering and access; compliance orders; compliance with Federal health and safety standards; rates for wages and labor standards applicable to covered work; and emergency procurement powers.

(3) Section 104(i)(11) of the Act (42 U.S.C. 9604(i)(11)), with respect to the reduction of exposure that presents a significant risk to human health.

(4) Section 104(j) of the Act (42 U.S.C. 9604(j)), with respect to the acquisition of real property and interests in real property required to conduct a remedial action.

(5) Section 105(d) of the Act (42 U.S.C. 9605(d)), with respect to petitions for preliminary assessment of a release or threatened release.

(6) Section 105(f) of the Act (42 U.S.C. 9605(f)), with respect to consideration of the availability of qualified minority firms in awarding contracts but excluding that portion of section 105(f) pertaining to the annual report to Congress.

(7) Section 109 of the Act (42 U.S.C. 9609), with respect to the assessment of civil penalties for violations and the granting of awards to individuals providing information.

(8) Section 111(f) of the Act (42 U.S.C. 9611(f) with respect to the designation of officials who may obligate money in the Hazardous Substances Superfund.

(9) Section 113(k) of the Act (42 U.S.C. 9613(k)), with respect to establishing an

administrative record upon which to base the selection of a response action.

(10) Section 116(a) of the Act (42 U.S.C. 9616(a)), with respect to preliminary assessments and site inspections of all facilities.

(11) Sections 117 (a) and (c) of the Act (42 U.S.C. 9617 (a) and (c)), with respect to public participation in the preparation of any plan for remedial action and explanation of variances from the final remedial action plan for any remedial action or enforcement action, including any settlement or consent decree entered into.

(12) Section 119 of the Act (42 U.S.C. 9619), with respect to the liability and indemnification of response action contractors.

(13) Section 121 of the Act (42 U.S.C. 9621), with respect to selecting cleanup standards.

(14) Section 122 of the Act (42 U.S.C. 9622), with respect to entering into settlement agreements.

(g) *Related to the Resource Conservation and Recovery Act.* With respect to facilities under the Assistant Secretary's authority, exercise the authority of the Secretary pursuant to Executive Order No. 12088, October 13, 1978 (43 FR 47707; 3 CFR, 1978 Comp., p. 243), and the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA), as further amended by the Solid and Hazardous Waste Amendments of 1984 (42 U.S.C. 6901 *et seq.*), to enter into an inter-agency agreement, known as a Federal Facility Compliance Agreement (FFCA), with the United States Environmental Protection Agency (EPA), containing a plan to achieve and maintain compliance with RCRA requirements.

§ 2.30a Reservations of authority.

The following authorities are reserved to the Secretary of Agriculture:

(a) *Related to science and education.*

(1) Withhold funds from States and sending notification thereof to the President in accordance with sections 5 and 6 of the Smith-Lever Act, as amended (7 U.S.C. 345–346), sections 5 and 7 of the Hatch Act, as amended (7 U.S.C. 361 (e) and (g)), and sections 1430, 1444, 1445, and 1468 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3198, 3221, 3222, and 3314).

(2) Reapportion funds under section 4 and apportion funds under section 5 of the act of October 10, 1962 (16 U.S.C. 582 a–3 and a–5).

(3) Appoint an advisory committee under section 6 of the act of October 10, 1962 (16 U.S.C. 582a–4).

(4) Final concurrence in Equal Employment Opportunity programs within the cooperative extension programs submitted under part 18 of this subtitle.

(5) Approve selection of State directors of extension.

(6) Approve the memoranda of understanding between land-grant universities and USDA related to cooperative extension programs.

Subpart N—Delegations of Authority by the Assistant Secretary for Science and Education

3. Sections 2.105, 2.106, 2.107, 2.108, and 2.109 are revised to read as follows:

§ 2.105 Deputy Assistant Secretary for Science and Education.

Delegations. Pursuant to § 2.30 subject to the reservations in § 2.30a and subject to policy guidance and direction by the Assistant Secretary for Science and Education, the following delegation of authority is made by the Assistant Secretary for Science and Education to the Deputy Assistant Secretary for Science and Education to be exercised only during the absence or unavailability of the Assistant Secretary: perform all the duties and exercise all the powers that are now or that hereafter may be delegated to the Assistant Secretary for Science and Education.

§ 2.106 Delegations to the Administrator, Agricultural Research Service.

(a) *Delegations.* Pursuant to § 2.30 (a), (c), and (g), subject to reservations in § 2.30a, the following delegations of authority are made by the Assistant Secretary for Science and Education to the Administrator, Agricultural Research Service:

(1) Coordinate USDA policy relative to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136 *et seq.*) and coordinate the Department's integrated pest management programs and the pesticide assessment program (7 U.S.C. 136–136y).

(2) Conduct research related to the economic feasibility of the manufacture and commercialization of natural rubber from hydrocarbon-containing plants (7 U.S.C. 178–178n).

(3) Conduct research on the control of undesirable species of honeybees in cooperation with specific foreign governments (7 U.S.C. 264).

(4) Conduct research concerning domestic animals and poultry, their protection and use, the causes of contagious, infectious, and communicable diseases, and the means for the prevention and cure of the same (7 U.S.C. 391).

(5) Conduct research related to the dairy industry and to the dissemination of information for the promotion of the dairy industry (7 U.S.C. 402).

(6) Conduct research and demonstrations at Mandan, ND, and Lewisburg, TN, related to dairy livestock breeding, growing, and feeding, and other problems pertaining to the establishment of the dairy and livestock industries (7 U.S.C. 421–422).

(7) Conduct research on new uses for cotton and on cotton ginning and processing (7 U.S.C. 423–424).

(8) Conduct research into the basic problems of agriculture in its broadest aspects, including, but not limited to, production, marketing (other than statistical and economic research but including research related to family use of resources), distribution, processing, and utilization of plant and animal commodities; problems of human nutrition; development of markets for agricultural commodities; discovery, introduction, and breeding of new crops, plants, animals, both foreign and native; conservation development; and development of efficient use of farm buildings, homes, and farm machinery except as otherwise delegated in § 2.17(a)(2) and § 2.50(a)(2) (7 U.S.C. 427, 1621–1627, 1629, 2201 and 2204).

(9) Conduct research on varietal improvement of wheat and feed grains to enhance their conservation and environmental qualities (7 U.S.C. 428b).

(10) Advance the livestock and agricultural interests of the United States, including the breeding of horses suited to the needs of the United States (7 U.S.C. 437).

(11) Enter into agreements with and receive funds from any State, other political subdivision, organization, or individual for the purpose of conducting cooperative research projects (7 U.S.C. 450a).

(12) Make facilities grants and conduct research under the IR–4 program (7 U.S.C. 450i (d) and (e)).

(13) Conduct research related to soil and water conservation, engineering operations, and methods of cultivation to provide for the control and prevention of soil erosion (7 U.S.C. 1010 and 16 U.S.C. 590a).

(14) Maintain four regional research laboratories and conduct research at such laboratories to develop new scientific, chemical, and technical uses and new and extended markets and outlets for farm commodities and products and the by-products thereof (7 U.S.C. 1292).

(15) Conduct a special cotton research program designed to reduce the cost of producing upland cotton in the United States (7 U.S.C. 1441 note).

(16) Conduct research to formulate new uses for farm and forest products (7 U.S.C. 1632(b)).

(17) Conduct research to develop and determine methods for the humane slaughter of livestock (7 U.S.C. 1904).

(18) Provide national leadership and support for research programs and other research activities in the food and agricultural sciences to meet major needs and challenges in food and agricultural system productivity; development of new food, fiber, and energy sources; agricultural energy use and production; natural resources; promotion of the health and welfare of people; human nutrition; and international food and agriculture pursuant to the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101, *et. seq.*).

(19) Conduct a program of grants to States to expand, renovate, or improve schools of veterinary medicine (7 U.S.C. 3151).

(20) Administer the National Agricultural Science Award for research or advanced studies in the food and agricultural sciences (7 U.S.C. 3153).

(21) Conduct program evaluations to improve the administration and effectiveness of agricultural research and education programs (7 U.S.C. 3317).

(22) Enter into contracts, grants, or cooperative agreements to further research programs in the food and agricultural sciences (7 U.S.C. 3318).

(23) Enter into cost-reimbursable agreements relating to agricultural research or teaching activities (7 U.S.C. 3319a).

(24) Conduct research for the development of supplemental and alternative crops (7 U.S.C. 3319d).

(25) Conduct research on potential uses for compost from agricultural wastes, including evaluating the application of compost on soil, plants, and crops (7 U.S.C. 3130).

(26) Administer a national food and human nutrition research program under the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3171–3175), except as otherwise delegated to the Administrator, Human Nutrition Information Service in § 2.92 (a)(1) and (a)(2).

(27) Cooperate and work with national and international institutions, Departments and Ministries of Agriculture in other nations, land-grant colleges and universities, and other persons throughout the world in the performance of agricultural research activities (7 U.S.C. 3291).

(28) Perform research and development at aquacultural research and development centers (7 U.S.C. 3322).

(29) Conduct a program of basic research on cancer in animals and birds (7 U.S.C. 3902).

(30) Conduct and coordinate Departmental research programs on water quality and nutrient management (7 U.S.C. 5504).

(31) Conduct research to optimize crop and livestock production potential, integrated resource management, and integrated crop management (7 U.S.C. 5821).

(32) Administer a national research program on genetic resources to provide for the collection, preservation, and dissemination of genetic material important to American food and agriculture production (7 U.S.C. 5841).

(33) Conduct remote-sensing and other weather-related research (7 U.S.C. 5852).

(34) Administer grants and conduct research programs to measure microbiological and chemical agents associated with the production, preparation, processing, handling, and storage of agricultural products (7 U.S.C. 5871–5874).

(35) Conduct research on integrated pest management, including research to benefit floriculture (7 U.S.C. 5881).

(36) Conduct research in the control and eradication of exotic pests (7 U.S.C. 5883).

(37) Conduct research to study the biology and behavior of chinch bugs (7 U.S.C. 5884).

(38) Administer a grant program for risk assessment research to address concerns about the environmental effects of biotechnology (7 U.S.C. 5921).

(39) Establish and coordinate USDA programs and conduct basic and applied research and technology development in the areas of plant genome structure and function (7 U.S.C. 5924).

(40) Conduct research for the development of technology to determine animal lean content (7 U.S.C. 5925).

(41) Conduct research to determine the presence of aflatoxin in the food and feed chains (7 U.S.C. 5925).

(42) Conduct research to develop production methods and commercial uses of mesquite (7 U.S.C. 5925).

(43) Conduct research to investigate enhanced genetic selection and processing techniques of prickly pears (7 U.S.C. 5925).

(44) Conduct a research program and administer grants and contracts for research on the disease of scrapie in sheep and goats (7 U.S.C. 5925).

(45) Conduct basic and applied research in the development of new commercial products from natural plant materials (7 U.S.C. 5925).

(46) Conduct research on diseases affecting honeybees (7 U.S.C. 5934).

(47) Coodinate USDA policy and programs relating to global climate change (7 U.S.C. 6701–6703).

(48) Coordinate Departmental policies under the Toxic Substances Control Act (15 U.S.C. 2601–2629).

(49) Enter into cooperative research and development agreements with industry, universities, and others; institute a cash award program to reward scientific, engineering, and technical personnel; award royalties to inventors; and retain and use royalty income (15 U.S.C. 3710a–3710c).

(50) Perform research and administer grants for research and development in aquaculture (16 U.S.C. 2804).

(51) Maintain a National Arboretum for the purposes of research and education concerning tree and plant life; accept and administer gifts or devices of real and personal property for the benefit of the National Arboretum; and order disbursements from the Treasury (20 U.S.C. 191–195).

(52) Conduct research on foot-and-mouth disease and other animal diseases (21 U.S.C. 113a).

(53) Conduct research on the control and eradication of cattle grubs (screwworms) (21 U.S.C. 114e).

(54) Conduct research activities related to farm dwellings and other buildings for the purposes of reducing costs and adapting and developing fixtures and appurtenances for more efficient and economical farm use (42 U.S.C. 1476(b)).

(55) Conduct research on losses of livestock in interstate commerce due to injury or disease (45 U.S.C. 71 note).

(56) Control within USDA the acquisition, use, and disposal of material and equipment that may be a source of ionizing radiation hazard.

(57) Pursuant to the authority delegated by the Administrator of General Services to the Secretary of Agriculture in 34 FR 6406, 36 FR 1293, 36 FR 18840, and 38 FR 23838, appoint uniformed armed guards and special policemen, make all needful rules and regulations, and annex to such rules and regulations such reasonable penalties (not to exceed those prescribed in 40 U.S.C. 318(c)), as will insure their enforcement, for the protection of persons, property, buildings, and grounds of the Arboretum, Washington, DC; the U.S. Meat Animal Research Center, Clay Center, NE.; the Agricultural Research Center, Beltsville, MD; and the Animal Disease Center, Plum Island, NY, over which the United States has exclusive or concurrent criminal jurisdiction, in accordance with

the limitations and requirements of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 *et. seq.*), the Act of June 1, 1948, as amended (40 U.S.C. 318 *et. seq.*), and the policies, procedures, and controls prescribed by the General Services Administration. Any rules or regulations promulgated under this authority shall be approved by the Director, Office of Operations, and the General Counsel prior to issuance.

(58) Administer the Department's Patent Program except as delegated to the General Counsel in § 2.31(g).

(59) Provide management support services for the National Agricultural Library as agreed upon by the agencies with authority to take actions required by law or regulation. As used herein, the term management support services includes budget, finance, personnel, procurement, property management, communications, paperwork management, ADP support, and related administrative services.

(60) With respect to land and facilities under the Administrator's authority, exercise the functions delegated to the Secretary by Executive Order No. 12580 (3 CFR, 1987 comp., p. 193) under the following provisions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("the Act"), as amended (42 U.S.C. 9601 *et. seq.*):

(i) Section 104 (a), (b), and (c)(4) of the Act (42 U.S.C. 9604 (a), (b), and (c) (4)), with respect to removal and other remedial action in the event of the release or threatened release of a hazardous substance, pollutant, or contaminant into the environment.

(ii) Section 104 (e) through (h) of the Act (42 U.S.C. 9604(e)–(h)), with respect to information gathering and access; compliance orders; compliance with Federal health and safety standards; rates for wages and labor standards applicable to covered work; and emergency procurement powers.

(iii) Section 104(i)(11) of the Act (42 U.S.C. 9604(i)(11)), with respect to the reduction of exposure that presents a significant risk to human health.

(iv) Section 104(j) of the Act (42 U.S.C. 9604(j)), with respect to the acquisition of real property and interests in real property required to conduct a remedial action.

(v) Section 105(d) of the Act (42 U.S.C. 9605(d)), with respect to petitions for preliminary assessment of a release or threatened release.

(vi) Section 105(f) of the Act (42 U.S.C. 9605(f)), with respect to consideration of the availability of qualified minority firms in awarding contracts, but excluding that portion of section 105(f) pertaining to the annual report to Congress.

(vii) Section 109 of the Act (42 U.S.C. 9609), with respect to the assessment of civil penalties for violations and the granting of awards to individuals providing information.

(viii) Section 111(f) of the Act (42 U.S.C. 9611(f)), with respect to the designation of officials who may obligate money in the Hazardous Substances Superfund.

(ix) Section 113(k) of the Act (42 U.S.C. 9613(k)), with respect to establishing an administrative record upon which to base the selection of a response action.

(x) Section 116(a) of the Act (42 U.S.C. 9616(a)), with respect to preliminary assessments and site inspections of all facilities.

(xi) Section 117 (a) and (c) of the Act (42 U.S.C. 9617 (a) and (c)), with respect to public participation in the preparation of any plan for remedial action and explanation of variances from the final remedial action plan for any remedial action or enforcement action, including any settlement or consent decree entered into.

(xii) Section 119 of the Act (42 U.S.C. 9619), with respect to the liability and the indemnification of response action contractors.

(xiii) Section 121 of the Act (42 U.S.C. 9621), with respect to selecting cleanup standards.

(xiv) Section 122 of the Act (42 U.S.C. 9622), with respect to entering into settlement agreements.

(61) With respect to facilities under the Administrator's authority, exercise the authority of the Secretary of Agriculture pursuant to Executive Order No. 12088, October 13, 1978 (43 FR 47707; 3 CFR, 1978 Comp., p. 243), and the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA), as further amended by the Solid and Hazardous Waste Amendments of 1984, (42 U.S.C. 6901, *et. seq.*), to enter into an inter-agency agreement, known as a Federal Facility Compliance Agreement (FFCA), with the United States Environmental Protection Agency (EPA), containing a plan to achieve and maintain compliance with RCRA requirements.

(62) Carry out research activities authorized in section 202(c) of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)).

(63) Perform food and agricultural research in support of functions assigned to the Department under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061, *et. seq.*), and the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251, *et. seq.*).

(b) [Reserved]

§ 2.107 Administrator, Cooperative State Research Service.

(a) *Delegations.* Pursuant to § 2.30 (a) and (c), subject to the reservations in § 2.30a, the following delegations of authority are made by the Assistant Secretary for Science and Education to the Administrator, Cooperative State Research Service.

(1) Administer research and technology development grants related to the economic feasibility of the manufacture and commercialization of natural rubber from hydrocarbon-containing plants (7 U.S.C. 178–178n).

(2) Administer the appropriation for the endowment and maintenance of colleges for the benefit of agriculture and the mechanical arts (7 U.S.C. 321–326a).

(3) Administer teaching funds authorized by section 22 of the Bankhead Jones Act, as amended (7 U.S.C. 329).

(4) Cooperate with the States for the purpose of encouraging and assisting them in carrying out out research related to the problems of agriculture in its broadest aspects under the Hatch Act, as amended (7 U.S.C. 361a–361i).

(5) Support agricultural research at eligible institutions in the States through provision of Federal-grant funds to help financial physical research facilities (7 U.S.C. 390–390k).

(6) Carry out a program (IR–4 Program) for the collection of residue and efficacy data in support of minor use pesticide registration or reregistration and to determine tolerances for minor use chemical residues in or on agricultural commodities (7 U.S.C. 450i(e)).

(7) Administer a program of competitive grants to State agricultural experiment stations, colleges and universities, other research institutions and organizations, Federal agencies, private organizations or corporations, and individuals for research to further USDA programs (7 U.S.C. 450i(b)).

(8) Administer a program of special grants to carry out research to facilitate or expand promising breakthroughs in areas of food and agricultural sciences and to facilitate or expand ongoing State-Federal food and agricultural research programs; and administer a program of facilities grants to renovate and refurbish research spaces (7 U.S.C. 450i (c) and (d)).

(9) Conduct a research and development program to formulate new uses for farm and forest products (7 U.S.C. 1632(b)).

(10) Administer, in cooperation with the States, a cooperative rural development and small farm research program under the Rural Development Act of 1972, as amended (7 U.S.C. 2661–2667).

(11) Provide national leadership and support for cooperative research programs and other cooperative activities in the food and agricultural sciences to meet major needs and challenges in food and agricultural system productivity; development of new food, fiber, and energy sources; agricultural energy use and production; natural resources; promotion of the health and welfare of people; human nutrition; and international food and agriculture pursuant to the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101 *et. seq.*).

(12) Conduct a program of grants to States to expand, renovate, or improve schools of veterinary medicine (7 U.S.C. 3151).

(13) Administer higher education programs in the food and agricultural sciences and administer grants to colleges and universities (7 U.S.C. 3152).

(14) Administer the National Food and Agricultural Sciences Teaching Awards program for recognition of educators in the food and agricultural sciences (7 U.S.C. 3152).

(15) Administer grants to colleges, universities, and Federal laboratories for research on the production and marketing of alcohol and industrial hydrocarbons from agricultural commodities and forest products (7 U.S.C. 3154).

(16) Administer a grant, in consultation with the Agricultural Research Service, for the establishment of a food science and nutrition research center for the Southeast Region of the United States (7 U.S.C. 3174).

(17) Conduct a program of grants to States to support continuing animal health and disease research programs under the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3191–3201).

(18) Support continuing agricultural and forestry research, resident instruction, and facilities improvement at 1890 land-grant colleges, including Tuskegee University, and administer a grant program for five National Research and Training Centennial Centers (7 U.S.C. 3221, 3222, and 3222a–3222c).

(19) Support agricultural research at the 1890 land-grant colleges, including Tuskegee University, through Federal grant funds to help finance physical facilities (7 U.S.C. 3223).

(20) Cooperate and work with national and international institutions, Departments and Ministries of Agriculture in other nations, land-grant colleges and universities, and other persons throughout the world in the performance of agricultural research activities (7 U.S.C. 3291).

(21) Administer grants to States in support of the establishment and operation of International Trade Development Centers (7 U.S.C. 3292).

(22) Conduct program evaluations to improve the administration and efficacy of the cooperative research grants program involving State agricultural experiment stations, cooperative extension services, and colleges and universities (7 U.S.C. 3317).

(23) Enter into contracts, grants, or cooperative agreements to further research or teaching programs in the food and agricultural sciences (7 U.S.C. 3318)

(24) Enter into cost-reimbursable agreements relating to agricultural research or teaching activities (7 U.S.C. 3319a).

(25) Development and implement a research and pilot project program for the development of supplemental and alternative crops (7 U.S.C. 3319d).

(26) Administer an aquacultural assistance program, involving centers, by making grants to eligible institutions for research to facilitate or expand production and marketing of aquacultural food species and products; and making grants to States to formulate aquaculture development plans for the production and marketing of aquaculture species and products (7 U.S.C. 3322).

(27) Administer grants to further develop and expand aquaculture research facilities for intensive water recirculating aquaculture systems (7 U.S.C. 3323).

(28) Administer a cooperative rangeland research program (7 U.S.C. 3331–3336).

(29) Administer grants for basic research on cancer in animals and birds (7 U.S.C. 3902).

(30) Administer programs and conduct projects in cooperation with other agencies for research and education on sustainable agriculture (7 U.S.C. 5811–5813).

(31) Cooperate with the Extension Service in carrying out research to optimize crop and livestock production potential in integrated resource management and integrated crop management systems (7 U.S.C. 5821).

(32) Establish an Agricultural Weather Office and administer a national agricultural weather information system, including competitive grants program for research in atmospheric sciences and climatology (7 U.S.C. 5852–5853).

(33) Administer a grants program to States to administer programs for State agricultural weather information systems (7 U.S.C. 5854).

(34) In cooperation with the Agricultural Research Service, administer competitive research grants regarding the production, preparation, processing, handling, and storage of agriculture products (7 U.S.C. 5871–5874).

(35) Administer a grants and contracts program on integrated pest management including research to benefit floriculture (7 U.S.C. 5881).

(36) Administer a grants program to States on the control of infestations and eradication of exotic pests (7 U.S.C. 5883).

(37) Administer a grant program for risk assessment research to address concerns about the environmental effects of biotechnology (7 U.S.C. 5921).

(38) Administer a special grants program to assist efforts by research institutions to improve the efficiency and efficacy of safety and inspection systems for livestock products (7 U.S.C. 5923).

(39) Administer a competitive grants program in support of the development of a plant genome mapping program (7 U.S.C. 5924).

(40) Support research related to the development of new commercial products derived from natural plant materials for industrial, medical, and agricultural applications (7 U.S.C. 5925).

(41) Administer a competitive grants program to develop production methods and commercial uses for mesquite (7 U.S.C. 5925).

(42) Administer a competitive grants program to investigate enhanced selection and processing techniques of prickly pears (7 U.S.C. 5925).

(43) Support research to determine the presence of aflatoxin in the food and feed chains (7 U.S.C. 5925).

(44) Administer research grants for the development of agricultural production and marketing systems to service niche markets (7 U.S.C. 5925).

(45) Administer a grants program to States on immunoassay, as it is used to detect agricultural pesticide residues on agricultural commodities and to diagnose plant and animal diseases (7 U.S.C. 5925).

(46) Establish and administer a program for the development and utilization of an agricultural communications network (7 U.S.C. 5926).

(47) Administer a competitive grants program, in consultation with the Agricultural Research Service, to establish national centers for agricultural product quality research (7 U.S.C. 5928).

(48) Administer a special grants program to study constraints on agricultural trade (7 U.S.C. 5931).

(49) Support research on the effects of global climate change in agriculture and forestry, including mitigation of the effects on crops of economic significance, and on the effects of the emissions of certain gases on global climate change (7 U.S.C. 6702).

(50) Administer the Small Business Innovation Development Act of 1982 for USDA (15 U.S.C. 638(e)–(k)).

(51) Administer a competitive forestry, natural resources, and environmental grant program (16 U.S.C. 582a–8).

(52) Establish and administer the Forestry Student Grant Program to provide competitive grants to assist the expansion of the professional education of forestry, natural resources, and environmental scientists (16 U.S.C. 1649).

(53) Provide staff support to the Secretary of Agriculture in his role as permanent Chair for the Joint Subcommittee on Aquaculture established by the National Aquaculture Act of 1980 and coordinate aquacultural responsibilities within the Department (16 U.S.C. 2805).

(54) Administer grants related to research and development in aquaculture (16 U.S.C. 2806).

(55) Coordinate research by cooperating State research institutions in support of functions assigned to the Department under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 *et. seq.*), and the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 *et. seq.*).

(56) Provide management support services to agencies reporting to the Assistant Secretary for Science and Education in the administration of discretionary grants.

(57) Obtain and furnish Federal excess property to eligible recipients for use in the conduct of research and extension programs (40 U.S.C. 483(d)(2)).

(58) Represent the Department on the Federal Interagency Council on Education.

(59) Conduct and coordinate Departmental research programs on water quality and nutrient management (7 U.S.C. 5504).

(b) [Reserved]

§ 2.108 Administrator, Extension Service.

(a) *Delegations.* Pursuant to § 2.30 (a) and (c), subject to reservations in § 2.30a, the following delegations of authority are made by the Assistant Secretary for Science and Education to the Administrator, Extension Service:

(1) Administer a cooperative agricultural extension program in accordance with the Smith-Lever Act, as amended (7 U.S.C. 341–349).

(2) Administer a cooperative agricultural extension program related to agriculture, uses of solar energy with respect to agriculture, and home economics in the District of Columbia (D.C. Code 31–1409).

(3) Conduct educational and demonstration work related to the distribution and marketing of a agricultural products under the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627).

(4) Administer a competitive grant program for non-profit institutions to establish and operate centers for rural technology or cooperative development (7 U.S.C. 1932(f)).

(5) Administer a nutrition education program for Food Stamp recipients and for the distribution of commodities on reservations (7 U.S.C. 2020(f)).

(6) Provide education outreach and programs for socially disadvantaged farmers and ranchers (7 U.S.C. 2279).

(7) Administer a grants program for rural health and safety education (7 U.S.C. 2662).

(8) Administer, in cooperation with the States, a cooperative rural development and small farm extension program under the Rural Development Act of 1972, as amended (7 U.S.C. 2661–2667).

(9) Administer a rural economic and business development program to employ specialists to assist individuals in business activities (7 U.S.C. 2662).

(10) Administer a national program to provide rural citizens with training to increase their leadership abilities (7 U.S.C. 2662).

(11) Administer a competitive grant program to establish demonstration areas for rural economic development (7 U.S.C. 2662a).

(12) Administer a competitive grant program for financially stressed farmers, dislocated farmers, and rural families (7 U.S.C. 2662(f)).

(13) Administer a grant program to improve the rural health infrastructure (7 U.S.C. 2662 note).

(14) Administer a cooperative extension program under the Farmer-to-Consumer Direct Marketing Act of 1976 (7 U.S.C. 3004).

(15) Provide national leadership and support for cooperative extension programs and other extension activities in the food and agricultural sciences to meet the needs and challenges in food and agricultural system productivity; development of new food, fiber, and energy sources; agricultural energy use and production; natural resources; promotion of the health and welfare of people; human nutrition; and international food and agriculture pursuant to the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101 *et seq.*).

(16) Identify and compile information on methods of composting agricultural wastes and its potential uses and develop educational programs on composting (7 U.S.C. 3130).

(17) Administer a national food and human nutrition extension program under the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3171–3175).

(18) Support continuing agricultural and forestry extension at 1890 land-grant colleges, including Tuskegee University (7 U.S.C. 3221).

(19) Make grants, under such terms and conditions as the Administrator determines, to eligible institutions for the purpose of assisting such institutions in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings, to provide adequate facilities to conduct extension work, and issue rules and regulations as necessary to carry out this authority (7 U.S.C. 3224).

(20) Cooperate and work with national and international institutions, Departments and Ministries of Agriculture in other nations, land-grant colleges and universities, and other persons throughout the world in the performance of agricultural extension activities (7 U.S.C. 3291).

(21) Conduct program evaluations to improve the administration and effectiveness of the cooperative extension programs involving State agricultural experiment stations, cooperative extension services, and colleges and universities (7 U.S.C. 3317).

(22) Enter into contracts, grants, or cooperative agreements to further extension programs in the food and agricultural sciences (7 U.S.C. 3318).

(23) Enter in cost-reimbursable agreements relating to agricultural extension or teaching activities (7 U.S.C. 3319a).

(24) Provide technical assistance to farm owners and operators, marketing cooperatives, and others in the development and implementation of a research and pilot project program for the development of supplemental and alternative crops (7 U.S.C. 3319d).

(25) Administer an aquaculture assistance program by supporting eligible institutions for extension to facilitate or expand production and marketing of aquaculture food species and products; and conducting a program of extension and demonstration at aquacultural demonstration centers (7 U.S.C. 3322).

(26) Design educational programs, implement, and distribute materials in cooperation with the cooperative extension services of the States emphasizing the importance of productive farmland pursuant to section 1544(a) of the Farmland Protection Policy Act (7 U.S.C. 4205(a)).

(27) Establish and administer education programs relating to water quality (7 U.S.C. 5503).

(28) Administer education programs for the users and dealers of agrichemicals (7 U.S.C. 5506).

(29) Administer a cooperative extension program developed for integrated crop management and integrated resource management practices (7 U.S.C. 5821).

(30) Design, implement, and develop handbooks, technical guides, and other educational materials emphasizing sustainable agriculture production systems and practices (7 U.S.C. 5831).

(31) Administer a competitive grant program to organizations to carry out a training program on sustainable agriculture (7 U.S.C. 5832).

(32) Administer a cooperative extension program on agricultural weather forecasts and climate information for agricultural producers (7 U.S.C. 5854).

(33) Implement and administer an extension program developed for integrated pest management (7 U.S.C. 5881).

(34) Establish a national pesticide resistance monitoring program (7 U.S.C. 5882).

(35) Conduct educational programs on the biology and behavior of chinch bugs (7 U.S.C. 5884).

(36) Administer extension grants for the development of agricultural production and marketing systems to service niche markets (7 U.S.C. 5925).

(37) Administer education programs on Indian reservations and tribal jurisdictions (7 U.S.C. 5930).

(38) Administer competitive grants to States to establish a pilot project to coordinate food and nutrition education programs (7 U.S.C. 2027(a) and 5932).

(39) Administer a demonstration grants program for support of an assistive technology program for farmers with disabilities (7 U.S.C. 3933).

(40) Conduct educational and demonstrational work in cooperative farm forestry programs (16 U.S.C. 568).

(41) Provide for an expanded and comprehensive extension program for forest and rangeland renewable resources (16 U.S.C. 1671–1676).

(42) Conduct forestry and natural resource education programs, including guidelines for technology transfer (16 U.S.C. 1674).

(43) Provide technical, financial, and educational assistance to State foresters and State extension directors on rural forestry assistance (16 U.S.C. 2102).

(44) Provide educational assistance to State foresters under the Forest Stewardship Program (16 U.S.C. 2103a).

(45) Implement and conduct an educational program to assist the development of urban and community forestry programs (16 U.S.C. 2105).

(46) Administer extension education programs in aquaculture (16 U.S.C. 2804 and 2806).

(47) Provide educational assistance to farmers regarding the Agricultural Water Quality Protection Program (16 U.S.C. 3838b).

(48) Authorize the use of the 4–H Club name and emblem (18 U.S.C. 707).

(49) Obtain and furnish Federal excess property to eligible recipients for use in the conduct of research and extension programs (40 U.S.C. 483(d)(2)).

(50) Conduct demonstrational and promotional activities related to farm dwellings and other buildings for the purposes of reducing costs and adapting and developing fixtures and appurtenances for more efficient and economical farm use (42 U.S.C. 1478(b)).

(51) Provide leadership and direct assistance in planning, conducting, and evaluating extension programs under a memorandum of agreement with the Bureau of Indian Affairs dated May, 1956.

(52) Exercise the responsibilities of the Secretary under regulations dealing with Equal Employment Opportunity (Part 18 of this subtitle).

(53) Administer educational and information services assigned under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 *et. seq.*), and the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 *et. seq.*).

(54) Provide management support services for the Cooperative State Research Service as agreed upon by the agencies with authority to take actions required by law or regulation. As used herein, the term management support services includes finance, personnel, procurement, property management, communications, paperwork management and related administrative services.

(55) Carry out demonstration and educational activities authorized in section 202(c) of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)).

(56) Provide educational and technical assistance in implementing and administering the conservation reserve program authorized in sections 1231–1244 of the Food Security Act of 1985 (Public Law 99–198, 99 Stat. 1509) (16 U.S.C. 3831–3844).

(b) [Reserved]

§ 2.109 Director, National Agricultural Library.

(a) *Delegations.* Pursuant to § 2.30(a), subject to reservations in § 2.30a, the following delegations of authority are made by the Assistant Secretary for Science and Education to the Director, National Agricultural Library:

(1) Provide resource information concerning rural electric and telephone use and rural development efforts (7 U.S.C. 917).

(2) Act as a catalyst to provide access to leadership training and services programs encompassing private, public, business, and government entities in cooperation with the Extension Service (7 U.S.C. 950aa–1).

(3) Develop and maintain library and information systems and networks and facilitate cooperation and coordination of the agricultural libraries of colleges, universities, USDA, and their closely allied information gathering and dissemination units in conjunction with private industry and other research libraries (7 U.S.C. 2201, 2204, 3125a, and 3126).

(4) Accept gifts and order disbursements from the Treasury for the benefit of the National Agricultural Library or for the carrying out of any of its functions (7 U.S.C. 2264–2285).

(5) Provide for the dissemination of appropriate rural health and safety information resources possessed by the NAL Rural Information Center, in cooperation with State educational program efforts (7 U.S.C. 2662).

(6) Provide national leadership in the development and maintenance of library and related information systems and other activities to support the research, extension, and teaching programs in the food and agricultural sciences pursuant to the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101 and 3121).

(7) Administer the programs and services of NAL consistent with its charge to serve as the primary

agricultural information resource of the United States and enter into agreements and receive funds from various entities to conduct NAL activities (7 U.S.C. 3125a).

(8) Provide and distribute information and data about Federal, State, local, and other rural development assistance programs and services available to individuals and organizations. To the extent possible, the National Agricultural Library shall use telecommunications technology to disseminate such information to rural areas (7 U.S.C. 3125b).

(9) Assemble and collect food and nutrition educational materials, including the results of nutrition research, training methods, procedures, and other materials related to the purposes of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended; maintain such information; and provide for the dissemination of such information and materials on a regular basis to State educational agencies and other interested parties (7 U.S.C. 3126).

(10) Conduct program evaluations to improve the administration and efficacy of the library and related information systems in the food and agricultural sciences (7 U.S.C. 3317).

(11) Enter into contracts, grants, or cooperative agreements to further library and related information programs supporting research, extension, and teaching programs in the food and agricultural sciences (7 U.S.C. 3318).

(12) Enter into cost-reimbursable agreements to further library and related information programs supporting research, extension, and teaching programs in the food and agricultural sciences (7 U.S.C. 3319a).

(13) Administer the National Agricultural Library, including the farmland information center, pursuant to section 1544(b) of the Farmland Protection Policy Act (7 U.S.C. 4205(b)).

(14) Support Department water programs through participation in State water quality coordination programs and dissemination of agrichemical information (7 U.S.C. 5503–5506).

(15) Provide a repository of agriculture and ground water quality planning information (7 U.S.C. 5505).

(16) Disseminate information on materials and methods of pest and disease control available to agricultural producers through the pest and disease control database (7 U.S.C. 5882).

(17) Represent the Department on all library and information science matters before Congressional Committees and appropriate commissions, and provide representation to the coordinating committees of the Federal and State governments concerned with library and information science activities.

(18) Represent the Department in international organizational activities and on international technical committees concerned with library and information science activities.

(19) Prepare and disseminate computer files, indexes and abstracts, bibliographies, reviews and other analytical information tools.

(20) Arrange for the consolidated purchasing and dissemination of printed and automated indexes, abstracts, journals, and other widely used information resources and services.

(21) Provide assistance and support to professional organizations and others concerned with library and information science matters and issues.

(22) Copy and deliver on demand selected articles and other materials from NAL's collections by photographic reproduction or other means within the permissions, constraints, and limitations of sections 106, 107, and 108 of the Copyright Act of October 19, 1976 (17 U.S.C. 106, 107 and 108).

(23) Formulate, write, or prescribe bibliographic and technically related standards for the library and information systems of USDA.

(24) Assure the acquisition, preservation, and accessibility of all information concerning food and agriculture by providing leadership to and coordination of the acquisition programs and related activities of the library and information systems, with the agencies of USDA, other Federal departments and agencies, State agricultural experiment stations, colleges and universities, and other research institutions and organizations.

(25) Determine by survey or other appropriate means, the information needs of the Department's scientific, professional, technical, and administrative staffs, its constituencies, and the general public in the areas of food, agriculture, the environment, and other related areas.

(b) [Reserved]

For 7 CFR part 2, subpart C.

Dated: March 10, 1992.

Edward Madigan,

Secretary of Agriculture.

For 7 CFR part 2, subpart N.

Dated: March 12, 1992.

Harry C. Mussman,

Acting Assistant Secretary for Science and Education.

Federal Aviation Administration

14 CFR Part 97

[Docket No. 1484; Amdt. No. 26808]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather.

Issued in Washington, DC, on March 13, 1992.

Thomas C. Accardi,

Director, Flight Standards Services.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. app. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) and 14 CFR 11.49(b)(2).

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

* * * *Effective June 25, 1992*

Palmdale, CA—Palmdale Prodn FLT/Test Instln AF Plant 42, VOR/DME or TACAN RWY 25, Amdt. 6

14 CFR Part 97

[Docket No. 1483; Amdt. No. 26807]

Standard Instruction Approach Procedures: Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective*: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The Provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPs criteria were applied to only these specific conditions existing at the affected airports.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the US Standard for Terminal Instrument Approach Procedures (TERPs). Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather. Issued in Washington, DC on March 13, 1992.

Thomas C. Accardi,
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. app. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

42 CFR Parts 1001, 1002, 1003, 1004, 1005, 1006, and 1007

Health Care Programs: Fraud and Abuse; Amendments to OIG Exclusion and CMP Authorities Resulting From Public Law 100–93

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects technical errors that appeared in the final rule, published on January 29, 1992, that is designed to implement section 2 of Public Law 100–93, the Medicare and Medicaid Patient and Program Protection Act of 1987, along with other conforming amendments.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Joel J. Schaer (202) 619–3270.

SUPPLEMENTARY INFORMATION: On January 29, 1992, a final rule, Amendments to OIG Exclusion and CMP Authorities Resulting from Public Law 100–93, was published in the **Federal Register** (57 FR 3298). Specifically, this final rule is designed to protect program beneficiaries from unfit health care practitioners, and otherwise to improve the anti-fraud provisions of the Department's health care programs under titles V, XVIII, XIX and XX of the Social Security Act. In publishing this final rule, several lines of the preamble, regulations text and specific cross-references to OIG authorities were inadvertently omitted or misstated. In addition, one authority set forth in § 1001.1601(a)(1)(iii)(B) has not been delegated to the OIG, but was inadvertently included in that section. To correct omissions and errors that appeared in the final rule's preamble and in parts 1001 and 1003, we are making the following corrections in FR Doc. 92–1939, published January 29, 1992:

1. In the preamble on page 3300, column 2, the first sentence of the third complete paragraph is corrected to read as follows—

In this final rule, we are retaining the definition of "furnished" currently found in § 1001.2 of the regulations with one modification, and placing the definition in § 1000.10 under General Definitions.

2. In the preamble on page 3318, column 1, the second sentence of the second paragraph, the citation to section 1863(e)(1)(B) of the Act is incorrect. The correct citation is section 1862(e)(1)(B) of the Act.

3. In the preamble on page 3320, column 2, the first sentence in the response under section 5., Notice to Third Parties Regarding Exclusions, is corrected to read as follows—

The OIG notifies the Public Health Service (PHS) of all program exclusions for subsequent action by PHS in excluding those practitioners from title V.

4. Section 1001.301 is corrected as follows:

A. Page 3331: In column 3, § 1001.301(a) is corrected to read as follows—

§ 1001.301 Conviction relating to obstruction of an investigation.

(a) *Circumstance for exclusion.* The OIG may exclude an individual or entity that has been convicted, under Federal or State law, in connection with the interference with or obstruction of any investigation into any criminal offense described in §§ 1001.101 or 1001.201.

B. Page 3332: In column 1, § 1001.301(b)(2)(i) is corrected to read as follows—

(b) * * *

(2) * * *

(i) The interference with, or obstruction of, the investigation caused the expenditure of significant additional time or resources;

5. Section 1001.1601 is corrected as follows:

Page 3340: In column 1, § 1001.1601(a)(1) is corrected to read as follows—

§ 1001.1601 Violations of the limitations on physician charges.

(a) *Circumstance for exclusion.* (1) The OIG may exclude a physician whom it determines—

(i) Is a non-participating physician under section 1842(j) of the Act;

(ii) Furnished services to a beneficiary;

(iii) Knowingly and willfully billed—

(A) On a repeated basis for such services actual charges in excess of the maximum allowable actual charge determined in accordance with section 1842(j)(1)(C) of the Act for the period January 1, 1987 through December 31, 1990, or

(B) Individuals enrolled under part B of title XVIII of the Act during the statutory freeze for actual charges in excess of such physician's actual charges determined in accordance with section 1842(j)(1)(A) of the Act for the period July 1, 1984 to December 31, 1986; and"

(iv) Is not the sole community physician or sole source of essential specialized services in the community.

6. Section 1003.102 is corrected as follows:

Page 3345: In column 3, § 1003.102(b)(2) is corrected to read as follows—

§ 1003.102 Basis for civil money penalties and assessments.

* * * * *

(b) * * *

(2) Is a non-participating physician under section 1842(j) of the Act and has knowingly and willfully billed—

(i) On a repeated basis for such services actual charges in excess of the maximum allowable actual charge determined in accordance with section 1842(j)(1)(C) of the Act for the period January 1, 1987 through December 31, 1990, or

(ii) Individuals enrolled under part B of title XVIII of the Act during the statutory freeze for actual charges in excess of such physician's actual charges determined in accordance with section 1842(j)(1)(A) of the Act for the period July 1, 1984 to December 31, 1986.

Dated: March 13, 1992.

Neil J. Stillman,

Deputy Assistant Secretary for Information Resources Management.

BILLING CODE 4150-04-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 43

[CC Docket No. 79-105, FCC 91-386]

Detariffing the Installation and Maintenance of Inside Wiring

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this action, the FCC preempts state regulation that requires or allows telephone companies to bundle charges for simple inside wiring services with charges for tariffed services, and decides not to preempt state regulation that requires telephone companies to act as providers of last resort for inside wiring services. The FCC requires local exchange carriers (LECs) having annual operating revenues of $100 million or more to file information on state regulation of LEC prices for inside wiring services. The FCC also requires all telephone companies subject to the joint cost rules to classify inside wiring services as nonregulated activities for federal accounting purposes on a permanent basis.

EFFECTIVE DATE: June 8, 1992. The rule requiring local exchange carriers to file information on state regulation of their prices for inside wiring services will take effect June 8, 1992. The other requirements of the Third Report and Order are effective as of that publication.

FOR FURTHER INFORMATION CONTACT: William A. Kehoe III at (202) 632-7500.

SUPPLEMENTARY INFORMATION:

Background

National Association of Regulatory Utility Commissioners v. *FCC*, 880 F.2d 422 (D.C. Cir. 1989) (*NARUC* v. *FCC*).

Detariffing the Installation and Maintenance of Inside Wiring, Second Further Notice of Proposed Rulemaking, 5 FCC Rcd 3407 (1990) 55 FR 23563, June 11, 1990 (*Second Further Notice*).

SUMMARY

This is a summary of the Commission's Third Report and Order in Detariffing the Installation and Maintenance of Inside Wiring, CC Docket No. 79-105, FCC 91-386, released February 14, 1992. The full text of this decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC 20054. The full text will be published in the FCC Record and may be purchased from the Commission's copying contractor, Downtown Copy Center, 1114 21st Street, NW., suite 140, Washington, DC 20037, (202) 452-1422.

This action finalizes the regulatory framework for simple inside wiring in response to *NARUC* v *FCC*. The action is intended to promote the development of an increasingly competitive market for simple inside wiring services and to protect consumers against cross subsidization, while not infringing on state regulatory authority.

In *NARUC* v. *FCC*, the United States Court of Appeals for the District of Columbia Circuit determined that the FCC may preempt state regulation of inside wiring services when the regulation would necessarily thwart or impede achievement of a valid federal policy. The court held, however, that the Commission had failed to justify its preemption of all regulation of simple inside wiring services and remanded three orders to the FCC for further proceedings.

In the Second Further Notice, the Commission initiated the proceedings on remand by proposing a combination of measures in regard to simple inside wiring.

The Third Report and Order concludes the proceedings on remand. That Order preempts state regulation that requires or allows telephone companies to bundle charges for simple inside wiring services with charges for tariffed services. The FCC also decides not to preempt state regulation that requires telephone companies to act as providers of last resort for inside wiring services. In the interest of comity with the states, the Third Report and Order states that the FCC will monitor, but not at this time consider preempting, state regulation of the prices and terms and conditions of service under which telephone companies provide simple inside wiring services.

To facilitate the FCC's monitoring, that Order adopts a rule requiring local exchange carriers (LECs) having annual operating revenues of $100 million or more to file information on state regulation of LEC prices for inside wiring services. Public reporting burden for this collection of information is estimated to average 2 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commission, Office of the Managing Director, Paperwork Reduction Project (OMB Control Number 30670-0450) Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control Number 3060-0450) Washington, DC 20503.

In order to protect interstate ratepayers against cross subsidization, the Third Report and Order requires all telephone companies subject to the FCC's joint cost rules to classify inside wiring services as nonregulated activities for federal accounting purposes on a permanent basis. The Order makes clear that this classification would not preclude those states, if any, that choose to regulate telephone company prices for simple inside wiring services from assigning all simple inside wiring services costs to the intrastate jurisdiction and setting unbundled rates based on those costs.

Ordering Clauses

1. Accordingly, *It is Ordered*, That pursuant to sections 1, 4(i), 4(j), 201-205, 218-220, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 201-05, 218-20, and 403, no state shall require or allow telephone companies to bundle charges for simple inside wiring services with charges for tariffed services.

2. *It is further Ordered*, That pursuant to sections 1, 4(i), 4(j), 201-205, 218-220, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 154(j), 201-05, 218-20, and 403, Part 43 of this Commission's Rules is AMENDED by adding Section 43.41 as set forth below. This amendment shall become effective 60 days following the publication of the text of the rule in the Federal Register.

3. *It is further Ordered*, That pursuant to sections 1, 4(i), 4(j), 201-205, 218-220, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 201-05, 218-20, and 403, telephone companies shall classify their inside wiring operations as nonregulated activities for federal accounting purposes.

4. *It is further Ordered*, That the Secretary shall serve as a copy of this Third Report and Order on state regulatory commissions.

5. *It is further Ordered*, That this proceeding is terminated.

Secretary.

Rule Changes

Part 43 of title 47 of the Code of Federal Regulations is amended as follows:

PART 43—REPORTS OF COMMUNICATION COMMON CARRIERS AND CERTAIN AFFILIATES

1. The authority citation for part 43 is revised to read as follows:

Authority: Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154, unless otherwise noted. Interpret or apply secs. 211, 219, 220, 48 Stat. 1073, 1077, as amended; 47 U.S.C. 211, 219, 220.

2. Section 43.41 is added to read as follows:

§ 43.41 Reports on Inside Wiring Services.

Each local exchange carrier with annual operating revenues of $100 million or more shall file, within thirty (30) days of its publication or release, a copy of any state or local statute, rule, order, or other document that regulates, or proposes to regulate, the price or prices the local exchange carrier charges for inside wiring services. This rule applies only to the local exchange carrier serving the greatest number of access lines within the portions of the state that are, or would be, subject to the state regulation.

Proposed Rules

Federal Register
Vol. 57, No. 55
Friday, March 20, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Parts 1202, 1250, and 1254

RIN 3095-AA34

NARA Privacy Act and Freedom of Information Act Regulations

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Archives and Records Administration (NARA) is amending its Privacy Act regulations to make the NARA Privacy Act Officer the point of contact for Privacy Act requests and information, and to change the designation of officials who may sign denials of requests for disclosure to third parties and who may consider appeals of such denials. These changes are administrative in nature and will have no significant impact upon the public.

NARA is also amending its Freedom of Information Act regulations in 36 CFR parts 1250 and 1254 to reflect a recent U.S. Court of Appeals ruling in *Oglesby v. Department of the Army* (920 F.2d 57, D.C. Cir. 1990) that requesters may appeal a response that no responsive records were found.

DATES: Comments must be received by April 20, 1992.

ADDRESSES: Comments should be sent to Director, Policy and Program Analysis Division (NAA), National Archives and Records Administration, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mary Ann Palmos or Nancy Allard at 202-501-5110.

SUPPLEMENTARY INFORMATION: NARA is reviewing all of its regulations on a periodic basis to identify outdated or incomplete material. This regulation was developed in the course of such a review.

This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have a significant impact on small business entities.

List of Subjects

36 CFR Part 1202

Privacy.

36 CFR Part 1250

Administrative practice and procedure, Confidential business information, Freedom of information.

36 CFR Part 1254

Archives and records; Confidential business information; Freedom of information; Micrographics.

For the reasons set forth in the preamble, NARA proposes to amend Chapter XII of title 36, Code of Federal Regulations as follows:

PART 1202—REGULATIONS IMPLEMENTING THE PRIVACY ACT OF 1974

1. The authority citation for part 1202 continues to read as follows:

Authority: 44 U.S.C. 2104(a); 5 U.S.C. 552a.

2. Section 1202.32 is revised to read as follows:

§ 1202.32 Procedures for disclosure.

(a) Address all requests for disclosure of records pertaining to a third party to the NARA Privacy Act Officer (NAA), National Archives and Records Administration, Washington, DC 20408. Upon receipt of such request, NARA shall verify the right of the requester to obtain disclosure pursuant to § 1202.30. Upon verification, the system manager shall make the requested records available. NARA shall acknowledge requests within 10 workdays and shall make a decision within 30 workdays, unless NARA notifies the requester that the time limit must be extended for good cause.

(b) If NARA determines that the disclosure is not permitted under § 1202.30, the Assistant Archivist for Management and Administration or the Inspector General (for records for which the Inspector General is the system manager) shall deny the request in writing. The requester shall be informed of the right to submit a request for review and final determination to the appropriate NARA Privacy Act Appeal Officer.

(1) Requests for review involving records for which the Inspector General is the system manager shall be addressed to the NARA Privacy Act Appeal Officer (N), National Archives and Records Administration, Washington, DC 20408.

(2) Requests for review involving all other records shall be addressed to the NARA Privacy Act Appeal Officer (ND), National Archives and Records Administration, Washington, DC 20408.

3. Section 1202.100 is revised to read as follows:

§ 1202.100 Requests for assistance and referrals.

Requests for assistance and referral to the responsible system manager or other NARA employee charged with implementing these regulations should be made to the NARA Privacy Act Officer (NAA), National Archives and Records Administration, Washington, DC 20408.

PART 1250—PUBLIC AVAILABILITY OF NARA ADMINISTRATIVE RECORDS AND INFORMATIONAL MATERIALS

4. The authority citation for part 1250 is revised to read as follows:

Authority: 44 U.S.C. 2104(a); 5 U.S.C. 552; E.O. 12600, 52 FR 23781, 3 CFR, 1987 Comp., p. 235.

§1250.34 [Amended]

5. In § 1250.34, the term "Program Policy and Evaluation Division" is revised to read "Policy and Program Analysis Division."

6. Section 1250.58 is amended by revising paragraphs (a) and (c) to read as follows:

§ 1250.58 Appeal with NARA.

(a) A requester who receives a denial of access in whole or in part of a request or who receives a response that no responsive records were found, and who considers the latter response as adverse in nature, may appeal that decision or finding within NARA to the appropriate NARA FOIA Appeal Official. If the denial was signed by the Assistant Archivist for Management and Administration, the appeal shall be addressed to the Deputy Archivist of the United States, National Archives (ND), Washington, DC 20408. If the denial was signed by the Inspector General, the appeal shall be addressed to the Archivist of the United States, National Archives (N), Washington, DC 20408.

* * * * *

(c) (1) The requester shall appeal in writing. The appeal letter shall include a brief statement of the reason(s):

(i) If an appeal of denial of access, why NARA should release the records, or

(ii) If an appeal of a requester category determination, why the requester should be considered to be a member of a different category, or

(iii) If an appeal of a denial of a fee reduction or waiver request that the requester is not otherwise entitled to, how disclosure of the information is likely to contribute significantly to public understanding of the operations or activities of government and why it is not a request primarily intended to benefit the commercial, trade, or profit interests of the requester, or

(iv) If no responsive records were found and the requester considers this to be an adverse determination, why the requester thinks that the search does not meet the requirements of the FOIA.

(2) The appeal letter shall include the words "Freedom of Information Appeal" on both the face of the appeal letter and the envelope, and the requester shall enclose with the appeal letter a copy of the initial request and denial.

(3) NARA has 20 workdays after receipt of an appeal to make a determination with respect to the appeal. The 20-workday time limit begins when the NARA FOIA Appeal Official receives the appeal.

* * * * *

PART 1254—AVAILABILITY OF RECORDS AND DONATED HISTORICAL MATERIALS

7. The authority citation for part 1254 continues to read as follows:

Authority: 44 U.S.C. 2101-2118, 5 U.S.C. 552, and E.O. 12600, 52 FR 23781, 3 CFR, 1987 Comp., p. 235.

8. Section 1254.38 is amended by revising paragraphs (f)(1) and (f)(4) to read as follows:

§ 1254.38 Freedom of Information Act requests.

* * * * *

(f) *Appeals.* (1) A requester whose request for access is denied in whole or in part, or who receives a response that no responsive records were found and who considers the latter response as adverse in nature, may appeal that decision or finding within NARA. The appeal shall be in writing and addressed to the Deputy Archivist of the United States (ND), National Archives, Washington, DC 20408.

* * * * *

(4) In the appeal letter the requester shall briefly state the reasons why NARA should release the records, or, if no responsive records were found and the requester considers this to be an adverse determination, why the requester thinks that the search does not meet the requirements of the FOIA.

* * * * *

Dated: March 10, 1992.

Don W. Wilson,

Archivist of the United States.

[FR Doc. 92-6470 Filed 3-19-92; 8:45 am]

BILLING CODE 7515-01-M

36 CFR Part 1228

RIN 3095-AA42

Disposition of Federal Records

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule makes substantive changes to NARA regulations relating to: Loans of permanent and unscheduled records by Federal agencies to non-Federal recipients, transfer of electronic records to the National Archives, and imposing restrictions on transferred records. In addition, minor changes are made to other provisions of the disposition regulations in 36 CFR part 1228 to improve the clarity of the regulation. The proposed rule was developed in the course of a periodic review of NARA regulations to identify outdated or incomplete material. These regulations are applicable to Federal agencies.

DATES: Comments must be received by April 20, 1992.

ADDRESSES: Comments should be sent to Director, Policy and Program Analysis Division (NAA), National Archives and Records Administration, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mary Ann Palmos or Nancy Allard at 202-501-5110 (FTS 241-5110).

SUPPLEMENTARY INFORMATION: Following is a description of the specific changes included in this proposed rule.

In 36 CFR 1228.30(b)(3), we are specifying that agencies must provide a citation to the Privacy Act system notice published in the Federal Register or Privacy Act Compilation as the statement of Privacy Act restrictions on temporary records that must be submitted with the Standard Form 115, Request for Records disposition Authority. Because the current provision is unclear, some agencies provide detailed information while others provide a reference to the Federal Register Privacy Act system notice. This change to the regulation should reduce the burden on agencies.

In 36 CFR part 1228, subpart E, we propose to specify that a written loan agreement is required whenever a Federal agency loans permanent or unscheduled records to non-Federal recipients. When provisions covering loan of permanent and unscheduled records were added to 36 CFR part 1228 in 1990, NARA intended that loan agreements to be made in writing. Sections 1228.74 and 1228.76 have been revised to specify that a written loan agreement is required. Agencies are currently required to provide to NARA the information that will be contained in the loan agreement. We also propose to add a new §1228.78 to require agencies to contact loan recipients 30 days prior to end of the loan agreement to make arrangements for the return of the records. If the loan period is extended, the agency will be required to notify NARA in writing. These modifications to the regulation will provide further protection for permanent and unscheduled records.

The current 36 CFR 1228.180 contains procedures concerning agenicies' retention of permanent records that are more than 30 years old and imposing agency restrictions on records transferred to the National Archieves. So that § 1228.180 will not contain both policy and procedural provisions, the procedures have been moved to separate sections. In the new § 1228.183, no changes have been made to the procedures for certifying an agency's continued need for records that are eligible for transfer to the National Archives. The material on imposing agency restrictions, currently contained in § 1228.1180(c)(2), has been revised and placed in § 1228.192.

In § 1228.182(a)(2)(ii) we have removed the phrase "do not absolutely preclude use of the records by the public." We believe that the phrase is not needed because paragraph (a)(2)(ii) already contains the condition that "restrictions on the use of records are acceptable to NARA." NARA generally does not accession records that would be closed forever to public use; however, NARA does accession some records that are less than 30 years old which have statutory limitations prohibiting immediate public access, such as the population Census tapes, in order to ensure the proper preservation of the records.

Section 1228.184 has been modified to require a duplicate negative when the original black and white negative is unstable safety or acetate and to clarify that agencies shall transfer all of the specified copies of audiovisual records to the National Archives if such copies exist.

Section 1228.188 has been retitled "Electronic records" to correspond with the title of the related 36 CFR part 1234, Electronic Records Management. In addition, the accessioning policy has been changed to permit agencies to transfer electronic records on tape cartridges as well as 7 or 9 track tape reels. The NARA form 14097, Technical Description for Tansfer of Electronic Records, will replace the canceled Standard Form 277, "Computer Magnetic Tape File Properties."

Nonsubstantive changes have been made to several other sections in subpart J. The introductory paragraph of § 1228.186 has been rewritten to improve its clarity. In § 1228.190, the names of the National Archives Field Branches have been corrected to Regional Archives. Section 1228.194 is revised to clarify that the Privacy Act notice must accompnay the SF 258 that intiates the transfer of Privacy Act systems to the National Archives. Two paragraphs of § 1228.198 have been rewritten to remove redundant material and improve clarity.

This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have a signficant impact on small business entities.

List of Subjects in 36 CFR Part 1228

Archives and records, Government property management.

For the reasons set forth in the preamble, NARA proposes to amend part 1228 of title 36 of the Code of Federal Regulations as follows:

PART 1228—DISPOSITION OF FEDERAL RECORDS

1. The authority citation for part 1228 continues to read as follows:

Authority: 44 U.S.C. chapters 21, 29, and 31.

2. In § 1228.30, paragraph (b)(3) is revised to read as follows:

§ 1228.30 Scheduling temporary records.

* * * * *

(b) * * *

(3) If the records are contained in a Privacy Act system of records, a citation to agency's alpha-numeric or numeric code designation for the system of records. If the system of records was amended since the publication of the current Office of the Federal Register compilation of *Privacy Act Issuances*, the agency shall also cite the date and page of the **Federal Register** on which the amended system notice appears.

* * * * *

3. Section 1228.74 is revised to read as follows:

§ 1228.74 Agency action.

(a) An agency proposing to loan permanent or unscheduled records shall execute a written loan agreement with the proposed recipient. The agreement shall include:

(1) The name of the department or agency and subdivisions thereof having custody of the records;

(2) The name and address of the proposed recipient of the records;

(3) A list containing:

(i) An identification by series or system of the records to be loaned,

(ii) The inclusive date for each series,

(iii) The volume and media of the records to be loaned, and

(iv) The NARA disposition job (SF 115) and item numbers covering the records, if any;

(4) A statement of the purpose and duration of the loan;

(5) A statement specifying any restrictions on the use of the records and how these restrictions will be administered by the donee; and

(6) A certification that the records will be stored according to the environmental specifications for archival records.

(b) The Archivist of the United States shall be a signatory on all loan agreements for permanent and unscheduled records. An agreement may not be implemented until the Archivist has signed.

(c) The head of the Federal agency shall request approval for the loan by sending a letter to NARA (NIR), Washington, DC 20408, transmitting the proposed loan agreement and specifying the name, title, and telephone number of the person NARA should contact about the proposed loan.

4. Section 1228.76 is revised to read as follows:

§ 1228.76 NARA action on request.

NARA will review the request and, if found acceptable, return the approved agreement to the agency. NARA will deny the request if the records should be transferred to the National Archives or if the loan would endanger the records or otherwise contravene the regulations in 36 CFR chapter XII, subchapter B. If NARA disapproves the loan, the Archivist will notify the agency in writing and provide instructions for the disposition of the records.

5. A new § 1228.78 is added to subpart E to read as follows:

§ 1228.78 Retrieval of records.

An agency shall contact the recipient of the loan of permanent or unscheduled records 30 days prior to the expiration of the loan period (as stated in the loan agreement) to arrange for the return of the records. If the agency extends the duration of the loan, it shall notify NARA (NIR) in writing, specifying the reason for the extension and providing a new time limit for the loan.

§§ 1228.182 and 1228.190 [Amended]

6. In subpart J, the titles "National Archives Field Branch" and "National Archives Field Branches" are replaced by the title "Regional Archives" in the following places:

§ 1228.182(b)(2)
§ 1228.182(b)(3)(ii)
§ 1228.190(b)(2)

7. Section 1228.180 is amended by revising paragraphs (a)(2) and (c) to read as follows:

§ 1228.180 Authority.

(a) * * *

(2) Direct and effect the transfer to the National Archives of the United States of Federal agency records that have been in existence for more than 30 years and that have been determined by the Archivist of the United States to have sufficient historical or other value to warrant their continued preservation by the U.S. Government.

* * * * *

(c) *Transferred records subject to statutory or other restrictions.* When records, the use of which is subject to statutory limitations and restrictions, are so transferred, permissive and restrictive statutory provisions concerning the examination and use of records applicable to the head of the transferring agency are applicable to the Archivist of the United States and the employees of the National Archives and Records Administration.

8. In § 1228.182, paragraph (a)(2)(ii) is revised to read as follows:

§ 1228.182 Types of records to be transferred.

(a) * * *

(2) * * *

(ii) Agency needs will be satisfied by use of the records in NARA research rooms or by copies of the records; and restrictions on the use of records are acceptable to NARA and do not violate the Freedom of Information Act (5 U.S.C. 552). Records appraised as permanent that are not yet eligible for transfer because of agency needs or restrictions may be stored in a Federal records center pending transfer. (See subpart I of this part.)

* * * * *

9. A new § 1228.183 is added to read as follows:

§ 1228.183 Certification for retention of records in agency custody.

(a) Permanent records shall be transferred to the National Archives of the United States when the records have been in existence for more than 30 years unless the head of the agency which has custody of the records certifies in writing to the Archivist that the records must be retained in agency custody for use in the conduct of the regular current business of the agency. Records that are scheduled in a NARA-approved records schedule to be transferred to the National Archives of the United States after a specified period of time are subject to the certification requirement only if the records are not transferred as scheduled.

(b) In order to certify that records must be retained for the conduct of regular current business, an agency should consider the following factors:

(1) Character of use (to be retained by an agency, records should be used for the normal routine business of the agency at the time of certification);

(2) Frequency of use (to be retained by an agency, records should be used more than one time per month per file unit); and,

(3) Preservation of the records (to be retained by an agency, permanently valuable records should be preserved in accordance with NARA guidelines).

(c) The written certification of need of a series of 30 year-old records for current agency business must:

(1) Include a comprehensive description and location of records to be retained;

(2) Cite the NARA approved authority for the disposition of the records if sheduled (SF 115 item number);

(3) Describe the current business for which the records are required;

(4) Estimate the length of time the records will be needed by the agency for current business (if no date is provided by the agency, approved certification requests will be effective for a maximum of five years);

(5) Explain why the current needs of the agency cannot be met by the services NARA provides for records deposited with the National Archives of the United States; and,

(6) If the records are being retained to enable the agency to provide routine public reference, cite the statute authorizing this agency activity.

(d) NARA will not accept an agency certification that a specific body of records over 30 years old, regardless of physical form or characteristics, is being used for the "conduct of the regular current business," if that agency is retaining such records primarily to:

(1) Provide to persons outside the agency access which can be provided by NARA; or

(2) Function as an agency archives, unless specifically authorized by statute or NARA.

10. Section 1228.184 is amended by revising the introductory text of the section, the introductory text of paragraphs (a), (b), and (c) and paragraphs (b)(1) and (e)(1) to read as follows:

§ 1228.184 Audiovisual records.

Audiovisual records appraised as permanent should be transferred to the National Archives as soon as they become inactive or whenever the agency cannot provide proper care and handling of the materials (see part 1232 of this chapter) to guarantee their preservation. Additionally, the following policies shall govern the transfer of audiovisual records to the National Archives:

(a) *Motion pictures.* The following copies are necessary for the preservation, duplication, and reference service of motion pictures transferred to the National Archives of the United States. Agencies shall transfer all specified copies, if they exist.

* * * * *

(b) *Still pictures.* The following elements are necessary for the preservation, duplication and reference service of each pictoral image transferred to the National Archives of the United States. Agencies shall transfer all specified copies, if they exist.

(1) For black and white photographs, an original negative and a captioned print. If the original negative is unstable safety, acetate, nitrate, or glass, a duplicate negative is also needed.

* * * * *

(c) *Sound recordings.* The following types of audio documents are necessary for the preservation, duplication, and reference service of sound recordings transferred to the National Archives of the United States. Agencies shall transfer all specified copies, if they exist.

* * * * *

(e) *Finding aids and production documentation.* * * *

(1) Existing finding aids such as data sheets, shot lists, continuities, review sheets, catalogs, indexes, lists of captions, and other documentation, whether in paper, electronic, or other form, that are necessary or helpful for the proper identification, retrieval, and use of the audiovisual records; and

* * * * *

11. In § 1228.186, the introductory paragraph is revised to read as follows:

§ 1228.186 Cartographic and architectural records.

The following classes of cartographic and architectural records appraised as permanent should be transferred to the National Archives as soon as they become inactive or whenever the agency cannot provide the proper care and handling of the materials to guarantee their preservation.

* * * * *

12. Section 1228.188 is revised to read as follows:

§ 1228.188 Electronic records.

(a) *Magnetic tape.* (1) Computer magnetic tape is a fragile medium, highly susceptible to the generation of error by improper care and handling. To ensure that permanently valuable information stored on magnetic tape is preserved, Federal agencies should schedule files for disposition as soon as possible after the tapes are written. When NARA has determined that a file is worthy of preservation, the agency should transfer the file to the National Archives as soon as it becomes inactive or whenever the agency cannot provide proper care and handling of the tapes (see part 1234 of this chapter) to guarantee the preservation of the information they contain.

(2) Agencies shall transfer electronic records to the National Archives either on open reel magnetic tape or on tape cartridges. Open reel magnetic tape shall be on one-half inch 7 or 9 track tape reels recorded at 800, 1600, or 6250 bpi. Tape cartridges shall be 18 track 3480-class cartridges recorded at 37,871 bpi. The data shall be written in ASCII or EBCDIC with all extraneous control characters removed from the data (except record length indicators for variable length records, or marks designating a datum, word, field, block or file), blocked at not higher than 32,760 bytes per block. The open reel magnetic tapes or the tape cartridges on which the data are recorded shall be new or recertified tapes (see part 1234 of this chapter) which have been passed over a tape cleaner before writing and shall be rewound under controlled tension.

(b) *Other magnetic media.* When an electronic file that has been designated for preservation by NARA is maintained

on a direct access storage device, the file shall be written on an open reel magnetic tape or on a magnetic tape cartridge that meets the specifications in paragraph (a)(2) of this section. This tape copy shall be transferred to the National Archives.

(c) *Documentation.* Documentation adequate for servicing and interpreting electronic records that have been designated for preservation by NARA shall be transferred with them. This documentation shall include, but not necessarily be limited to completed NARA Form 14097, Technical Description for Transfer of Electronic Records, or its equivalent. Where it has been necessary to strip data of its extraneous control characters (see paragraph (a)(2) of this section), the codebook specifications defining the data elements and their values must match the new format of the data. Guidelines for determining adequate documentation may be obtained from the Office of Records Administration (NI), National Archives and Records Administration, Washington, DC 20408.

13. Section 1228.190 is amended by revising paragraph (b)(1) to read as follows:

§ 1228.190 Transfer of records.

(b) *Initiation of request to transfer.* (1) NARA will provide the SF 258 for records scheduled for immediate transfer on an SF 115 approved after September 30, 1987. NARA will send the SF 258 to the agency with the approved SF 115. The agency will sign and return the SF 258 to the address indicated on the form.

* * * * *

14. Section 1228.192 is added to read as follows:

§ 1228.192 Restrictions on transferred records.

(a) *General.* Before records are transferred to the National Archives, the head of an agency may state in writing restrictions that appear to him or her to be necessary or desirable in the public interest on the use or examination of records. The head of an agency must, however, justify and cite the statute or Freedom of Information Act exemption (5 U.S.C. 552(b)) that authorizes placing restrictions on the use or examination of records being considered for transfer. If the Archivist agree, restrictions will be placed on the records.

(b) *Records less than 30 years old.* Unless required by law, the Archivist will not remove or relax restrictions placed upon records less than 30 years old without the concurrence in writting of the head of the agency from which the material was transferred or of his or her successor, if any. If the transferring agency has been terminated and there is no successor in function, the Archivist is authorized to relax, remove or impose restrictions in the public interest.

(c) *Record 30 or more years old.* After the records have been in existence for 30 years or more, statutory or other restrictions referred to in this section shall expire unless the Archivist determines, after consulting with the head of the transferring agency, that restrictions shall remain in force for a longer period. Such restrictions may be extended by the Archivist beyond 30 years only for reasons consistent with standards established in relevant statutory law, including the Freedom of Information Act (5 U.S.C. 552). Restrictions are systematically extended beyond 30 years where agencies advise NARA on the SF 258 that a particular category of records requires such protection. NARA has identified specific categories of records, including classified information and information that would invade the privacy of an individual, which may require extended protection beyond 30 years. See 36 CFR part 1258.

15. Section 1228.194 is revised to read as follows:

§ 1228.194 Records subject to the Privacy Act of 1974.

For records constituting systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), the agency shall attach to the SF 258 the most recent agency Privacy Act system notice covering the records.

16. Section 1228.198 is amended by revising paragraphs (a) and (b)(4) to read as follows:

§ 1228.198 Use of records transferred to the National Archives.

(a) In accordance with 44 U.S.C. 2108, restrictions lawfully imposed on the use of transferred records will be observed and enforced by NARA to the extent to which they do not violate 5 U.S.C. 552. The regulations in subchapter B and C of this title, insofar as they relate to the use of records in the National Archives of the United States apply to official use of the records by Federal agencies as well as to the public.

(b) * * *

(4) Each official who borrows records shall provide a receipt for them at the time they are delivered and shall be responsible for their prompt return upon the expiration of the loan period specified by NARA; and

* * * * *

Dated: February 3, 1992.

Don W. Wilson,

Archivist of the United States.

36 CFR Part 1258

RIN 3095-AA33

NARA Reproduction Fee Policies

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule makes minor corrections and clarifications to 36 CFR part 1258 to reflect current NARA policies and practices concerning fees for reproductions. This regulation was developed during a periodic review of existing NARA regulations to identify outdated or incomplete material. Two substantive changes will affect members of the public who order reproductions. First, the policy on accepting rush orders has been modified to reflect that such service is only available from Presidential libraries. It should be noted that some libraries may not be able to provide rush service under this policy. Second, two changes have made to our payment policy. Persons who order reproductions will be allowed to pay by selected credit cards. Checks for more than $200 will no longer need to be certified.

DATES: Comments must be received by April 20, 1992.

ADDRESSES: Comments should be sent to Director, Policy and Program Analysis Division (NAA), National Archives and Records Administration, Washihngton, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mary Ann Palmos or Nancy Allard at (202) 501-5110 (FTS 241-5110).

SUPPLEMENTARY INFORMATION: This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have significant impact on small business entities.

List of Subjects in 36 CFR Part 1258

Archives and records.

For the reasons set forth in the preamble, NARA proposes to amend part 1258 of title 36 of the Code of Federal Regulations as follows:

PART 1258—FEES

1. The authority citation for part 1258 continues to read as follows:

Authority: 44 U.S.C. 2116(c).

2. Section 1258.2 is amended by revising paragraphs (c)(3), (c)(6)(ii), and (c)(8) to read as follows:

§ 1258.2 Applicability

* * * * *

(c) * * *

(3) Motion picture, sound recording, and video recording materials among the holdings of the National Archives and Presidential libraries. Prices for reproduction of these materials are available from the Motion Picture, Sound and Video Branch (NNSM), National Archives, Washington, DC 20408, or from the Presidential library which has such materials (see § 1253.3 of this chapter for addresses).

* * * * *

(6) * * *

(ii) Passenger arrival lists (order form NATF Form 81)—$10.

* * * * *

(8) Orders for expedited service ("rush" orders) for reproduction of still pictures and motion picture and video recordings among the holdings of a Presidential library. Orders may be accepted on an expedited basis by the library when the library determines that sufficient personnel are availale to handle such orders or that the NARA contractor making the reproduction can provide the service. Rush orders are subject to a surcharge to cover the additional cost of providing expedited service.

* * * * *

3. Section 1258.4 is amended by revising the introductory paragraph and paragraph (f), and removing paragraphs (g) through (i) to read as follows:

§ 1258.4 Exclusions.

No fee is charged for reproduction or certification in the following instances:

* * * * *

(f) For Federal records center (FRC) records only:

(1) when furnishing the service free conforms to generally established business custom, such as furnishing personal reference data to prospective employers of former Government employees;

(2) when the reproducion of not more than one copy of the document is required to obtain from the Government financial benefits to which the requesting person may be entitled (e.g., veterans or their dependents, employees with workmen's compensation claims, or persons insured by the Government);

(3) when the reproduction of not more than one copy of a hearing or other formal proceeding involving security requirements for Federal employment is requested by a person directly concerned in the hearing or proceeding; and

(4) when the reproduction of not more than one copy of a document is for a person who has been required to furnish a personal document to the Government (e.g., a birth certificate required to be given to an agency where the original cannot be returned to the individual).

4. Section 1258.12 is amended by revising paragraph (g) to read as follows:

§ 1258.12 Fee schedule.

* * * * *

(g) *Preservation of records.* In order to preserve certain records which are in poor physical condition, NARA may restrict customers to microfilm copies instead of electrostatic copies.

* * * * *

5. Section 1258.14 is revised to read as follows:

§ 1258.14 Payment of fees.

Fees may be paid in cash, by check or money order made payable to the National Archives Trust Fund, or by selected credit cards. Remittances from outside the United States must be made by international money order payable in U.S. dollars or a check drawn on a U.S. bank. Fees must be paid in advance except when the appropriate director approves a request for handling them on an account receivable basis. Purchasers with special billing requirements must state them when placing orders and must complete any special forms for NARA approval in advance.

Dated: January 23, 1992.

Don W. Wilson,

Archivist of the United States.

36 CFR Part 1260

RIN 3095-AA17

Declassification Procedures

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking

SUMMARY: NARA is updating its regulations relating to mandatory review by Federal agencies of national security information contained in archival records, Presidential records, donated historical materials, and the Nixon Presidential materials. The changes will reflect the present practice whereby agencies return all documents reviewed for declassification action to NARA, and NARA provides the appropriate notification and declassified or sanitized reproductions to the requester.

The proposed rule will also require agencies to return a complete copy of the reviewed documents to NARA. Some agencies only return the first page of a document that is either being released or denied in its entirety. Because NARA holdings include many documents with identical dates, correspondence, and subjects, return of the complete document will help NARA close out the mandatory review request more quickly and accurately.

We are also clarifying that 36 CFR part 1260 applies to Presidential records subject to the Presidential Records Act and to the Nixon Presidential materials subject to the Presidential Recordings and Materials Preservation Act.

This proposed rule will affect Federal agencies. There are no changes to the mandatory review request procedures followed by members of the public. The proposed rule was developed during a periodic review of NARA regulations to identify outdated or incomplete material.

DATES: Comments must be received by April 20, 1992.

ADDRESSES: Comments should be sent to Director, Policy and Program Analysis Division (NAA), National Archives and Records Administration, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mary Ann Palmos or Nancy Allard at 202-501-5110 (FTS 241-5110).

SUPPLEMENTARY INFORMATION: This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have a significant impact on small business entities.

List of Subjects in 36 CFR Part 1260

Archives and records, Classified information.

For the reasons set forth in the preamble, NARA proposes to amend part 1260 of title 36 of the Code of Federal Regulations as follows:

PART 1260—DECLASSIFICATION OF AND PUBLIC ACCESS TO NATIONAL SECURITY INFORMATION

1. The authority citation for part 1260 continues to read as follows:

Authority: 44 U.S.C. 2104(a); Executive Order 12356 of April 2, 1982 (3 CFR 1982 Comp., p. 166).

2. Section 1260.1 is revised to read as follows:

§ 1260.1 Scope of part.

(a) Declassification of and public access to national security information and material (hereafter referred to as "classified information" or collectively termed "information") is governed by Executive Order 12356 of April 2, 1982 (47 FR 14874, 3 CFR 1982 Comp., p. 166) and by the Information Security Oversight Office Directive Number 1 of June 22, 1982 (47 FR 27836, June 25, 1982).

(b) Documents declassified in accordance with this regulation may be withheld from release under the provisions of 5 U.S.C. 552(b) for accessioned agency records; 36 CFR 1254.36 for donated historical materials; 44 U.S.C. 2201 et seq. and 36 CFR part 1270 for Presidential records; and 44 U.S.C. 2111 note and 36 CFR part 1275 for Nixon Presidential materials. Procedures for public requests for mandatory review of classified information under Executive Order 12356 are found in § 1254.46 of this chapter.

3. Section 1260.12 is amended by revising paragraph (a), the introductory text of paragraph (c), paragraphs (c)(2) and (d) and adding paragraph (e) to read as follows:

§ 1260.12 Agency action.

* * * * *

(a) Either make a prompt declassification determination and notify NARA accordingly, or inform NARA of the additional time needed to process the request. NARA will inform the requester of the agency action. Except in unusual circumstances, agencies shall make a final determination within one year.

* * * * *

(c) Return to NARA a complete copy of each declassified document with the agency determination. NARA will forward the reproduction to the requester. When a request cannot be declassified in its entirety, the agency must also furnish NARA, for transmission to the requester, the following:

* * * * *

(2) A statement of the requester's right to appeal within 60 calendar days of receipt of the denial; the procedures for taking such action; and the name, title, and address of the appeal authority.

(d) The agency appellate authority shall make a determination within 30 working days following receipt of an appeal. If additional time is required to make a determination, the agency appellate authority shall notify NARA of the additional time needed and the reason for the extension. The agency appellate authority shall notify NARA in writing of the final determination and of the reasons for any denial. NARA will provide the researcher a copy of any notifications.

(e) Furnish to NARA a complete copy of each document to be released only in part, clearly marked to indicate the portions which remain classified.

4. Section 1260.46 is amended by revising paragraphs (b) and (c) to read as follows:

§ 1260.46 Agency action.

* * * * *

(b) Provide a brief statement of the reasons any requested information should not be declassified and return a complete copy of the reproductions to NARA; and

(c) Return all reproductions referred for consultation including a complete copy of each document which should be released only in part, clearly marked to indicate the portions which remain classified.

Dated: January 29, 1992.

Claudine J. Weiher,

Acting Archivist of the United States.

BILLING CODE 7515-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA11-1-5611; FRL-4116-8]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; Bay Area Air Quality Management District

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to approve two volatile organic compound (VOC) rules submitted to EPA by the California Air Resources Board (ARB) as revisions to the California State Implementation Plan (SIP). The rules were adopted by the Bay Area Air Quality Management District (AQMD) on June 20, 1990 and were submitted by ARB on April 5, 1991. The rules, regulation 8, rule 3—Architectural Coatings (reg 8-3) and regulation 8, rule 48—Industrial Maintenance Coatings (reg 8-48), regulate the VOC content of various architectural coatings and industrial maintenance coatings used within the Bay Area AQMD. EPA has evaluated these rules and is proposing to approve them under section 110(k)(3) as meeting the requirements of section 110(a) and part D.

DATES: Comments must be received on or before April 20, 1992.

ADDRESSES: Comments may be mailed to: Esther Hill, Chief, Northern California, Nevada, and Hawaii Rulemaking Section (A-5-4), Air and Toxics Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rules and EPA's evaluation report are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rules are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814.

Bay Area Air Quality Management District, 939 Ellis Street, San Francisco, CA 94109.

FOR FURTHER INFORMATION CONTACT: John Ungvarsky, Southern California and Arizona Rulemaking Section (A-5-3), Air and Toxics Division, Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744-1188, FTS: 484-1188.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA), that included the San Francisco Bay Area. 43 FR 8964, 40 CFR 81.306. Because it was not possible for the Bay Area AQMD to reach attainment by the statutory attainment date of December 31, 1982, California requested under section 172(a)(2), and EPA approved, an extension of the attainment date for ozone in the Bay Area AQMD to December 31, 1987. 40 CFR 52.238. The Bay Area AQMD did not attain the ozone standard by the approved attainment date. On November 15, 1990, the Clean Air Act Amendments of 1990 (CAA) were enacted. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q.

The CAA classifies ozone nonattainment areas by the seriousness of their nonattainment problems and published extended deadlines for such areas keyed to their classifications. The Bay Area AQMD is currently classified as a moderate ozone nonattainment area [1] and is responsible for the implementation of VOC regulations applicable in the San Francisco Bay Area.[2] VOCs contribute to the production of ground level ozone and smog.

On April 5, 1991, ARB submitted to EPA Bay Area AQMD reg 8-3 and reg 8-48. This notice addresses EPA's proposed action for these rules. The rules were found to be complete on May 21, 1991, pursuant to EPA's completeness criteria as set forth in 40 CFR part 51, appendix V [3] and are being proposed for approval. The two rules addressed in this notice are intended to replace, expand, and further strengthen the current SIP version of reg 8-3, which was adopted into the SIP on October 3, 1984.

Description of Regulations

Bay Area AQMD Reg 8-3 and Reg 8-48 control emissions of VOCs from architectural coatings and industrial maintenance coatings sold, offered for sale, applied, solicited, or manufactured for sale within the Bay Area AQMD. Architectural coatings and industrial maintenance coatings are defined as coatings[4] applied to stationary structures and their appurtenances, to mobile homes, to pavements, or to curbs.

On May 12, 1989, the ARB approved a Suggested Control Measure (SCM) for the architectural coatings category. The SCM was developed by the California Technical Reviw Group (TRG)[5] with close cooperation with the paints and coatings industry[6] and was intended to serve as a model architectural coatings rule for ozone nonattainment areas (e.g., the Bay Area AQMD) in California. The SCM built upon previous architectural coating model rules adopted by ARB in 1977 and 1985. EPA supported the ARB's and TRG's adoption of the SCM and the Bay Area AQMD's adoption of reg 8-3 and reg 8-48[7] as demonstrating progress toward attainment of the National Ambient Air Quality Standard for ozone and as representing controls which are technically and economically feasible.[8] Reg 8-3 and reg 8-48 are modeled after the SCM. However, the Bay Area AQWD chose not to submit for SIP approval the future effective limits for twelve coating categories in reg 8-3 and reg 8-48.[9] Therefore, the submitted rules are not consistent with the SCM for eleven of the twelve coating categories previously mentioned. The following is EPA's evaluation for reg 8-3 and reg 8-48.

EPA Evaluation

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA, 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which form the basis for today's action, appears in the various EPA policy guidance documents.[10] Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of Reasonably Available Control Technology (RACT) for major stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting states and local agencies in developing RACT rules, EPA has prepared a series of CTG documents which specify the minimum requirements that a rule must contain in order to be approved into the SIP. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. There is not a CTG applicable to Bay Area AQMD reg 8-3 or 8-48 at this time (see footnote 8).

For the purposes of meeting the requirements of part D, EPA reviewed this submittal against current SIP limits and EPA policies as described in the previous paragraph. Overall, the requirements of reg 8-3 and reg 8-48 meet or exceed the current SIP requirements for reg 8-3.

EPA has evaluated the submitted rule for consistency with EPA requirements. The rule will achieve VOC reductions from: Amended definitions and additional administrative requirements; new emission limits for previously exempt specialty coatings; and revised emission limits for several specialty coating categories. The revisions include:

- Approximately twenty new or revised definitions which further clarify the applicable coating categories and delete non-substantive verbiage;
- New VOC content limits for approximately eighteen specialty categories and elimination of five specialty categories through consolidation with other categories; and

---

[1] Upon the date of enactment of the amendments, the designation of the Bay Area AQMD as nonattainment continued under section 107(d) and the area was classified by operation of law, pursuant to section 181(a). See 56 FR 56694 (November 6, 1991).

[2] The Bay Area AQMD includes the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, and those portions of the counties of Solano and Sonoma as defined in 40 CFR 81.21.

[3] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991). These will replace the completeness criteria currently set forth in 40 CFR part 51, appendix V.

[4] Architectural coatings include but are not limited to: Ordinary house and trim paints, lacquers, varnishes, concrete curing compounds, industrial maintenance coatings, stains, primers, sealers, undercoaters, roof coatings, traffic coatings, and waterproof sealers.

[5] The TRG is a statewide regulatory workgroup comprised of representatives from the Air Resources Board, various California air pollution control districts, and the EPA. In California, the TRG has been instrumental in assisting the ARB and various air pollution control districts with the development of control strategies which represent RACT for a variety of pollutants, including various VOC categories. On May 24, 1989, the TRG approved the Suggested Control Measure adopted by ARB making in the "Air Resources Board—California Air Pollution Control Officers Association Suggested Control Measure for Architectural Coatings."

[6] Bay Area Reg 8-3 and Reg 8-48 are currently being challenged in the California courts by a group of paint manufacturers, retailers, and contractors. On September 20, 1991, the Superior Court of California for the County of San Francisco issued a writ of mandate ordering the Bay Area AQMD to set aside the regulations as of January 1, 1992, or re-adopt them (or adopt new regulations) after complying with the California Environmental Quality Act. *Dunn-Edwards Corp.* v. *Bay Area AQMD*, No. 930826 (Cal. Super. Ct. S.F.). On September 30, 1991, the Bay Area AQMD filed an appeal. *Dunn-Edwards Corp.* v. *Bay Area AQMD*, No. A055155 (Cal Ct. App., 1st Appl. Dist.). The appeal is pending.

[7] Regulation 8, rule 48 is a result of moving the Industrial Maintenance Coating category out of regulation 8, rule 3, to provide greater clarity and definition while remaining consistent with the Architectural Coatings, SCM.

[8] EPA has not developed a Control Techniques Guideline (CTG) for architectural coatings. As required under section 183(e) of the CAA, EPA is investigating the development of a CTG or regulations for consumer and commercial products, which will include paints, coatings, and solvents (e.g., architectural coatings).

[9] The twelve categories include the following coatings in Reg. 8-3: Below-ground wood preservatives, bond breakers, lacquers, sanding sealers, magnesite cement coatings, multi-color coatings, swimming pool coatings, and swimming pool repair and maintenance coatings; and the following coatings in reg. 8-48: High temperature industrial maintenance coatings, industrial maintenance anti-graffiti coatings, industrial maintenance coatings, and pre-treatment wash primer (also in reg 8-3). With the exception of the lacquer limit, the submitted limits for the aforementioned coatings are not consistent with the SCM.

[10] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations, Clarification to appendix D of November 24, 1987 **Federal Register**" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs). In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

• The elimination of one and addition of eight administrative requirements.

For a detailed description of the revision, readers should contact the individual listed previously in this notice. In summary, the revisions strengthen the limits in and improve the enforceability of the current SIP rule. Thus reg 8–3 and reg 8–48 should be approved in order to strengthen the SIP.

EPA Proposed Action

EPA has evaluated Bay Area AQMD reg 8–3 and reg 8–48 for consistency with the CAA, EPA regulations and EPA policy. Therefore, Bay Area AQMD reg 8–3 and reg 8–48 are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92–47, RM–7828]

Television Broadcasting Services; Bellingham and Anacortes, WA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Prism Broadcasting Company, Inc., seeking the reallotment of vacant UHF television Channel 24 in lieu of Channel 64 at Bellingham, Washington, the modification of Station KBCB(TV)'s construction permit accordingly, and the reallotment of Channel 64 in lieu of Channel 24 at Anacortes, Washington. Channel 24 can be allotted to Bellingham and Channel 64 to Anacortes, in compliance with the Commission's minimum distance separation requirements. The coordinates for Channel 24 at Bellingham are North Latitude 48–40–48 and West Longitude 122–50–23. The coordinates for Channel 64 at Anacortes are North Latitude 48–30–06 and West Longitude 122–36–36. We will not accept competing expressions of interest in the use of television Channel 24 at Bellingham. See also Supplementary Information, *infra.*

DATES: Comments must be filed on or before May 4, 1992, and reply comment on or before May 19, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Garry Spire, Esq., suite 104, 23842 Calabasas Road, Calabasas, California 91302 (Counsel for Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's notice of proposed rule making, MM Docket No. 92–47, adopted March 5, 1992, and released March 13, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

Since Anacortes and Bellingham are located within 400 kilometers (250 miles) of the U.S.-Canadian border, concurrence by the Canadian government has been requested.

Provisions of the Regualtory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB10

Captive-bred Wildlife Regulation

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of extension of comment period and of public meeting.

SUMMARY: On January 7, 1992, the Fish and Wildlife Service (Service) published a notice of intent to propose a rule concerning regulation of captive-bred specimens of non-native species (57 FR 548). The comment period for that notice closed on March 9, 1992. At this time, the Service wishes to reopen the period for public comment. Also, the Service announces a public meeting for the purpose of examining the issue, answering questions and receiving comments.

DATES: The public meeting will be held from 1–3:30 p.m. Wednesday, April 1, 1992. The Service will consider all written comments on the notice of intent that are received by close of business on April 20, 1992.

ADDRESSES: Send comments to the U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Room 432, Arlington, VA 22203.

The meeting will be in room 200, Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Marshall P. Jones or Richard K. Robinson at the above address or call (703) 358–2093.

SUPPLEMENTARY INFORMATION: The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) prohibits any person subject to the jurisdiction of the United States from conducting certain activities with any endangered or threatened species of fish or wildlife. The Service has been striving to achieve an appropriate degree of control over prohibited activities involving living wildlife of non-native species born in captivity in the United States. Twelve years ago, the Service issued proposed and final rules to address the issue (44 FR 30044, May 23, 1979, and 44 FR 54002, September 17, 1979). The Service believes that this regulation, as currently implemented, amy impose a substantial paperwork burden on the public as well as on the Service without contributing appreciably to the conservation of many affected species. Therefore, the Service is conducting a review of the system to determine whether changes are needed, and if so, what those changes should be.

Several alternative approaches, including no change, were outlined in the January 7 notice.

Public Comments Solicited

Comments, suggested alternatives not discussed in the January 7, 1992 notice (57 FR 548), or any germane information or statistics are hereby solicited.

Author

The primary author of this notice is Richard K. Robinson, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, room 432, Arlington, Virginia 22203. This notice is issued under authority of the Endangered Species Act, 16 U.S.C. 1531–44.

Dated: February 27, 1992.

Richard N. Smith,

Director.

[FR Doc. 92–6532 Filed 3–19–92; 8:45 am]

BILLING CODE 4310–55–M

50 CFR Part 17

RIN 1018–AB42

Endangered and Threatened Wildlife and Plants; Reopening of Comment Period on Proposed Endangered Status for Certain Populations of the African Elephant and Revision of Special Rule

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of reopening of comment period; notice of extension of 6-month statutory deadline.

SUMMARY: The Service announces that the comment period on the proposed rule to change the status for some populations of the African elephant has been reopened. This will allow all pertinent information obtained at the Eighth Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) at Kyoto, Japan, on March 2–March 13, 1992, to be considered in the development of a final decision. In addition, the Service has extended the statutory deadline for completing this rulemaking process by 6 months, based on its finding that substantial disagreement exists on the sufficiency or accuracy of the best available scientific and commercial information pertaining to the reclassification proposal.

DATES: All comments and information received through April 20, 1992, will be considered in making a final decision on the proposal and will be included in the administrative record.

ADDRESSES: Written comments and materials concerning the proposed rule should be sent to the Chief, Office of Scientific Authority; Mail Stop: Arlington Square, Room 725; U.S. Fish and Wildlife Service; Washington, DC 20240 (FAX number 703–358–2276). Express and messenger-delivered mail should be addressed to the Office of Scientific Authority; Room 750, 4401 North Fairfax Drive; Arlington, Virginia 22203. Comments and materials received will be available for public inspection, by appointment, from 8 a.m. to 4 p.m. Monday through Friday, at the Arlington, Virginia, address.

FOR FURTHER INFORMATION CONTACT: Dr. John L. Oldemeyer, Office of Scientific Authority, at the above address, or by phone (703–358–1708 or FTS 921–1708).

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service (Service), in the **Federal Register** of March 18, 1991, (56 FR 11392–11401), issued a notice proposing to reclassify most populations of the African elephant (*Loxodonta africana*) from threatened to endangered status. The proposal would classify all African elephants (including their parts and products) as endangered wherever found except in Botswana, Zinbabwe, and South Africa, where they would remain listed as threatened. The Service at that time also (1) withdrew its May 5, 1989, proposal (54 FR 19416–19421) to amend its regulations found in 50 CFR 14.91, 14.92, 17.3 and the African elephant special rule found in 50 CFR 17.40(e); and proposed to (2) amend the regulations found in 50 CFR 17.21; and (3) revise the African elephant special rule found in 50 CFR 17.40(e). The Service, in the **Federal Register** of January 8, 1992 (57 FR 658–659), had extended the comment period through January 24, 1992. The present notice further extends the comment period through April 20, 1992.

The CITES Conference was attended by credentialed delegates from over 100 nations to determine proposals on species status and to make recommendations on management policies about trade in species of fauna and flora. The African elephant, which was the subject of two specific downlisting proposals (from CITES appendix I to appendix II) was a major discussion topic at the Conference. Although the downlisting proposals were eventually withdrawn by the proponents after extensive debate among the delegations, new management and biological information was presented that illustrates the need for further scientific review. Incorporating information obtained at the CITES Conference will help ensure that the final rule will be as biologically accurate as possible.

During the Conference of the Parties, numerous expert scientific opinions were exchanged among the party countries and non-governmental organizations (NGO's). The Service has received the Panel of Experts reports on the various elephant populations covered by the downlisting proposals. The Service was also informed of range state management opinions, a report prepared by the Environmental Investigation Agency, and the expert judgments of Iain Douglas-Hamilton (Commission of the European Communities, Nairobi, Kenya) and experts affiliated with other NGO's. The various expert opinions pointed to contradictory positions on the assessment of threats posed to the populations under review. In light of this new information and recent scientific analysis, the Service finds that there is substantial disagreement among biological experts as to the sufficiency

or accuracy of data pertaining to the pending reclassification proposal. Therefore, under authority of section 4(b)(6)(B)(i) of the Endangered Species Act, the 12-month statutory period for completing the decision-making process on this reclassification proposal is extended for 6 months in order to further assess, as well as to receive additional, scientific data.

The Service intends that the final rule developed for the African elephant will be accurate and as effective as possible in the conservation of the species. Therefore, comments, suggestions, and information concerning any aspect of the proposed rule are hereby solicited from the public, concerned governmental agencies within the United States, African range states, other interested countries, the scientific community, industry, private interests, and other parties.

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

Lists of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Dated: March 17, 1992.

ACTION

Foster Grandparent and Senior Companion Programs

AGENCY: Action.

ACTION: Notice of revision of income eligibility levels for the Foster Grandparent Program and Senior Companion Program.

SUMMARY: This Notice revises the schedules of income eligibility levels for participation in the Foster Grandparent Program (FGP) and Senior Companion Program (SCP), published in 56 FR 11984, March 21, 1991 and 56 FR 41117, August 19, 1991. Because data used for determining FGP and SCP income eligibility levels is available at different times during the year, ACTION has determined that it will issue these guidelines twice a year so as to reflect the most current information and to assure the widest base of potential applicants.

The revised schedules are based on changes in the Poverty Income Guidelines from the Department of Health and Human Services (DHHS), published in 57 FR 5455, February 14, 1992 and Supplemental Security Income (SSI) guidelines disseminated by the Social Security Administration in July 1991. This revision adopts as the income eligibility level for each State the higher amount of either: (a) 125 percent of the DHHS Poverty Income Guidelines, or (b) 100 percent of the DHHS Poverty Income Guidelines, plus the 1991 amount each State supplemented Federal SSI, rounded to the next highest multiple of $5.00.

When the Social Security Administration disseminates the 1992 State supplements to the Federal SSI, ACTION will revise its income eligibility guidelines for those States with SSI supplements above 125 percent of the DHHS Poverty Income Guidelines.

Schedule of Income Eligibility Levels: Foster Grandparent and Senior Companion Programs

1992 FGP/SCP INCOME ELIGIBILITY LEVELS FOR ALL STATES (AND HAWAII), EXCEPT ALASKA, CALIFORNIA, COLORADO, CONNECTICUT (BASED ON 125 PERCENT OF DHHS POVERTY INCOME GUIDELINES)

States	Household Units of One	Two	Three	Four	Five	Six	Seven	Eight
All	$8,515	$11,490	$14,465	$17,440	$20,415	$23,390	$26,365	$29,340
Hawaii	9,790	13,215	16,640	20,065	23,490	26,915	30,340	33,765

(For household units with more than eight members, add $2,975 in all States and $3,425 in Hawaii for each additional member.)

Below are adjusted income eligibility levels, which reflect either 1991 SSI supplements or 125 percent of the DHHS 1992 Poverty Income Guidelines, whichever is higher.

FGP/SCP INCOME ELIGIBILITY LEVELS FOR THE FOLLOWING SSI-ADJUSTED STATES

States	Household Units of One	Two	Three	Four	Five	Six	Seven	Eight
Alaska	$12,480	$17,230	$20,050	$22,870	$25,690	$29,250	$32,975	$36,700
California	10,115	17,200	19,460	21,720	23,980	26,240	28,500	30,760
Colorado	8,515	12,410	14,670	17,440	20,415	23,390	25,365	29,340
Connecticut	10,930	15,145	17,405	19,665	21,925	24,185	26,445	29,340

(For household units with more than eight members, add $3,725 in Alaska, add $2,280 in California, and add $2,975 in Connecticut and Colorado for each additional member.)

Any person whose income is not more than 100 percent of the DHHS Poverty Income Guideline for her/his specific household unit shall be given special consideration for participation in the Foster Grandparent and Senior Companion Programs. The revised income eligibility levels presented here are calculated from the base DHHS Poverty Income Guidelines now in effect.

1992 DHHS POVERTY INCOME GUIDELINES FOR ALL STATES

States	Household Units of One	Two	Three	Four	Five	Six	Seven	Eight
All Except Alaska/Hawaii	$6,810	$9,190	$11,570	$13,950	$16,330	$18,710	$21,090	$23,470
Alaska	8,500	11,480	14,460	17,440	20,420	23,400	26,380	29,360
Hawaii	7,830	10,570	13,310	16,050	18,790	21,530	24,270	27,010

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Rey Tejada, Program Officer, Foster Grandparent Program, 1100 Vermont Avenue, NW., Washington, DC 20525 or Telephone (202) 606–4849.

Thomas E. Endres, Program Officer, Senior Companion Program, 1100 Vermont Avenue, NW., Washington, DC 20525 or Telephone (202) 606–4851.

SUPPLEMENTARY INFORMATION: These ACTION programs are authorized pursuant to section 211 and 213 of the Domestic Volunteer Service Act of 1973, as amended, Public Law 93–113, 87 Stat. 394. The income eligibility levels are determined by the currently applicable guidelines published by DHHS pursuant to sections 652 and 673(2) of the Omnibus Budget Reconciliation Act of 1981 which requires poverty guidelines to be adjusted for Consumer Price Index changes.

Dated: March 13, 1992.

Jane A. Kenny,

Director of ACTION.

BILLING CODE 6050–28–M

DEPARTMENT OF AGRICULTURE

Forest Service

Boundary Modification, Roosevelt National Forest, Colorado

AGENCY: Forest Service, USDA.

ACTION: Notice of boundary modification.

SUMMARY: The Secretary of Agriculture has modified the boundary in response to a Public Law enacted on November 29, 1989, which authorizes the National Park Service to acquire three non-Federal ownerships located within the boundaries of the Roosevelt National Forest. Upon completion of each acquisition, the Secretary of the Interior is directed to modify the boundary of Rocky Mountain National Park, and the Secretary of Agriculture is directed to correspondingly modify the boundary of the Roosevelt National Forest. The National Park Service has completed acquisition of two of the three parcels referred to in the Act and has requested that the Forest boundary be modified accordingly. Efforts to acquire the third parcel have begun, but consummation is estimated to be two to three years in the future, when a second boundary modification will be necessary.

DATES: This boundary modification is effective November 22, 1991.

ADDRESSES: Copies of a map showing the proposed additions are on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture, Washington, DC 20090–6090.

FOR FURTHER INFORMATION CONTACT: Dave M. Sherman, Lands Staff, 4 South, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090 (202) 205–1362.

Dated: March 6, 1992.

George M. Leonard,

Associate Chief.

Boundary Modification on the Roosevelt National Forest

Pursuant to authority vested in me by Section 1(b) of the Act of November 29, 1989 (103 Stat. 1700, 16 USC 192b–10), the boundary of the Roosevelt National Forest is hereby modified to exclude the following lands:

T. 4N., R.73W., 6th P.M., Larimer County, Colorado
- Sec. 10, W½ SE¼;
- Sec. 14, That part of the SE¼ NW¼ and SW¼ lying west of the westerly right-of-way line of Colorado Highway No. 7;
- Sec. 15, NE¼, N½ SE¼;
- Sec. 23, That part of the NW¼ NW¼ lying west of the westerly right-of-way line of Colorado Highway No. 7.

Dated: November 22, 1991.

Edward Madigan

Secretary of Agriculture.

[FR Doc. 92–6503 Filed 3–19–92; 8:45 am]

BILLING CODE 3410–11–M

Santa Fe Ski Area EIS, Ski Area Improvements and Expansion Analysis, Santa Fe National Forest; Santa Fe County, NM

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, USDA, will prepare an environmental impact statement (EIS) to disclose effects of alternative plans for upgrading and/or expansion of recreational facilities at the Santa Fe Ski Area, which is on the Santa Fe National Forest and operated under a Forest Service special use permit.

DATES: Written comments concerning the scope of the analysis, the issues, or the alternatives should be received on or before April 30, 1992.

ADDRESSES: Send written comments to Lori D. Osterstock, District Ranger, P.O. Drawer R, Espanola, NM 87532.

FOR FURTHER INFORMATION CONTACT: Corey Wong, Project Coordinator, Espanola Ranger District. (505) 753–7331.

RESPONSIBLE OFFICIAL: Alan S. Defler, Forest Supervisor, Santa Fe National Forest.

SUPPLEMENTARY INFORMATION: Special Use Permittee Santa Fe Ski Company has proposed to amend their Master Development Plan for the Santa Fe Ski Area. The Santa Fe Ski Company proposes additional developments at the Santa Fe Ski Area and also proposes development on public land adjacent to the Ski Area. The project area encompasses portions of the Rio en Medio and Tesuque Creek watersheds, located at the end of the Hyde Park Road (NM 475), 16 miles from the City of Santa Fe. The Tesuque Creek watershed area includes the Santa Fe Ski Company's Big Tesuque expansion proposal, a controversial part of the project.

The scope of the proposal includes expanding the Ski Area in size by adding (to the existing 588 acres) 75 acres in the Ravens Ridge area and 340 acres in the Big Tesuque area; removing one surface tow; adding 3 lifts and one surface tow; clearing 42 acres for ski runs; thinning 81 acres for tree skiing; replacing a mid-mountain restaurant; expanding the base lodge; adding a building at the base for skier and employee use; adding 50 acres of snowmaking within the Rio en Medio watershed and 2 acres within the Tesuque Creek watershed; expanding one small parking lot and creating 2 new parking lots, totalling 750 new spaces; increasing skier capacity from 4,100 to 6,000 skiers at one time (SAOT); and providing a summertime mountain bicycling and hiking trail system. Implementation could begin in summer 1993 and would continue for about ten years.

The proposed project will be in compliance with the Forest Plan which provides the overall guidance for management of the area. Ski area expansion is an appropriate use of the areas around the existing Santa Fe Ski Area. The site-specific environmental analysis provided by the Ski Area EIS will assist the Forest Supervisor in determining which improvements are needed to meet the following objectives: Accommodate predicted short- and long-term demand for skiing; continue the supply of high quality recreational opportunities; maintain the attractiveness and viability of the permittee's operation; and, sustain the resource uses and amenity values which the local Santa Fe community and many visitors depend on and enjoy. Alternative development plans will be carefully examined for their potential impacts on the physical, biological, and social environments so their tradeoffs are apparent to the public and the Forest Supervisor.

Public participation will be fully incorporated into preparation of the EIS. The first step is the scoping process during which the Forest Service seeks information, comments, and assistance from Federal, State, and local agencies, and other individuals or groups who may be interested or affected by the proposed action. This information will be used in preparing the EIS. Scoping includes: Inviting participation, determining the project's scope and potential issues, and eliminating from detailed study those issues which are not significant. The public is also invited to participate in developing alternatives, and identifying and reviewing the potential environmental effects of the proposed action and its alternatives.

The Santa Fe National Forest, as the lead agency, began the scoping process for this project in 1988, and held several public meetings in 1988 and 1989. Environmental analysis was initiated during that period with the development of issues, alternatives, and completion of some surveys. There was an almost two-year break in the environmental analysis process in 1990 and 1991.

In December 1991, the Santa Fe National Forest began supplementing the scoping process via a letter, media coverage, and open houses held in January 1992. Comments on the issues and alternatives were requested with an initial March 2, 1992 deadline, which was extended to April 30, 1992. Those people that have submitted comments do not need to resubmit their comments because of this **Federal Register** notice.

Preliminary issues include the potential effects of proposed actions on the following elements of the biological, physical, and social environments: Quality of and capacity for downhill skiing; four-season recreational resource opportunities and conflicts; water quantity, quality, and timing of snowmelt; Native American sacred areas; parking, traffic, and transportation systems; scenic quality (views); fish and wildlife habitat; noise levels; air quality; Wilderness resource values; the overall quality of life for local residents; jobs and personal income; and past and potential future scientific research studies. The direct, indirect, and cumulative, short-term, and long-term aspects of impacts on National Forest lands and resources, and those of connected or related effects off-site, will be fully disclosed.

Preliminary alternatives include the applicant's proposal (described above) and No Action, which in this case is the continuing current administration of the ski area. Additional preliminary alternatives include: Developments within the existing permitted boundary; developments within the permitted boundary plus the Ravens Ridge expansion; and developments within the permitted boundary plus the Ravens Ridge expansion plus a 475-acre expansion into the Big Tesuque area with cleared ski runs, a satellite base lodge, parking, and vehicular access from the Aspen Vista Picnic Area along NM 475 (the Hyde Park Road). These alternatives will be modified after the supplemental scoping period to ensure that the final issues are addressed. The Forest Supervisor will be presented with a wide range of feasible and practical alternatives.

Permits and licenses required to implement the proposed action will, or may, include the following: Amended Special Use Permit from the Forest Service; consultation with U.S. Fish and Wildlife Service for compliance with section 7 of the Threatened & Endangered Species Act; review from the New Mexico Environment Department, Department of Game & Fish, and Energy, Minerals, and Natural Resources Department; approval from the New Mexico Highway and Transportation Department for any state highway redesign or access improvement; approval from the New Mexico State Engineer on any additional water rights acquired; clearance from the New Mexico State Historic Preservation Office; and various construction permits from State agencies.

The Forest Service predicts the Draft EIS will be filed in Fall 1992 and the Final EIS in Spring 1993.

The comment period on the Draft EIS will be 60 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register.**

The Forest Service believes, at this early stage, it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of Draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, *Vermont Yankee Nuclear Power Corp* v. *NRDC, 435 U.S., 519, 533 (1978).* Also, environmental objections that could be raised at the Draft EIS stage but that are not raised until after completion of the Final EIS may be waived or dismissed by the courts, *City of Angoon* v. *Hodel, 803 F.2d 1016m 1022 (9th Cir, 1986),* and *Wisconsin Heritages, Inc.* v. *Harris, 490 F. Supp. 1334, 1338 (E.D. Wis 1980).*

Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 60 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the Final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the Draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the Draft EIS. Comments may also address the adequacy of the Draft EIS or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.)

Dated: March 2, 1992.

Alan S. Defler,

Forest Supervisor.

[FR Doc. 92–6512 Filed 3–19–92; 8:45 am]

BILLING CODE 3410–11–M

Halfmoon Timber Sale; Flathead National Forest, Hungry Horse Ranger District, Flathead County, State of Montana

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement (EIS) to analyze and disclose the environmental impacts of a proposal to harvest timber and construct roads in the area south of the town of West Glacier, Montana and north of the town of Coram, Montana on the Hungry Horse Ranger District, Flathead County, Montana. The decision to be made is whether or not to harvest timber and build roads in the Halfmoon areas, and if so, to what level is that development appropriate and also, whether or not to broadcast burn for wildlife forage production and, if so, how much. Finally, a decision will be made on which roads or areas to close to motorized traffic if any. This EIS will tier to the Flathead National Forest Land and Resource Management Plan (LRMP) and EIS of January, 1986, which provide overall guidance in achieving the desired future condition for the area. The purpose and goal of the proposed action is to help satisfy short-term demands for raw materials for wood products and provide for a continuous supply of forest resources in the future. In addition, it is the goal of the Forest Service to maintain or improve the health and productivity of forest stands, and to increase resistance to insect and disease outbreaks. Also, improving wildlife forage and maintaining cover distribution is a goal.

Extensive scoping has been done for this project during the initial stages of preparation of an Environmental Assessment, and during the analysis of alternatives over the past fourteen months. It has now been determined that an EIS will be prepared for this project.

DATES: The draft environmental impact statement (DIS) will be released to the public on or before April 20, 1992.

ADDRESSES: Send written comments to Al Christophersen, District Ranger, Hungry Horse Ranger District, P.O. Box 340, Hungry Horse, MT 59919.

FOR FURTHER INFORMATION CONTACT: Ed Lieser, Halfmoon Interdisciplinary Team Leader, or Al Christophersen District Ranger, at (406) 387–5243.

SUPPLEMENTARY INFORMATION:

Management activities under consideration would occur in an area encompassing approximately 10,000 acres of National Forest lands in the Lake Five Geographic Unit, on the Hungry Horse Ranger District, as delineated in the Flathead LRMP. Included in the area of analysis are all or portions of the following: Sections 30–32, T. 32 N., R. 18 W., P.M.M.; all or portions of section 34–36, T. 32 N., R. 19 W. P.M.M.; all or portions of sections 1–5, 8–17, 21–24, T. 31 N., R. 19 W., P.M.M.; all or portions of sections 5–7, 18, T. 31 N., R. 18 W., P.M.M. Principal Meridian Montana. The stands considered for treatment are pure stands of even aged lodgepole pine approximately 60 years old. Management activities may include construction of approximately 4 miles, and reconstruction of approximately 3 miles and subsequent closure of roads. Harvesting approximately 210 acres of timber in 27 units, will include regeneration type cutting using the clearcut method with reserve trees on 23 of the 27 units and shelterwood harvesting on the remaining 4 units. All units will be tractor yarded and planted to supplement natural regeneration and ensure diversity in future stands. Units will vary in size from 2 acres to 23 acres with an average of 7 acres. Site preparation and hazard reduction will be accomplished by spot burning in areas of high fuel accumulation. Prescribed burning to improve forage for elk is planned on 17 acres in 4 units. Other activities include closing existing roads.

The LRMP for the Flathead National Forest provides the overall guidance for management activities in the potentially affected area through its goals, objectives, standards and guidelines, and management area direction. In the LRMP, timber harvest and road construction was tentatively scheduled in the Halfmoon Lake and Lake Five areas for sometime between 1991 and 1995.

Most areas of proposed harvest and road construction for the Halfmoon project are within Management Area (MA) 15. Some activity is also planned in MA 7. LRMP plan direction states that Management Area 15 consists of lands where timber management with roads is economical and feasible. The management goal is to manage those lands suitable for timber production for the long-term growth and production of commercially valuable wood products as well as provide for soil and water protection, wildlife habitat, and roaded recreation opportunities.

Management Area 7 includes forested lands in areas of high scenic value. One of the primary goals consists of maintaining a pleasing, natural-appearing landscape in which management activities are not dominant. All resources will be managed with a partial retention visual quality objective.

The proposal was designed to meet the LRMP standards and guidelines. The analysis includes a full range of alternatives that respond to issues received from scoping. One of these is the "no-action" alternative, in which the tree harvest, road construction and closures, and burning for wildlife forage production would not be implemented. As a result of the scoping and analysis, alternatives to the proposed action include:

(1) No management activities other than effectively closing all existing roads.

(2) Maximizing the development of the area of the next planning period by regeneration harvesing 352 acres using the clearcut method with reserve trees, constructing 5.2 miles of new roads and 4.7 miles of reconstructed roads, and broadcast burn 17 acres of natural openings for wildlife forage production.

(3) Commercial thinning and shelterwood harvesting on 63 acres, construct 0.7 mile of new road and reconstruct 2.2 miles existing roads, broadcast burn 21 acres of natural openings, and slash and burn 6 acres of dense, overstocked lodgepole pine for wildlife forage production.

(4) Regeneration harvest 100 acres using the clearcut method with reserve trees, shelterwood harvest 13 acres, and broadcast burn 17 acres. Construct 1.5 miles of new roads and reconstruct 1.5 miles of existing roads.

(5) Commercial thin and shelterwood harvest 130 acres, constuct 0.7 mile of new road and reconstruct 2.2 miles of existing roads.

(6) Shelterwood harvest 44 acres, clearcut with reserve trees 72 acres, and broadcast burn 17 acres. Construct 1 mile of road and reconstruct 2.3 miles of existing roads.

Alternative analysis examined various levels and locations of timber harvest and road construction to provide emphasis on differing mixes of timber and non-timber resource values.

The direct, indirect, and cumulative environmental effects of the alternatives have been analyzed and will be disclosed in the EIS. The EIS will also disclose the site specific features that reduce or eliminate potential environmental impacts.

Public participation has been emphasized and has occurred at several points during the analysis. An open house meeting will be scheduled sometime during the Draft EIS review period.

The Fish and Wildlife Service, Department of the Interior, has been and will be informally consulted throughout the analysis. To meet the requirements of the Endangered Species Act, the Fish and Wildlife Service will review the EIS and biological evaluation and if necessary, render a formal Biological Opinion of the effects on the Threatened and Endangered Species including grizzly bear, gray wolf, and bald eagle.

The public comment period on the draft EIS will be 45 days from the date the EPA's notice of availability appears in the **Federal Register.**

The Forest Service believes it is important to give reviewers notice at this early stage because of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Wisconsin Heritage, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when the agency can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.).

The effect of proposed activities of this project on various resources constituted the preliminary issues from initial scoping within the agency and from public comments. These issues are listed below:

- Cover/forage and security for Threatened and Endangered Species,
- Wildlife travel corridor considerations between Glacier National Park and The Great Bear Wilderness,
- Cover/forage and security for deer, elk, and moose,
- Management Indicator Species (pileated woodpecker and pine marten) and old growth habitat,
- Short and long term timber supply to the local economy,
- Air quality from broadcast burning,
- The risk of escaped wildfire from National Forests to private lands,
- The vitality of even-aged pure lodgepole stands,
- Sensitive plants,
- Opportunities for motorized recreation,
- The quality of life of local residents (i.e. noise, nuisance, and wildlife viewing),
- Riparian areas,
- Noxious weeds.
- The comments received on the draft DEIS will be analyzed, considered, and responded to in the Final Environmental Impact Statement (FEIS). The FEIS is scheduled to be completed by July 1992. The District Ranger for the Hungry Horse Ranger District, Flathead National Forest is the responsible official for the preparation of this EIS and will make a decision regarding this proposal considering the comments and responses, environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies. The decision and rationale for the decision will be documented in a Record of Decision. That decision will be subject to appeal under applicable Forest Service reguations.

Dated: March 11, 1992.

Allen L. Christophersen,

District Ranger, Hungry Horse Ranger District, Flathead National Forest.

BILLING CODE 3410–21–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Electronics Technical Advisory Committee; Partially Closed Meeting

A meeting of the Electronics Technical Advisory Committee will be held April 9, 1992, 9 a.m., Herbert C. Hoover Building, room 1617–M, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to semiconductors and related equipment or technology.

Agenda: General Session

1. Opening Remarks by the Chairman and Commerce Representative.
2. Introduction of Members and Visitors.
3. Presentation of Papers by the Public.
4. Discussion of General License Free World (GFW).
5. Australia Group/Chemical Biological Warfare—1B70E.
6. Segment A List Review (Category 3).
7. Focused Ion Beam Presentation.
8. Other Presentations (Semiconductor Equipment Mfg. Industry, Electronic Industry Association, Semiconductor Industry Association).

Executive Session

9. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, in order to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that you forward your public presentation materials or comments at least one week before the meeting to the address listed below: Ms. Ruth D. Fitts, Technical Advisory Committee Unit, BXA/EA, room 1621, U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 5, 1992, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202–377–4959.

Dated: March 10, 1992.

Betty A. Ferrell,

Director, Technical Advisory Committee Unit, Office of Deputy Assistant Secretary for Export Administration.

[FR Doc. 92–6507 Filed 3–19–92; 8:45 am]

BILLING CODE 3510–DT–M

International Trade Administration

[A–538–802]

Antidumping Duty Order: Shop Towels from Bangladesh

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: John Beck or Raphiel Hampton, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230: (202) 377–3464 or 377–0176, respectively.

SCOPE OF ORDER: The product covered by this order is shop towels. Shop towels are absorbent industrial wiping cloths made from a loosely woven fabric. The fabric may be either 100 percent cotton or a blend of materials. Shop towels are currently classifiable under items 6307.10.2005 and 6307.10.2015 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

ANTIDUMPING DUTY ORDER: In accordance with section 735(a) of the Tariff Act of 1930, as amended (the Act), on January 27, 1992, the Department of Commerce (Department) made its final determination that shop towels from Bangladesh are being sold at less than fair value (57 FR 3996 February 3, 1992). On March 11, 1992, in accordance with section 735(d) of the Act, the International Trade Commission notified the Department that such imports materially injure a U.S. industry.

Therefore, in accordance with section 736 of the Act, the Department will direct U.S. Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act, antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of shop towels from Bangladesh. These antidumping duties will be assessed on all unliquidated entries of shop towels from Bangladesh entered, or withdrawn from warehouse, for consumption on or after September 12, 1991, the date on which the Department published its preliminary determination notice in the Federal Register (56 FR 46411). On or after the date of publication of this notice in the Federal Register, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties, the following cash deposits for the subject merchandise.

Manufacturer/producer/exporter	Margin percentage
Eagle Star Textile Mills, Ltd	42.31
Sonar Cotton Mills (B.D.), Ltd	2.72
All Others	4.60

This notice constitutes the antidumping duty order with respect to shop towels from Bangladesh, pursuant to section 736(a) of the Act. Interested parties may contact the Central Records Unit, room B–099 of the Main Commerce Building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act and 19 CFR 353.21.

Dated: March 13, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Titanium Sponge From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On January 21, 1992, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on titanium sponge from Japan. We have now completed this review and found no dumping margins for either manufacturer/exporter during the period November 1, 1989 to Octooer 31, 1990.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Elizabeth Levy or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On January 21, 1992, the Department of Commerce (the Department) published in the Federal Register (57 FR 2251) the preliminary results of its administrative review of the antidumping duty order on titanium sponge from Japan (49 FR 47053; November 30, 1984). The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by the review are shipments of unwrought titanium sponge. Titanium sponge is a porous, brittle metal which has a high strength-to-weight ratio and is highly ductile. It is an intermediate product used to produce titanium ingots, slabs, billets, plates, and sheets. During the review period, such merchandise was classified under subheading 8108.10.50.10 of the Harmonized Tariff Schedule (HTS). The HTS number is provided for convenience and customs purposes. The written description remains dispositive.

The review covers two manufacturers/exporters to the United States of the subject merchandise, Showa Denko K.K. and Toho Titanium Co., Ltd. for the period November 1, 1989 through October 31, 1990.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

Final Results of Review

As a result of this review, we determine the dumping margin to be:

Manufacturer/exporter	Time period	Margin (percent)
Showa Denko K.K.; Toho Titanium Co., Ltd.	11/1/89–10/31/90 11/1/89–10/31/90	zero (0). zero (0).

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, the following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of the subject merchandise, entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed companies will be as outlined above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be zero percent. This rate represents the highest rate for any firm with shipments in these administrative reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Act, as amended (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: March 16, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Request for Public Comments on Bilateral Textile Consultations with the Government of Sri Lanka on Certain Cotton Textile Products

March 13, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing a limit.

EFFECTIVE DATE: March 24, 1992.

FOR FURTHER INFORMATION CONTACT: Kim-Bang Nguyen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343–6580. For information on embargoes and quota re-openings, call (202) 377–3715. For information on categories on which consultations have been requested, call (202) 377–3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On February 28, 1992, under the terms of the Bilateral Textile Agreement, effected by exchange of notes dated May 23 and 24, 1988, as amended, between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka, the United States Government requested consultations with the Government of the Democratic Socialist Republic of Sri Lanka with respect to cotton printcloth in Category 315.

According to the terms of the bilateral agreement, the Government of the United States has decided, pending a mutually satisfactory solution, to control imports in Category 315 exported during the period which began on February 28, 1992 and extends through June 30, 1992 at a level of 1,487,191 square meters.

A summary market statement concerning Category 315 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 315, under the agreement with the Government of the Democratic Socialist Republic of Sri Lanka, or to comment on domestic production or availability of products included in Category 315, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Category 315. Should such a solution be reached in consultations with the Government of the Democratic Socialist Republic of Sri Lanka, further notice will be published in the Federal Register.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Sri Lanka

Category 315—Cotton Printcloth

February 1992

Import Situation and Conclusion

U.S. imports of cotton printcloth fabric, Category 315, from Sri Lanka began in June 1991 and reached 3,774,140 square meters during June-December 1991. Sri Lanka is a new supplier of cotton printcloth fabric to the U.S. market. In the last seven months of 1991, Sri Lanka shipped an average of one-half million square meters of cotton printcloth fabric per month accounting for one percent of total Category 315 imports in 1991.

The sharp and substantial increase of Category 315 imports from Sri Lanka is

causing a real risk of disruption in the U.S. market for cotton printcloth fabric.

Import Penetration and Market Share

U.S. production of cotton printcloth fell to 292,937,000 square meters in 1990, 6 percent below the 1989 level and 24 percent below the 1988 level. Production continued downward in 1991, falling to 220,649,000 square meters during January-September 1991, 1 percent below the January-September 1990 level. In contrast, U.S. imports of Category 315 from all sources have been on the rise since 1988 reaching 351,309,387 square meters in 1991, an increase of 88 percent over the 1988 level.

The U.S. producers' share of the cotton printcloth market dropped 20 percentage points, falling from 67 percent in 1988 to 47 percent during January-September in 1991. The ratio of imports to domestic production more than doubled, increasing from 48 percent in 1988 to 113 percent during the Janaury-September 1991 period.

Duty-Paid Value and U.S. Producers' Price

All of Category 315 imports from Sri Lanka during 1991 entered the U.S. under HTSUSA number 5208.12.6060—85 percent or more by weight cotton unbleached printcloth of yarn numbers 43–68, weighing between 100 and 200 grams per square meter. These fabrics entered the U.S. at duty-paid landed values below U.S. producers' prices for comparable fabrics.

Committee for the Implementation of Textile Agreements

March 24, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1991; pursuant to the Bilateral Textile Agreement, effected by exchange of notes dated May 23 and 24, 1988, as amended, between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 24, 1992, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 315, produced or manufactured in Sri Lanka and exported during the period beginning on February 28, 1992 and extending through June 30, 1992, in excess of 1,487,191 square meters [1].

[1] The limit has not been adjusted to account for any imports exported after February 27, 1992.

Textile products in Category 315 which have been exported to the United States prior to February 28, 1992 shall not be subject to the limit established in this directive.

Textile products in Category 315 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List commodities and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: April 20, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On January 17 and 31, 1992 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (57 FR 2081 and 3750) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities and provide the services at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities or service to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities or service.

3. The action will result in authorizing small entities to furnish the commodities or service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities or service proposed for addition to the Procurement List.

Accordingly, the following commodities and services are hereby added to the Procurement List:

Commodities

Short-Run Printing, Books & Pamphlets
7690-00-NSH-0024
(Government Printing Office requirements for Fairchild Air Force Base, WA only)
Short-Run Printing, Flat Forms
7690-00-NSH-0025
(Government Printing Office requirements for Fairchild Air Force Base, WA only)

Service

Janitorial/Custodial
Air Traffic Control Tower
Airway Facilities Sector Field Office
Flight Service Station
Automated Flight Service Station,
Casper, Wyoming.

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

G. John Heyer,

General Counsel.

[FR Doc. 92-6538 Filed 3-19-92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed addition to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a service to be furnished by nonprofit agencies employing persons with severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 20, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the service to the Government.

2. The action will result in authorizing small entities to furnish the service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following service to the Procurement List:

Janitorial/Custodial, Federal Building,
Washington and Linden Streets,
Scranton, Pennsylvania.

G. John Heyer,

General Counsel.

[FR Doc. 92-6539 Filed 3-19-92; 8:45 am]

Procurement List; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 20, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity and services to the Procurement List:

Commodity

Chest, Tool
7310-00-310-8544

Services

Grounds Maintenance, U.S. Department of Energy, Southwestern Power Station, Battlefield and Golden, Springfield, Missouri
Sorting of Aperture Cards, EDCARS System Management Office (SMO), AFLC LMSC/SXMA, Wright-Patterson Air Force Base, Ohio
Sorting of Time and Attendance Reports, Department of Transportation, 1777 Phoenix Parkway Building, College Park, Georgia.

G. John Heyer,

General Counsel.

BILLING CODE 6820-33-M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: EVALUATION OF COMMISSIONING APPLICANTS: AF Form 1145; OMN No. 0701-0104.

Type of Request: Reinstatement.

Average Burden Hours/Minutes per Response: 20 Minutes.

Responses per Respondent: 1.

Number of Respondents: 3,500.

Annual Burden Hours: 1,167.

Annual Responses: 3,500.

Needs and Uses: This form is needed to support Air Force officer procurement programs. Air Force application processing activities and approval authorities use the form to select applicants (civilian and military) who apply for training leading to a commission.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer

for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington Virginia 22202-4302.

Dated: March 17, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Office of the Secretary

Defense Policy Board Task Force on the Future of American Nuclear Forces

ACTION: Notice of Task Force Meeting.

SUMMARY: The Defense Policy Board Task Force on the Future of American Nuclear Forces will meet in closed session on 8-9 April 1992 from 0800 to 1700 at the RDA Logicon Facility located at 6053 West Century Blvd, Los Angeles, California. The mission of the Task Force is to provide the Secretary of Defense, Deputy Secretary of Defense and the Under Secretary of Defense for Policy with independent, informed advice and opinion concerning matters relating to U.S. nuclear force policy. At the meeting the Task Force will hold classified discussions on national security matters.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended (5 U.S.C. app. II, (1982), it has been determined that this Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Dated: March 17, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Special Operations Policy Advisory Group; Meeting

The Special Operations Policy Advisory Group (SOPAG) will meet on Thursday, April 30, 1992 in the Pentagon, Arlington, Virginia to discuss sensitive, classified topics.

The mission of the SOPAG is to advise the Office of the Secretary of Defense on key policy issues related to the development and maintenance of effective Special Operations and Low-Intensity Conflict forces.

In accordance with section 10(d) of Public Law 92-463, the "Federal Advisory Committee Act," and section 552b(c)(1) of title 5, United States Code, this meeting will be closed to the public.

Dated: March 17, 1992.

L.M. Bynum,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

[FR Doc. 92-6527 Filed 3-19-92; 8:45 am]

BILLING CODE 3810-01-M

Department of the Air Force

USAF Scientific Advisory Board; Meeting

The USAF Scientific Advisory Board's Committee on Technology Options for Global Reach—Global Power: 1995-2020 (Mobility Panel) will meet on 6-7 April 1992, at Eglin AFB, FL, 8 a.m. to 5 p.m.

The purpose of this meeting is to receive briefings and gather information for the study.

The meeting will be closed to the public in accordance with section 552b(c) of title 5, United States Code, specifically subparagraphs (1) and (4) thereof.

For further information, contact the Scientific Advisory Board Secretariat at (703) 697-4811.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 92-6552 Filed 3-19-92; 8:45 am]

BILLING CODE 3910-01-M

Department of the Army

Notice of Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

Name of the Committee: Coastal Engineering Research Board.

Date of the Committee: April 7-9, 1992.

Place: Coastal Engineering Research Center, U.S. Army Engineer Waterways Experiment station, Vicksburg, Mississippi.

Time: 8:30 a.m. to 5 p.m. on April 7; 8:30 a.m. to 5 p.m. on April 8; 8:30 a.m. to 12 noon on April 9.

Proposed Agenda: The 1993 Coastal Engineering Program Review is to be held April 7-9, 1992. On Tuesday, April 7, the Coastal Research and Development Programs will be broken down into four breakout sessions. The four sessions will simultaneously review and discuss Coastal Flooding and Storm Protection; Harbor Entrances and Coastal Channels; Shore Protection and Restoration; and Coastal Structures Evaluation and Design. On Wednesday morning, April 8, a plenary session will discuss the Coastal Research and Development Programs and make recommendations. The Wednesday afternoon session will be devoted to the review of the Coastal Field Data Collection Program. Monitoring Complete Coastal Projects Program will be reviewed Thursday morning, April 9. There will be discussion of completed, current, and proposed activities.

This meeting is open to the public, but since seating capacity of the meeting room is limited, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

Inquiries and notice of intent to attend the meeting may be addressed to Dr. James R. Houston, Chief, Coastal Engineering Research Center, U.S. Army Engineer Waterays Experiment Station, 3909 Halls Ferry Road, Vicksburg, Mississippi 39180-6199.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92-6597 Filed 3-19-92; 8:45 am]

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Conduct of Employees; Notice of Waiver

Section 602(a) of the Department of Energy ("DOE") Organization Act (Pub. L. No. 95-91, hereinafter referred to as the "Act") prohibits a "supervisory employee" (defined by section 601(a) of the Act) of the Department from knowingly receiving compensation from, holding any official relation with, or having any pecuniary interest in any "energy concern" (defined by section 601(b) of the Act).

Section 602(c) of the Act authorizes the Secretary of Energy to waive the requirements of section 602(a) in cases of exceptional hardship or where the interest is a pension, insurance, or other similarly vested interest.

Mr. Charles F. Vacek has recently been appointed to the position of Deputy Assistant Secretary for Fuels Programs in the Office of the Assistant Secretary for Fossil Energy. As a result of his previous employment with the Pacific Gas and Electric Company, Mr. Vacek has a vested pension interest, within the meaning of section 602(c) of the Act, in the Pacific Gas and Electric Company Retirement Plan. Accordingly, I have granted Mr. Vacek a waiver of the divestiture requirement of section 602(a) of the Act for the duration of his employment as a supervisory employee with the Department with respect to this pension interest.

In accordance with section 208, title 18, United States Code, Mr. Vacek has been directed not to participate personally and substantially, as a Government employee, in any particular matter the outcome of which could have a direct and predictable effect upon the Pacific Gas and Electric Company, unless his supervisor and the Counselor agree that the financial interest in the particular matter is not so substantial as to be deemed likely to affect the integrity of the services which the Government may expect of him.

Dated: March 9, 1992.

James D. Watkins,

Admiral, U.S. Navy (Retired), Secretary of Energy.

BILLING CODE 6450-01-M

Intent To Prepare an Environmental Impact Statement for the Upgrade of Canyon Exhaust Systems at the Savannah River Site

AGENCY: Department of Energy (DOE).

ACTION: Notice of intent to prepare an environmental impact statement (EIS) for the Upgrade of Canyon Exhaust Systems at the Savannah River Site.

SUMMARY: The DOE announces its intent to prepare an EIS pursuant to the National Environmental Protection Act (NEPA) of 1969 (42 U.S.C. 4321, *et seq.*), as amended, for the proposed Upgrade of Canyon Exhaust Systems at the Savannah River Site (SRS). The DOE will conduct public scoping meetings to solicit input on the scope of the EIS. The proposed action is to replace and upgrade the existing canyon exhaust systems for the F- and H-Areas at the Savannah River Site (SRS). The underlying need for the proposed action is to ensure occupational safety, environmental protection, and regulatory compliance for activities within the F- and H-Areas. The canyon exhaust systems are the primary of control of radioactive and hazardous materials from the F- and H-Areas. These systems must provide constant and adequate airflow through the canyons. The EIS will consider reasonable alternatives to the proposed replacement and upgrade of the existing systems, including leaving the systems as they exist.

INVITATION TO COMMENT: To ensure that the full range of issues related to this proposal are addressed, comments on the proposed scope of the EIS are invited from all interested parties. Written comments or suggestions to assist DOE in identifying significant environmental issues and the appropriate scope of the EIS should be directed to Mr. Stephen R. Wright at the address indicated below and should be postmarked by April 30, 1992. Comments postmarked after that date will be considered to the extent practicable. Agencies, organizations, and the general public are also invited to present oral comments or suggestions pertinent to the preparation of this EIS at the public scoping meetings scheduled as indicated below. Written comments will also be accepted at the meetings. Written and oral comments will be given equal weight in the scoping process. Comments and suggestions received during the scoping period will be considered in preparing the draft EIS.

Following the completion of the public scoping process, an EIS Implementation Plan will be prepared and made available, upon request, to the public. The Implementation Plan will record the results of the scoping process and define the alternatives and issues to be evaluated in the EIS. A draft EIS is expected to be completed in November 1992, at which time its availability will be announced in the **Federal Register**, and public comments will again be solicited. Comments on the draft EIS will be considered in preparing the final EIS, tentatively scheduled for completion in May 1993.

ADDRESSES: Written comments or suggestions on the scope of the EIS, requests to speak at the public scoping meetings, questions concerning the proposed action, and requests to receive a copy of the Implementation Plan or the draft EIS should be directed to: Mr. Stephen R. Wright, U.S. Department of Energy, Savannah River Field Office, P.O. Box A, Aiken, South Carolina 29802 (803) 725-3957. All written correspondence related to this activity should have the envelopes marked: "Upgrade Canyon Exhaust Systems EIS."

FOR FURTHER INFORMATION CONTACT: For general information on the DOE NEPA process, please contact: Ms. Carol M. Borgstrom, EH-25, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-4600 or (800) 472-2756.

DATES: Written comments and suggestions on the proposed scope of the EIS should be postmarked by April 30, 1992, to assure consideration in the preparation of the EIS. Comments postmarked after that date will be considered to the extent practicable.

SUPPLEMENTARY INFORMATION:

Background Information

The Savannah River Site (SRS) occupies an area of approximately 300 square miles adjacent to the Savannah River, principally in Aiken and Barnwell counties of South Carolina. The site is approximately 25 miles southeast of Augusta, Georgia, and 20 miles south of Aiken, South Carolina. The primary mission of the SRS is to produce nuclear materials that support the defense, research, and medical programs of the United States. Included in the production process are fuel and target fabrication facilities, nuclear production reactors, separations facilities, product preparation facilities, and waste management facilities. The separations facilities are located in two areas: F-Area and H-Area. Each area contains a large chemical separation plant (approximately 800 feet long×120 feet wide×50 feet high), also known as "canyon," which is involved with the recovery and purification of the desired nuclear materials. Plutonium and uranium are the principal materials processed in the canyons.

The canyon exhaust systems must maintain a differential pressure between the canyons and the atmosphere, and among facilities within the canyons. The exhaust systems also provide for constant and adequate airflow to allow a margin of safety in the event of accidents, equipment failures, or natural disasters. The exhaust systems must be reliable to provide continuous contamination control and environmental protection. The EIS will address the potential environmental impacts of proposed replacement and upgrades to the canyon exhaust systems.

Reliable canyon exhaust systems are needed to contain and control atmospheric emissions of radioactive and hazardous materials and contaminants, whether the canyon buildings operate, are in standby, or undergo decontamination and decommissioning. The interiors of the canyon facilities have become contaminated with radionuclides, due to the nature of past operations. Controlled airflow/ventilation, which is provided by the exhaust systems, is necessary to assure that air existing the canyon facilities is properly filtered before release to the atmosphere. Without the exhaust systems, natural airflow migration could lead to uncontrolled and unmonitored of radionuclides or hazardous material.

The current canyon exhaust systems have been operating for more than twenty years. During this time several additions to the canyons have reduced the reserve capacity of the exhaust systems. The exhaust systems are old, airflow requirements exceed the systems' design capacity, and

continuous operational availability is becoming increasingly suspect. The proposed upgrade would restore the original proportional reserve capacity and thus improve operational safety margins relative to current operations.

Although the current exhaust systems remain operable and are still capable of maintaining safe facility conditions, the reliability of the systems is degrading and becoming increasingly uncertain. Maintaining the existing systems is increasingly difficult, and continued maintenance may not be sufficient to assure proper airflows and controls.

Proposed Action

The proposed action is to construct new exhaust systems to replace and upgrade existing systems in both F- and H-Areas. This proposed action would include provision of new fan-houses, exhaust fans, exhaust stacks, exhaust monitoring instrumentation, underground ductwork, redundant utility power supplies with redundant emergency diesel generator backup, and fire protection and security systems. Safety class diesel fuel storage and transfer facilities would be provided for the generators. The proposed action would also include decontamination and disposal of existing exhaust systems components.

Replacing and upgrading the existing canyon exhaust systems would enhance DOE's ability to provide a margin of safety and environmental protection during either production of nuclear materials or decommissioning and decontamination (D&D) of the canyons. The replacement and upgrade of the canyon exhaust systems would not otherwise extend the production life of the canyons or influence rates of production, but would increase the safety of the canyons, whether operating or not.

The proposed project would help SRS to meet or maintain:

—Safety class system requirements contained in DOE Order 6430.1A for the new equipment;
—Environmental monitoring capabilities and requirements as contained in the DOE Order 5400 Series;
—Design requirements related to the SRS design-basis accident as contained in UCRL–159110.

The proposed action involves facilities that would be part of an EIS to be prepared for the Continuing Operation of the Nuclear Fuel Cycle and Product Preparation Facilities at the Savannah River. Site. Preparation of the continuing operations EIS was a commitment that DOE made in the Final EIS for Continued Operation of K-, L-, and P-Reactors, page C–316. However, the proposed Upgrade of Canyon Exhaust Systems complies with the criteria of § 1506.1(c) of the Council on Environmental Quality Regulations (40 CFR 1506.1(c)) for a permissible interim action. As noted above, the proposed replacement and upgrade of the canyon exhaust systems is needed to assure continuous operation with an adequate margin of safety to ensure environmental protection in the event of accident or abnormal events.

Furthermore, the proposed action would not prejudice any decision to be made from the Continuing Operation of the Nuclear Fuel Cycle and Product Preparation Facilities EIS, because the upgrade would be necessary whether the canyons operate, are in stand-by mode, or undergo decontamination and decommissioning. Upon completion of the EIS that is the subject of this NOI, the proposed action will be accompanied by an adequate EIS. For similar reasons, the proposed action is a permissible interim action during preparation of the Programmatic EIS for the Reconfiguration of the Nuclear Weapons Complex.

Alternative Proposed for Consideration

Several alternatives to the proposed action are proposed for consideration in the EIS:

(1) The refurbishment, as needed in whole or in part, of the existing facilities to meet the original ventilation system design margin of safety and implementation of DOE safety goals.

(2) Refurbishment of certain components and replacement and upgrade of other components of the exhaust systems (details of this alternative are to be developed during the scoping process).

(3) As required by the Council on Environmental Quality (CEQ) NEPA regulations, 40 CFR 1500, the EIS will also analyze the "no-action" alternative (i.e., no upgrade or replacement of the canyon exhaust systems).

The EIS will include a comparative assessment of the environmental impacts of each alternative.

Identification of Environmental and Other Issues

The following issues have been tentatively identified for analysis in the EIS. This list of issues is presented to facilitate discussion on the scope of the EIS and is not intended to be all-inclusive or to predetermine the scope. Additions to or deletions from this list may occur as a result of the scoping process. In accordance with CEQ NEPA regulations (40 CFR 1500.4 and 1502.21), other environmental documents, as appropriate, may be incorporated by reference, in whole or in part, into these impact analyses. The EIS will address the environmental impacts of the proposed action and alternatives under both normal and accidental conditions. Therefore, DOE invites comments on these and additional issues relevant to the EIS.

Environmental Issues

1. Public and Worker Safety and Health Risks—Radiological and non-radiological impacts of construction, routine operation, and potential accidents.

2. Ecosystem Effects—Potential effects on ecosystems, including air and water quality, resulting from radiological and non-radiological emissions from routine operation and potential accidents.

3. Regulatory Compliance—Compliance with all applicable Federal, state, and local statutes and regulations; required Federal and state environmental consultations and notifications; and DOE Orders related to environmental protection and safety.

4. Waste Management—Impacts of the generation, treatment, storage, and disposal of high- and low-level radioactive waste, transuranic radioactive wastes, hazardous wastes, and mixed wastes.

5. Socioeconomics—Socioeconomic impacts, primarily on the six-county region identified in the data base report entitled Socioeconomic Characteristics of Selected Counties and Communities Adjacent to the Savannah River Site, dated January 1990.

6. Transportation—Impacts of the transportation of raw materials, supplies, equipment, products, and wastes under routine and accident scenarios.

7. Decontamination and Disposal—The environmental impacts of decontaminating and disposing of existing exhaust system components as they are removed from service. These components may include two 200 ft. stacks, canyon exhaust fans, process vessel vent fans, associated underground ducts, diesel generators and generator building, and electrical gear. The radioactive waste and the special considerations in the decontamination and disposing of the exhaust system components may contribute to the issues of public and worker safety, air quality, regulatory compliance, waste management, and transportation. The environmental impacts of future decontamination and disposal of the proposed canyon exhaust system upgrades will also be discussed.

Related Documentation

Background information on the proposed action is available in the public reading rooms listed later in this notice. The background information includes the following:

DOE, 1987. Final Environmental Impact Statement, Waste Management Activities for Groundwater Protection, Savannah River Plant, Aiken, South Carolina, DOE/EIS–0120, Savannah River Operations Office, Aiken, South Carolina.

DOE, 1990. Final Environmental Impact Statement, Continued Operation of K-, L-, and P-Reactors, Savannah River Site, Aiken, South Carolina, DOE/EIS–0147, Savannah River Operations Office, Aiken, South Carolina.

E. I. du Pont de Nemours and Company, 1986. Safety Analysis, 200 Area, Savannah River Plant, F-Canyon Operations, DPSTSA-200-10, Supp. 4, Savannah River Laboratory, Aiken, South Carolina.

E. I. du Pont de Nemours and Company, 1986. Safety Analysis, 200 Area, Savannah River Plant, H-Canyon Operations, DPSTSA-200-10, Supp. 5, Savannah River Laboratory, Aiken, South Carolina.

Westinghouse Savannah River Company, 1990. Savannah River Site Environmental Report for 1989, WSRC-TM-90-60, Environmental Protection Department, Savannah River Site, Aiken, South Carolina.

Scoping Meetings

In addition to receiving written comments, DOE will conduct public scoping meetings to assist DOE in defining the appropriate scope of the EIS and identifying significant environmental issues to be addressed. Public scoping meetings will be held at the following locations:

(1) Columbia, South Carolina, on April 21, 1992, at the Holiday Inn-Express, 773 St. Andrews Road, Columbia, South Carolina 29210; for accommodations call (803) 772–7275.

(2) Savannah, Georgia, on April 24, 1992, at the Hyatt Regency, 2 West Bay Street, Savannah, Georgia 31401; for accommodations call (800) 233-1234.

(3) Aiken, South Carolina, on April 28, 1992, at the Aiken Municipal Center, 214 Park Avenue, SW., Aiken, South Carolina 29801; accommodations at Comfort Suites, Richland Avenue West, Aiken, South Carolina, call (803) 641–1100.

Each public scoping meeting will consist of both a morning session beginning at 9 a.m. and an evening session beginning at 6 p.m. The public scoping process begins with this announcement, and will continue through April 30, 1992.

The public is invited to present oral and written comments concerning the scope of the EIS, including (1) the issues that should be addressed, and (2) the alternatives to be analyzed in the EIS.

Oral and written comments will be given equal consideration. Instructions for submitting written comments are given above. People desiring to speak at the public scoping meetings should submit their requests to Mr. Stephen R. Wright at the address presented above. Oral presentation requests for each meeting should be received by DOE at least 2 days before the meeting.

The meetings will be chaired by a presiding officer. They will not be conducted as evidentiary hearings. To give everyone an adequate opportunity to speak, 5 minutes will be allotted to each speaker. Depending on the number of persons requesting to speak, the presiding officer, at his/her discretion, may allow a longer time for speakers representing multiple parties or organizations. Persons wishing to speak on behalf of organizations should identify the organization in their request to speak. Persons who have not submitted a request to speak may register at the meetings.

DOE will make a transcript of each meeting. Copies will be made available for inspection at the DOE Freedom of Information Reading Room, room 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6020 and at the DOE Reading Room, University of South Carolina, Aiken Campus, University Library, 2nd Floor, 171 University Parkway, Aiken, SC 29801, (803) 648–6851 during business hours, Monday through Friday.

Signed in Washington, DC, this 11th day of March, 1992, for the United States Department of Energy.

Paul L. Ziemer,

Assistant Secretary, Environment, Safety and Health.

[FR Doc. 92–6558 Filed 3–19–92; 8:45 am]

BILLING CODE 6450–01–M

Energy International Corp.; Financial Assistance Award Intent To Award a Grant

AGENCY: Department of Energy.

ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy (DOE) announces that pursuant to 10 CFR 600.6(a)(2), it is making a financial assistance award based on an unsolicited application satisfying the criteria of 10 CFR 600.14(e)(1). This award will be made under Grant Number DE–FG01–92FE62585 to the Energy International Corporation. The financial assistance will provide partial support of a "Feasibility Study for the Commercial Application of Underground Coal Gasification to the Waikato Coal Resource in New Zealand." This study will foster development of international coal technology trade opportunities for U.S. industry, and further enhance the competitiveness of American firms in the world marketplace.

SCOPE: The grant will provide $200,000 in funding to the Energy International Corporation to determine the feasibility of using the Underground Coal Gasification (UCG) technology in Waikato, N.Z. This study will involve: (1) The development of an environmental compliance plan, (2) Obtaining the geotechnical data and samples required to verify the suitability of the Huntly resource for the UCG process and, (3) Identification of design modifications required by the power station to properly handle and combust the raw UCG product gas.

ELIGIBILITY: Based on the receipt of an unsolicited proposal, eligibility for this award is being limited to Energy International Corporation. DOE support of this activity would enhance the public benefits to be derived. DOE knows of no other entity which is conducting or planning such a program.

The term of the grant shall be until February 28, 1993.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, ATTN: James F. Thompson, 1000 Independence Avenue, SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Operations Division "B", Office of Placement and Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. QF92–42–000, et al.]

Oyster Creek Limited, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Oyster Creek Limited

[Docket No. QF92-42-000]

March 10, 1992.

On March 5, 1992, Oyster Creek Limited tendered for filing an amendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment provides additional information pertaining to the ownership structure of the proposed cogeneration facility.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Southern Company Services, Inc.

[Docket No. ER92-153-000]

March 10, 1992.

Take notice that on March 2, 1992, Southern Company Services, Inc., acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company, tendered for filing supplemental information in connection with Amendment No 2 dated October 31, 1991 to the Southern Company System Intercompany Interchange Contract and Allocation Methodology and Periodic Rate Computation Manual ("Manual").

Southern Companies request that the amendment be allowed to become effective on January 1, 1992. The supplemental filing contains additional information regarding the revisions incorporated in Amendment No. 2.

Comment date: March 16, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Nevada Cogeneration Associates #1

[Docket No. QF90-210-003]

March 10, 1992.

On February 28, 1992, Nevada Cogeneration Associates #1 (Applicant) of 420 N. Nellis Boulevard, #A3-148, Las Vegas, Nevada 89110, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is presently certified for 85 MW [53 FERC ¶ 62,021 (1990)]. The instant recertification is requested to reflect a change in the ownership structure and a change in the installation date. Under the proposed ownership structure Portland General Electric Company will have an indirect ownership interest in the facility. The construction of the facility began in the Spring of 1991.

Comment date: 30 days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

4. Iowa-Illinois Gas and Electric Co.

[Docket No. ES92-33-000]

March 11, 1992.

Take notice that on March 6, 1992, Iowa-Illinois Gas and Electric Company filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authority to issue from time to time not more than $100 million of unsecured short-term debt with a final maturity date no later than June 30, 1993.

Comment date: April 3, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Wisconsin Public Service Corp.

[Docket No. ER92-350-000]

March 13, 1992.

Take notice that Wisconsin Public Service Corporation (WPSC) on March 6, 1992, tendered for filing (1) an executed Limited Term Capacity Agreement with the Marshfield Electric and Water Department, Wood County, Wisconsin (MEWD); and (2) an executed Service Agreement for MWD under WPSC's W-2 Partial Requirements Tariff. The parties propose to make these agreements effective as of April 1, 1992, and therefore ask for waiver of the 60-day notice requirements.

WPSC states that copies of this filing have been served upon MEWD and the Public Service Commission of Wisconsin.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. PacifiCorp Electric Operations

[Docket No. ER92-265-000]

March 13, 1992.

Take notice that PacifiCorp Electric Operations (PacifiCorp) on March 4, 1992, tendered for filing an amendment to its filing under FERC Docket No. ER92-265-000.

Copies of this compliance filing were supplied to Pacific Gas and Electric Company, Southern California Edison Company, the Public Utility Commission of Oregon, the Utah Public Service Commission and the Public Utilities Commission of the State of California.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Pennsylvania Power & Light Co.

[Docket No. ER92-357-000]

March 13, 1992.

Take notice that Pennsylvania Power & Light Company (PP&L) tendered for filing on March 6, 1992 for filing an executed agreement dated as of February 27, 1992 (Second Supplemental Agreement), between PP&L and Niagara Mohawk Power Corporation (Niagara Mohawk). PP&L and Niagara Mohawk are parties to the Electric Output Sales Agreement between PP&L and Niagara Mohawk dated as of July 11, 1989 (Basic Agreement), as amended by the First Supplement to the Electric Output Sales Agreement dated as of December 27, 1989, on file with the Commission as Rate Schedule No: 76. At present, the Basic Agreement, as amended, provides that Niagara Mohawk may reserve capability and energy from PP&L's Martin's Creek Units 3 and 4. PP&L states that the Second Supplemental Agreement provides for the addition of PP&L's Martin Creek Units 1 and 2 to the PP&L generating units from which Niagara Mohawk may reserve capability and energy.

PP&L requests waiver of the notice requirements of section 205 of the Federal Power Act and § 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective as of March 9, 1991. Initial service under the Second Supplemental Agreement will not begin before the requested effective date.

PP&L states that a copy of its filing was served on Niagara Mohawk, the Pennsylvania Public Utility Commission and the New York Public Service Commission.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. PacifiCorp Electric Operations

[Docket No. ER92-350-000]

March 13, 1992.

Take notice that on March 9, 1992, PacifiCorp Electric Operations (PacifiCorp) tendered for filing, in accordance with 18 CFR 35.13 of the Commission's Rules and Regulations a Power Sales Agreement between PacifiCorp and Nevada Power Company dated February 28, 1992.

Copies of this filing have been supplied to Nevada Power Company, the Public Service Commission of Nevada, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment Date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. San Diego Gas & Electric Co.

[Docket No. ER92-344-000]

March 13, 1992.

Take notice that on March 2, 1992, San Diego Gas & Electric Company (SDG&E) tendered for filing a change of rates for transmission service as embodied in the following SDG&E Agreements with Southern California Edison Company (Edison), which reflects a decrease in the rate of return authorized by the California Public Utilities Commission (CPUC) to 10.75% from 10.91% for 1991, effective January 1, 1992.

1. Short Term Firm Transmission Service Agreement, Rate Schedule FERC 58;

2. Interruptible Transmission Service Agreement, Rate Schedule FERC 59; and

3. Firm Transmission Service Agreement, Rate Schedule FERC 60.

SD&G requests waiver of the Commission's prior notice requirements and an effective date of January 1, 1992.

Copies of this filing were served upon the Public Utilities Commission of the State of California and Edison.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Montaup Electric Co.

[Docket No. ER92-91-000]

March 13, 1992.

Take notice that on March 9, 1992, Montaup Electric Company tendered for filing an amendment to its October 7, 1991 filing in the above-referenced docket.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Northern States Power Co.

[Docket No. ER90-527-006]

March 13, 1992.

Take notice that on March 6, 1992, Northern States Power Company (NSP) tendered for filing its refund report in this docket pursuant to the Commission's order issued on February 6, 1992.

Comment Date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. New England Power Co.

[Docket No. ER92-335-000]

March 13, 1992.

Take notice that on February 28, 1992, New England Power Company (NEP) submitted for filing revisions to its FERC Electric Tariff, Original Volume No. 5—System Energy Sales and Exchange under that tariff more flexibility in entering into the covered transactions by (i) permitting the buyer to dispatch energy purchased thereunder, and (ii) permitting the buyer under an Exchange transaction to provide system capacity in lieu of specified unit entitlements. NEP requests that these changes be made effective April 26, 1992.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

13. The Kansas Power and Light Co.

[Docket No. ER92-245-000]

March 13, 1992.

Take notice that on March 5, 1992, The Kansas Power and Light Company (KPL) tendered for filing revised service schedules to KPL's Electric Interconnection Contract with Omaha Public Power District.

Copies of this filing were served upon Omaha Public Power District and the Utilities Division of the Kansas Corporation Commission.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Pacific Gas & Electric Co.

[Docket No. ER91-337-001]

March 13, 1992.

Take notice that Pacific Gas & Electric Company (PG&E) on February 3, 1992 tendered for filing its compliance refund report in the above-referenced docket.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Public Service Electric and Gas Co.

[Docket No. ER91-567-000]

March 13, 1992.

Take notice that on September 25, 1991, Public Service Electric and Gas Company (PSE&G) of Newark, New Jersey tendered for filing an initial Rate Schedule for the sale of energy to Long Island Lighting Company (LILCO). Pursuant to the agreement, PS&EG commenced selling on August 1, 1991 and will sell to LILCO energy from time to time as scheduled by LILCO.

In response to discussions with Commission Staff, PSE&G on March 5, 1992 tendered for filing the First Supplemental Agreement by and between Public Service Electric and Gas Company and Long Island Lighting Company which amends the methodology to develop the maximum reservation rate (CAP).

PSE&G requests the Commission to waive its notice requirements under § 35.3 of its rules and to permit the Energy Sales Agreement, as supplemented, to become effective as of the commencement of the transaction, August 1, 1991. Copies of the amended filing have been served upon LILCO.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

16. Blue Ridge Power Agency Central Virginia Electric Cooperative, Inc. and Craig-Botetourt Electric Cooperative, Inc. v. Appalachian Power Co.

[Docket No. EL89-53-004 and Docket Nos. ER90-132-002 and ER90-133-002]

March 13, 1992.

Take notice that on March 6, 1992, Appalachian Power Company (APCo) tendered its compliance filing in the above-referenced dockets, in compliance with the Commission's February 20, 1992 Opinion and Order on Rehearing, which modified, in part, the Commission's June 28, 1991 Opinion and Order of Initial Decision and its October 24, 1991 Opinion and Order on Rehearing.

Copies of the filing were served upon APCo's jurisdictional customers, the Virginia State Corporation Commission, the Public Service Commission of West Virginia, the Tennessee Public Service Commission and all parties of record.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

17. Nevada Cogeneration Associates #1)

[Docket No. QF90-210-003]

March 13, 1992.

On March 10 and 11, 1992, Nevada Cogeneration Associates #1 (Applicant) tendered for filing amendments to its filing in this docket.

The amendments provide additional information pertaining to the ownership structure of its cogeneration facility. No determination has been made that the submittal constitutes a complete filing.

Comment date: April 1, 1992, in accordance with Standard Paragraph E at the end of this notice.

18. Hadson Power 13—Hopewell

[Docket No. QF88-85-003]

March 13, 1992.

On March 9, 1992, Hadson Power 13—Hopewell of 2030 Main Street, Irvine, California 92714, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to Section 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in Hopewell, Virginia. The Commission previously certified the facility as a qualifying cogeneration facility, *Ultra Cogen Systems, Inc.*, 43 FERC ¶ 62,103 (1988), and recertified the facility as a qualifying cogeneration

facility, *Hadson Power 13—Hopewell*, 53 FERC 62, 208 (1990). The instant request for recertification is due to change in ownership and increase in maximum net electric power production capacity from 60.147 MW to 62.7 MW.

Comment date: 30 days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

19. Hadson Power 11—Southampton

[Docket No. QF88-84-003]

March 13, 1992.

On March 9, 1992, Hadson Power 11—Southampton, tendered for filing an amendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment provides additional information pertaining to ownership structure of the facility.

Comment date: April 3, 1992, in accordance with Standard Paragraph E at the end of this notice.

20. Hadson Power 12—Altavista

[Docket No. QF88-94-003]

March 13, 1992.

On March 9, 1992, Hadson Power 12—Altavista, tendered for filing an amendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment provides additional information pertaining to ownership structure of the facility.

Comment date: April 3, 1992, in accordance with Standard Paragraph E at the end of this notice.

21. Westmoreland—Hadson Partners)

[Docket No. QF90-147-002]

March 13, 1992.

On March 9, 1992, Westmoreland—Hadson Partners, c/o Westmoreland Energy, Inc., 2955 Ivy Road, Charlottesville, Virginia 22901, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Weldon Township, near Roanoke Rapids, North Carolina. The Commission previously certified the facility as a qualifying cogeneration facility, *Westmoreland—Hadson Partners*, 52 FERC ¶ 62,001 (1990). The instant request for recertification is due to change in ownership of partnership.

Comment date: 30 days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6499 Filed 3-19-92; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 9635-006, et al.]

Hydroelectric Applications [Clarence A. and Lottie E. Hawkins and Hawkins Hydro Co., et al.]; Applications

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1. a. *Type of Application:* Surrender of License.
b. *Project No.:* 9635-006.
c. *Date Filed:* February 11, 1992.
d. *Applicant:* Clarence A. and Lottie E. Hawkins and Hawkins Hydro Company.
e. *Name of Project:* Hawkins Hydro
f. *Location:* On Dirty George and Camp Creeks, partially on lands of the United States administered by the Bureau of Land Management in Delta County, Colorado.
g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)—825(r).
h. *Applicant Contact:* Mrs. Clarence A. Hawkins, 1824-2025 Road Eckert, CO 81418.
i. *Commission Contact:* Mr. James Hunter (202) 219-2839.
j. *Comment Date:* April 16, 1992.
k. *Description of Proposed Action:* The licensees request surrender of their license, stating that their water supply has changed completely and because the electric company that agreed to buy the power has had severe financial problems, they have no market for the power. The project would have utilized an existing dam on Dirty George Creek and an irrigation ditch, and would have also consisted of an intake on the irrigation ditch, a 9, 200-foot-long penstock connecting to a powerhouse containing a 650-kW generating unit, and a tailrace discharging into Camp Creek.
l. *This notice also consists of the following standard paragraphs:* B, C, and D2.

2. a. *Type of Application:* Preliminary Permit.
b. *Project No.:* 11200-000.
c. *Date Filed:* November 1, 1991.
d. *Applicant:* City of Boulder, Colorado.
e. *Name of Project:* Boulder Hydrolectric Development IV.
f. *Location:* At the terminus of the applicant's existing Silver Lake Raw Water Pipeline near the city of Boulder in Boulder County, Colorado.
g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)—825(r).
h. *Applicant Contact:* Eva June Busse, P.E., Hydro Projects Manager, City of Boulder, P.O. Box 791, Boulder, Colorado 80306 (303) 441-3200.
i. *FERC Contact:* Mr. Michael Strzelecki, (202) 219-2827.
j. *Comment Date:* April 23, 1992.
k. *Description of Project:* The proposed project would consist of: (1) The applicant's existing diversion structure and intake on Boulder Creek; (2) the applicant's existing 18-inch-diameter, 18,000-foot-long Silver Lake Raw Water Pipeline; (3) a powerhouse containing one generating unit with an installed capacity of 2,790 kW; (4) a 1,000-foot-long transmission line interconnecting with an existing Public Service Company of Colorado transmission line; and (5) appurtenant facilites.

No new access roads will be needed to conduct the studies. The approximate cost of the studies would be $90,000.
l. *This notice also consists of the following standard paragraphs:* A5, A7, A9, A10, B, C, and D2.

3. a. *Type of Application:* Preliminary Permit.
b. *Project No.:* 11220-000.
c. *Date filed:* January 6, 1992.
d. *Applicant:* Seneca Hydro Acquisition Corporation.
e. *Name of Project:* Edward Falls.
f. *Location:* On Limestone Creek at Edward Falls, in the Town of Manlius, Onondaga County, New York.
g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)—825(r).
h. *Applicant contact:* Paul V. Nolan, Esquire, 6219 North 19th Street, Arlington, VA 22205 (703) 534-5509.

i. *FERC Contact:* Mary Golato (202) 219-2804.
j. *Comment Date:* April 23, 1992.
k. *Competing Application:* Project No. 11202-000, Date Filed: November 7, 1991.
l. *Description of Project:* The proposed project would consist of the following facilities: (a) an existing 350-foot-long and 24-foot-high dam; (2) an existing reservoir having a surface area of 3.5 acres; (3) a 4.5-diameter and 730-foot-long penstock; (4) a proposed powerhouse containing two generating units having a total installed capacity of 800 kilowatts; (5) an existing 330-foot-long, 13.2-kilovolt transmission line; and (6) appurtenant facilities. The dam is owned by Enders Road Developent Corporation and the average annual generation is 3.0212 gigawatthours. The applicant expects the cost of the studies to be $150,000.00.
m. *This notice also consists of the following standard paragraphs:* A8, A10, B, C, and D2.

4. a. *Type of Application:* Preliminary Permit.
b. *Project No.:* 11223-000.
c. *Date filed:* January 13, 1992.
d. *Applicant:* L&D 24 Hydro Associates.
e. *Name of Project:* L&D 24 Hydroelectric Project.
f *Location:* On the Mississippi River, near Clarksville, Pike County, Missouri and Calhoun County, Illinois.
g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)—825(r).
h. *Applicant Contact:* L&D 24 Hydro Associates, c/o Louis Rosenman, Suite 1200, 1875 Connecticut Ave., NW., Washington, DC 20009, (202) 986-8138.
i. *FERC Contact:* Mary Golato (dt) (202) 219-2804.
j. *Comment Date:* April 23, 1992.
k. *Description of Project:* The proposed project would utilize the existing U.S. Corps of Engineers Lock and Dam 24 and would consist of: (a) a proposed powerhouse containing four 7.5 meter pit-type units at a total installed capacity of 50 megawatts; and (b) existing transmission lines. The project would have an average annual generation of 245,000,000 kilowatthours. The applicant estimates that the cost of the studies will be approximately $250,000.
l. *This notice also consists of the following standard paragraphs:* A3, A5, A7, A9, A10, B, C, and D2.

5. a. *Type of Application:* Preliminary Permit.
b. *Project No.:* 11224-000.

i. *Comment Date:* May 6, 1992.
j. *Description of Project:* Each of the following projects is in competition for the site as noted.

P-11229 competes with P-11182. The project would consist of (1) a 13-foot-high concrete diversion dam on Summit Creek; (2) a 10-foot-high diversion dam on Carlton Creek; (3) 10-foot-diameter, 2,500-foot-long tunnel between the diversions; (4) a 10-foot-diameter, 14,000-foot-long tunnel to the powerhouse; (5) a powerhouse containing a generating unit with a capacity of 19 MW and an average annual generation of 72.3 GWh; (6) a 10-mile-long transmission line; and (7) three access roads, one 1,500 feet long to the powerhouse, one 1,000 feet long to the Summit Creek diversion, and one 1,200 feet long to the Carlton Creek diversion. Township 14 N. Range 10 E, and Sections 10, 11, 14, 15, 16, 17 and 20.

P-11230 competes with P-11183. The project would consist of (1) a 13-foot-high concrete diversion dam on Clear Fork Cowlitz River; (2) a 10-foot-high diversion dam on Cortright Creek; (3) a 10-foot-high diversion dam on Dam Creek; (4) 10-foot-diameter, 6,500-foot-long tunnel between the diversions on Cortright and Dam Creeks; (5) a 10-foot-diameter, 17,000-foot-long main tunnel to the powerhouse; (5) a powerhouse containing a generating unit with a capacity of 30.5 MW and an average annual generation of 128.5 GWh; (6) a 7-mile-long transmission line; and (7) four access roads, one 1,000 feet long to the powerhouse, one 3,000 feet long on the main stem, one 1,810 feet long to the Cortright Creek diversion, and one 400 feet long to the Dam Creek diversion. Township 14 N. Range 10 E. and Sections 22, 26, 27, 28, and 29.

P-11231 competes with P-11184. The project would consist of (1) a 10-foot-high diversion dam on Coal Creek; (2) a 5-foot-high diversion dam on Lost Creek; (3) 38-inch-diamter, 1,000-foot-long penstock between the diversions; (4) a 38-inch-diameter, 16,000-foot-long penstock to the powerhouse; (5) a powerhouse containing a generating unit with a capacity of 5.5 MW and an average annual generation of 21.2 GWh; (6) a 5-mile-long transmission line; and (7) two access roads, one 1,000 feet long to the powerhouse, and one along the penstock route. Township 13 N. Range 10 E. and Sections 6, 7, 8, 9, and 16.

P-11232 competes with P-11185. The project would consists of: (1) a 13-foot-high diversion dam on Johnson Creek; (2) a 10-foot-high diversion dam on Smith Creek; (3) 10-foot-diameter, 21,500-foot-long tunnel will connect the diversions to the powerhouse; (4) a powerhouse containing a generating unit with a capacity of 23.2 MW and an average annual generation of 85.2 GWh; (5) a 3-mile-long Transmission line; and (6) two access roads, one 5,030 feet long to the Smith Creek diversion, and one 500 feet long to the Johnson Creek diversion Township 13 N, Range 9 E, and Sections 32 and 33, and Township 12 N, Range 9 E Sections 4, 9, 10, 11, and 12.

P-11233 competes with P-11186. The project would consist of: (1) a 13-foot-high diversion dam on Butter Creek; (2) 4.5-foot-diameter, 14,000-foot-long penstock; (3) a powerhouse containing a generating unit with a capacity of 7.2 MW and an average annual generation of 28.4 GWh; (4) a 2.5-mile-long transmission line; and (5) two access roads, one 2,210 feet long to the powerhouse and one 2,100 feet long to the Butter Creek diversion. Township 14

N, Range 9 E, Sections 28 and 33, and Township 13 N, Range 9 E Sections 3, 4, 9, and 10.

P–11234 competes with P–11187. The project would consist of two developments. The upper development will consist of: (1) a 10-foot-high diversion dam on upper Williame Creek; (2) 3.5-foot-diameter, 5,000-foot-long penstock; (3) a powerhouse containing a generating unit with a capacity of 2.9 MW; and (4) two access roads, one 1,700 fleet long to the powerhouse, and one 3,000 feet long to the upper diversion.

The lower development will consist of: (1) a 12-foot-high diversion dam on the main stem; (2) a 10-foot-high diversion dam on the South Fork Williame Creek; (3) a 4-foot-diameter, 8,600-foot-long penstock from the main diversion to a confluence; (4) a 2.5-foot-diameter, 4,400-foot-long penstock from the South Ford diversion to a confluence; (5) a 4.75-foot-diameter, 5,400-foot-long penstock from the confluence to the powerhouse; (6) a powerhouse containing a generating unit with a capacity of 5.8 MW; and (7) three access roads, one 1,000 feet long to the powerhouse, one 1,200 feet long to the South diversion, and one 2,915 feet long to the main stem diversion. Township 13 N, Range 8 E, Sections 13 and 25, and Township 13 N, Range 9 E Sections 18, 19, 30, and 31.

P–11235 competes with P–11188. The project would consist of: (1) a 13-foot-high concrete diversion dam on Silver Creek; (2) a 13-foot-high diversion dam on Lynx Creek; (3) a 10-foot-high diversion dam on Lake Creek; (4) a 10-foot-diameter, 18,000-foot-long tunnel from Lynx Creek to a confluence; (5) a 10-foot-diameter, 5,300-foot-long tunnel from Silver Creek and Lake Creek to the confluence; (5) a 7.5-foot-diameter, 1,600-foot-long tunnel from the confluence to the powerhouse; (6) a powerhouse containing a generating unit with a capacity of 16 MW and an average annual generation of 59.3 GWh; (7) a 2-mile-long transmission line; and (8) three access roads, one 2,900 feet long to the Lake Creek diversion, one 2,910 feet long to the Lynx Creek diversion, and one 2,515 feet long to the Silver Creek diversion. Township 13 N, Range 7 E, and Sections 21, 22, 27, 28, 33, and 34, and Township 12 N, Range 7 E and Sections 3 and 10.

P–11236 competes with P–11189. The project would consist of: (1) a 15-foot-high diversion dam on Yellow Jacket Creek; (2) 10-foot-diameter, 11,900-foot-long tunnel; (3) a powerhouse containing a generating unit with capacity of 10.1 MW and an average annual generation of 37.5 GWh; (5) a 10-mile-long transmission line; and (6) two access roads, one 1,910 feet long to the powerhouse, and one 7,340 feet long to the Yellow Jacket Creek diversion. Township 11 N, Range 8 E, Sections 20, 28, 29 and 33.

P–11237 competes with P–11190. The project would consist of: (1) a 13-foot-high diversion dam on Greenhorn Creek; (2) 38-inch-diameter, 13,400-foot-long penstock; (3) a powerhouse containing a generating unit with a capacity of 5.1 MW and an average annual generation of 19.7 GWh; (5) a 12-mile-long transmission line; and (6) two access roads, one 600 feet long to the powerhouse, and one 5,280 feet long to accommodate the penstock. Township 11 N, Range 7 E, Sections 14, 15, 23, 26, and 27.

P–11238 competes with P–11191. The project would consist of: (1) a 13-foot-high diversion dam on Iron Creek; (2) a 5.25-foot-diameter, 22,000-foot-long penstock; (3) a powerhouse containing a generating unit with a capacity of 14.1 MW and an average annual generation of 54.4 GWh; (5) a 8-mile-long transmission line; and (6) one access road 600 feet long to the powerhouse. Township 11 N, Range 7 E, Sections 19, 30, and 31. Township 10 N, Range 7 E, Sections 6, 7, and 8.

k. *Purpose of Projects:* Project power would be sold.

l. *This notice also consists of the following standard paragraphs: A8, A10, B, C, and D2.*

7. a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 11239–000.

c. *Date filed:* January 16, 1992.

d. *Applicant:* Elkhart County, Board of County Commissioners, 117 North Second Street, Goshen, Indiana 46526.

e. *Name of Project:* Goshen Water Power Project.

f. *Location:* on the Elkhart River, near Goshen, Elkhart County, Indiana.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* John E. Fisher, Lawson-Fisher Associates, 525 West Washington Street, South Bend, Indiana 46601, (219) 534–3541.

i. *FERC Contact:* Mary Golato (202) 219–2804.

j. *Comment Date:* April 24, 1992.

k. *Description of Project:* The proposed project would consist of the following facilities: (a) an existing dam with a 200-foot-wide concrete spillway and a gabion emergency drawdown structure; (b) an existing reservoir with a maximum storage capacity of approximately 3,100 acre-feet with a surface area of about 765 acres; (c) a proposed powerhouse containing two turbine-generating units at a total installed capacity of 400 kilowatts; (d) a proposed 1-mile-long transmission line; and (e) appurtenant facilities. The dam is owned by Elkhart County Department of Parks and Recreation. The average annual generation is estimated to be 2,223,000 kilowatthours.

l. *This notice also consists of the following standard paragraphs:* A5, A7, A9, A10, B, C, and D2.

8. a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 11241–000.

c. *Date Filed:* January 21, 1992.

d. *Applicant:* Vermont Hydro Associates.

e. *Name of Project:* West Rutland Pumped Storage.

f. *Location:* Near the Casteleton River in the Town of West Rutland, Rutland County, Vermont.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Louis Rosenman, 1725 DeSales Street, NW., suite 800, Washington, DC 20036, 202–659–8568.

i. *FERC Contact:* Charles T. Raabe (tag) (202) 219–2811.

j. *Comment Date:* April 30, 1992.

k. *Description of Project:* Applicant proposes to study two closed-loop alternatives. Alternative 1 would consist of: (1) an upper reservoir having 1,240 acre-foot useable storage capacity at water surface elevation 1400 feet msl; (2) a 13-foot-diameter, 1,170-foot-deep vertical shaft; (3) a 15-foot-diameter, 6,5000-foot-long tunnel; (4) an underground powerhouse containing two turbine/pump units each rated at 80–MW at a 1,210-foot-maximum head; (5) existing quarries utilized as a lower reservoir having water surface elevation 500 feet msl; (6) a 13.8/115-kV switchyard; (7) a 1.8-mile-long, 115-kv transmission line; and (8) appurtenant facilities. Alternative 2 would consists of: (1) an upper reservoir having 1,500 acre-foot useable storage capacity at water surface elevation 1460 feet msl; (2) a 13-foot-diameter, 200-foot-deep vertical shaft; (3) a 15-foot-diameter, 8,700-foot-long tunnel; (4) an underground powerhouse containing two turbine/pump units each rated at 100–MW at a 1,270-foot-maximum head; (5) existing quarries utilized as a lower reservoir having water surface elevation 500 feet msl; (6) a 13.8/115-kV switchyard; (7) a 1.8-mile-long, 115-kV transmission line; and (8) appurtenant facilities.

The project would be interconnected to the existing West Rutland Substation. Applicant estimates that the cost of the studies under the permit would be $350,000. Project energy would be sold to/purchased from one or more electric utilities. The existing quarries are owned by Gawet Marble & Granite, Inc.

l. *This notice also consists of the following standard paragraphs:* A5, A7, A9, A10, B, C, and D2.

9. a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 11245–000.

c. *Date filed:* February 4, 1992.

d. *Applicant:* Iowa Hydropower Development Corporation.

e. *Name of Project:* Mississippi River Lock & Dam No. 9 Project.

f. *Location:* On the Mississippi River, near Harpers ferry, Allamakee County, Iowa, and Crawford County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)—825(r).

h. *Applicant Contact:* Mr. Justin Rundle, Iowa Hydropower Development Corporation, 3900 Crosby Drive, suite 1620, Lexington, Kentucky 40515 (606) 271–4781.

i. *Comment Date:* April 13, 1992.

j. *Description of the Request:* Pursuant to Public Law No. 102–240, 105 Stat. 1914, section 1075(b) of the Intermodal Surface Transportation Efficiency Act of 1991, the licensee requests that the deadline for the acquisition of real property and the commencement of construction on FERC Project No. 3033 be extended to August 10, 1994, and the deadline for completion of construction on FERC Project No. 3034 be extended to August 10, 1999. The licensee also requests that the deadline for the acquisition of real property and the commencement of construction on the project be extended to August 10, 1996, and the deadline for completion of construction on the project be extended to August 10, 2001.

k. *This notice also consists of the following standard paragraphs:* B, C, and D2.

17. a. *Type of Application:* Declaratory Order.

b. *Project No.:* EL92–18–000.

c. *Date Filed:* February 11, 1992.

d. *Applicant:* Carle E. Hitchcock.

e. *Name of Project:* Sheboygan Falls Hydropower Project.

f. *Location:* Sheboygan River, Sheboygan County, Sheboygan Falls, Wisconsin.

g. *Filed Pursuant to:* Section 23 (b) of the Federal Power Act, 16 U.S.C. 817(b).

h. *Applicant Contact:* Carl E. Hitchcock, 423 Green Tree Road, Kohler, WI 53044, (414) 452–2624.

i. *FERC Contact:* Etta Foster, (202) 219–2679.

j. *Comment Date:* April 20, 1992.

k. *Description of Project:* The existing Sheboygan Falls Project consists of: (1) A 10-foot-high, 175-foot-long dam; (2) a 10-foot-high reservoir with an estimated surface area of 3.75 acres and a storage of 15 acre-feet; (3) a power-house containing a 60 kW induction generator; (4) a 30-foot-long transmission line; and (5) appurtenant facilities.

When a Declaratory Order is filed with the Federal Energy Regulatory Commission, the Federal Power requires the Commission to investigate and determine if the interests of interstate or foreign commerce would be affected by the project. The Commission also determines whether or not the project: (1) Would be located on a navigable waterway; (2) would occupy or affect public lands or reservations of the United States; (3) would utilize surplus water or water power from a government dam; or (4) if applicable, has involved or would involve any construction subsequent to 1935 that may have increased or would increase the project's head or generating capacity, or have otherwise significantly modified the project's pre-1935 design or operation.

l. *Purpose of Project:* Applicant intends to sell energy to the Sheboygan Falls Utility for consumption in their grid.

m. *This notice also consists of the following standard paragraphs:* B, C, and D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for a preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30 (b)(1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30 (b)(1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit applications or notices of intent. Any competing preliminary permit or development application or notice of intent to file a competing preliminary permit or development application must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice. A competing license application must conform with 18 CFR 4.30 (b)(1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment data for the particular application.

C. Filing and Service of Responsive Documents–Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, Room 1027, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 10, 1992, Washington, DC.

Lois D. Cashell,

Secretary.

[FR Doc. 92–6498 Filed 3–19–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. PL92–1–000]

Incentive Ratemaking for Interstate Natural Gas Pipelines, Oil Pipelines, and Electric Utilities; Proposed Policy Statement on Incentive Regulation

March 13, 1992.

AGENCY: Federal Energy Regulatory Commission, DOE

ACTION: Notice of proposed policy statement.

SUMMARY: The Commission is inviting comments on a proposed policy statement on incentive ratemaking for interstate natural gas pipelines, oil pipelines and electric utilities. The proposed policy statement would define the essential elements of incentive ratemaking policy. It also proposes to invite natural gas pipelines, oil pipelines and electric utilities to file incentive ratemaking proposals for gas and oil transportation and wholesale electric service, and it proposes guidelines for companies to use in fashioning incentive proposals.

DATES: Comments are due on April 27, 1992. Reply Comments are due on May 12, 1992.

ADDRESSES: An original and 14 copies of the written comments should be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, and should refer to Docket No. PL92–1–000.

FOR FURTHER INFORMATION CONTACT: Michael P. Lynch, Office of Economic Policy, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208–2210.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3308, 941 North Capitol Street, NE., Washington, DC.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300,1200, or 2400 baud, full duplex, nor parity, 8 data bits, and 1 stop bit. The full text of this notice of proposed policy statement will be available on CIPS for 30 days from the date of issuance. The complete text on

diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in 3104, 941 North Capitol Street NE., Washington, DC 20426.

I. Introduction

The Commission has used cost-of-service rate regulation as a regulatory tool for preventing pipelines and electric utilities for exercising market power. Recently, the Commission has allowed individual companies to depart from cost-of-service regulation and set market-based rates if they could show they lacked significant market power or had mitigated market power.[1] Now, the Commission is interested in providing alternatives to traditional cost-of-service regulation for companies with market power, especially alternatives that encourage productive efficiency, result in lower rates to consumers and provide utilities the opportunity to earn higher returns. In this proceeding, the Commission proposes to define the essential elements of an incentive ratemaking policy and proposes to set guidelines for utilities that choose to submit specific incentive rate proposals for natural gas pipeline and oil pipeline transportation service and wholesale electric service.

It must be emphasized that incentive regulation is an alternative to cost-of-service regulation for utilities in non-competitive markets. The goals are to lower costs, reduce administrative burdens and improve pricing and services. The Commission also emphasizes that incentive rates are not a substitute for market-based rates where markets are workably competitive, or where there is no exercise of market power. Incentive regulation is an alternative to traditional cost-of-service regulation that gives greater emphasis to productive efficiency in non-competitive markets. The Commission proposes to invite companies to file incentive ratemaking proposals consistent with the principles laid out in a final policy statement issued after our review of the public comments. The Commission recognizes that there is a relationship between this proposed policy statement and any restructuring proceedings necessitated as a result of the final rule in Docket No. RM91-11-000, Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation Under Part 284 of the Commission's Regulations. Thus, after a review of the comments filed here, the Commission will issue guidance on how this policy statement affects those restructuring proceedings.

II. Overview

The key feature distinguishing incentive regulation from traditional cost-of-service regulation is the relationship between the utility's costs and its rates. Traditional regulation places limits on profits as a substitute for the downward pressure on prices that exists in competitive markets. Thus utility rates reflect the cost-of-service plus an allowed return on equity. Lower costs translate into lower rates, although possibly with a lag.

Incentive regulation places limitations on price rather than profit, with the expectation that utilities will aggressively cut costs in order to maximize their return. This is accomplished by relaxing the tie between a utility's costs and its rates. Lower costs do not automatically translate into dollar-for-dollar reductions in rates. Incentive regulation allows utilities to permanently retain a portion of cost savings as an inducement for further cost reductions. Consumers benefit by sharing in the cost savings through lower rates than would otherwise exist under traditional regulation.

Extending the time frame between rate reviews is another feature of incentive regulation, since currently, for example, traditional regulation for most natural gas pipelines entails a three-year periodic rate review. A longer interval between rate reviews gives the utility added incentives to minimize costs and operate more efficiently.

Of course, even under incentive regulation, rate reviews take place. However, there is symmetry in incentive regulation which distinguishes it from traditional regulation. Utilities will be allowed to retain a portion of any cost savings and they will be required to bear all losses during the period its incentive rate mechanism is in effect. This is not meant to imply that the Commission is abandoning its rights to conduct an investigation to determine the justness and reasonableness of natural gas pipeline rates under section 5 of the Natural Gas Act (NGA), oil pipeline rates under section 13 of the Interstate Commerce Act (ICA), or an electric utility's rates under section 206 of the Federal Power Act (FPA).

Traditional regulation is asymmetrical. Between rate cases, utilities retain the benefits of cost savings. However, in a subsequent rate case, the full amount of the costs savings may generally be reflected in lower rates, thereby prospectively preserving all of the benefits for ratepayers.

III. Legal Authority

Incentive ratemaking is consistent with our general ratemaking authority. As more fully discussed below, the Commission is not required to follow any specific type of ratemaking formula and is not limited to designing rates based upon traditional cost-of-service ratemaking under either the NGA, the ICA, or the FPA. Indeed, the Commission's history of ratemaking includes past use of "Fair value" rate base, "original cost" rate base and no rate base (i.e., market-based rates).

Section 4 of the NGA requires the rates and charges of natural gas companies to be "just and reasonable." As pointed out in *City of Charlottesville* v. *FERC*, 661 F.2d 945, 949 (D.C. Cir. 1981), "[t]he Natural Gas Act fails to prescribe specific standards for ratemakers to follow." However, the statute has been interpreted by the courts to provide a framework for determining what methods may be permissible. The Commission requests that parties comment on what standards the Commission should use in determining whether incentive rate proposals are just and reasonable.

In *FPC* v. *Hope Natural Gas Co.*,[2] the Supreme Court stated that:

> Under the statutory standard of "just and reasonable" it is the result reached and not the method employed which is controlling * * *. It is not the theory but the impact of the rate order which counts. If the total effect of the rate order cannot be said to be unjust and unreasonable, judicial inquiry * * * is at an end. The fact that the method employed to reach that result may contain infirmities is not then important.[3]

In *Federal Power Commission* v. *Natural Gas Pipeline Co.*, 315 U.S. 575 (1941), the Supreme Court addressed the extent of the Commission's authority under section 4 of the NGA. The court stated that "[t]he Constitution does not bind rate-making bodies to the service of any single formula or combination of formulas. Agencies to whom this legislative power has been delegated are free, within the ambit of their statutory authority, to make the pragmatic adjustments which may be called for by particular circumstances." 315 U.S. at 586.

[2] 320 U.S. 591 (1944).

[3] *Id.* at 602.

In *Wisconsin* v. *FPC* 373 U.S. (1963), the Supreme Court, in affirming the FPC's use of area rates, rejected the argument that an individual company's cost-of-service was the only permissible basis upon which rates could be set. In subsequent area rate cases, the Supreme Court upheld the use of incentive pricing schemes in conjunction with area rates as a means of promoting natural gas exploration and the dedication of new supply to the interstate market. In the *Permian Basin Area Rate Cases*, 390 U.S. 747 (1967), the Court upheld the Federal Power Commission's (FPC) area rate proceeding, including a two-price rate structure comprised of one area maximum price for natural gas produced from gas wells and dedicated to interstate commerce after January 1, 1961, and a lower area maximum price for all other natural gas produced in the Permian Basin. The Commission expected that its adoption of separate maximum prices would provide a suitable incentive to exploration and prevent excessive producer profits. The Court stated that the Commission's responsibilities include the protection of future, as well as present, consumer interests. It found, on the basis of substantial evidence, that a two-price rate structure would both provide a useful incentive to exploration and prevent excessive producer profits. 390 U.S. at 798.

In *Mobil Oil Corporation* v. *FPC*, 417 U.S. 283 (1973), the Supreme Court reviewed a Commission order establishing an area rate structure for interstate sales of natural gas produced in the Southern Louisiana area. The program provided for price escalations if the gas industry as a whole found and dedicated new gas reserves from the Southern Louisiana area to the interstate market (contingent escalations). The program also created a refund workoff credit that allowed any company with a refund obligation to a pipeline to reduce the refund obligation if new gas reserves from the Southern Louisiana area were committed to the interstate market. The Commission concluded that the refund workoff credits and contingent escalations would generate additional capital to spur exploration and at the same time keep pace with rising costs. Consumers would be protected from excessive gas supply costs since rate increases would not be levied unless new gas supplies were dedicated to the interstate market.

The Supreme Court found the incentive provisions of the area rates acceptable. The Court stated that, because of a serious and growing domestic gas shortage, the lower court properly concluded that the Commission could reasonably decide that its responsibility to maintain adequate supplies at the lowest possible rate could be better discharged by means of the contingent escalation and refund credit provisions, rather than by case-by-case adjustments in the rate ceilings for gas producers. Finally, in *FPC* v. *Texaco, Inc.*, the Supreme Court stated the fact that the NGA requires "every rate of every natural gas company must be just and reasonable does not require that the cost of each company be ascertained and its rates fixed with respect to its own costs." [4]

In *Farmers Union Central Exchange Inc.* v. *FERC*, 734 F.2d 1486 (D.C. Circuit), *cert. denied sub nom.* 469 U.S. 1034 (1984), the Court stated that "changing characteristics of regulated industries may justify the agency's decision to take a new approach to the determination of just and reasonable rates" and that "non-cost factors may legitimate a departure from a rigid cost-based approach." With the exception of *Farmers Union*, which dealt with oil pipeline rates, these cases have arisen under the NGA. However, the rate provisions of the NGA substantially parallel sections 205 and 206 of the Federal Power Act (FPA). The courts have viewed the statutory interpretations of the just and reasonable standards of the FPA and NGA as interchangeable. In *Jersey Central Power and Light Co.* v. *FERC*, the Court stated that "The Federal Power Act, the source of claim in this case, also requires that the rates be just and reasonable, and the courts rely interchangeably on cases construing each of these Acts when interpreting the other." [5]

These cases affirm that the Commission is not required to follow any specific type of ratemaking formula and is not limited to designing rates for the utilities it regulates based on traditional cost-of-service ratemaking. The Commission is free to set rates to provide incentive so long as there is a correlation between the incentive and the result to be induced.[6]

IV. Objectives of Incentive Regulation

1. General Principles

Regulated rates should foster both allocative and productive efficiency. Incentive ratemaking stresses productive efficiency by allowing regulated firms to profit or lose based on an objective performance standard. The Rate Design Policy Statement [7] requires efficient gas pipeline rates and stresses allocative efficiency.

Traditional regulation lacks mechanisms that foster long-run efficiency. Utilities face few explicit rewards for taking risks to aggressively cut their costs, and may face few penalties for excessive spending. However, traditional regulation is not without incentives to be efficient in the short-term. Regulatory lag provides some incentive to minimize costs, since savings achieved between rate cases accrue to the benefit of stockholders. However, this incentive is muted once the future benefits of the cost savings are allocated to ratepayers in the form of lower rates in a subsequent rate case. Incentive regulation differs from traditional regulation in that it fosters long-term efficiency.[8] It accomplishes this by: (1) Divorcing rates from the underlying cost of service, (2) lengthening the period between rate cases, and (3) sharing the benefits of cost savings between consumers and stockholders on a current basis.

Divorcing rates from costs provides the utility with the incentive to cut costs aggressively since it is assured that it will retain a portion of the savings it generates. Lengthening the period between rate cases increases the incentive for utilities to take risks associated with aggressive cost cutting measures.

The combination of the longer period between rate reviews and divorcing rates from costs allows the utility to aggressively cut costs, knowing in advance that it will permanently retain a share of the savings. This produces the incentive to pursue long-term productive efficiency that is lacking in traditional regulation. Since companies will have the opportunity to earn returns through retention of a portion of the savings, fairness dictates that customers receive a share of the costs savings on a current basis.

The Commission recognizes that natural gas pipelines' rates have been

[7] Interstate Natural Gas Pipeline Rate Design, *et al.*, 47 FERC ¶ 61,295, *order on reh'g*, 48 FERC ¶ 61,122 (1989).

[8] See, e.g., FERC, Incentive Regulation: A Research Report, Office of Economic Policy, Technical Report 89-3, November, 1989.

designed to give pipelines an incentive to achieve a high throughput by conditioning their recovery of some fixed costs by including those costs in a commodity or usage charge. In the rulemaking proceeding in Docket No. RM91-11-000, referenced above, the Commission has proposed to adopt a different rate design methodology in which the pipeline's fixed costs would be recovered solely through a demand or reservation fee, unless the parties otherwise agree. The Commission specifically requests comments on how the policy proposal here relates to its rate design methodology proposal in Docket No. RM91-11-000.

2. Regulatory Standards

Incentive ratemaking *must* be fair. Properly done, all can benefit; improperly done, it may hurt parties—especially those the Commission has historically protected—as much as it helps. Incentive ratemaking must simultaneously protect customers' interests and offer potential rewards to the firm for good performance. Incentive rate proposals must be consistent with the four standards discussed below.

a. Incentive Mechanisms Must Be Prospective

Incentive ratemaking must be prospective.[9] Utilities cannot assume that their existing rates will be the base to which an incentive mechanism will apply. The Commission must determine that the base rates, calculated on a cost-of-service basis, are just and reasonable at the inception of an incentive rate program.

b. Participation Must be Voluntary

Incentive ratemaking must be voluntary for the firm. Fairness dictates that incentive ratemaking must not be made mandatory during this experimental period.[10]

c. Incentive Mechanisms Must be Understood by all Parties

Incentive ratemaking programs must be specific and clearly state the expected benefits relative to cost-of-service regulation for both the utility and its customers.

d. Benefits to Consumers Must be Quantifiable

All proposals must include a quantified estimate of the consumer benefits compared to cost-of-service regulation (i.e., a comparison of projected cost-of-service rates to prospective rates under the proposed incentive rate mechanism),[11] and a realistic estimate of the program's prospects for success and the risks of failure. The program must include a specific procedure and a time certain for review of the program by the Commission. Because incentive ratemaking is, at this time, an experiment, its merits can only be known by evaluating how firms performed. The Commission can modify, expand, or end the program based on the evaluation.

V. Some Possible Mechanisms

The key to getting incentives to cut costs is to sever the tie between rate changes and changes in a company's current operating and investment costs. As long as rates only reflect the firm's current costs, the firm has little incentive to cut costs. Input prices (e.g., wages, capital costs, fuel, etc.) paid by the utility change because of changes throughout the economy, such as changes in inflation. Even if rates do not depend on the firm's recent costs, they still must respond to changes in demand if a company is to operate efficiently. Failure to operate efficiently results in earned returns below authorized returns. Under traditional regulation, a company in this circumstance would seek a rate increase to prospectively mitigate a decline in earnings. Under the incentive regulation, a company could not seek a rate increase at a time other than that specified by the incentive rate mechanism. In order to increase earnings, the company must achieve cost savings in excess of the change in rates permitted by the incentive rate mechanism. If it fails to do so, any losses incurred are borne by stockholders.

1. Automatic Rate Changes

Automatic rate changes increase regulatory lag by extending the interval between rate cases and permitting greater flexibility in intermediate price changes. Rates are indexed and changed automatically to correspond to changes in an index developed by the utility and approved by the Commission.[12] Adopting an automatic rate change mechanism does not presume existing rates (i.e., the base rates from which rates will be indexed) are just and reasonable. Rather, the base rates and indexing mechanism must be filed and reviewed as a package to assure that the historical costs upon which the indexing mechanisms are based are just and reasonable.

Actions taken by the utility should not change the value of the index used to adjust its rates. When it cuts costs, the utility would keep a portion of the savings. The more it cuts, the more it saves. Conversely, if costs rise, rates will not rise to recover all of the increase. Major issues for automatic rate changes are which indices to use, how to adjust them, and when to conduct a new rate case with a new cost study. Another concern may be quality of service. The proposal must contain standards to measure quality of service and incentives to maintain it. The Commission requests comments on what might be appropriate standards and how incentive rates might affect quality of service.

a. Choosing an Index

The basic choice is between indices that track general prices—such as the Consumer Price Index (CPI) or Producer Price Index (PPI)—and those that track utility input prices. Either way, rates change as the prices change in the economy as a whole and do not reflect changes in a company's specific costs. Linking rates to a general price index has both the benefit and burden of simplicity. To the extent such indices have little direct connection to the electric, oil, or natural gas industries, they may completely miss important changes in a utility's costs, and rates could become unreasonably high or low.

Linking price changes to utility input prices has the opposite virtues and vices. Such an ARAM can track industry costs with much greater accuracy. But defining the index is difficult as it should include all major inputs. However, indices tracking utility input prices must not be so narrowly defined that changes in a single company's costs can significantly affect the index value. To do so would undercut the goal of linking prices to a basket of cost factors that the company cannot affect.

b. Adjusting the Index for Productivity

Changes in rates may directly follow changes in an index or an adjusted version of the index with an offset for productivity. For example, to share productivity gains contemporaneously with ratepayers, the allowed rate change might be somewhat less than the change in the selected index.

c. Revisiting the Base Costs of the Index

The financial, operating and service assumptions of an incentive plan may become outdated because of various factors beyond a company's control. There may have been mistakes in designing the index or changes in governmental policy regarding the particular industry involved. Therefore, the index mechanism, its assumptions and the company's performance should be periodically revisited to assure the index still reflects a fair allocation of benefits and losses between the company and its customers. The issue is how often this should occur. We assume that the plan should contain a reopening date and its rationale.

Over a long enough period of time, the basic cost structure of any industry changes. So, in time, the costs on which all future rates depend may become an unreasonable basis for pricing. The company might begin making or losing money simply because of structural changes in the industry, not because of its own performance. Of course, structural change is partly a result of performance, so this may not be clearly definable. In the end, however, either the firm or its customers may have a strong argument to set rates from scratch. Whenever a rate case does revisit costs, however, the principle of incentive regulation must remain intact—the firm must be able to keep part of its productivity gains or suffer part of the losses over the long-term.

2. Performance Targets

Performance targets also can encourage companies to cut costs. If the company achieves the target, it obtains a benefit. If not, it is sanctioned by a reduction in its profits. The Commission uses performance targets now—throughout projections for pipelines and off-system sales and transmission revenues for wholesale electric utilities. These give incentives to increase service but only indirectly to cut costs. Regulatory lag also provides a performance target of sorts but one that may inspire high costs now to raise rates later. However, the use of performance targets could be expanded in a number of different ways. Targets could be set for almost any cost—interest, salaries, operation and maintenance, even taxes. Rates could be designed using the targets rather than actual costs. The firm could be designed using the targets rather than actual costs. The firm would be allowed to keep a portion of the savings if it beats its target, at least until the next rate case. And, it would absorb a portion of the losses if it failed to meet its targets. Or, the rate of return could be tied to performance.[13] Key issues to be addressed are which costs to target and how to set the targets. Therefore, the overall impact of the selected target on the utility's operations must be scrutinized to ensure its neutrality with respect to operations and ultimately rates.

a. What to Target

Which costs should be the subject of performance targets? Unless the interrelationship of all costs is clearly stated, a company could spend lavishly on non-targeted areas to save a little on targeted ones. For example, if a target applied only to maintenance costs, then a firm might choose to let a plant run down, expecting to charge customers later for the capital investment to replace it. That would benefit the firm now and burden customers later.

b. Setting the Target

One way to set a target is to index a utility's own costs to the average change in costs for similar companies. That may lead to pleas from some firms that they differ greatly from the norm. While looking at the special circumstances of each company complicates the process, it should not, presumably, differ much from the normal rate case. Another approach is to set specific performance or operating standards in conjunction with benefit sharing devices. Performance can be measured in economic terms such as fuel costs or purchased power costs, or in physical terms such as capacity factors and heat rates.[14]

3. Flexible Pricing

Incentive proposals may contain new techniques for flexible pricing. The Commission's selective discounting policy is a form of incentive regulation that encourages better utilization of existing facilities. Other forms of flexible pricing could include auctions for IT service when the maximum cost-of-service rate fails to ration capacity. Flexible pricing could be expanded to give utilities greater latitude to adjust rates and modify service terms and conditions when customers find such changes beneficial.

4. Benefit Sharing

Incentive ratemaking must offer benefits to customers as well as utilities. Most automatic rate changes and performance targets can be combined with benefit sharing so that the utility does not keep all the gains from productive efficiency. These mechanisms are designed so that the utility shares gains with its customers on an ongoing basis. Although benefit sharing may dilute a utility's incentive to operate more efficiently, equity requires that customers should also benefit.

The Commission has, on an experimental basis, considered benefit sharing in the Southwest Bulk Power market Experiment [15] and the Western System Power Pool (WSPP).[16] In the Bulk Power Market Experiment, the Commission, for purposes of testing "the proposition that utility managers are responsive to explicit pecuniary incentives and will increase their coordination sales efforts" allowed the utilities to retain for stockholders 25 percent of the revenue generated from coordination transactions and flow through the remaining 75 percent to ratepayers. The Commission adopted an identical revenue sharing proposal in the WSPP Experiment.[17]

Benefit sharing is also not a novel concept for the gas pipeline industry. The Rate Design Policy Statement suggests designing interruptible pipeline rates around benefit sharing. Some capacity brokering and release programs use benefit sharing usually with firm customers sharing benefit with the pipeline as an incentive to make the program work.

---

[9] Canyon Creek Compression Company, 55 FERC ¶ 61,148, *reh'g denied* 56 FERC ¶ 61,140 (1991)

[10] In Western Systems Power Pool (WSSP), the Commission permitted a voluntary multi-year experiment to determine if flexible pricing and defined benefits sharing increased exchange efficiency in electricity coordination markets. The Commission ultimately approved the WSPP on a permanent basis with a-modified cost-based price cap to mitigate the exercise of market power. See Western Systems Power Pool, 55 FERC ¶ 61,099 (1991), *reh'g granted and denied in part*, 56 FERC ¶ 61,495 (1991).

[11] For example, the Commission recently rejected Viking Gas Transmission Company's proposed incentive rate scheme because, *inter alia*, it seemed to guarantee that future rates would be higher than they would otherwise be under traditional embedded cost ratemaking. 57 FERC ¶ 61,417 (1991)

[12] The Commission has accepted rates that automatically adjust to an outside index, including: (1) The average percentage change in wholesale electric rates of neighboring utilities, Illinois Power Co., 36 FERC ¶ 61,400 (1986); (2) the Producer Price Index for finished goods, American Electric Power Co., 51 FERC ¶ 61,501 (1988); and (3) the GNP Price Deflator, Buckeye Pipeline Co., 53 FERC ¶ 61,473 (1990). These filings were not proposed as incentive rate mechanisms. Nevertheless, they are demonstrative of how rates can be decoupled from a company's own costs under an automatic rate adjustment mechanism.

[13] In Virginia Electric Power Company, 19 FERC ¶ 61,333 (1982), the Commission approved a sliding scale mechanism that would adjust the allowed rate of return relative to the performance characteristics (i.e., heat rates and unit availability) of selected fossil-fire generators.

[14] In Ocean State Power Company, 38 FERC ¶ 61,140 (1987), the Commission approved a unit sale contract under which capacity charges will be reduced if the unit fails to achieve a net design capability within a 90 to 95 percent range. Further reductions in capacity charges will occur if the unit's equivalent forced outage rate falls below 60 percent. Ocean State will be awarded additional capacity payments if unit availability exceeds specified levels.

[15] Public Service Company of New Mexico, Opinion No. 203, 25 FERC ¶ 61,469 (1983) *rehearing denied*, 27 FERC ¶ 61,154 (1984).

[16] Pacific Gas and Electric Company, 38 FERC ¶ 61,242 (1987).

[17] 38 FERC ¶ 61,242 at 61,709 (1987).

5. Consumer Welfare Bonus

Another way to satisfy customers is to give the utility a bonus for serving them well. For example, the rate of return could be adjusted to rise or fall depending on how well the pipeline improved the designated service parameters or how much it cuts prices. Customer satisfaction leads to repeat sales and an increase in the firm's return.

In the electric industry, demand-side management programs can act as a consumer welfare bonus. For instance, the utility may install conservation devices and share the savings from avoiding the construction of more generating capacity with its customer. However, defining customer welfare in monopoly or oligopoly markets is technically difficult. The idea may work best when more value can be added to the customer's quality of service. That may not be possible for pipelines or wholesale power suppliers.

VI. Conclusion

Incentive ratemaking is an alternative regulatory mechanism that the Commission tentatively concludes can reward utilities for efficiency and benefit customers with lower rates. Incentive ratemaking can help achieve the goal of productive efficiency. It is not a substitute for market-based mechanisms where markets are workably competitive. Rather, it is a way to attempt to replicate incentives that occur naturally in a competitive market.

While the Commission proposes to invite utilities to propose incentive rate mechanisms, the Commission would not automatically accept any proposal filed that purports to meet the goals of this policy statement. Rather, a utility would be required to file specific detailed information concerning its proposal, and how it meets the policies contained herein. Prior to accepting any such filing the Commission would scrutinize that proposal closely. The Commission would reject, consistent with Commission and court precedent,[18] any proposal that is not consistent with the goals of this policy statement. In addition, the Commission would suspend such proposals for the full statutory period and provide for refunds, to the maximum extent possible, should that be found appropriate.

Cir. 1971), *cert. denied*, 405 U.S. 989 (1972); *United Gas Pipeline Co.* v. *FERC*, 551 F.2d 460, 463 (D.C. cir. 1977); Stingray Pipeline Co. 56 FERC ¶ 61,078 (1991); Viking Gas Transmission Co. 56 FERC ¶ 61,417 (1991).

VII. Comment Procedures

The Commission invites interested persons to submit comments concerning all facets of this proposed policy statement and solicits suggestions on other criteria or other standards for evaluating incentive mechanisms that should be considered. All comments should include a one page executive summary of the commenter's major concerns. All copies should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426 and should refer to Docket No. PL92–1–000. Comments must be submitted no later than 45 days from the date of issuance of this order. Reply comments may be submitted no later than 60 days from the date of issuance of this order. This comment period should afford parties affected by the Commission's final rule in Docket No. RM91–11–000 an opportunity to review the rule before filing their comments here. In the event there is insufficient time, the Commission will extend the time for comments in this proceeding.

By direction of the Commission. Commissioner Trabandt concurred with a separate statement attached.

Lois D. Cashell,

Secretary.

Trabandt, Commissioner, *concurring:*

I. Introduction

The instant Notice of Proposed Policy Statement (NOPPS) on Incentive Regulation includes a Proposed Policy Statement (PPS) of considerable significance for the Commission's regulatory program, primarily in the regulation of interstate natural gas pipelines. Under favorable circumstances, the PPS in theory could conceivably lead to improvements in the productive efficiency of services provided by interstate natural gas pipelines, with demonstrable benefits to consumers in the form of lower costs, improved quality of service and/or lower rates. Under other circumstances, which potentially could develop pursuant to a Final Policy Statement (FPS) in this docket, existing pipeline services at current levels of quality could be offered at rates in excess of those rates which would otherwise be established under current policy, without any quantifiable consumer benefit.

I write separately to discuss the relevant procedural and substantive issues for purposes of advancing the analytical debate about the PPS and focusing appropriate attention on the likely effect of a FPS. Paraphrasing Douglas Jones, Director of the National Regulatory Research Institute, I attempt to provide a cautionary view with moderate skepticism from the regulatory vantage point. Hopefully, this discussion will provide a useful foundation for the analysis of the PPS by interested parties and the prepartion of comments in response to the NOPPS. I should note that all of the studies and the bulk of the analysis included in this discussion were provided to Commission Terzic's Task Force for review over the last few months.

II. Scope of the PPS

A. General

The NOPPS is styled as "incentive ratemaking for interstate natural gas pipelines, oil pipelines, and electric utilities." And, the introduction states, "[i]n this proceeding, the Commission proposes to define the essential elements of an incentive ratemaking policy and proposes to set guidelines for utilities that choose to submit specific incentive rate proposals for natural gas pipeline and oil pipeline transportation service and wholesale electric service." (Slip op. at 1, 2.) As developed at the Commission Meeting of March 11, 1992, and discussed below, the PPS in actuality is primarily, if not almost exclusively, focused on the transportation and related services of interstate natural gas pipelines. While at some point there could be a direct application of the PPS to oil pipeline transportation services and wholesale electric services, that is not the primary focus nor realistic contemplation of the instant order.

B. Competition vs. Incentive Regulation

As emphasized in the introduction and reiterated thereafter throughout the PPS, "incentive regulation is an alternative to cost-of-service regulation for utilities in non-competitive markets * * * and not a substitute for market-based rates where markets are workably competitive, or where there is no exercise of market power." (Slip op. at 2.) Therefore, in order to assess the relevance of incentive regulation to any particular activity under the Commission's jurisdiction, it is necessary to assess qualitatively the extent to which competition exists or for which Commission policy seeks to engender or promote competition. In the end, incentive regulation will only be relevant to those activities and services for which competition does not serve as a substitute, in whole or in part, for traditional cost-based regulation. That

fact is of crucial importance in defining the jurisdictional scope of the PPS.

C. Wholesale Electric Services

As pointed out at the March 11 Commission meeting, the Commission regulates only 10 to 15 percent of revenue a typical utility earns. Moreover, there are only five or six electric utility companies that have 100 percent FERC jurisdictional sales and which would be affected by incentive ratemaking. The vast majority of the electric sales business falls under retail jurisdiction, where several states already have incentive ratemaking in various stages of implementation. Beyond those five or six companies, it is not clear if or how incentive ratemaking would apply to our jurisdictional electric areas, such as transmission services and bulk power sales. I think it is also incumbent on the Commission to assess more specifically what exact electric utility services subject to our jurisdiction would be candidates for incentive ratemaking, for what reasons, with what objectives and with what particular incentive approach.

In additin, the Commission's current focus is on bringing additional competition to those electric services, such as transmission, which are subject to our jurisdiction. For example, wherever possible now, the Commission approves negotiated/market rates for eligible IPP transactions. Also, by law PURPA QF transactions are set at "avoided costs," as administered by the states pursuant to our general PURPA regulations. While I have not been completely enthusiastic about every competitive initiative proposed by the Commission staff or adopted by a majority of the Commission, that certainly is the general direction of the Commission today, as reiterated repeatedly in Chairman Allday's speeches and in a series of electric utility cases.

And, I would note that it shouldn't be that hard to work through analytically the electric jurisdictional services and competition questions. Such an analysis would give us a better grip also on the underlying question of interest to some of us; *i.e.*, to what extent is incentive ratemaking appropriate in our electric power regulation on a jurisdictional area specific basis. In the spirit of "truth in advertising," we ought to know the answer to that question anway before proceeding on any generic basis to initiate Federal incentive ratemaking for electric utilities.

Consequently, I believe the Commission should concede that few electric jurisdictional areas will be subject to traditional regulation, in whole or in part. Thus, by and large, areas accounting for very little revenue will remain subject to cost-based ratemaking in the face of the competitive policies in electricity.

I also would note that the discussion at the March 11 Commission meeting demonstrated in my judgment some of the real policy contradictions between the PPS as applied to electric utilities and current policies, even in areas subject to regulation. In the specific area of transmission pricing, for example, the Commission recently pronounced a new policy by which electric utilities could use a rate other than a traditional, embedded cost rate for transmission services, involving so called "opportunity costs." The Commission discussed in detail the circumstances under which the Commission is willing to approve some form of opportunity cost pricing for transmission services. (*Northeast Utilities Service Company, et al.*, 58 FERC ¶ 61, 070 (1992) (Opinion No. 364–A)).

I will not repeat that discussion here. But, of primary significance to this PPS, the Commission in Opinion No. 364–A articulated three goals governing the pricing of future third-party requests for firm transmission service. The goals are: (1) To hold harmless the native load customers of the utility providing transmission service; (2) to charge the lowest reasonable cost-based rate for third-party firm transmission service; and (3) to prevent the collection of monopoly rents by the transmission owner and promote efficient transmission decisions. The Commission further explained that in ruling on specific proposed rates, the Commission would balance the three goals in light of the facts and circumstances presented at that time.

The Opinion No. 364–A pronouncement was intended to support the Commission's general electric policy of fostering greater competiton in the nation's wholesale bulk power markets, while recognizing the important economic interests of the native load customers of franchise utilities. Certaily, there is a quite obvious reluctance on the part of the Commission staff to allow inicentive regulation proposals for transmission services to undercut or reverse the new Opinion No. 364–A policy, as I determined when I specifically inquired about the acceptability of such a proposal at the Commission Meeting. How, if at all, incentive regulation would apply to those transmission services and their rates is not only unclear, but such incentive regulation on its face would be contrary to the new policy in Opinion No. 364–A, for better or for worse.

There also has not been much analytical support or empirical evidence presented thus far to the Commission or reflected in the NOPPS to buttress the use of inicentive regulation in this Commission's electric jurisdiction. The NOPPS does cite to the Southwest Bulk Power Experiment and the Western System Power Pool Experiment, as well a a few other electric cases. However, none of the cases cited had as a *primary* objective the use of an incentive ratemaking mechanism to achieve a demonstrable increase in productive efficiency with concomitant quantifiable consumer benefits, which is the proffered *sine qua non* of this proposal. Although certain mechanisms similar to those discussed in the PPS were employed in those cases, the use of the mechanisms in almost every case was intended to support another primary objective; *e.g.*, flexible transmission pricing in the Western System Power Pool Experiment to obtain greater transmission access (and such greater access was lost, when the Commission severly limited the pricing flexibility).

Those studies available from other sources raise considerable questions about the effectiveness more generally of incentive regulation in electric utility services. For example, the New York Public Service Commission has been actively reviewing incentive ratemaking for electric utilities for the past year and a half. The New York PSC published an "Issues Paper on Ratemaking Alternatives and Performance Incentive" for use in that docket. The Issues Paper provides a reasonably comprehensive discussion of the ratemaking options associated with a series of "alternative Regulatory Strategies" for electric utilities. Without personally endorsing any portion of the analysis, I believe the discussion of the advantages and disadvantages associated with the identified options and strategies would provide a useful starting point for further analysis and discussion by interested parties and should be considered by the Commission. A copy of the Issues Paper will be placed in the Public file in this docket.

Another recent study is by Berg and Jeong, "An Evaluation of Incentive Regulation for Electric Utilities' (*Journal of Regulatory Economics*; 3:45–55 (1991)). That empirical study attempted for the first time to identify the determinants of regulatory initiatives in this area and to test the effectiveness of incentive programs in lowering electricity production costs. The study examined the determinants and impacts of inicentive regulations introduced by

state utility commissions in the late 1970s and early 1980s. Rewards for generating plant utilization and low heat rates were found to have been introduced in states whose firms exhibited relatively high managerial slack (or relatively higher costs). However, the empirical data did *not* find that the introduction of specific cost component incentives improved overall operating cost performance. Again, without personally endorsing any portion of the study or taking a position on such state incentive regulation programs, I believe this empirical study should be reviewed by interested parties and considered by the Commission. A copy of the study will be placed in the public file in this docket.

Another recent study is "The Michigan Regulatory Incentives Study for Electric Utilities, Phase I Final Report, " April 25, 1991, Barakat and Chamberlin. Without personally endorsing any portion of the study, I have attached a detailed description of the study (attachment A) [1] for the purposes of postulating the analytical differences between the Michigan study and that of the NOPPS. The description is an excerpt from the 1991 Report of the Committee on Energy Conservation of the National Association of Regulatory Utility Commissioners. Interested parties may wish to review the study and it should be considered by the Commission. A copy of the study will be placed in the public file in this docket.

As these studies demonstrate, there is considerable analytical disagreement about whether and how incentive regulation should be applied to state electric utility regulation. A recent speech by Douglas N. Jones, Director of the National Regulatory Research Institute, provides a cautionary view with moderate skepticism from the regulatory vantage point. A copy of his remarks is attached for the information of interested parties (Attachment B). For the reasons discussed above, those factors are complicated by the limitation and type of Federal jurisdiction over the electric utility industry.

D. Oil Pipelines

The Task Force did not propose to include oil pipelines in the PPS. Oil pipelines were added to the NOPPS at the March 11 Commission meeting after I questioned the rationale for their absence. An explanation of the situation might assist interested parties in their review of the NOPPS.

As we know, by settlement the Commission has successfully initiated a competitive experiment in the *Buckeye* case (*Buckeye Pipeline Company, L.P.*, 53 FERC ¶ 61,473 (1990); *rehearing granted in part and denied in part*, 55 FERC ¶ 61,084 (1991)) and other oil pipelines are in various stages of proceeding down the same path. However, there may continue to be some discrete markets, as in *Buckeye*, where the intermodal competition cannot be demonstrated to support market based rates and where, as a result, traditional ratemaking will continue for the foreseeable future. In essence, the competitive initiative is well underway on a case-by-case basis, but that is going to take a long time across the industry and there still may remain some traditional ratemaking before and after the transition. So, perhaps, the Commission would find upon further review that incentive regulation might be compatible with the competitive initiative for some oil pipeline services to particular discrete markets.

I wouldn't want to pre-judge that question, because it would involve a mix of incentive ratemaking with market prices for a particular pipeline, such as in *Buckeye*, but it might be worth exploring. In any event, again, we should know the answer ourselves in order to determine exactly what role, if any, incentive ratemaking should have under existing law for oil pipelines, taking into account the *Buckeye* competitive initiative. I would encourage the Commission to conduct such an analysis.

At the March 11 meeting, the Commission staff argued that the Commission might be better advised to defer consideration of incentive regulation for oil pipelines until after the Commission receives the results of a staff technical conference on April 30, 1992. The staff is convening the technical conference to examine the potential for streamlining the regulation of the interstate oil pipeline industry and to consider generic, market-based rates for oil pipelines under existing law. I continue to believe, as I have testified before Congress and argued to the Commission previously, that a generic initiative proposing market-based rates for much of the industry could be effective.

So, I strongly support the technical conference initiative to explore that possibility, as well as procedural reforms. At the same time, however, unless and until some form of generic action is taken under existing law, the case-by-case approach with time consuming and costly market analyses will remain the only option to traditional cost-based regulation for oil pipeline companies. On that basis, the Commission should probably consider whether and how incentive regulation might be applicable as an alternative to continued traditional regulation for the foreseeable future for many oil pipelines.

As an aside, I would note that I found particularly ironic the advice of the Commission staff that the Commission defer action on incentive regulation for oil pipelines because of a forthcoming *staff technical* conference, while at the same time urging immediate action without public comment for incentive regulation for natural gas pipelines in the face of an imminent *Final Rule* in the so-called "Mega-NOPR" proceedings in Docket No. RM91-11-000. More on that later.

E. Natural Gas Regulation

This for me is the most difficult jurisdictional regulation for which to assess the appropriate role of incentive ratemaking *at this time* for several reasons. First, the predicate for the Task Force's support of incentive regulation is the need to provide a financial incentive for interstate pipelines to cut costs under traditional regulation, where there is inadequate competition to impose cost reduction as a competitive matter. At the same time, the objective of the Mega-NOPR is to increase competition on a gas-to-gas basis on individual pipelines by establishing full comparability of firm transportation and related services, which in turn will support more flexible pricing and regulation for both pipeline sales and services. Additionally, pipeline-on-pipeline competition should be enhanced significantly by the proposed measures in markets served by two or more pipelines. And, concepts such as capacity brokering add additional dimensions of competition for pipeline capacity entitlements.

It also is important to bear in mind that the natural gas market now deals in two basic commodities—(1) the physical natural gas molecule and (2) the pipeline capacity to deliver it. After the Mega-NOPR final rule, there probably will be at least one additional commodity, if not more, and that is the storage capacity which can serve as a competitive alternative (1) to direct wellhead sales and (2) to pipeline capacity (particularly for peak demand service). So, the Mega-NOPR should introduce additional competition in several different forms in several different (existing and new) markets. Thus, it is not clear today how incentive ratemaking either could or should be introduced into the interstate pipeline industry under the Mega-NOPR proposals.

For that reason, I am not persuaded we should initiate any action on incentive ratemaking for pipelines until we enact a final rule in the Mega-NOPR docket. We do need to decide in that docket (1) what services will be provided by pipelines, (2) under what terms and conditions, (3) with what degree of potential competition, (4) with what resulting degree of pricing flexibility or market rates, and (5) with what remaining degree of traditional cost-based regulation. There may be a different outcome for firm vs. interruptible for a particular service and as between (1) storage, (2) transportation, (3) balancing, (4) gathering, and (5) sales, for example. It also is noteworthy that the initial comments of various parties in the Nega-NOPR propose various forms of flexible pricing, negotiated rates and incentive ratemaking in alternative formulations, *i.e.*, let us have negotiated market rates, or failing that flexible pricing, or failing that incentive or "motivator" rates (*e.g.*, for capacity release programs).

Consequently, I believe we need to develop some threshold notion of where we are going to land on those issues in the Mega-NOPR in order to assess whether, and if so, how incentive ratemaking will get into the final mix. I also believe that it would be appropriate for us to look at the specific services *then* remaining under traditional cost-based regulation, *if any*, to assess how incentive ratemaking could or should apply. Depending on how the final rule comes out, we may find that incentive ratemaking could be a good generic supplement for services other than more competitive services, or we may find it will have little generic value because services then will be largely competitive.

If it is the former, then we can assess how best to proceed on either a case-by-case basis or by generic policy statement. However, I do not believe we should do an incentive ratemaking policy statement right after the Mega-NOPR final rule, because we will still need to make the pipeline specific decisions under the final rule. In fact, it is likely that we will not have a clear picture of a general industry nature as to how much comparability has really been achieved and what formulation competitive pipeline services have really taken, until the settlement negotiations on many pipelines are complete.

Fourth, I am not sure I can agree with the underlying assumption that there is inadequate competition in *today's* market for cost cutting. Take, for example, interruptible transportation rates (IT). They are set at max-min's based on cost recovery factors, but subject to selective discounting. And, most pipelines in off-peak periods (whenever the pipeline is not largely full with FT and firm sales) discount almost continuously by electronic bulletin board to maximize throughput in a market where one or two pennies can make a real difference.

Also, sophisticated computer software now makes it instantaneously possible to trace IT discounts on pipelines serving the same geographic market area to determine the least cost path on a real time basis. Additionally, the "contemporaneous and comparable" correlative discount requirement in Order No. 497 for all similarly situated shippers, when a discount is given to a pipeline affiliate, has served to make discounting a far more fair and effective competitive tool. As a result, most pipelines today have a great incentive for cost cutting in the face of discounting, as we have seen in many pipelines. This is just one example of why we need to have a careful assessment of the need for incentive ratemaking for cost reduction on a pipeline service-by-service basis, that reflects the actual competitive conditions advanced by the Final Rule in the Mega-NOPR docket. And I do believe, by the way, that our several initiatives since 1984 have advanced, if not created, much of the competitive situation in the natural gas industry today, just as will the Mega-NOPR Final Rule.

F. Conclusion

As a practical matter, the NOPPS is really focused on transportation services provided by natural gas pipelines. There is as yet no demonstration that incentive regulation has a particular place in wholesale electric services. And, there even is apparent opposition to its use in Federal jurisdictional services, as well as considerable doubt as to its effectiveness more generally for electric services. Additionally, oil pipelines are clearly an afterthough, however, meritorious incentive regulation might be for them, and oil pipelines are the subject of the staff technical conference in any event. By rather obvious deduction, therefore, the NOPPS, despite its styling, and the PPS, despite its inclusive phrasing, target transportation services of natural gas pipelines for incentive regulation. For that reason, the balance of this opinion will focus on that subject.

III. The Legal Question

The Bible teaches us, *Ecclesiastes*, 1:9, "And there is nothing new under the sun." That applies to incentive regulation as well. Though narrower in scope than the Task Force's program, the Commission has tried incentive ratemaking before in natural gas. We departed from strict cost of service regulation in order to provide various incentives to gas companies. The efforts regarding exploration come to mind.

For example, in the years before the Natural Gas Policy Act, the Commission allowed gas pipelines to extract higher rates from customers, to pay producers more (the advance payment program). Providing an incentive also formed the original rationale for allowing pipelines to keep for shareholders, rather than give to ratepayers, the benefits of consolidated tax savings that come from production losses. Both programs wound up under review in court, and as a result, considerable case law exists on how properly to fashion an incentive regulation under the "just and reasonable" standard of the Natural Gas Act.

The more recent, *City of Charlottesville* v. *FERC*, 661 F.2d 945 (D.C. Cir. 1981), struck down the Commission's consolidated tax policy for gas pipelines. The court held, 661 F.2d 945, 950, that a more rigorous standard of review applies when the Comission "seeks, * * * to encourage [a particular activity] through increased rates to consumers." Quoting the *City of Detroit* v. *FPC*, 230 F.2d 810 (D.C. Cir. 1955), the court admonished (*id.*):

> [I]f the Commission contemplates increasing rates for the purpose of encouraging exploration and development * * * it must see to it that *the increase is in fact needed* and *is no more than is needed for the purpose*. Further than this we think the Commission cannot go without additional authority from Congress.

(Emphasis added)

In addition, the *Charlottesville* case stands for the proposition that the Commission must, through evidence, show that the incentive works. The court, 661 F.2d at 953–954, examined the record and found, as had the Administrative Law Judge, that the extra money the pipeline took in went, not to exploration, but to general corporate purposes. The court, 661 F.2d at 954, refused to "take it on faith that such funneling of tax savings does occur." (Footnote omitted.)

Even this cursory legal analysis should tell us that we cannot just decide

[1] Copies of attachment A–D are not being printed in the Federal Register but are available in copies of the Notice from the Public Reference Room.

to give companies undefined "incentives," such as tying rates to some external index. Rather, after overcoming the hurdle that we need incentive ratemaking at all, the Commission must show how that the mechanism we choose gives companies enough, but not too much, money and, in fact, will bring about cost reductions. I also think that we will have to introduce a rigorous monitoring program to make sure that a particular form of incentive does more than degenerate into windfalls for the pipeline. I also invite the attention of the reader to the Commission's inquiry about what standards the Commission should use in determining whether incentive rate proposals are just and reasonable (slip op. at 5).

IV. Procedural Aspects

A. Proposed Policy Statement

It is particularly important that this is, in fact, a *proposed* policy statement. As such, as of this time, the PPS does not represent a final policy of the Commission. That point is emphasized repeatedly in the Introduction of the NOPPS, where it is stated that, "the Commission proposes to define * * * proposes to set guidelines * * * and proposes to invite companies to file incentive ratemaking proposals consistent with the principles laid out in a *final policy statement issued after our review of the public comments.* (Slip op. at 1, 2.)

The Commission certainly could have adopted an immediately effective policy statement, without any prior public comments and subject only to requests for rehearing after issuance. Speaking only for myself, I believe that the decision not to proceed with an immediately effective policy statement, but rather only issuing the instant NOPPS for initial and reply comments before considering a final policy statement, is very significant. In my judgment, that decision reflects a preceived need for industry-wide input in advance of any decision about (1) *whether* and (2) if so, *how* to proceed with incentive regulation for transportation services provided by interstate pipelines, particularly in the face of the Mega-NOPR and its impending Final Rule. The NOPPS approach will ensure that the Commission has the benefit of industry-wide comment, as well as the Task Force recommendation, before becoming committed to any form of incentive regulation for natural gas pipeline transportation services.

Consequently, it would be quite premature, in my judgment, to conclude today that the Commission on any consensus basis has already embraced incentive regulation for such services without any hesitation or reservation. And, I would submit that any suggestion to the contrary "just ain't so." Therefore, I would urge analysts and commenters to address fully *whether* and *why* incentive regulation for such natural gas pipeline services should be adopted as Commission policy, as well as where, when, and how any policy of incentive regulation for those same services should be implemented.

B. Relationship to the Mega-NOPR

1. Timing

The NOPPS provides for 45 days for initial comments and 15 days for reply comments after issuance. However, there remains considerable pressure to rush to adoption of a FPS for reasons apparently related to the Mega-NOPR final rule.

The order states that, "(t)his comment period should afford parties affected by the Commission's Final Rule in Docket No. RM91–11–000 an opportunity to review the rule before filing comments here (and) in the event there is insufficient time, the Commission will extend the time for comments in this proceeding." (Slip op. at 22, 23.) And, as discussed at the March 11 Commission meeting, the Commission is expected to act on the final rule in early to mid-April. Thus, commenters in this proceeding would have two to three weeks after that Final Rule issues to file initial comments here by late April and then reply comments by mid-May, in the absence of an extension.

Correspondingly, requests for rehearing of the final rule would be required by statue 30 days after its issuance, or in early to mid-May. Consequently, the Commission by mid-May would probably have pending before it the record of public comments on incentive regulation for natural gas pipeline transportation services for decision in a FPS in this docket, at the same time we would have pending the requests for rehearing in the Mega-NOPR docket. I am concerned that the apparent coincidence of the pendency of the two decisions (final policy here and rehearing order there) may suggest or invite a linkage in the implementation of the final rule, which I would oppose.

2. Linkage

The Commission in the instant order could have announced an intent to issue a final policy statement as close as possible to the time companies and other interested parties begin discussions on restructuring in reponse to the final rule in Docket No. RM91–11–000, thus indicating a clear policy direction that incentive regulation proposals could or even should be considered as part of those restructuring negotiations. Rather, the Commission in the NOPPS stated that it, "recognizes that there is a relationship between this proposed policy statement and any restructuring proceedings necessitated as a result of the final rule * * * (and) (t)hus, after a review of the comments filed here, the Commission will issue guidance on how this policy statement affects those restructuring proposals." (Slip op. at 2.)

This is hardly a matter of purely academic or mere procedural concern. The Reply Comments of the Natural Gas Supply Association and Indicated Producers (NGSA/IP) in Docket No. RM91–11–000 address this linkage issue quite well, as follows:

> While the term "incentive rate" apparently has different meanings to different segments of the natural gas industry, at the very least, incentive rates must be designed to encourage a pipeline to operate in the interest of all parties, including shippers, and to enhance pipeline efficiency. Therefore, any future incentive rate mechanism must produce a "win-win" situation for pipelines and shippers.
>
> NGSA/IP are troubled, however, that some pipelines have recently filed market-based transportation rates and one-sided profit enhancement schemes with the Commission under the guise of "incentive rates." Those proposals benefit only the pipeline's shareholders at the expense of all other parties. They do not have the offsetting and commensurate benefits which are the foundation for economic enhancements and efficiencies under incentive rates. NGSA/IP urge the Commission to examine carefully purported "incentive rate" filings to make sure pipelines do not utilize incentive rates primarily to enhance revenue flow or to avoid declining rate bases.
>
> Additionally, the Commission should carefully review "incentive rates" which are filed even as settlements under the implementation filings required under the Final Rule. The Commission should assure itself that the parties have not been coerced into accepting one-sided "incentive rates" as an inducement to the pipeline to become comparable, something the Final Rule will require the pipeline to do anyway. Incentive rates must be economically beneficial to all parties when examined on a stand-alone basis.
>
> Finally, it is clear to NGSA/IP that regulations for incentive rates should not be addressed in the instant rulemaking. It is premature to fashion rules for incentives until pipeline services are unbundled and comparable. Only when embedded, historic cross-subsidies are eliminated will it be clear which functions and services the pipeline offers will benefit from incentive rate treatment. Without the clear pricing signals that unbundling of services offers the purported positive effects of incentive ratemaking will be counterproductive to the efficient operation of the market. (Footnote omitted.)

I am quite concerned that, in the absence of substantial public comment on this linkage issue, pipelines may be authorized, if not affirmatively encouraged, to incorporate incentive regulation proposals pursuant to a Final Policy Statement in this docket into the restructuring proceedings. And, to the extent that settlements including incentive regulation for pipeline services are negotiated in those proceedings and filed with the Commission, I would deem it very unlikely that the Commission would be in a position procedurally to reach the merits of the four principles set forth in the PPS, such as quantifiable consumer benefits, for any given incentive regulation proposal. Under those circumstances, the potential for coercion suggested by NGSA/IP could be manifest, without any realistically available remedy.

Consequently, I strongly would prefer to require that any incentive ratemaking for natural gas pipelines under the FPS must be the subject of a separate filing and a separate docket without any linkage or incorporation into the restructuring proceedings. Such a complete separation would ensure that the Commission will have the full legal and policy flexibility to review any such incentive mechanism on the substantive merits, without any settlement limitations. In my judgment, that is not only the best way, but probably the only effective way to ensure that any incentive ratemaking for natural gas pipeline transporation services will be consistent with applicable legal requirements and the Commission's competitive policy objectives in the Mega-NOPR.

I encourage all interested parties to address the linkage issue in their initial and reply comments.

3. Straight Fixed Variable

The NOPPS includes a discussion about the current rate design of natural gas pipelines and the Commission's proposal in the Mega-NOPR "to adopt a different rate design methodology in which the pipeline's fixed costs would be recovered solely through a demand or reservation fee, unless the parties otherwise agree (and) (t)he Commission specifically requests comments on how the policy proposal here relates to its rate design methodology proposal in Docket No. RM91–11–000." (Slip op. at 11.) Of course, this is a rather obtuse way of inviting commenters to tell the Commission *again* that the Straight Fixed Variable (SFV) proposal in the Mega-NOPR (assuming it survives in the final rule) would leave the pipeline with no incentive to maximize throughput. And, further, that the fix for that problem really should be incentive regulation for transportation rates, *ergo*, we must adopt the instant PPS. And, oh by the way, we better hurry up to adopt this PPS in order that incentive ratemaking can be included in the Mega-NOPR restructuring proceedings to ensure that pipelines have an incentive to maximize throughout, even under SFV if adopted in the final rule.

For those of us poor (and probably perverted) souls who sadly delight in the analytical chess game of the regulatory process, that line of attack is a fascinating gambit. Of course, the whole issue of maxmizing throughput goes to the heart of *allocative* efficiency, rather than *productive* efficiency. If allocative efficiency is the primary objective here, then that is the subject of the 1989 Rate Design Policy Statement and very much the focus of the Mega-NOPR. Indeed, if maximizing throughput is a serious concern, then as discussed earlier, the *existing* Order No. 436 rate structure for transportation services with maximum rates subject to non-discriminatory, selective discounting provides a *perfect* answer, because the discounting feature (i) achieves allocative efficiency by maximizing throughput *and* at the same time, (ii) achieves productive efficiency by creating a decided incentive to cut costs in providing transportation services in order to maximize profits realized from discounted volumes. And, candidly, that is the essence of the debate which has continued since the early days of the Task Force with regard to the fundamental need for incentive ratemaking for natural gas transportation services.

In any event, all interested parties should address the question at page 11 with this explanation in mind, after checking the final rule to see whether and, if so, how the SFV proposal in the Mega-NOPR fared in the final rule. And, if SFV is retained in some form, what effect does that have on (i) the allocative efficiency and (ii) the productive efficiency of pipeline transportation services? And, then how would incentive regulation for those services affect those separate efficiencies generally? And, more specifically, is there any resulting justification for replacing current transportation rate policies with incentive ratemaking, apart from the aforementioned gambit?

C. Experimental Nature of the Proposal

There has been some suggestion that the intention of the PPS really is only to commission "experiments" in incentive ratemaking for natural gas pipeline transportation services, in order to build a body of knowledge for further policy development in this area. Traditionally, the Commission has used experiments on occasion to develop operating experience and obtain empirical data for such purposes. The Southwest Bulk Power Experiment and the Western Systems Power Pool initiative are examples of such experiments. The Commission articulated at the outset the objectives it hoped to achieve, set up criteria for evaluation, provided for the collection of data for analysis, and used outside consultants to provide an independent analysis of the data and an objective assessment of the results of the experiment.

Then, the Commission carefully considered the results of the analysis, the conclusions of the experts, and the recommendations of the participants, other interested parties and the Commission staff *before* deciding how to proceed with a more general policy. In the Western Systems Power Pool case, for example, the Commission extended the experiment at the request of the parties, when it became clear that certain delays had prevented the timely collection of adequate data for analysis. And, there was considerable debate in that case at the Commission about the degree of transmission pricing flexibility necessary to achieve the bulk of the consumer benefits.

It is also noteworthy that courts reviewing such traditional experiments, including the Western Systems Power Pool, have been willing to provide the Commission with considerably more latitude than might otherwise be available under a typically more rigid application of statutory standards, such as "just and reasonable" for natural gas pipeline rates. Courts in those cases have emphasized, however, that to qualify for such greater latitude the Commission must be quite precise in establishing the objectives, evaluation criteria, data collection, analytical process, monitoring mechanism, and specific review procedures, such as in Western Systems Power Pool.

The legal discussion in the original Western Systems Power Pool order set out the proper standard for supporting experimental departures from traditional cost-based rates. Citing to *Maryland People's Counsel V. FERC*, 761 F.2d 768,779 (D.C. Cir. 1985), we said, "[T]he law] demand[s] an articulation * * * of the Commission's reasons for believing that more harm than good" will result from the experiment. *Pacific Gas & Electric Company*, 38 FERC ¶

61,242 at 61,793 (1987). (For the full text of that discussion, see Attachment D to this opinion).

By all of those legal and past practice indicia, this PPS is decidedly not an "experiment" *per se* for purposes of any analysis or public comment. While the Task Force may have in mind the notion of having a series of incentive ratemaking mechanisms in place on any number of natural gas pipelines across the country as some form of grand "experiment" to see how they all work, that is not tantamount to a true regulatory "experiment" in legal or policy terms. Rather, as the attempted linkage to the Mega-NOPR restructuring cases make clear, the clear and unambiguous direction is to make any one of several incentive ratemaking mechanisms available to *all* pipelines at the same time, *i.e.*, mid-1992 for incorporation in those restructuring proceedings. That may be a "grand experiment" in continental terms, but it quite simply is not an "experiment" in traditional regulatory terminology.

VI. Substantive Merits of the PPS

A. Regulatory Standards

The PPS includes a discussion of Regulatory Standards involving (1) incentive mechanisms must be prospective, (2) participation must be voluntary, (3) incentive mechanisms must be understood by all parties and, perhaps most significant (4) benefits to consumers must be quantifiable. (Slip op. at 11–13.)

In order to assess these proposed standards, my office has attempted to review, as best time allows, the FCC experience and AT&T price cap regulation. The middle of 1990 was the end of the first year of price cap regulation pursuant to the landmark order issued by the FCC, after the original NOPR was re-noticed by the Bush Administration appointees. In that first year, the FCC calculated that AT&T customers benefited by $727 million in *reduced* rates under price cap regulation.

AT&T services are now divided into 17 separate categories. There are limits on increases in any given category each year, and AT&T is also required to reduce the average residential rate by 2 percent annually in real terms. The caps on each group of services (1. residential and small business; 2. 800 service, and 3. all other business services) also are adjusted to reflect changes in exogenous costs, productivity and rate restructuring. The following discussion is based on a report to the House Subcommittee on Telecommunications and Finance by the FCC Common Carrier Bureau in October, 1990 entitled "AT&T's Performance Under Price Cap Regulation," which is one of several documents we have obtained from the FCC for review of their program.

After one year, service prices were, on average, 4.3 percent *lower*. Prices in 15 of the 17 service categories decreased and the largest increase was less than .3 percent. Adjustments in the price caps after one year reduced the limits in all three baskets—down 2.4 percent in basket 1; down 2.9 percent in basket 2; and down 1.6 percent in basket 3. In addition, the FCC allowed 12 filings for below-band pricing of AT&T offerings to take effect after determining that they met the "average variable costs" test standard to guard against predatory pricing. AT&T earnings remained within their historic benchmark and yet were sufficient to support needed investments in service and modernization during the first years of price cap regulation, according to the FCC, with a rate of return of 11.62% during the period.

Significantly, the FCC in its order established a number of key measurements to monitor the effectiveness of price cap regulation. They included new and restructured services, as a measure of innovation and efficiency, where AT&T introducted 27 new services in the first year. The AT&T market share was monitored to determine, if other interstate carriers could continue to compete. The quality of service was monitored specifically to guard against undetected service degradation.

The FCC also reviewed the technical standards contained in all AT&T tariffs and monitored the customer complaint process maintained by the Enforcement Division. The FCC also tracked capital expenditure variations to assess the potential impact on network capacity, service quality, and facilities modernization, to ensure that modernization and network upgrading proceed apace across the system. Additionally, the FCC order provides for an ongoing "reconsideration process" for future adjustments as required, as well as the possibility of changes if the ongoing monitoring of tariffs and new data indicate problem areas. Finally, the FCC will conduct a comprehensive reexamination of the price cap regulation at the end of the first three years, in mid-1992.

I submit this summary of the FCC's first year of experience with AT&T price cap regulation to point out the highly complex approach adopted by the FCC after almost three years of analysis and two separate industry wide NOPRs. I also recognize fully that this particular price cap regulation remains very controversial in many quarters where the FCC's approach has been challenged and criticized. And, of course, one could argue, "see it really can work for the benefit of ratepayers, to enhance competition, etc., etc."

But the real point is that it takes a very specific and detailed approach (we can provide citations to the relevant FCC documents for anyone wanting to study them) in order to ensure that ratepayers, in fact, benefit from any particular incentive ratemaking proposal. The PPS may be a good concept or "Foundation" discussion to spur further analysis and debate, but it does not strike me as anywhere near specific-enough or detailed-enough to support a decision to implement incentive ratemaking at this point on any generic basis for interstate natural gas pipeline transportation services.

B. Productive Efficiency

The PPS concludes that none of the current incentive approaches used by the Commission has a strong long-term effect on costs. Apart from general theory, we do not have any empirical data to support that conclusion for interstate pipelines. For example, the issue of how best to establish throughout projections reflecting discounted volumes is a hotly contested matter in most rate cases and much debated by the Commission during and since the 1989 Rate Design Policy Statement, as discounted volumes have become increasingly significant in aggregate totals. And, as discussed much earlier, selective discounting appears to have led to significant pressures to cut costs throughout the industry.

The PPS then asserts that incentive regulation differs from traditional regulation in that it fosters long-term productive efficiency, which the PPS declares as the primary objective of the proposed policy, citing to the 1989 Research Report of the Commission's Office of Economic Policy (OEP). Whether incentive regulation for transportation services of natural gas pipelines will, in fact, achieve any demonstrable level of incrementally increased productive efficiency in the post Mega-NOPR era, therefore, becomes a crucial threshold analytical issue, (assuming, of course, that there is a consensus that the productive efficiency of those services require such improvement under current policy, such as discounting of interruptible transportation services discussed above). Thus, the analysis and conclusions of the 1989 OEP Report

become directly relevant to the substantive merits of the PPS.

A May, 1991, NRRI Research Report entitled, "A Review of FERC's Technical Reports on Incentive Regulation" provides a useful analysis of the 1989 OEP report. At my request, OEP provided the Commission with a response to the NRRI report in the best spirit of analytical discourse about this issue. Upon further review and study, I remain impressed with the attached conclusion of the NRRI report and the critical analysis it presents.

When one compares the PPS with the NRRI report, there are many substantive similarities with regard to the particular aspects of the incentive ratemaking alternatives discussed in the paper. At the same time, however, the NRRI report reaches *different* conclusions in terms of (1) the cost cutting incentives under existing traditional regulation and competitive initiatives already underway (and also contemplated by the Mega-NOPR for interstate pipeline and by the Commission's electric power regulatory policies for electric utilities) and (2) the likely benefits for ratepayers under the incentive proposals, as opposed to the regulated companies.

I would still like to see an effort by the Commission to reconcile those differences between the NRRI report and the PPS on an objective analytical basis. For example, it might be appropriate to invite the NRRI staff members to review the PPS and address the differing conclusions. Failing that, I would separately approach NRRI for further discussion of their report and conclusions, as can any Commissioner.

C. Some Possible Mechanisms

The PPS discusses in general conceptual terms five possible incentive mechanisms for the transportation services if interstate natural gas pipelines, including: (1) Automatic rate changes, (2) performance targets, (3) flexible pricing, (4) benefit sharing, and (5) consumer welfare bonus.

As discussed earlier, the Michigan State Regulatory Incentives Study, the NRRI Report, the Berg and Jeong study, and the New York PSC Issues Paper, among others, provide useful reference material related to the various incentive mechanisms, including the five discussed in the PPS.

I also believe that the New York PSC Issues Paper provides a useful basis as a reference frame for how to analyze the various ratemaking options and the resulting Alternative Regualtory Strategies, including the identified advantages and disadvantages. I believe the Issues Paper should serve as a model for how the Commission should proceed to flesh out the options and Alternative Strategies for electric utilities, oil pipelines, and natural gas pipelines, with particular attention to the specific jurisdictional rate or service to be considered for incentive ratemaking, as discussed above. I think such an analysis would be a useful step before we decide to adopt the largely, otherwise unsupported conclusions in the proposed policy statement.

I also should note a new study by Brown, Williams, Quinn & Chinn, Inc., "An Overview of Incentive Ratemaking Mechanisms: Application to Interstate Natural Gas Pipelines," December, 1991. This "White Paper," according to the Foster Report of February 27, 1992 (Report No. 1865–p.2), "was apparently circulated in anticipation of a discussion of a proposed policy statement on incentive ratemaking at FERC's open meeting on February 26," but the item was removed from the meeting agenda, so the discussion did not take place. I personally have no knowledge about how or why the White Paper was prepared by Brown, Williams, Quinn & Chinn, Inc., nor anything about the timing of the white paper's release. According to the Foster Report:

> The white paper describes five workable mechanisms to design and implement incentive rates. According to the study, "these mechanisms result in win-win outcomes where both the pipeline and its customers stand to gain economic benefits." All reflect "the same philosophy of offering the pipeline a financial incentive to achieve higher productivity." Five mechanisms were explored because "pipeline systems are so different in their mix or services, cost structure and degree of completion that no single incentive rate design will work on all of them." For that reason, the paper declared, incentive rates could be implemented through individual rate case filings under NGA Section 4, not through a generic FERC rulemaking.
>
> With respect to each of the five incentive rate mechanisms, the white paper described how rates would be set, the flexibility to change rates, the impact on frequency of rate cases, benefits, and applicability to pipelines in different states of development. Examples were also provided.

The five "workable" mechanisms described in the report include: (1) rate cap regulation, (2) zone of reasonableness, (3) bounded rates, (4) sharing of efficiency gains, and (5) incentive rate of return. Those mechanisms in varying degrees relate analytically to the five possible mechanisms set forth in the PPS, although in some cases there is a mix of competitive and non-competitive factors inconsistent with the underlying premise of the PPS that the incentive regulation is solely for non-competitive activities, such as pipeline transportation. I mention the Brown, Williams, Quinn and Chinn report in order that interested parties will have the benefit of this recent, natural gas pipeline-specific analysis by that knowledgeable consulting group. We are still reviewing the report at this time to assess its analysis of the incentive mechanisms.

D. The Viking Case

The most recent decision of the Commission regarding incentive regulation occurred in *Viking Gas Transmission Company* (57 FERC ¶ 61,417) (*Viking*), cited in the PPS for the proposition that an incentive rate proposal must have a quantifiable benefit for consumers. The Commission rejected the company's "proposed incentive rate scheme because, *inter alia*, it seemed to guarantee that future rates would be higher than they would otherwise be under traditional embedded cost ratemaking." (Slip op. at 13, n.11.) Nevertheless, the rejection of Viking's mechanism was without prejudice to its refiling at a later date and, to that end, a technical conference was to be established to explore other incentive mechanisms (as well as an FT bidding program) that might be acceptable in the future.

Viking provides an interesting and valuable case study, in my judgment, of the potential problems associated with incentive ratemaking for natural gas pipelines, particularly in the context of the Mega-NOPR restructuring proceedings. I believed the protestors raised concerns which justified summary rejection of Viking Gas Transmission Company's (Viking) so-called "incentive" and "market oriented" proposals on the substantive merits. The order included questions in Appendix C which would elicit information to respond to the protestors' and the Commission's concerns. I would much prefer to have the answers to such questions *before* accepting any incentive rate proposals in the future. And, I suggest that a FPS should impose such a requirement.

First, although the pipeline had chosen to term its proposal an "incentive" mechanism, there is no incentive for the pipeline to reduce costs and no showing of increased efficiency. As proposed by Viking, this "incentive rate" proposal is just another way to increase revenues to the pipeline without any increase in efficiency or in the quality of services. I see no justification to depart from traditional cost of service ratemaking *unless* there is a clear indication that the customers will be better off under the new proposal; *i.e.* lower rates for the

same quality service or higher quality service for the same rates otherwise established under current policy. As pointed out by Northern Minnesota Utilities (NMU), "The QRAM guarantees recovery of continually escalating rates at a time when Viking's rates should be decreasing to reflect its steadily declining rate base."

Second, Viking proposed mark-oriented rate structures for new firm transportation (FT) capacity which becomes available and for interruptible transportaion (IT) capacity. The Commission has permitted pipelines to depart from traditional cost of service rates and charge market based rates for services for which it has shown that the pipeline does not exercise significant market power. However, Viking had neither shown, nor attempted to show, that it does not have significant market power over its transportation capacity. The Commission should not accept such proposals *until* that determination is made. Again, I do not see how the customers will be better off under these proposals. In addition, as the NSP Companies note in their protest, these market-oriented mechanisms would "*artificially raise the price of transportation at the expense of producer netbacks*, thus discouraging gas exploration to the detriment of the consumers and the nation's energy policy." (emphasis added)

Third, the Commission summarily rejected Viking's proposal to design maximum FT rates on the basis of replacement costs. In a non-competitive environment, rates should not be designed to recover more than the original construction cost incurred by the pipeline. As a practical matter, the use of replacement costs here to establish a so-called "cost based cap" results in a maximum rate which is so high as to not provide any reasonable constraint on prices. The end result, again, is unreasonably high rates with no incrase in efficiency or quality of services. The NSP Companies point out in their protest that the Commission has previously rejected the use of replacement costs for the design of open-access transportation rates, citing to *Bayou Interstate Pipeline System*, 41 FERC ¶ 61,086 (1987).

Fourth, Viking had mixed a so-called "incentive" proposal with a market based proposal for the same services. Not only would shippers be required to bid for new FT capacity, subject to an unreasonably high so-called "cost based" cap, their bid would then escalate through the application of the QRAM, thus further enhancing Viking's revenues for no efficiency gains.

It is possible that these rate mechanisms could have been put into effect, subject to refund, after the five month suspension period. However, I did not believe that the refund obligation provided adequate protection to Viking's customers against the severe disruptions which would be caused by, in effect, permitting a monopoly to charge "market based" rates. Therefore, I supported summary rejection of Viking's "incentive" and "market oriented" proposals.

I would note that the incorporation of incentive ratemaking proposals in the restructuring proceedings and any subsequent settlements could deny the Commission as a practical matter the flexibility to suspend or reject a proposal similar to that of Viking. To that extent, the discussion in the conclusion of the NOPPS about scrutinizing closely any incentive ratemaking proposal, rejecting any proposal not consistent with the goals of the PPS, and suspending others for the full statutory period could ring hollow in practice, as argued by NGSA/IP in their reply comments to the Mega-NOPR. That settlement circumstance also could frustrate the opportunity for the Commission to require the analysis and information contained in Appendix C to the *Viking* order and deemed necessary by the Commission there for our review *before* we would act on any such Viking proposal.

As noted above, I believe the Commission in any FPS should adopt a requirement that any filing of an incentive ratemaking proposal must include the same detailed type of information and analysis specified in the Appendix C for Commission review prior to any decision on the proposal. Such a requirement would enable the Commission to assess whether there was any quantifiable consumer benefit, particularly in the form of a rate reduction from otherwise applicable rates under current policy, among other features of the proposal. I request that commenters consider such a requirement, as well as the concomitant requirement that incentive ratemakings be included only in separate dockets outside of the restructuring proceedings, so we could actually consider the data adduced by the information requirement.

For the convenience of the interested parties, I have attached a copy of Appendix C of the Viking order (Attachment C). I also would note that certain of the questions in Appendix C are quite relevant to the analysis of the PPS, as well as any specific incentive ratemaking proposal that might be filed in response to a FPS.

E. Specific Questions

The PPS includes a wide ranging discussion of current ratemaking policies and suggestions about the potential benefits of incentive ratemaking, as an alternative to those policies where competitive forces are inadequate to support market-based options. The following comments and questions are intended to provide interested parties with an analytical basis for approaching key aspects and factors. The page citations are to the slip opinion.

(1) The NOPPS states that a larger interval between rate periods gives the utility added incentives to minimize costs and operate more efficiently (slip o. at 3).

However, the Commission's current three-year rate requirement is only applicable to companies which have a Purchased Gas Adjustment (PGA) clause for tracking gas costs. In the Mega-NOPR, the Commission has proposed to issue pipelines blanket sales certificates under which sales would be made at market-based prices thus eliminating the need for a PGA. As a result, pipelines will not be subject to a mandatory three-year review. Would this elimination of the three-year rate review provide the pipeline with sufficient incentives to minimize costs and operate more efficiently?

(2) In addition, the NOPPS states "Lengthening the period between rate cases increases the incentive for utilities to take risks associated with aggressive cost cutting measures." (Slip op. at 10.)

What type of risks might the pipeline take to aggressively cut costs? Can the pipeline be expected to take such risks without negatively impacting on the current quality of service or reliability of service? Could the "incentive to aggressively cut costs" slow the implementation or adoption of the type of new technology which will be beneficial, if not necessary, for the post-Mega-NOPR restructuring of the natural gas industry? How might the Commission address these concerns in its review of individual incentive rate proposals?

(3) The NOPPS states that proposals must contain standards to measure quality of service and incentives to maintain it. (Slip op. at 14.)

What are some standards the Commission might expect to be included to measure quality of service? What sort of incentives might be proposed to ensure current quality of service is maintained? Should not the industry be concerned with improving quality of service and reliabilty in order to improve the current perception in certain markets that natural gas is less reliable than other energy sources?

(4) The Brown, Williams, Quinn and Chinn white paper discussed how difficult developing a productivity index can be and appears to conclude that setting the level would be a matter of negotiation.[2] Please comment on how such indices may be developed. Would negotiating a productivity index provide the pipeline with additional leverage in the upcoming restructuring proceedings? How might the Commission ensure that an index that is the result of negotiations is a fair measure of productivity and won't merely serve to provide the pipeline with additional revenues for the same costs and same services?

(5) The NOPPS states that incentive proposals may contain new techniques for flexible pricing. In response to my questions regarding the value of flexible pricing in relation to other incentive rate mechanisms, staff responded that flexible pricing is one way to achieve greater allocative efficiency. However, staff stated that it is not an integral part of incentive regulation, which is focused on productive efficiency (*i.e.*, cost reduction measures, such as reducing O&M). In staff's opinion, flexible pricing is valuable, but it has little to do with getting pipelines to minimize costs. Rather, it has everything to do with getting pipelines to use their existing facilties most efficiently (*i.e.*, tailoring services and prices to be responsive to the needs and operating characteristics of individual customers). In addition, staff recognized that selective discounting, one type of flexible pricing, has been valuable in getting pipelines to increase volumes on under-used systems and customers receiving the discounts have certainly benefitted from lower rates. However, staff asserted that this is not the same as saying that pipelines have cut costs as a result of selective discounting.

Flexible pricing in the context of the NOPPS (slip op. at 19) seems to mean the ability of the company to charge rates above the current maximum cost based rate as necessary to ration capacity. How might the Commission analyze flexible pricing proposals to ensure that they don't result in excessive cost shifting between captive and non-captive customers or excessive revenues to the pipelines? Is it true that pipelines have not cut costs as a result of selective discounting?

(6) Flexible pricing raises additional equity issues. Staff explained to the Task Force that some firms have so few costs left (due to highly depreciated rate bases) that they cannot raise rates high enough to retain capacity without over-recovering costs. Conversely, other are so seldom constrained that their rates are always higher than needed to ration capacity. That tends to raise a problem of equity, not efficiency, raising the question of who is left paying for surplus capacity. Although raised to the Task Force, staff later said this is not a problem intended to be addressed by incentive regulations as proposed in the NOPPS. I would like industry comment concerning this equity issue and how it might be negatively or positively impacted by incentive regulation and how the Commission might address these concerns. Are there other equity issues involved in Incentive Regulation or Flexible Pricing mechanisms which the Commission should address when analyzing these proposals?

(7) In its discussion of Consumer Welfare (slip op. at 21) the NOPPS seems to say that it may not be possible to add value to the pipeline customers' quality of service. If so, then logically incentive ratemaking may only lead to higher prices for the same quality of service. I would like comments on whether that is true, and if so, what benefit is there to the consumer in adoping incentive rate proposals?

V. Conclusion

While I strongly would have preferred to defer action on incentive regulation of natural gas pipeline tranportation services until after implementation of the Mega-NOPR Final Rule, I am willing reluctantly to support a proposed policy statement subject to meaningful public comment as a compromise. I have attempted in this separate opinion to set forth as much of the analytical thought which has occasioned our internal debate about this subject as time would allow. Hopefully, this discussion will provide some measure of analytical foundation for interested parties to assess the PPS, draw their own conclusions, and file public comments, if they so choose.

At the March 11 Commission meeting, my distinguished colleague, Commissioner Terzic recounted, as only he could, an old Serbian joke. He said that this NOPPS reminded him of the huge elephant that goes into extended labor and after much travail brings forth a meek little field mouse. I would most respectfully suggest that interested parties would be well served to approach the analysis with the anticipation that this will be one Serbian mouse that roars thunderously before these proceedings are over.

Seriously, though, the debate about the incentive regulation issue is now joined publicly. I sincerely commend Commissioner Terzic for his concerted and tenacious efforts to advance the debate to this point. And, I look forward with great interest to the public comments adduced by the instant NOPPS.

For these reasons, I concur.

Charles A. Trabandt,

Commissioner.

BILLING CODE 6717-01-M

[2] The NOPPS discussed productivity adjustmehts on p. 15 of the slip op.

Office of Civilian Radioactive Waste Management

Availability of "Report of Early Site Suitability Evaluation of the Potential Repository Site at Yucca Mountain, Nevada"

AGENCY: Department of Energy.

ACTION: Notice of availability.

SUMMARY: The "Report of Early Site Suitability Evaluation of the Potential Repository Site at Yucca Mountain, Nevada," has been published and is available for public review. The report may be obtained as provided in "**ADDRESSES**" below.

DATES: Written comments on the "Report of Early Site Suitability Evaluation of the Potential Repository Site at Yucca Mountain, Nevada," must be received on or before June 15, 1992, in order to ensure full consideration.

ADDRESSES: Persons wishing to review the "Report of Early Site Suitability Evaluation of the Potential Repository Site at Yucca Mountain, Nevada," may obtain a copy by contacting the Project Manager, U.S. Department of Energy, Yucca Mountain Site Characterization Project Office, suite 200, 101 Convention Center Drive, Las Vegas, Nevada, 89109. Written comments should be addressed to the Project Manager, Yucca Mountain Site Characterization Project Office, at the above mentioned address. Comments received are available for public inspection at the Yucca Mountain Site Characterization Project Office.

FOR FURTHER INFORMATION CONTACT: Jeremy M. Boak at the above address (telephone 702-794-7588 or FTS 544-7588).

SUPPLEMENTARY INFORMATION: This study evaluated the technical suitability of Yucca Mountain, Nevada, for

characterization as a potential site for a mined geologic repository for the permanent disposal of radioactive waste. In the judgment of the team conducting this evaluation, the presently available evidence continues to support the findings of the Environmental Assessment (DOE, 1986) that the site is suitable for site characterization. This evaluation, however, found that additional information is needed in a number of specific areas before a final recommendation can be made by the Secretary of Energy to the President regarding the suitability of the site for repository development.

The judgments presented in this report are those of the team that conducted this study, referred to as the "Core Team," and are not findings or conclusions made or endorsed by the U.S. Department of Energy (DOE). The Core Team included representatives from those organizations that are participating with the DOE in characterizing and evaluating the Yucca Mountain site. To ensure that the evaluation was technically sound and logically consistent, the Early Site Suitability Evaluation Report underwent two formal reviews. The first review was performed by technical personnel within the Yucca Mountain Site Characterization Project who were not involved in preparing the Early Site Suitability Evaluation Report and its site suitability evaluations. The second review was conducted by a panel of experts (university faculty members and private consultants) who have had only minimal involvement, and in most cases, no specific involvement with the geologic repository program.

John W. Bartlett,

Director, Office of Civilian Radioactive Waste Management.

BILLING CODE 6450-01-M

Office of Fossil Energy

[FE Docket No. 92-02-NG]

Bray Terminals, Inc.; Application for Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy of the Department of Energy (DOE) gives notice of receipt on January 15, 1992, of an application filed by Bray Terminals, Inc. requesting blanket authorization to import from Canada up to 43.8 Bcf of natural gas over a two-year period commencing with the date of first delivery. Bray Terminals, Inc. intends to use only existing pipeline facilities within the United States and states that it will submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 20, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Room 3F–056, FE–50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9482.

FOR FURTHER INFORMATION CONTACT:

Charles E. Blackburn, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–7751.

Diane Stubbs, Office of Assistant General Counsel, for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: Bray Terminals, Inc. is a New York corporation with its principal place of business in Glens Falls, New York. Bray Terminal, Inc. is engaged in the petroleum industry, including the sale of lubricating oil and equipment, for the commercial, industrial, and retail sector. Bray Terminals, Inc. proposes to import gas from a variety of Canadian suppliers for sale to various United States customers, which might include end-users, LDC's, and other pipeline companies. The specific terms of each transaction, including price, would be negotiated in response to prevailing market conditions.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties, especially those that may oppose this application, should comment on the issue of competitiveness as set forth in the policy guidelines regarding the requested import authority. The applicant asserts that imports made under the proposed arrangement will be competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notice of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notice of intervention, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is schedule, notice will be provided to all parties. If no party request additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of the Bray Terminal, Inc. applcation is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on March 16, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–6555 Filed 3–19–92; 8:45 am]

BILLING CODE 6450–01–M

[FE Docket No. 92–21–NG]

Exxon Corp.; Application for Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application filed on February 20, 1992, as revised on February 25, 1992, by Exxon Corporation (Exxon) requesting blanket authorization to import up to 36.5 Bcf of natural gas per year over a two-year period beginning on April 26, 1992, the day after the date on which Exxon's current authority to import natural gas from Canada expires.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 20, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Peter Lagiovane Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6116.

Diane Stubbs, Office of Assistant General Counsel, for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: Exxon is a publicly owned corporation incorporated in the State of New Jersey with offices in Houston, Texas. On December 8, 1989, the DOE, in Opinion and Order No. 357, authorized Exxon to import up to 73 Bcf of natural gas from Canada over a two-year term beginning on the date of first delivery (1 FE Para. 70,272). The first import under that authorization took place on April 26, 1990.

In its February 20, 1992, application, Exxon requests that this authorization be further extended for two years. Exxon proposes to import the gas for its own account and as agent for U.S. purchasers of natural gas from Esso Resources Canada, or its affiliates, or other individual producers, producer groups and associates, or pipeline companies. In addition, Exxon stated it will only transport the imported natural gas through facilities that exist at the time the import authorization is issued. Exxon stated it would continue to comply with the quarterly reporting requirements contained in its previous blanket authorization.

The decision on the request for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the market served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. Exxon states that the proposed imports would be purchased under market-responsive arrangements of no more than two years in length. The specific terms of each transaction will be negotiated among the parties based upon market conditions. Exxon asserts such transactions will only take place to the extent that sellers can provide short-term or spot volumes, purchasers require such volumes, and prices remain competitive. Further, Exxon notes that Canada has been an extremely stable source of natural gas and there has been no instance of a major supply interruption that would call into question the reliability of the imported gas supply. Parties opposing Exxon's request for import authorization bear the burden of overcoming these assertions.

All parties should be aware that if DOE approves this requested blanket import authorization, it may designate a total authorized volume for the two-year term, or 73 Bcf of natural gas, rather than the 36.5 Bcf per year requested by Exxon, in order to maximize the applicant's flexibility of operation.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided,

such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Exxon's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 13, 1992.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs Fossil Energy.

BILLING CODE 6450-01-M

Office of Fossil Energy

[FE Docket No. 92-11-NG]

Highland Energy Co.; Application for Blanket Authorization To Export Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Mexico.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on February 5, 1992, of an application filed by Highland Energy Company (Highland) requesting blanket authorization to export to Mexico up to 75,000 MMBtu per day of natural gas over a two-year term beginning on the date of first delivery. Highland intends to use existing pipeline facilities on the U.S.-Mexican border, and states it will submit quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act (NGA) and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 20, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION:

Peter Lagiovane, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-8116.

Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Highland is a Texas corporation with its principal place of business in Dallas, Texas. Highland proposes to export natural gas to Mexican purchasers for varying terms but not to exceed one year. The identity of actual purchasers is presently unknown but would be reported in Highland's quarterly filing with DOE.

The decision on the application for export authority will be made in accordance with section 3 of the NGA and the authority contained in DOE Delegation Orders Nos. 0204-111 and 0204-127. In deciding whether the proposed export is in the public interest, domestic need for the gas will be considered, and any other issues determined to be appropriate. Highland asserts there currently exists no national or regional need for the gas proposed for export. Moreover, Highland notes that the short-term nature of the requested export authorization protects against the possibility that a national or regional need for these supplies might develop in the future. Parties opposing the arrangement bear the burden of overcoming these assertions.

All parties should be aware that if DOE approves this requested blanket export authorization, it may designate a total authorized volume for the two-year term, or approximately 54.8 Bcf of natural gas, rather than the 75,000 MMBtu per day requested by Highland, in order to maximize the applicant's flexibility of operation.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Highland's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 13, 1992.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Program, Fossil Energy.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-4116-5]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 2, 1992 through March 6, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 5, 1991 (56 FR 14096).

Draft EISs

ERP No. D-AFS-F02020-OH Rating EC2, Wayne National Forest, Amendment 7 Land and Resource Management Plan, Oil and Gas Leasing, Implementation, Application for Permit Drilling and Section 404 Permit, Several Counties, OH.

Summary: EPA expressed concerns regarding potential environmental impacts associated with the preferred alternative. Additional information on mitigation for noise, water, wetland and wildlife impacts and a contingency plan for oil spills should be provided in the final EIS. EPA also expressed environmental objections to several of the high-development scenario alternatives in the draft EIS.

ERP No. D-AFS-J65133-UT Rating EC1, Roundy Reservoir Area Timber Sale and Road Construction, Implementation, Dixie National Forest, Aquarius Plateau, Escalante Ranger District, Garfield County, UT.

Summary: EPA expressed environmental concerns regarding the viability of old-growth habitat units under the proposed management criteria.

ERP No. D-COE-C32034-00 Rating EC2, Delaware River Comprehensive Navigation Channel Improvement, Beckett Street Terminal in New Jersey through Philadelphia Harbor, Implementation, Several Counties, NJ, DE and PA.

Summary: EPA has concerns regarding the proposed project's alternatives, sediment sample results, water quality and dredging operations. Accordingly, additional information is needed in the final EIS to address these concerns.

ERP No. D-COE-J50008-ND Rating LO, Lake Oahe Bridge Construction, midway between Bismarck, and Mobridge, SD, Funding, Emmons and Sioux Counties, ND.

Summary: EPA recommended that greater emphasis be placed on restoring old wetlands and creating new ones.

ERP No. D-DOT-A52168-00 Rating EC2, Commercial Reentry Vehicles Launched into and from Space, Licensing.

Summary: EPA expressed concerns for the possible effects of ablation on the stratospheric ozone layer and would like to see the section on air pollutants clarified.

ERP No. D-IBR-J31022-UT Rating EU2, Price-San Rafael Rivers Unit of the Colorado River Water Quality Improvement Program (CRWQIP) and the on-farm Colorado River Salinity Control Program (CRSC), Improvements, Funding and Possible Section 404 Permit, Carbon, Emery Counties, UT.

Summary: EPA has identified adverse environmental impacts and has concerns regarding the magnitude of projected wetland losses associated with the "on-farm" portion of the project, sufficiency of impact disclosure, and the narrow range of action alternatives among other issues. The DOI Bureau of Reclamation has proposed that project authorization include mitigation of the on-farm wetland losses. This could satisfy EPA's concern with the project.

ERP No. D-IBR-L28005-OR Rating EC2, Milltown Hill Project, Dam and Reservoir Construction and Operation, Funding and Implementation, Elk Creek Subbasin, Umpqua River Basin, Douglas County, OR.

Summary: EPA continues to have environmental concerns based on the potential for adverse water quality effects resulting from secondary growth and effects on already depleted anadromous fish stocks. Additional information is needed to describe project monitoring, describe the effectiveness of mitigation measures, describe the detailed wetlands mitigation plan, and clarify the ability of the local government to deal with the induced growth resulting from this project.

ERP No. D-USA-E85040-MS Rating EC2, Camp Shelby Continued Military Training Activities, Use of National Forest Lands, Special Use Permit, Desoto National Forest, Forrest, George and Perry Counties, MS.

Summary: EPA expressed environmental concerns regarding the proposal to upgrade mechanized training at Camp Shelby, MS. The final EIS and ROD should describe and commit to design modification and

mitigation measures, necessary to offset wetlands, water quality, air quality and noise impacts.

ERP No. DS–COE–C32034–00 Rating EC2, Delaware River Comprehensive Navigation Channel Improvement, Additional Information, Beckett Street Terminal in New Jersey through Philadelphia Harbor, Implementation, Several Counties, NJ, DE, PA.

Summary: EPA has concerns regarding the proposed project's alternatives, sediment sample results, water quality and dredging operations. Accordingly, additional information is needed in the final EIS to address these concerns.

Final EISs

ERP No. F–CDB–C80019–NY Northeast Middle School Project Construction and Operation, Site Approval and CDB Grant, City of Rochester, Monroe County, NY.

Summary: EPA has no objections to the implementation of the proposed project.

ERP No. F–FHW–F40314–WI WI–TH–67/Oconomowoc Bypass Corridor Improvement and Relocation, Summit Avenue to existing WI–TH–67 near Lang Road, Funding and Section 404 Permit, City of Oconomowoc, Waukesha County, WI.

Summary: EPA continues to express concern for water quality impacts due to bridge construction and highway run-off, affects on fish spawning areas, and insufficient information on secondary development. EPA recommended additional mitigation measures be included in project design.

Dated: March 17, 1992.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

BILLING CODE 6560–50–M

[OPP–100103; FRL–4050–6]

Integrated Laboratory Systems; Transfer of Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Integrated Laboratory Systems (ILS) has been awarded a contract to perform work for the EPA Office of Pesticide Programs, and will be provided access to certain information submitted to EPA under FIFRA and the FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transferred to ILS consistent with the requirements of 40 CFR 2.307(h)(3) and 2.308(h)(2). This transfer will enable ILS to fulfill the obligations of the contract and serves to notify affected persons.

DATES: ILS will be given access to this information no sooner than March 25, 1992.

FOR FURTHER INFORMATION CONTACT: By mail: Clare Grubbs, Program Management and Support Division (H7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 212, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 305–7460.

SUPPLEMENTARY INFORMATION: Under Contract No. 68–C0–0059, ILS will provide technical support in the review and development of health risk assessment methodologies in order for the EPA to better assess the health hazards from exposure to chemicals in the environment. This contract involves no subcontractor.

The Office of Pesticide Programs has determined that access by ILS to information on all pesticide chemicals is necessary for the performance of this contract.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 4, 6, and 7 of FIFRA and under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(2), the contract with ILS prohibits use of the information for any purpose other than purposes specified in the contract; prohibits disclosure of the information in any form to a third party without prior written approval from the Agency; and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release and to handle it in accordance with the FIFRA Information Security Manual. In addition, ILS is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to this contractor until the above requirements have been fully satisfied. Records of information provided to this contractor will be maintained by the Project Officer for this contract in the EPA Office of Pesticide Programs.

All information supplied to ILS by EPA for use in connection with this contract will be returned to EPA when ILS has completed its work.

Dated: March 5, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

BILLING CODE 6560–50–F

[OPP–50738; FRL–4052–3]

Receipt of Application for an Experimental Use Permit; Genetically Engineered Microbial Pesticide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received an application (EUP No. 58788–EUP–L) from Crop Genetics International (CGI) requesting an experimental use permit for a genetically engineered microbial pesticide. The first EUP on this organism was issued June 14, 1988 (EUP No. 58788–EUP–1). The Agency has determined that the application may be of regional and national significance. Therefore, in accordance with 40 CFR 172.11(a), the Agency is soliciting public comments on this application.

DATES: Written comments must be received on or before April 20, 1992.

ADDRESSES: Comments in triplicate, must bear the docket control number OPP–50738 and be submitted to: Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked, will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and all written comments will be available for public inspection in Rm. 246 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Phil Hutton, Product Manager (PM) 18, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 213, CM #2, 1921 Jefferson Davis Highway, Arlington, VA (703–557–7690).

SUPPLEMENTARY INFORMATION: An application for an EUP has been received from Crop Genetics International of 7170 Standard Drive, Hanover, MD 21076. This EUP application EPA File Symbol is 58788–EUP–L. The proposed experiment involves the endophytic (plant-dwelling) bacterium *Clavibacter xyli* subspecies *cynodontis* that has been genetically engineered to contain a delta-endotoxin gene obtained from *Bacillus thuringiensis* subspecies *kurstaki*. After inoculation, the endophytic bacterium grows within the corn plants and produces the pesticidal agent which is active against the larval stages of the European corn borer (ECB), *Ostrinia nubilalis*. The product is referred to as Cxc/Bt.

Field activity of the Cxc/Bt construction (MDR1.586) against the European corn borer (ECB), *Ostrinia nubilalis* was demonstrated in several field corn hybrids during the 1991 field tests. Therefore, the purpose of this EUP application is to conduct two small-scale Cxc/Bt recombinant field trials to evaluate further insecticidal activity of one or more new Cxc/Bt constructions against ECB in several corn genotypes of commercial interest in Maryland and Nebraska. Data on the incidence of Cxc/Bt colonization, population levels of Cxc/Bt, and activity of Cxc/Bt will be obtained during the growing season. In addition, genetic segregation of the Cxc/Bt constructions will be studied using colonies isolated from plants in these field tests.

CGI is proposing to test a prototype recombinant microorganism (MDR1.586) and a series of closely related Cxc/Bt constructions at two small-scale sites in 1992: Ingleside, Queen Anne's County, Maryland; and Hastings, Clay County, Nebraska. In both Maryland and Nebraska, the total for each site will occupy 96,900 ft² or 2.2 acres. At each site, the test plants will occupy a maximum of 1.7 acres of this total, with the remaining space consisting of fallow zones between and around test margins to allow for plot maintenance and working areas for study personnel. Test sites at both the Maryland and Nebraska locations will consist of two field experiments designated as Test A and Test B (optional). Test A will be designed to evaluate the activity of one to five Cxc/Bt constructions in four corn hybrids against ECB. Treatments will include an untreated control and plants or seeds inoculated with: (1) wild-type Cxc (MDE1), (2) Cxc/Bt construction (MDR1.586), and (3) up to four additional Cxc/Bt constructions. Test B (an optional component of the proposed recombinant field trials may be included at one or both locations) will consist of one to six corn hybrids or inbreds and up to four treatments. Treatments may include an untreated control, seeds or plants inoculated with wildtype Cxc (MDE1), and /or up to three Cxc/Bt constructions. Tests at both sites will be initiated at planting and will continue through harvest. Planting will take place between late April and late May depending upon weather conditions. The proposed field test sites in both Maryland and Nebraska would allow the use of 1.0 kg active ingredient on seeds and plants sufficient to plant approximately 4.4 test plot acres. The actual amount of active ingredient present in the seeds after seed inoculation is estimated to be not more than 5 g, and the actual amount of active ingredient used to stab-inoculate plants

is estimated to be not more than 19 g. The amount active ingredient requested per State is less than 9.5 g. The test sites will consist of the two field experiments planted side-by-side and separated by a 20 ft. wide buffer zone, with the entire study area surrounded by a 20 ft. wide fallow zone. Corn seeds inoculated with Cxc/Bt using Crop Genetic's International standard inoculation process will be planted at the two study areas. If Crop Genetics International chooses to test less than four new constructions, then site dimensions will be less than discussed above. The fallow zone will be 20 ft. wide and will separate individual tests and the general study area from other crops grown outside the test site at both locations, the zone will be maintained using tillage and/or chemical herbicides. In the event that certain hybrids are determined based on greenhouse tests not to inoculate well using CGI's standard process, these varieties may be stab-inoculated in the field using a suspension of Cxc/Bt. CGI's 1992 field tests are designed: to evaluate activity of Cxc/Bt constructions against the European corn borer (ECB), Ostrinia nubilalis (Hubner) in Maryland and Nebraska; and to evaluate the segregation of Cxc/Bt constructions. Upon completion of the tests, all plant debris and stubble will be buried by disking. Harvested grain will be destroyed by either (1) Grinding the harvested grain, spreading the residue onto the test site, and incorporating the residue into the soil, or (2) roasting the grain and disposing of the residue either at a landfill or by incorporating the residue into the soil in the test site. Based on previous data submitted (EUP No. 58788–EUP–2), no overwintering of Cxc is anticipated.

The labeling proposed by CGI that would govern the conduct of the experiment states:

Applicator should wear protective clothing and waterproof gloves. For use only in accordance with the terms and conditions of the experimental use permit.

Following the review of the CGI application and any comments received in response to this notice, EPA will decide whether to issue or deny the EUP request for this EUP program, and if issued, the conditions under which it is to be conducted. Any issuance of an EUP will be announced in the *Federal Register*.

Dated: March 5, 1992.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

[FRL4116–6]

Revision of the Connecticut National Pollutant Discharge Elimination System (NPDES) Program to Add Authority to Issue General Permit

AGENCY: Environmental Protection Agency.

ACTION: Notice of approval of the National Pollutant Discharge Elimination System General Permit Program of the State of Connecticut.

SUMMARY: On March 10, 1992, the Regional Administrator for the Environmental Protection Agency (EPA), Region I approved the State of Connecticut's National Pollutant Discharge Elimination System General Permit Program. This action authorizes the State of Connecticut to issue general permits in lieu of individual NPDES permits.

FOR FURTHER INFORMATION CONTACT: Edward K. McSweeney, Chief, Wastewater Management Branch, Water Management Division, U.S. EPA, Region I, John F. Kennedy Federal Building, Boston, Massachusetts, 02203, (617) 565–3560.

SUPPLEMENTARY INFORMATION:

I. Background

EPA regulations at 40 CFR 122.28 provide for the issuance of general permits to regulate discharges of wastewater which result from substantially similar operations, contain the same types of wastes, require the same effluent limitations or operating conditions, require similar monitoring, and are appropriately controlled under a general permit rather than individual permits.

Connecticut was authorized to administer the NPDES Permit program in 1973. Its program is previously approved, did not include provisions for the issuance of general permits. There are several categories of discharges which could appropriately be regulated by general permits in Connecticut, including stormwater. Therefore, the Connecticut Department of Environment Protection requested a revision of its NPDES program to provide for issuance of general permits.

Each general permit will be subject to EPA review as provided by 40 CFR 123.44. Public notice and opportunity to request a hearing is also provided for each general permit.

II. Discussion

The State of Connecticut submitted, in support of its request a Program Description and revised NPDES Memorandum of Agreement between EPA and the State, as well as copies of relevant statutes and regulations. The State also submitted a statement by the Attorney General certifying, with appropriate citations to the statutes and regulations, that the State has adequate legal authority to administer a general permit program consistent with the applicable federal regulations. Based upon Connecticut's submission and its experience in administering an approved NPDES program, EPA has concluded that the State will have the necessary approved procedures and resources to administer the general permits program.

Under 40 CFR 123.62, NPDES program revisions are either substantially (requiring publication of proposed program approval in the **Federal Register** for public comment) or non-substantial (where approval may be granted by letter from EPA to the State). EPA has determined that assumption by Connecticut of general permit authority is a non-substantial revision of its NPDES program. EPA has generally viewed approval of such authority as non-substantial because it does not alter the substantive obligations of any discharger under the State program, but merely simplifies the procedures by which permits are issued to a number of similar point sources.

Moreover, under the approved program, the State retains authority to issue individual permits where appropriate, and any person may request the State to issue an individual permit to a discharger otherwise eligible for general permit coverage. While not required under 40 CFR 123.62, EPA is publishing notice of this approval action to keep the public informed of the status of its general permits program approvals.

III. Federal Register Notice of Approval of State NPDES Program or Modifications

The following table provides the public with an up-to-date list of the status of State NPDES permitting authority throughout the country. Today's Federal Register notice is to announce the approval of Connecticut's authority to issue general permits.

STATE NPDES PROGRAM STATUS

IV. Review Under Executive Order 12291 and the Regulatory Flexibility Act

The Office of Management and Budget has exempted this rule from the review requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

Under the Regulatory Flexibility Act, EPA is required to prepare a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. Pursuant to section 605(d) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq*), I certify that this State General Permit Program will not have a significant impact on a substantial number of small entities. Approval of the Connecticut NPDES State General Permit Program establishes no new substantive requirements, nor does it alter the regulatory control over any industrial category. Approval of the Connecticut NPDES State General Permit Program merely provides a simplified administrative process.

Dated: March 13, 1992.

Paul Keough,

Acting Regional Administrator.

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review of the information collection system described below.

Type of Review: Extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

Title: Application for a bank to (1) establish a branch, (2) move its main branch, or (3) establish a remote service facility.

Form Number: None (letter application).

OMB Number: 3064–0070.

Expiration Date of OMB Clearance: May 31, 1992.

Respondents: Insured state nonmember banks applying for FDIC's consent to establish and operate new branches, move main offices or branches, or establish remote service facilities.

Frequency of Response: On occasion.

Number of Respondents: 1,325.

Number of Responses per Respondent: 1.

Total Annual Responses: 1,325.

Average Number of Hours per Response: 7.
Total Annual Burden Hours: 9,275.
OMB Reviewer: Gary Waxman, (202) 395–7340, Office of Management and Budget, Paperwork Reduction Project 3064–0070, Washington, DC 20503.
FDIC Contact: Steven F. Hanft, (202) 898–3907, Office of the Executive Secretary, room F–400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
Comments: Comments on this collection of information are welcome and should be submitted by May 19, 1992.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above. Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: The FDIC uses the information collected in letter applications to evaluate the factors required by statute before approving applications.

Dated: March 16, 1992.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

FEDERAL MARITIME COMMISSION

[Docket No. 92–10]

Autoliners Inc., General Agents for Hoegh-Ugland Auto Liners A/S v. American Transportation Group, Inc. Dba AAA Phoenix Transportation Group; Filing of Complaint and Assignment

Notice is given that a complaint filed by Autoliners, Inc., General Agents for Hoegh-Ugland Auto Liners A/S ("Complainant") against American Transportation Group, Inc. dba AAA Phoenix Transportation Group ("Respondent") was served March 16, 1992. Complainant alleges that Respondent engaged in violations of section 10(a)(1) of the Shipping Act of 1984, 46 U.S.C. 1709(a)(1), by presenting checks for ocean freight without having sufficent funds in its account and continuing to refuse to pay the lawful ocean freight charges on nine shipments of automobiles.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 16, 1993, and the final decision of the Commission shall be issued by July 14, 1993.

Joseph C. Polking,
Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. 93631–92–01]

Development Disabilities: Request for Public Comment on Developmental Disabilities Funding Priorities for Projects of National Significance for Fiscal Year 1992

AGENCY: Administration on Developmental Disabilities (ADD), Administration for Children and Families (ACF).

ACTION: Notice of request for public comments on developmental disabilities funding priorities for Projects of National Significance for Fiscal Year 1992.

SUMMARY: The Administration on Developmental Disabilities, Administration for Children and Families, announces that public comments are being requested on funding priorities for Fiscal Year 1992 Projects of National Significance.

DATES: Closing date for receipt of public comments is May 19, 1992.

ADDRESSES: Comments should be sent to: Deborah L. McFadden, Commissioner, Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services, room 349–F HHH Building, 200 Independence Avenue SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Kay Smith, Program Development Division, Administration on Developmental Disabilities, (202) 245–2984.

SUPPLEMENTARY INFORMATION:

Part I. Background

A. Goals of the Administration on Developmental Disabilities

The Administration on Developmental Disabilities (ADD) is located within the Administration for Children and Families (ACF), Department of Health and Human Services (DHHS). ADD's goals relate to increased familial and individual self-sufficiency, and improved services for persons with developmental disabilities. Emphasis on these goals, and progress towards them will help more persons with developmental disabilities to live productive and independent lives, integrated into communities. It is through the Projects of National Significance Program that ADD attempts to promote the achievement of these goals.

In addition, at least biennially the ADD Commissioner holds a national meeting for the purpose of discussing current and emerging issues of national significance within the field of developmental disabilities and to share significant accomplishments. The Commissioner has also developed a national initiative to create innovative, effective and goal-oriented collaboration among all network components of the Developmental Disabilities Programs (Developmental Disabilities Planning Councils, Protection and Advocacy Systems, and University Affiliated Programs) and the principal organizations involved with persons with developmental disabilities in the States. This program, "Leadership Through Collaboration," is a direct result of working with the States to create the Administration on Developmental Disabilities' National Agenda.

Therefore, in Fiscal Year 1992, ADD will be focusing its efforts on implementing the Commissioner's National Agenda and in providing technical assistance to programs and agencies nationwide in the implementation of those activities.

The technical assistance meetings will bring together State and Territorial leadership and other organizations to work on skill and coalition-building activities, and to provide technical assistance in implementing those activities as they relate to each of the topic areas.

B. Purpose of the Administration on Developmental Disabilities

The Administration on Development Disabilities (ADD) is the lead agency within ACF and DHHS responsible for planning and administering programs which promote the self-sufficiency and protect the rights of persons with developmental disabilities.

The Developmental Disabilities Assistance and Bill of Rights Act of 1990 (Pub. L. 101–496) (the Act) supports and provides assistance to States and public and private nonprofit agencies and organizations to assure that all persons with developmental disabilities receive the services, assistance and opportunities necessary to enable them to achieve their maximum potential through increased independence, productivity and integration into the community.

The Act emphasizes that persons with developmental disabilities include those with severe functional limitations attributable to physical impairments, mental impairments, and combinations of physical and mental impairments. It recognizes that, notwithstanding their severe disabilities, these persons have capabilities, competencies, and personal needs and preferences. Most importantly, the Act points out that a substantial portion of persons with developmental disabilities remain unserved or underserved.

The Act also stresses that the family and members of the community can play a central role in enhancing the lives of persons with developmental disabilities, especially when the family is provided with the necessary support services; that public and private employers tend to be unaware of the capability of persons with developmental disabilities to be engaged in competitive work in integrated settings; and that it is in the national interest to offer persons with developmental disabilities the opportunity to make decisions for themselves and to live in homes and communities where they can exercise their full rights and responsibilities as citizens.

In addition, in administering the Act at the Federal level, ADD seeks to enhance the role of the family in assisting persons with developmental disabilities to achieve their maximum potential (through self-advocacy and empowerment); in supporting the increasing ability of persons with developmental disabilities to perform leadership functions, and determine changes of their choice; as well as in ensuring the protection of the legal and human rights as these individuals.

Programs funded under the Act are:

- Basic State formula grants;
- State system for the protection and advocacy of individual rights;
- Grants to University Affiliated Programs for interdisciplinary training, exemplary services, technical assistance, and information dissemination; and
- Grants for Projects of National Significance.

C. Description of Projects of National Significance

Under Part E of the Act, grants and contracts are awarded for projects of national significance to increase and support the independence, productivity, and integration into the community of persons with developmental disabilities, and to support the development of national and state policy which enhances the independence, productivity, and integration of these individuals. These projects may include, but are not limited to:

- Projects to conduct data collection and analysis;
- Projects to provide technical assistance to program components;
- Projects to provide technical assistance for the development of information and referral systems;
- Projects which improve supportive living and quality of life opportunities which enhance recreation, leisure and fitness;
- Projects to educate policymakers;
- Projects to pursue Federal interagency initiatives;
- Projects that support the enhancement of minority participation in public and private sector initiatives in developmental disabilities; and
- Other projects of sufficient size and scope, and which hold promise of expanding or otherwise improving opportunities for persons with developmental disabilities (especially those who are multihandicapped or disadvantaged, including minority groups, Native Americans, Native Hawaiians, and other underserved groups).

In addition, funds may be awarded for technical assistance and demonstration projects (including research, training, and evaluation in connection with such projects) which expand or improve the advocacy functions of the State Planning Councils, the functions performed by University Affiliated Programs and Satellite Centers, and the Protection and Advocacy System.

Section 162(c) of the Act requires that ADD publish in the **Federal Register** its priorities for grants and contracts to carry out Projects of National Significance. The Act also requires a period of 60 days for public comment concerning such priorities. After analyzing and considering such comments, ADD must publish in the **Federal Register** final priorities for such grants and contracts, and solicit applications for funding based on the final priorities selected.

The following section presents ADD's funding priorities for Fiscal Year 1992 Projects of National Significance. We welcome specific comments and suggestions as well as suggestions for additional funding priorities. We would also like to receive suggestions on topics which are timely and relate to specific needs in the field of developmental disabilities.

Part II. Fiscal Year 1992 Funding Priorities for Projects of National Significance

ADD is interested in all comments and recommendations which address areas of existing or evolving national significance related to the field of developmental disabilities.

Comments should be addressed to: Deborah L. McFadden, Commissioner, Administration on Developmental Disabilities, Department of Health and Human Services, room 349–F HHH Building, 200 Independence Avenue, SW., Washington, DC 20201.

In FY 1992, ADD will not be funding any new start grant awards. However, we will be awarding continuation funds for projects funded in FY 1991 (in self-advocacy and empowerment, youth leadership development, ongoing data collection, cultural diversity, and home ownership). We are also planning to award contract funds to provide technical assistance for the implementation of the ADD Commissioner's national initiative, "Leadership through Collaboration," and to provide technical assistance to improve the functions of the University Affiliated Program. Those activities are described as follows:

Funding Priority Area 1: Technical Assistance for Implementing the National Agenda

Through the conduct of technical assistance activities, ADD will implement its "Leadership through Collaboration" initiative. The purpose of this initiative is to create innovative, effective and goal-oriented collaboration among all network components of the Developmental Disabilities Programs (Developmental Disabilities Planning Councils, Protection and Advocacy Systems, and University Affiliated Programs) and the principal organizations involved with persons with developmental disabilities in the

States. This program, "Leadership Through Collaboration," is a direct result of working with the States to create the Administration on Developmental Disabilities' National Agenda.

The technical assistance that will be provided through this initiative will assist state agencies and organizations in establishing collaborative programs within their respective states, as well as with other state agencies. The initiative activities that will be conducted include a national conference, state meetings, and topic-specific workshops.

In addition, this initiative will provide the necessary technical assistance to potential funding applicants in the development of collaborative programs in anticipation of possible funding of PNS projects in FY 1993.

Funding Priority Area 2: Continuation Grant Awards

ADD will expend approximately $1.7 million in continuation funding for Projects of National Significance in support of the National Agenda and state-of-the-art projects. These projects include priorities in self-advocacy and empowerment, youth leadership development, ongoing data collection, minority participation in development disabilities, and home ownership.

Funding Priority Area 3: Technical Assistance

Under separate contractual solicitations, ADD will award funds to provide technical assistance to improve the functions of the University Affiliated Program. (RCFs were awarded in FY 1991 to provide technical assistance to the DD Councils and P&As, and therefore, will not be recompeted in FY 1992.)

In addition, ADD will conduct topic-specific conferences throughout the country to provide technical assistance to interested agencies and organizations in implementing the National Agenda.

This announcement is a public comment notice only. No proposals, concept papers or other forms of application should be submitted at this time. Any such submission will be discarded.

No acknowledgments will be made of the comments in response to this notice, but all comments will be considered in preparing the final priorities for developmental disabilities Projects of National Significance for fiscal year 1992.

(Federal Catalog of Domestic Assistance Number 93.631 Developmental Disabilities—Projects of National Significance)

Dated: February 21, 1992.

BILLING CODE 4130-01-M

U.S. Advisory Board on Child Abuse and Neglect; Meeting

AGENCY: U.S. Advisory Board on Child Abuse and Neglect, ACF, HHS.

ACTION: Notice of the tenth meeting of the U.S. Advisory Board on Child Abuse and Neglect.

SUMMARY: The U.S. Advisory Board on Child Abuse and Neglect will hold its tenth meeting in Los Angeles, California from 9 a.m. March 31, 1992 through 5 p.m. April 3, 1992. A portion of the Board meeting on Thursday, April 2, from 1 p.m. to 6 p.m. is closed to the public due to the need for confidentiality in connection with a site visit by the Board to the Child Death Review Team of the Los Angeles County Inter-Agency Council on Child Abuse and Neglect and with a Board discussion about a proposed paper on child maltreatment-related fatalities.

ADDRESSES: The meeting will be held at: Sheraton Grande Hotel, 333 South Figueroa Street, Los Angeles, California 90071.

FOR FURTHER INFORMATION CONTACT: Joan M. Williams, Special Projects Specialist, U.S. Advisory Board on Child Abuse and Neglect, room 300E, Humphrey Building, Washington, DC 20201, (202) 245-0208.

SUPPLEMENTARY INFORMATION: During portions of this meeting the Executive Committee on the Board will discuss: The form, content, nature and scope of the 1992 and 1993 annual reports of the Board; developments in connection with reauthorization of the Child Abuse Prevention Act; progress toward the accomplishment of the FY 1992–FY 1993 Board Program Plan; the special 1993 Board report on Progress in Achieving National Child Protection Reform; and Board goverance and administrative issues. During other portions of this meeting, the Board will: Participate in a site visit with the Los Angeles County Inter-Agency Council on Child Abuse and Neglect Child Death Review Team (Closed Session); conduct a hearing on child maltreatment-related fatalities; discuss developments related to the reauthorization of the Child Abuse Prevention Act; discuss the special 1993 Board report on Progress in Achieving National Child Protection Reform; discuss the form, content, nature, and scope of the 1992 and 1993 reports; receive an updating on the activities of the Inter-Agency Task Force, the DHHS initiative on child abuse and neglect, and the National Center on Child Abuse and Neglect and the Children's Bureau since the January, 1992 meeting; and discuss Board papers on research, child fatalities (Closed Session), and child protective services reform.

Dated: March 13, 1992.

Donna N. Givens,

Deputy Assistant Secretary for Children and Families.

BILLING CODE 4130-01-M

Interagency Committee on Developmental Disabilities; Meeting

AGENCY: Administration on Developmental Disabilities, Administration for Children and Families (ACF), HHS.

ACTION: Notice of meeting

SUMMARY: The Interagency Committee on Developmental Disabilities (ICDD) was established in 1984 by section 106(b) of the Developmental Disabilities Assistance and Bill of Rights Act of 1984 (42 U.S.C. 6007(b)) to "meet regularly to coordinate and plan activities by Federal departments and agencies for persons with developmental disabilities." In 1990, the Act was amended to provide that the meetings be open to the public and that a notice of the meeting be published in the **Federal Register**. The ICDD is chaired by the Assistant Secretary for Special Education and Rehabilitative Services and the Commissioner of the Administration on Developmental Disabilities.

The ICDD meets regularly on the first Tuesday in December, April, and August. The meeting is open to the public.

DATES: Tuesday, April 7, 1992. 9:30 a.m. to 11:30 a.m.

ADDRESSES: Auditorium of the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Ronald W. Conley, room 348F, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201 (202) 245-7617 or Wendell Johnson, room 3014A, Mary E. Switzer Building, 330 C Street SW., Washington, DC 20202 (202) 732-1274.

SUPPLEMENTARY INFORMATION: At the meeting the ICDD will discuss: (1) Long-term funding for people in supported employment; (2) the application of the Fair Labor Standards Act to students with severe disabilities engaging in transitional work activities; (3) the adoption of a mission and goals statement for the ICDD; and other matters that may arise.

Dated: March 16, 1992.

Deborah L. McFadden,

Commissioner Administration on Developmental Disabilities.

BILLING CODE 4130-01-M

Food and Drug Administration

[Docket No. 91N-0438]

Cooperative Research and Development Agreement Between Nicolet Instrument Corp. and the Center for Drug Evaluation and Research

AGENCY: Food and Drug Administration HHS.

ACTION: Notice

SUMMARY: The Food and Drug Administration (FDA), Center for Drug Evaluation and Research (CDER) is announcing its intention to enter into a Cooperative Research and Development Agreement (CRADA) with Nicolet Instrument Corp. of Madison, WI, to develop a Fourier Transform Infrared (FTIR) spectral library of United States Pharmacopeia reference standards. The execution of this CRADA will result in a licensing agreement between CDER and Nicolet Instrument Corp. to market the finished library as allowed by the Federal Technology Transfer Act (FTTA) of 1986. This notice is being published to inform the public of FDA's intention of entering into a CRADA with Nicolet Instrument Corp. This collaboration will be done under the provisions of the FTTA.

DATES: Written Comments by April 20, 1992.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, with a copy sent to Thomas Layloff, Division of Drug Analysis, 1114 Market St., rm. 1002, St. Louis, MO 63101, 314-539-2135, FAX 314-539-2113.

FOR FURTHER INFORMATION CONTACT: Beatrice Droke, Division of Contracts and Grants Management (HFA-500), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6890, or Thomas Layloff (address above).

SUPPLEMENTARY INFORMATION: CDER needs to be abreast with advancements in analytical teachnology. This CRADA with Nicolet Instrument Corp., with offices at 5225 Verona Rd., Madison, WI 53711, would assist FDA laboratories by developing a FTIR spectral library of United States Pharmacopeia reference standards. This library will enable FDA laboratories to more readily make correct identification of substances by their molecular and chemical structure. CDER will provide Nicolet with water vapor, background, and sample interferograms that have been collected on a Nicolet 710SX FTIR. Nicolet will form these interferograms into an acceptable spectral library.

Dated: March 16, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[Docket No. 92N-0135]

Hoffmann-La Roche Inc., et al.; Withdrawal of Approval of 40 New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) withdraws approval of 40 new drug applications (NDA's). The holders of the NDA's notified the agency in writing that the drug products were no longer being marketed under the NDA and requested that the approval of the applications be withdrawn.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy Maizel, Center for Drug Evaluation and Research (HFD-53), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4320.

SUPPLEMENTARY INFORMATION: The holders of the NDA's listed below have informed FDA that these drug products are no longer being marketed under the NDA and requested that FDA withdraw approval of the applications. The applicants have also, by request, waived their opportunity for a hearing.

NDA No.	Drug name	Applicant name and address
776	Ephynal (vitamin E) Tablets	Hoffmann-La Roche Inc., 340 Kingsland St., Nutley, NJ 07110-1199.
2-402	Fergon Iron Tablets	Sterling Drug Inc., 90 Park Ave., New York, NY 10016.
6-467	d-Panthenol	Hoffmann-La Roche Inc.
6-646	Vitamin A	Do.
6-658	Biotin Tablets	Do.
7-765	Itrumil (iothiouracil sodium)	Ciba-Geigy Corp., Pharmaceuticals Division, 556 Morris Ave., Summit, NJ 07901.
8-036	Riboflavin 5'-Phosphate	Hoffman-La Roche Inc.
8-188	Aparnide (acetaminophen) Tablets	Miles Inc., Pharmaceutical Division, 400 Morgan Lane, West Haven, CT 06516.
9-194	Crest (stannous fluoride) Dentifrice	The Procter & Gamble Co., Sharon Woods Technical Center, 11511 Reed Hartman Hwy., Cincinnati, OH 45241-0974.
9-215	Rautensin (alseroxylon) Tablets	Dorsey Laboratories, Division of Sandoz Inc., Box 83288, Lincoln, NE 68501-3288.

BILLING CODE 4160-01-M

Social Security Administration

[Social Security Ruling SSR 92-4p]

State and Local Coverage—Commissioner's Ruling on Definition of a "Fee" for Social Security Coverage Purposes Under Section 218 of the Social Security Act

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(1), the Commissioner of Social Security gives notice of Social Security Ruling 92-4p. This Policy Interpretation Ruling concerns the fact that since there is no Federal statutory definition of a "fee," the Social Security Administration (SSA) had defined what constitutes a "fee" for Social Security coverage purposes under section 218 of the Social Security Act differently than the Internal Revenue Service (IRS) had defined the term for taxation purposes under the Internal Revenue Code. Consequently, in some cases, different outcomes have been reached by the two agencies when determining whether remuneration received by certain individuals, e.g., tax collectors, is a "fee." After consideration of the issues involved, the Commissioner concluded that it would be appropriate for SSA to adopt the IRS definition of a "fee." Therefore, effective January 1, 1992, SSA, for Social Security coverage purposes, will treat remuneration received by certain State and local public officials, in the same manner as the IRS. This Ruling reflects this change

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Joanne K. Castello, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (410) 965-1711.

SUPPLEMENTARY INFORMATION: Although we are not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Ruling in accordance with 20 CFR 422.406(b)(1).

Social Security Rulings make available to the public precedential decisions relating to the Federal old-age, survivors, disability, supplemental security income, and black lung benefits programs. Social Security Rulings may be based on case decisions made at all administrative levels of adjudication, Federal court decisions, Commissioner's decisions, opinions of the Office of the General Counsel, and other policy interpretations of the law and regulations

Although Social Security Rulings do not have the force and effect of the law or regulations, they are binding on all components of the Social Security Administration, in accordance with 20 CFR 422.406(b)(1), and are to be relied upon as precedents in adjudicating other cases.

If this Social Security Ruling is later superseded, modified, or rescinded, we will publish a notice in the **Federal Register** to that effect.

(Catalog of Federal Domestic Assistance Programs Nos. 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security—Survivor's Insurance)

Dated: March 9, 1992.

Gwendolyn S. King,

Commissioner of Social Security.

Policy Interpretation Ruling

Title II: State and Local Coverage—Commissioner's Ruling Definition of a "Fee" for Social Security Coverage Purpose Under Section 218 of the Social Security Act

Purpose: The state the policy change by which the Social Security Administration (SSA) adopted the Internal Revenue Service (IRS) definition of a "fee" for purposes of Social Security coverage under section 218 of the Social Security Act (the Act), of compensation of certain State and local public officials, effective January 1, 1992.

Citation (Authority): Section 218(c) and 218(m) of the Social Security Act (42 U.S.C. 418(c) and 418(m)); 20 CFR 404.1073(b)(1) and 404.1210.

Pertinent History: There is no Federal statutory definition of a "fee," and as a result, IRS and SSA in some instances have used different definitions as to what constitutes a "fee." Consequently, in these situations, different outcomes have been reached by the two agencies when determining whether compensation received by certain individuals, such as State or local tax collectors, is a fee. The definition of a "fee" is significant for determining: (1) Whether certain positions may be excluded from Social Security coverage under the optional fee-basis exclusion; and (2) whether certain positions are compensated solely by fees and, therefore, whether occupants of these positions may be treated as self-employed individuals. This issue affects certain State and local public officials nationwide.

SSA's policy prior to 1992 defined a "fee" as compensation for a particular act or service without regard to the amount of time spent in its performance. Furthermore, whether compensation was a "fee" was determined by the method of payment and the appropriate State statute and/or any related court decision. SSA had held that a "fee" may be paid by the State, one of its political subdivisions, or a third party.

The IRS position holds that the source of the remuneration paid is an important factor in determining whether the remuneration is a "fee." When a public official receives remuneration for services in the form of a "fee" directly from members of the public with whom he or she does business, that is considered to be a "fee." Otherwise, if payment is made to a public official from government funds, and no portion of the monies collected by him or her belongs to or can be retained by him or her as compensation, that remuneration is not consider to be a "fee." IRS concludes that, in the later case, the public official is not engaged in a trade or business under section 1402(c)(1) of the Internal Revenue Code and the remuneration for services is not net earnings from self-employment.

Because of the differences between the SSA and IRS interpretations of what constituted a "fee," State and local political employing entities have received inconsistent advice regarding how to report the compensation of individuals in certain positions, e.g., tax collectors in Pennsylvania. As a result of this new policy interpretation, SSA and IRS will now have a single, coordinated position on the definition of a "fee."

Policy Interpretation:

SSA's Change in Its Definition of a "Fee"

After full consideration of the issue, the Commissioner of Social Security concluded that it would be appropriate for SSA to adopt the IRS definition because it related to the source of the payment and the official's authority to retain the payment as compensation. Therefore, SSA has adopted the IRS definition for Social Security coverage purposes under section 218 of the Act, effective January 1, 1992.

Adopting the IRS definition means that, effective January 1, 1992, SSA will consider the remuneration for service received by a State or local public official, such as a tax collector or any other official who performs service in a position compensated solely on a fee basis, a "fee" if the payment is made directly by a member of the public with whom he or she does business, and the public official is authorized to retain the payment or a portion therefor as compensation. In this situation, the official is engaged in a trade or business as set forth in sections 211(c)(1) and 211(c)(2)(E) of the Act and thus, self-employed. Conversely, when a State or local public official has no authority to retain the monies collected by him or her from a member of the public as compensation, but instead receives payment from government funds, that payment is no a "fee." In the latter situation, the official is not engaged in a trade or business, and his earnings are not net earnings from self-employment but are wages received as an employee.

Treatment of Remuneration Paid to Public Officials Affected by the SSA Change of Definition of a "Fee"

Under SSA's policy prior to 1992, a "fee" was distinguishable from a salary in that a "fee" was usually paid as compensation for a particular act of service regardless of the amount of time spent in its performance, while a salary was normally related to the amount of time worked.

Beginning January 1, 1992, SSA will find that a "fee" is distinguishable from a salary only when the compensation for a particular act or service is paid directly to the State or local public official by a member of the public for whom the act or service is performed and the official is authorized to retain the payment or a portion thereof as compensation.

Treatment of Positions Compensated Solely by Fees

For services first covered after 1967, services in any class or classes of positions compensated solely by fees are excluded from coverage under agreements pursuant to section 218 of the Act unless the State specifically includes these services. Consequently, services performed after 1967 by State and local public officials in positions solely compensated by fees which are not covered under a section 218 agreement, are compulsorily covered as self-employment for Social Security purposes under sections 211(c)(1) and 211(c)(2)(E) of the Act.

The above principle is not affected by SSA's change in position as it applies to individuals whose services are actually compensated by a "fee." Therefore, SSA uses the definition of a "fee" for years prior to January 1, 1992, to determine whether compensation for services is made solely on the basis of fees.

Beginning January 1, 1992, SSA determines whether services are compensated solely by a fee by using the revised definition of a "fee."

Treatment of Positions Compensated by Salary and Fees

After 1967, a State may exclude services from coverage under an agreement, as provided in section 218(c) of the Act, in any class or classes of fee-basis positions compensated by both salary and fees. If the exclusion is taken, none of the compensation, whether salary or fees, is covered as wages. If the exclusion is not taken, all of the compensation received, including the fees, is covered as wages under the State's section 218 agreement.

Effective Date: This policy is effective for all remuneration received for services after December 31, 1991.

Cross References: Program Operations Manual System, part 03, chapter 015, subchapter 05, Sections .007 and .042; part 03, chapter 018, subchapter 02, sections .200 and .220; Handbook for State Social Security Administrators, section 238; SSR 77-17, Pennsylvania Justice of the Peace; and SSR 73-58c, Nebraska Constables, Justices of the Peace, and Registrars. The revised definition as cited in this Policy Interpretation Ruling does not affect the herein cross-referred Rulings. These two Rulings continue to provide examples of a "fee."

BILLING CODE 4190-29-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D-92-982; FR-3198-D-01]

Delegation of Authority for the Shelter Plus Care Program

AGENCY: Office of the Secretary, Department of Housing and Urban Development.

ACTION: Notice of delegation of authority.

SUMMARY: This notice delegates from the Secretary of Housing and Urban Development to the Assistant Secretary for Community Planning and Development the power and authority to administer the Shelter Plus Care Program authorized by section 837 of the National Affordable Housing Act (Pub. L. 101–625, enacted November 28, 1990), amending Title IV of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11403) by adding subtitle F.

EFFECTIVE DATE: March 12, 1992.

FOR FURTHER INFORMATION CONTACT: James N. Forsberg, Director, Special Needs Assistance Program, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street, SW., room 7262, Washington, DC, 20410, (202) 708–4300. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Shelter Plus Care program is a new program authorized by section 837 of the National Affordable Housing Act (Pub. L. 101–625, enacted November 28, 1990), amending title IV of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11403) by adding Subtitle F, to provide rental housing assistance, in connection with supportive services funded from sources other than this program, to homeless persons with disabilities (primarily persons who are seriously mentally ill, have chronic problems with alcohol, drugs, or both; or have acquired immunodeficiency syndrome and related diseases) and their families. The Notice of Program Guidelines and the Notice of Funds Availability (NOFA) which are applicable to the competition for FY92 funding under the Shelter Plus Care Program have been published previously in the **Federal Register**. Under this delegation of authority, the Secretary of Housing and Urban Development delegates all power and authority with respect to the Shelter Plus Care Program to the Assistant Secretary for Community Planning and Development.

Section A. Authority Delegated

The Assistant Secretary for Community Planning and Development is authorized to exercise the power and authority of the Secretary of Housing and Urban Development with respect to the Shelter Plus Care Program as authorized by section 837 of the National Affordable Housing Act (Pub. L. 101–625, enacted November 28, 1990), amending Title IV of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11403) by adding subtitle F, except as indicated in section B below. This includes the authority to issue or waive rules, regulations or guidelines under the program.

Section B. Authority Excepted

There is excepted from the authority delegated under section A the power to sue or be sued.

Section C. Authority to Redelegate

The Assistant Secretary of Community Planning and Development is authorized to redelegate to employees of the Department any of the power and authority delegated under section A and not excepted under Section B of this delegation. However, the authority to issue or waive rules, regulations and guidelines under the Program cannot be redelegated.

Authority: Section 837 of the National Affordable Housing Act (Pub. L. 101–625, enacted November 28, 1990), amending Title IV of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11403); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 12, 1992.

Alfred A. DelliBovi,

Deputy Secretary.

BILLING CODE 4210–33–M

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N–92–1917; FR–2934–N–70]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–4300; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administrtion*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HSS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screen for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free inforamtion line at 1–800–927–7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Army: Robert Conte, Dept. of Army, Military Facilities, DAEN–ZCI–P; rm. 1E671, Pentagon, Washington, DC 20310–2600; (202) 693–4583; Corps of Engineers: Gary B. Paterson, Chief, Base Realignment and Closure Office, Directorate of Real Estate, 20 Massachusetts Ave., NW., rm. 4133, Washington, DC 20314–1000; (202) 272–0520; GSA: Ronald Rice, Federal Property Resources Services, GSA, 18th and F Streets NW., Washington, DC 20405; (202) 501–0067; Dept. of Transportation: Ronald D. Keefer, Director, Administrative Services & Property Management, DOT, 400 Seventh St., SW., room 10319, Washington, DC 20590; (202) 366–4246; (These are not toll-free numbers).

Dated: March 13, 1992.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

TITLE V, FEDERAL SURPLUS PROPERTY PROGRAM FEDERAL REGISTER REPORT FOR 03/20/92

California—Fort Ord

Fort Ord is located 7 miles north of the City of Monterey and 120 miles southeast of San Francisco, California 93941–5000. The installation is scheduled for closure on or about September 1995. Properties shown below are suitable/available will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The installation consists of approximately 26,720 acres and 14 million square feet of permanent facilities that have been reviewed by HUD for suitability for use to assist the homeless. The properties that HUD has determined suitable and which are available include various types of housing; office and administrative buildings; recreational, maintenance and storage facilities; and other more specialized structures.

For specific information concerning Fort Ord, please contact Commander, 7th ID, ATTN: AFZW–RM (LTC Anderson), Fort Ord, California 93941–5000.

Suitable/Available Properties

Property Number: 329210039
Type Facility: Housing—1431 family houses; majority are 2-story.

Property Number: 329210040
Type Facility: Temporary Living Quarters—254 buildings; wood, concrete and concrete block structures including barracks.

Property Number: 329210041
Type Facility: Office/Administration—311 buildings; wood, concrete, concrete block and steel structures including personnel bldgs. and general purpose bldgs.

Property Number: 329210042
Type Facility: Recreation—53 facilities including bowling center, guest houses, community and youth centers, library, gym and recreation bldgs.

Property Number: 329210043
Type Facility: Aircraft/Airport Facilities—18 facilities including hangars, runway, taxiways, aprons, fire station, maintenance bldgs. and control tower.

Property Number: 329210044
Type Facility: Maintenance/Engineering Facilities—24 buildings; wood, concrete block and steel structures.

Property Number: 329210045
Type Facility: Mess/Dining Halls—95 buildings; wood, concrete and concrete block dining facilities.

Property Number: 329210046
Type Facility: Child Care—7 buildings; wood and concrete child care centers.

Property Number: 329210047
Type Facility: Stores and Services—23 buildings; wood, concrete, concrete block and steel structures including stores, snack bars, commissary and service station exchange.

Property Number: 329210048
Type Facility: Hospital Facilities—10 buildings; wood, concrete and concrete block structures including a hospital, clinics and vet. facilities.

Property Number: 329210049
Type Facility: Chapels—10 buildings; wood, concrete, concrete block chapels and chapel center facilities.

Property Number: 329210050
Type Facility: Fire Facilities—2 fire stations.

Property Number: 329210051
Type Facility: Audio Visual Facilities—8 buildings; wood, concrete and steel structures including photo labs and training centers.

Property Number: 329210052
Type Facility: Communications/Electronics Facilities—6 buildings; concrete block and steel structures including a communication center and radio bldgs.

Property Number: 329210053
Type Facility: Warehouses—224 buildings; wood, concrete, concrete block and steel structures including storage bldgs. and sheds.

Property Number: 329210054
Type Facility: Vehicle Shops—04 buildings; wood, concrete, concrete block and steel structures including maintenance shops and oil storage bldgs.

Property Number: 329210055
Type Facility: Miscellaneous Facilities—440 facilities including hdqts. bldgs., reserve centers, classrooms, day rooms, roads, vehicle parks and training areas.

Property Number: 329210056
Type Facility: Multi-Purpose Facilities—27 facilities.

Property Number: 329210057
Type Facility: Fuel Facilities—31 buildings; concrete, concrete block and steel structures including gas station bldgs.

Property Number: 329210058
Type Facility: Hazardous Storage Facilities—6 buildings; concrete, concrete block and steel structures.

Property Number: 329210059
Type Facility: Explosives/Munitions Facilities—31 buildings; concrete and steel structures including igloo storages and magazine storages.

Hawaii—Kapalama Military Reservation Phase III

Kapalama Military Reservation is located in the Harbor district in the City of Honolulu. All the properties will be excess to the needs of the Army Corps of Engineers on or about September 30, 1994. Properties shown below as suitable will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The base comprises 21.22 acres and contains nine buildings which are currently being used for storage.

Suitable/Available Properties

Property Numbers: 329210003–329210011
Type Facility: Nine buildings currently used for storage; 116 to 39654 sq. ft.; one story wood frame; needs minor rehab.

Massachusetts—Fort Devens

Fort Devens military base is located at Fort Devens, Massachusetts 01433–5000. It is approximately 45 miles west of Boston. All the properties will be excess to the needs of the Army Corps of Engineers on or about October 31,1995. Properties shown below as suitable/available will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The installation covers 9,283 acres and has approximately 7.4 million square feet of facilities. The properties that HUD has determined suitable and which are available include ove 550 single family and multifamily housing units; office and administration buildings, indoor and outdoor recreational facilities; warehouses and multi-use buildings; hospital facilities; stores and service facilities; dining facilities; a chapel; a

child care facility; and other miscellaneous and specialized structures.

For specific information concerning Fort Devens, please contact Commander, Fort Devens, Attn: AFZD-T (Mr. Carter Hunt), Fort Devens, Massachusetts 01433-5000.

Suitable/Available Properties

Property Number: 329210012
Type Facility: 54 Office/Administration Buildings; 1,174 to 71,781 sq ft.; wood, brick or concrete block frame including personnel bldgs., general purpose and support services bldgs.

Property Number: 329210029
Type Facility: 404 Housing units; 1,200 to 4,380 sq. ft.; wood or brick frame; single and duplex residences, multifamily residences—up to 14 units per bldg.

Property Number: 329210015
Type Facility: 150 Temporary Living Quarters; 1,028 to 19,120 sq. ft.; wood, brick or concrete block structures including barracks.

Property Number: 329210013
Type Facility: 27 Recreational Facilities; 155 to 30,000 sq. ft.; wood, brick, steel or concrete block construction including a gym, library, swimming pool, golf clubhouse, and bowling center.

Property Number: 329210016, 329210025
Type Facility: Aircraft/Fuel Facilities—7; six gas station bldgs. and pump stations; wood, steel or concrete block structures.

Property Number: 329210017, 329210021
Type Facility: Maintenance Engineering/Vehicle Shops—34 buildings; 120 to 20,310 sq. ft.; wood, brick, steel or concrete block frame including maintenance shops, entomology facility, vehicle maintenance bldgs., oil storage bldgs.

Property Number: 329210018
Type Facility: 11 Stores/Service Buildings; 271 to 107,208 sq. ft.; wood, concrete block or brick frame including commissary, sales store, exchange service station, exchange retail stores.

Property Number: 329210019
Type Facility: 7 Hospital Facilities; 493 to 126,835 sq. ft.; wood concrete, concrete block or brick frame including clinics, hospital, veterinarian facility, and dental clinic.

Property Number: 329210022
Type Facility: 4 Audio Visual/Photo Labs; 480 to 10,612 sq. ft.; wood or concrete block construction.

Property Number: 329210027
Type Facility: 24 Mess/Dining Halls; 2,403 to 2,717 sq. ft.; wood frame.

Property Number: 329210024
Type Facility: 2 Communication Buildings; 1,322 to 1,749 sq. ft.; concrete block or brick frame; communication centers.

Property Number: 329210026
Type Facility: 92 Warehouses; 49 to 85,790 sq ft.; wood, concrete, concrete block or steel construction including sheds, storehouse, medical suppy, vehicle storage, general purpose bldgs.

Property Number: 329210014
Type Facility: Child Care Facility; 6,012 sq. ft.; wood frame.

Property Number: 329210020
Type Facility: Chapel; 22,250 sq. ft.; brick frame.

Property Number: 329210023
Type Facility: 8 Hazardous Storage Buildings; 64 to 6,000 sq. ft.; concrete, steel or concrete block structures including oxygen storage facilities and flammable materials storage.

Property Number: 329210028
Type Facility: 172 Miscellaneous Facilities; 320 to 114,000 sq. ft.; wood, concrete block, brick or steel construction including general purpose bldgs., training facilities, RG houses, reserve centers, garages.

Property Number: 329210030
Type Facility: 4 Multi-purpose buildings.

Unsuitable Properties

Property Number: 329210032
Type Facility: 3 Recreation Facilities; within 2,000 feet from flammable or explosive material.

Property Numbers: 329210033, 329210038
Type Facility: One Temporary Living Quarters and 2 housing residences; within 2,000 feet from flammable or explosive material.

Property Number: 329210031
Type Facility: One Office/Administration Building; within 2,000 feet from flammable or explosive material.

Property Numbers: 329210034, 329210037
Type Facility: 6 Miscellaneous Buildings—including stores, service facilities, etc.

Property Number: 329210035
Type Facility: One Vehicle Shop; within 2,000 feet from flammable explosive material.

Property Number: 329210036
Type Facility: One Warhouse; within 2,000 feet from flammable explosive material.

Virginia—Harry Diamond Laboratories

Harry Diamond Laboratories, Woodbridge Facility is located in Prince William County, Virginia, 22191. The installation is scheduled for closure on or about September 1994. Properties shown below as suitable/available will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The installation consists of approximately 76,000 square feet of facilities that have been reviewed by HUD for suitability for use to assist the homeless. The properties that HUD has determined suitable and which are available include a warehouse, communications facilities and miscellaneous facilities.

For specific information concerning Harry Diamond Laboratories, please contact Commander, U.S. Army Laboratory Command, ATTN: AMSLC-MC (Ms. Ann Barnett), 2800 Powder Mill Road, Adelphi, Maryland 20783-1145.

Suitable/Available Properties

Property Number: 329210060
Type Facility: Communications/Electronics Facilities—3 brick structures.

Property Number: 329210061
Type Facility: Warehouse—1 brick storehouse.

Property Number: 329210062
Type Facility: Miscellaneous Facilities—3 facilities including roads and a vehicle park.

Property Number: 329210063
Type Facility: Multi-Purpose Facilities—2 brick structures including an administrative building.

BILLING CODE 4210-29-M

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-92-3385; FR-3149-C-02]

Fund Availability (NOFA) for Supportive Housing for the Elderly, Fund Availability for FY 92; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of fund availability for FY 92; correction.

SUMMARY: On March 6, 1992 (57 FR 8218), the Department published in the **Federal Register**, a NOFA that announced HUD's funding for supportive housing for the elderly. The chart titled, Fiscal Year 1992 Allocations for Supportive Housing for the Elderly, erroneously listed the Nonmetropolitan Units for Region 3 to be 730. The purpose of this document is to correct that chart by indicating that the correct number of Nonmetropolitan Units for Region 3 is 130.

DATES: The deadline date for receipt of applications in response to this NOFA is June 3, 1992.

ADDRESSES: Applications must be delivered to the HUD Field Office for your jurisdiction. HUD will date and time stamp incoming applications to evidence timely receipt, and upon request, provide the applicant with an acknowledgement of receipt. Applications submitted by facsimile are not acceptable.

FOR FURTHER INFORMATION CONTACT: The HUD Field Office for your jurisdiction.

SUPPLEMENTARY INFORMATION: Accordingly, the following correction is made to FR Doc. 92-5233, published in the **Federal Register** on Friday, March 6, 1992 (57 FR 8218), to read as follows:

On page 8218, at the bottom of the page, under paragraph B. Allocation Amounts, in the chart titled, FISCAL YEAR 1992 ALLOCATIONS FOR SUPPORTIVE HOUSING FOR THE ELDERLY, correct the Nonmetropolitan Units for Region 3 to read "130" instead of "730".

Authority: Section 202, Housing Act of 1959, as amended (12 U.S.C. 1701q), section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 16, 1992.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-27-M

[Docket No. N-92-3242; FR-2997-N-02]

Funding Availability; Housing Counseling: Announcement of Funding Awards

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Announcement of funding awards.

SUMMARY: In accordance with section 102(a)(4)(C) of the Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions made by the Department under HUD's Housing Counseling Program for Fiscal Year 1991. The announcement contains the names and addresses of the award winners and the amounts of the awards.

FOR FURTHER INFORMATION CONTACT: Thomas Miles, Program Advisor, Single Family Servicing Division, Department of Housing and Urban Development, room 9178, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708-1672 or (202) 708-4594 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Section 106 of the Housing and Urban Development Act of 1968 (section 106) authorizes HUD to provide a program of housing counseling services to designated homeowners and tenants. The program authorized by section 106 (Housing Counseling Program) is divided into two components: the housing counseling services provided under

section 106(a), and those provided under section 106(c).

Under the Housing Counseling Program, HUD contracts with public or private organizations to provide the housing counseling services authorized by section 106. When the Congress makes funds available to assist the Housing Counseling Program, HUD announces the availability of these funds, and invites applications from eligible agencies (i.e. HUD-approved counseling agencies), through a notice of funding availability (NOFA) published in the **Federal Register**.

In a NOFA published on April 30, 1991 (56 FR 19902), HUD announced that a total amount of $8,000,000 was appropriated for housing counseling by the HUD Appropriations Act of 1991. Of this amount, the National Affordable Housing Act of 1990 authorized up to $2,000,000 of the total appropriated amount to be used by HUD for the establishment of a toll-free telephone number through which interested parties may obtain lists of housing counseling agencies. (This toll-free number was announced in a notice published in the **Federal Register** on December 12, 1991, 56 FR 64724.) Of the remaining $6,000,000 available for counseling activities, HUD set aside $425,000 to help resolve two litigation matters that involved housing counseling; and announced the availability of $5,575,000 in FY 1991 funds for the counseling services specified in section 106.

In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, the Department is publishing the names, addresses and the amounts of the awards made under the Housing Counseling Program for FY 1991. This information is provided in appendix A to this document. The total amount of the awards equaled $6,465,480. The difference between the amount awarded and the amount announced as available in the April 30, 1991 NOFA results from the fact that HUD did not use the full amount of the $2,000,000 authorized for the toll-free telephone number, or the full amount of the $425,000 set aside for two litigation matters. Accordingly, HUD was able to make available the funds remaining from these matters to HUD-approved counseling agencies for the counseling activities provided under section 106.

Dated: March 13, 1992.

Arthur J. Hill,

Assistant Secretary for Housing—Federal Housing Commissioner.

HOUSING COUNSELING AGENCIES RECEIVING GRANTS IN FY 1991

Office of Administration

[Docket No. N-92-3417]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESSES: Interested parsons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: Jennifer Main, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Devlopment, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a tool-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The notice lists the following information:

(1) The title of the information collection proposal;

(2) The office of the agency to collect the information;

(3) The description of the need for the information and its proposed use;

(4) The agency form number, if applicable;

(5) What members of the public will be affected by the proposal;

(6) How frequently information submissions will be required;

(7) An estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response;

(8) Whether the proposal is new or an extension, rein statement, or revision of an information collection requirement; and

(9) The names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535 (d).

Dated: March 11, 1992.

John T. Murphy,

Director, Information Resources, Management Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Application for Insurance of Advance Mortgage Proceeds.

Office: Housing.

Description of the Need for the Information and its Proposed Use: The form is used by mortgagees to request the advancement of mortgage proceeds to reimburse the mortgagor for funds expended or obligated for construction related items. HUD needs this information to verify and approve the amount requested.

Form Number: HUD–92403.

Respondents: Businesses or Other For-Profit.

Frequency of Submission: On Occasion.

Reporting Burden:

	No. of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–92403	5,000		1		.20		1,000

Total Estimated Burden Hours: 1,000.

Status: Extension.

Contact: Kerry J. Mulholland, HUD, (202) 708–0283 Jennifer Main, OMB, (202) 395–6880.

Dated: March 11, 1992.

Proposal: Section 8 Random Digit Fair Market Rent Telephone Surveys.

Office: Policy Development and Research.

Description of the Need for the Information and its Proposed Use: The telephone surveys will provide the Department with a fast and inexpensive way of estimating Section 8 Fair Market Rents (FRMs). The surveys will be used to derive FMR updating factors and to test the accuracy of FMRs in selected areas.

Form Number: None.

Respondents: Individuals or Households.

Frequency of Submission: On Occasion and Annually.

Reporting Burden:

	No. of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Interviews	433,900		6		.00208		5,418

Total Estimated Burden Hours: 5,418.

Status: Extension.

Contact: Joseph Riley, HUD, (202) 708–0590, Jennifer Main, OMB, (202) 395–6880.

Dated: March 11, 1992.

Proposal: Preliminary Site Report by Indian Housing Authority (IHA).

Office: Public and Indian Housing.

Description of the Need for the Information and its Proposed Use: This information, submitted by IHAs, details the type of site proposed for housing construction in terms of land status, size of site and proposed density, zoning status, physical characteristics, and availability of utilities to determine whether a site is suitable for housing.

Form Number: HUD–3188.

Respondents: State and Local Governments and Non-Profit Institutions.

Frequency of Submission: On Occasion.

Reporting Burden:

	No. of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–3188	100		1.5		4		600

Total Estimated Burden Hours: 600.

Status: Reinstatement.

Contact: Ralph Gonzales, HUD, (202) 708–0296 Jennifer Main, OMB, (202) 395–6880.

Dated: March 11, 1992.

BILLING CODE 4210–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–123–02–6334–10; GP–109]

Closures and Restrictions

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of closures and restrictions, Dean Creek Elk Viewing Area.

SUMMARY: Pursuant to 43 CFR part 8364, the BLM will close designated areas of the Dean Creek Elk Viewing Area to the public. Subject to valid existing rights, use of 1,033 acres of Dean Creek Elk Viewing Area outside of designated parking areas, viewing areas or interpretive trails by foot, automobile, or off-road motorized vehicles is prohibited. This Closure shall apply year round. Hunting, shooting firearms, and igniting fireworks or other explosive devices is prohibited. Vehicular parking, for a period of more than twelve hours in a twenty four hour period is prohibited. Designated public use areas will be open from dawn to dusk; overnight use is prohibited. Any Bureau of Land Management, Oregon Department of Fish and Wildlife, employee, agent, contractor or cooperator, while in the performance of official duties are exempt from this closure. Either agency may authorize volunteers, or other parties to enter Dean Creek for administrative, maintenance or other authorized purposes.

The pastures at the Dean Creek Elk Viewing Area support a large herd of resident Roosevelt elk that are highly visible from the highway. The purpose of this closure and restriction notice is to provide a means by which the Secretary of the Interior through the Bureau of Land Management, may control and manage public use of the area to effectively carry out management objectives and provide wildlife with habitat that is free from public disturbance or harassment. The area is designated as a watchable wildlife site; the closure will also provide for public safety by designating safe viewing areas with greater opportunities to view wildlife.

The closed area is depicted on a Dean Creek Elk Viewing Area Map. The map and copies of this closure and restriction notice are available from the Coos Bay District Office, Bureau of Land Management, 1300 Airport Lane, North Bend, Oregon 97459.

This closure and restriction order is effective immediately and shall remain in effect until revised, revoked or amended by the authorized officer pursuant to 43 CFR part 8360.

Any person who violates this closure and restriction notice may be subject to a maximum fine of $1,000 and/or imprisonment not to exceed 12 months under authority of 43 CFR 8360.0–7.

Closed Areas

Dean Creek Elk Viewing Area is located approximately 3 miles east of Reedsport, Oregon, adjacent to Oregon State Highway 38 and is further described as follows:

Township 21 South, Range 11 West, Willamette Meridian

Sec. 31 M & B within lot 4 So. of Hwy 38
Sec. 32 M & B within lots, 5, 6, 7 and 8
Sec. 33 M & B within S½SW¼, SW¼SE¼ So. of Hwy 38, SE¼SE¼, lot 8
Sec. 34 lots 5 and 6

Township 22 South, Range 11 West, Willamette Meridian

Sec. 3 lot 15, M & B within lot 14
Sec. 4 NW¼, W½NE¼, NE¼NE¼, M & B SE¼NE¼
Sec. 5 W½NE¼, N½NW¼, W½NW¼, SW¼NW¼
Sec. 6 SE¼NE¼, M & B within NE¼, lots 1, 2 and 3

All south of Oregon State Highway 38.

FOR FURTHER INFORMATION, CONTACT: Kathy Jo Wall, Natural Resource Specialist, Umpqua Resource Area, Coos Bay District, Bureau of Land Management, 1300 Airport Lane, North Bend, Oregon 97459 (telephone 503/756/0100).

Terry A. Richards,

Umpqua Area Manager.

[CA–060–4410–08]

1992 Amendment Review of the California Desert Conservation Area Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the Bureau of Land Management is initiating the 1992 Review of the California Desert Conservation Area Plan in accordance with the amendment procedures outlined in chapter 7 of the Plan. The purpose of this review is to consider the need for possible amendments to the Plan based on requests from individuals, public and private organizations, and the Bureau's own observations.

DATES: Proposed amendments are being accepted from the public until May 4, 1992.

ADDRESSES: Send written proposals to: Gerald E. Hillier, District Manager, Attn: 1992 Plan Amendments, California Desert District, 6221 Box Springs Blvd., Riverside, California 92507.

FOR FURTHER INFORMATION CONTACT: Contact Molly Brady, Chief of Planning and Environmental Assistance at (714) 697–5230 if you have any questions regarding this notice.

SUPPLEMENTARY INFORMATION: Requests for amendments or changes in the California Desert Plan are now being accepted from public agencies, interested individuals, and organizations. Supporting rationale is necessary for each proposed change. Requests will be considered in light of the following criteria:

(1) Is the proposed amendment based on new data not considered while the Plan was developed?

(2) Does the information represent a change in legal or regulatory mandate?

(3) Is the supporting detail sufficient and the problem clearly stated so that the request can be considered?

(4) Does the information represent a formal change in a State or local government or agency plan?

The California Desert District Advisory Council will review suggested amendments at its public meeting on June 3–4, 1992. Please contact the California Desert District Office for additional details regarding the meeting.

Dated: March 16, 1992.

Gerald E. Hillier,

District Manager.

BILLING CODE 4310–40–M

[AZ 020–02–4212–13 (AZA–26504)]

Realty Action: Exchange of Public Land, Maricopa County, Arizona

BLM proposes to exchange public minerals for patented minerals in order to achieve more efficient management of the public land through consolidation of ownership.

All Federal minerals in the following sections are being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Gila and Salt River Meridian, Arizona

T. 6 N., R. 3 W.,
Secs. 3, 4, 5 and 8.
Containing 2,003.90 more or less.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this notice will segregate the affected public minerals from appropriation under the public land laws and the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: March 13, 1992.

Henri R. Bisson,

District Manager.

Classification of Public Land in Santa Fe County, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; Bureau Motion Recreation and Public Purposes (R&PP) Act classification; NM.

SUMMARY: The following public lands near the community of Espanola, Santa Fe County, New Mexico have been examined and found suitable for lease or conveyance for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et seq.)

New Mexico Principal Meridian, New Mexico

T.20 N., R.9 E.,
Section 7: Lots 1, 2, 3, 6, E½ SW¼, SE¼
Section 8: Lots 2, 7, 24, 30, SW¼ SW¼
Section 18: N½ NE¼ NW¼, N½ NW¼ NE¼, SE¼ NW¼ NE¼, NE¼ NE¼.
Containing 649.76 acres more or less.

This action is a motion by the Bureau to make available lands identified in the Taos Resource Management Plan not needed for Federal purposes and having potential for disposal to support community needs and recreational resources. Lease or conveyance of the lands for recreational or public purposes use would be in the public interest. Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Taos Resource Area, 224 Cruz Alta Road, Taos, New Mexico, 87571.

Lease or conveyance of the lands will be subject to the following terms, conditions, and reservations:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. All valid existing rights documented on the official public land records at the time of lease/patent issuance.

3. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals.

4. Any other reservations that the authorized officer determines appropriate to ensure public access and proper management of Federal lands and interests therein.

Upon publication of this notice in the **Federal Register**, the lands will be segregated from all forms of appropriation under the public land laws, including the general mining laws, except for lease or conveyance under the Recreation and Public Purposes Act and leasing under the mineral leasing laws. For a period of 45 days from the date of publication of this notice, interested persons may submit comments regarding the proposed lease/conveyance or classification of the lands to the District Manager, Albuquerque District Office, 435 Montano Road NE., Albuquerque, New Mexico 87107. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification will become effective 60 days from the date of publication of this notice.

Upon the effective date of classification, the lands will be open to the filing of an application under the Recreation and Public Purposes Act by any interested, qualified applicant. If, after 18 months following the effective date of classification, an application has not been filed, the segregative effect of the classification shall return to their former status without further action by the authorized officer.

Dated: March 13, 1992.

Robert T. Dale,

District Manager.

BILLING CODE 4310-GG-M

[ID-943-4214; IDI-15633]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes that a 1,063.39 acre withdrawal for Powersite Reserve No. 106, continue for an additional 20 years. The land is still needed for waterpower purposes. These lands will remain closed to surface entry, but have been and would remain open to mineral leasing and mining.

EFFECTIVE DATE: Comments should be received on or before June 18, 1992.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208-384-3166.

The Bureau of Land Management proposes that the existing land withdrawal made by the Executive Order dated July 2, 1910, for Powersite Reserve No. 106, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following described land:

Boise Meridian

T. 37 N., R. 3 W.,
- Sec. 25, lot 8;
- Sec. 26, lot 3;
- Sec. 27, lot 1;
- Sec. 32, lot 1, NE¼SE¼ and SW¼SE¼;
- Sec. 34, lots 1 and 6.

T. 36 N., R. 3 W.,
- Sec. 4, lots 5 and 6;
- Sec. 5, lots 9 and 10;
- Sec. 6, lots 12 and 13 and NW¼SE¼;
- Sec. 7, lots 4 to 7 inclusive and NE¼SE¼.

T. 37 N., R. 2 W.,
- Sec. 28, lot 4;
- Sec. 29, lot 8;
- Sec. 30, lot 1.

T. 37 N., R. 1 W.,
- Sec. 31, lot 2.

T. 36 N., R. 1 W.,
- Sec. 1, lot 1;
- Sec. 2, lot 5;
- Sec. 4, lots 8 and 9 and SW¼SE¼.

T. 36 N., R. 1 E.,
- Sec. 1, lot 5;
- Sec. 2, S½ of lot 2;
- Sec. 3, lot 1;
- Sec. 6, lots 1 to 3 inclusive.

T. 37 N., R. 1 E.,
- Sec. 32, lots 2, 3 and 7.

The areas described aggregate 1,063.39 acres in Clearwater and NezPerce counties.

The withdrawal is essential for protection of potential waterpower development. The existing withdrawal closes the described land to surface entry but not to mineral leasing and mining. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: March 11, 1992.

William E. Ireland,

Chief, Realty Operations Section.

BILLING CODE 4310-GG-M

[NM-930-4214-10; NMNM 88049]

Proposed Withdrawal and Opportunity for Public Meeting; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Department of Agriculture, Forest Service, has filed an application to withdraw 3,760.08 acres of National Forest System land for protection of the Guadalupe Canyon Zoological Botanical Area. This notice closes the land for up to 2 years from location and entry under the United States mining laws. The land will remain open to all other uses which may by law be made of National Forest System land.

DATES: Comments and requests for meeting should be received on or before June 18, 1992.

ADDRESSES: Comments and meeting requests should be sent to the New Mexico State Director, BLM, P.O. Box 27115, Santa Fe, New Mexico 87502-7115.

FOR FURTHER INFORMATION CONTACT: Clarence F. Hougland, BLM, New Mexico State office, 505-438-7400.

SUPPLEMENTARY INFORMATION: On December 16, 1991, the United States Department of Agriculture filed an application to withdraw the following described National Forest System land from location and entry under the United States mining laws, subject to valid existing rights:

New Mexico Principal Meridian

Coronado National Forest

T. 33 S., R. 21 W.,
- Sec. 17, SW¼SW¼;
- Sec. 18, lots 1 to 4, inclusive, E½, and E½W½;
- Sec. 19, lots 1 to 4, inclusive, E½, and E½W½;
- Sec. 20, W½W½;
- Sec. 29, W½;
- Sec. 30, lots 1 to 4, inclusive, E½, and E½W½;
- Sec. 31, lots 1 to 4, inclusive, E½, and E½W½.

T. 33 S., R. 22 W.,
- Sec. 24, SE¼SE¼;
- Sec. 25, E½;
- Sec. 36, E½.

The area described contains 3,760.08 acres in Hidalgo County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the New Mexico State Director of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the New Mexico State Director within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which will be permitted during this segregative period are any land uses, except location under the mining laws, permitted by the Forest Service under existing laws and regulations including, but not limited to, necessary protection for the flora and fauna and threatened and endangered plants and animals.

Dated: March 11, 1992.

Larry L. Woodard,

State Director.

BILLING CODE 4310-FB-M

Fish and Wildlife Service

Availability of Draft Recovery Plan for Lepidium Barnebyanum (Barneby Ridge-Cress), A Utah Plant, for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of the draft recovery plan for *Lepidium barnebyanum* (Barneby ridge-cress), a species of mustard from Indian Creek Canyon in the Uinta Basin of northeastern Utah. This species is known from only one population along shale ridge tops south of the town of Duchesne, Utah. The Service solicits review and comment from the public on this draft recovery plan.

DATES: Comments on the draft recovery plan must be received on or before May 19, 1992 to ensure they receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor, Fish and Wildlife Enhancement, U.S. Fish and Wildlife Service, 2060 Administration Building, 1745 West 1700 South, Salt Lake City, Utah 84104, (801) 524-4430 or (FTS) 588-4430. Written comments and materials regarding this plan should be sent to the Field Supervisor at the Salt Lake City address given above. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: John L. England, Botanist, (801) 524-4430 or (FTS) 588-4430 (see **ADDRESSES** above).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plan to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and

Wildlife Service's (Service) endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal Agencies also will take these comments into account in the course of implementing recovery plans when approved.

Lepidium barnebyanum was listed under the Act as an endangered species on September 28, 1990 (55 FR 39860), due to current and potential threats to the species' population and habitat, as a consequence of current and potential habitat destruction from off-road vehicle and oil and gas development in its limited habitat. Initial recovery efforts will focus on protecting the species' population and habitat from habitat-destroying activities, through the section 7 responsibilities of Federal Agencies, to ensure the conservation of the species and section 9 prohibitions of the Act for plan species on Indian lands, and assisting in maintenance of the species' habitat through cooperative efforts with the Ute Indian Tribe. The species' entire known habitat is on the Uintah and Ouray Reservation of the Ute Indian Tribe. Additional recovery efforts will focus on habitat inventory and minimum viable population studies. The initial goal of the recovery plan is to prevent the extirpation of the species. Downlisting of the species to threatened status is a long-term goal.

Public Comments Solicited

The Service solicits written comments on the *Lepidium barnebyanum* Recovery Plan. All comments received by the date specified in the DATES section will be considered prior to approval of the Recovery Plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 10, 1992.

Galen L. Buterbaugh,

Regional Director.

[FR Doc. 92-6403 Filed 3-19-92; 8:45 am]

BILLING CODE 4310-55-M

National Park Service

AGENCY: National Park Service, Interior.

ACTION: Public Notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession contract with the Mount Rushmore Mountain Company, Inc., authorizing it to continue to provide food and beverage, merchandising, and other visitor facilities and services for the public at Mount Rushmore National Memorial in South Dakota for a period of ten (10) years from January 1, 1993, through December 31, 2002.

EFFECTIVE DATE: May 22, 1992.

ADDRESSES: Interested parties should contact the Regional Director, Rocky Mountain Region, 12795 W. Alameda Parkway, P.O. Box 25287, Denver, Colorado 80225, for information as to the requirements of the proposed contract.

SUPPLEMENTARY INFORMATION: The proposed contract requires a construction and improvement program. The construction and improvement program required has been addressed in the National Environmental Policy Act document dated March 3, 1990, and amended October 4, 1990, amending the General Management Plan for Mount Rushmore National Memorial.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on February 28, 1991, and therefore pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be received by the Regional Director, Rocky Mountain Region, 12795 W. Alameda Parkway, P.O. Box 25287, Denver, Colorado 80225 not later than the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Dated: February 6, 1992.

Boyd Evison,

Acting Regional Director, Rocky Mountain Region.

[FR Doc. 92-6559 Filed 3-19-92; 8:45 am]

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-55; Sub #416X]

CSX Transportation, Inc.—Abandonment Exemption—in Polk County, FL

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—Exempt Abandonments to abandon its 0.9-mile line of railroad between mileposts SV-862.43 and SV-863.37, in West Lake Wales, Polk County, FL.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 19, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 30, 1992.[3] Petitions to reopen or request for public use conditions under 49 CFR 1152.28 must be filed by April 9, 1992, with:

Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative:

Charles M. Rosenberger, CSX Transportation, Inc., 500 Water Street J150, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 25, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927-6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: March 16, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-6515 Filed 3-19-92; 8:45 am]

BILLING CODE 7035-01-M

[1] A stay will be routinely issues by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. See Exemption of Out-of-Service Rail Lines, 5 I.C.C.2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use statement as long as it retains jurisdiction to do so.

[Docket No. AB-117; Sub 5A]

Elgin, Joliet & Eastern Railway Company—Abandonment—Hammond Branch in Hammond, IN; Findings

The Commission has issued a certificate authorizing Elgin, Joliet and Eastern Railway Company to abandon a 0.81-mile segment of its Hammond Branch from a point west of Calumet Avenue to a point near Columbia Avenue in Hammond, IN. The abandonment certificate will become effective on April 19, 1992, unless the Commission also finds that:

(1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and

(2) It is likely that the assistance would fully compensate the railroad.

Any financial assistance offered must be filed with the Commission and served on the applicant no later than March 30, 1992. The following notation must be typed in bold face on the lower left-hand corner of the envelope: "Rail Section AB-OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Decided: March 11, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act: Youth Apprenticeship Research and Demonstration Project

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of availability of funds and of solicitation for grant applications (SGA); withdrawal of solicitation.

SUMMARY: On March 10, 1992, the Employment and Training Administration published a notice in the **Federal Register** announcing the availability of funds and of a solicitation for grant applications (SGA) (SGA/DAA 92-006) for a Youth Apprenticeship Research and Demonstration Project (FR Doc. 92-5564, 57 FR 8493). ETA has determined that further time is needed to refine the SGA, and, therefore, is withdrawing its availability at this time. A new notice of availability is expected to be published in the near future. Requests for copies of the SGA received in response to the March 10, 1992, notice will be returned.

Accordingly, FR Doc. 92-5564, 57 FR 8493 (March 10, 1992), is withdrawn.

FOR FURTHER INFORMATION CONTACT: Laura Cesario. Telephone: (202) 535-8702.

Signed at Washington, DC, this 13th day of March, 1992.

Robert D. Parker,

ETA Grant Officer.

BILLING CODE 4510-30-M

Employment Standards Administration

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., room S-3014, Washington, DC 20210.

New General Wage Determination Decisions

The numbers of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume, State, and page numbers(s).

Volume I

Vermont:
VT91-6 (Mar. 20, 1992)..... p.All.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered by any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 13th day of March 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cultural Anthropology; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Panel for Cultural Anthropology.

Date and Time: April 9, 1992, 9 a.m.-5 p.m., April 10, 1992, 9 a.m.-5 p.m.

Place: Room 500-C, National Science Foundation, 1110 Vermont Ave. Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Stuart Plattner, Program Director for Cultural Anthropology, room 320, National Science Foundation, Washington, DC 20550 Telephone (202) 357-7804.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate unsolicited proposals submitted to the Anthropology Program.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552 b. (c) (4) and (6) of the Government in the Government in the Sunshine Act.

Dated: March 10, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meetings:

Name: Special Emphasis Panel in Mechanical and Structural Systems.

Date and Time: April 2-3, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 540, 1800 G St., NW., Washington, DC.

Agenda: Review and evaluate National Science Foundation Young Investigator nominations.

Date and Time: April 16-17, 1992; 8:30 a.m. to 5 p.m.

Place: Rm. 540, NSF, 1800 G St. NW., Washington, DC.

Agenda: To review and evaluate Materials Synthesis and Processing Proposals.

Contact Persons: Huseyin Sehitoglu or Jerome Sackman, Program Directors, Mechanics and Materials Program, room 1108, NSF, Washington, DC 20550. Telephone: (202) 357-9542.

Purpose of Meetings: To provide advice and recommendations to the Division of Mechanical and Structural Systems concerning proposals submitted to the Division for financial support.

Type of Meetings: Closed.

Reason for Closing: The nominations and proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the nominations and proposals. These matters are exempt under 5 U.S.C. 552 b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 17, 1992.

NUCLEAR REGULATORY COMMISSION

GE Nuclear Energy; Receipt of Application for Design Certification

On September 29, 1987, GE Nuclear Energy (GE) filed an application pursuant to section 103 of the Atomic Energy Act of 1954, as amended, and 10 CFR part 50, appendix O which sought design certification of the Advanced Boiling Water Reactor (ABWR), in accordance with 10 CFR part 50, appendix O. Subsequently, on May 18, 1989, 10 CFR part 52 was adopted. Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has received a request from GE dated December 20, 1991, to have their application for design certification of the ABWR under amendment O of 10 CFR part 50, as supplemented by amendments 1 through 19, be considered as an application for design certification pursuant to 10 CFR part 52.

A copy of the application, as amended, is available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street NW., Washington, DC. Previous correspondence on this application is filed under docket number 50-605. The new docket number established for this application is 52-001. A notice relating to the rulemaking pursuant to 10 CFR 52.51 for design certification including provisions for participation of the public and other parties will be published at the appropriate time in the future.

Dated at Rockville, Maryland this 13th day of March, 1992.

For the Nuclear Regulatory Commission.

Jerry N. Wilson,

Acting Director, Standardization Project Directorate, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Revision of the Office of Management and Budget (OMB) Circular No. A-119, Request for Public Comment

AGENCY: Office of Federal Procurement Policy, OMB.

ACTION: OMB is requesting comments on Circular No. A-119, "Federal Participation in the Development and Use of Voluntary Standards." This Circular is being revised to foster greater agency use of voluntary standards, particularly in light of recently stated national objectives, and to increase the effectiveness of the Circular.

SUMMARY: OMB Circular No. A-119 provides policies on Federal use of private standards, and agency participation in voluntary standard bodies and standards-developing groups. Participation in such groups should occur when it is in the public interest and is compatible with agencies' missions, authorities, priorities, and budget resources.

As part of the Circular A-119 review process, we would welcome comments on all aspects of the Circular and its implementation.

DATES: Comments must be received on or before April 20, 1992.

ADDRESSES: Written comments should be sent to Office of Management and Budget, Office of Federal Procurement Policy, 725 17th Street, NW.—suite 9001, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Chris Jordan, Policy Analyst, Office of Federal Procurement Policy, 725 17th Street, NW., Washington, DC 20503. Telephone (202) 395-6810.

SUPPLEMENTARY INFORMATION: The following is a brief summary of the changes proposed in the draft revision of OMB Circular A-119:

(1) Clarification of existing Administration policy in the areas of international standards and conformity assessment procedures;

(2) Incorporation of recently stated national goals and objectives in the areas of metrication and the use of environmentally sound and energy efficient standards; and

(3) Strengthening of the reporting and other mechanisms to ensure full implementation of this Circular, including the designation of a Standards Executive within each agency who will be responsible for implementing the Circular as well as developing certain agency reports.

New or revised parts of the Circular appear in italics in the text of the Circular.

Dated: March 17, 1992.

Allan V. Burman,

Administrator.

Circular No. A-119
Revised

To the Heads of Executive Departments and Establishments

Subject: Federal Participation in the Development and use of Voluntary Standards.

1. *Purpose.* The Circular establishes policy to be followed by executive agencies in working with voluntary standards bodies. It also establishes policy to be followed by executive branch agencies in adopting and using voluntary standards.

2. *Rescissions.* This Circular supersedes OMB Circular No. A-119, dated *October 20, 1982*, which is rescinded.

3. *Background.* Government functions often involve products or services that must meet reliable standards. Many such standards, appropriate or adaptable for the Government's purposes, are available from private voluntary standards bodies. Government participation in the standards-related activities of these voluntary bodies provides incentives and opportunities to establish standards that serve national needs, and the adoption of voluntary bodies provides incentives and opportunities to establish standards that serve national needs, and the adoption of voluntary standards, whenever practicable and appropriate, eliminates the cost to the Government of developing its own standards. Adoption of voluntary standards also furthers the policy of reliance upon the private sector to supply Government needs for goods and services, as enunciated in OMB Circular No. A-76, "Performance of Commercial Activities."

4. *Applicability.* This Circular applies to all Executive agency participation in voluntary

standards activities, domestic and international, but not to activities carried out pursuant to treaties and international standardization agreements.

5. *Definitions.* As used in this Circular:

a. *Executive agency* (hereinafter referred to as "agency") means any executive department, independent commission, board, bureau, office, agency, Government-owned or controlled corporation or other establishment of the Federal Government, including regulatory commission or board. It does not include the legislative or judicial branches of the Federal Government.

b. *Standard* means a prescribed set of rules, conditions, or requirements concerned with the definition of terms; classification of components; delineation of procedures, *including conformity assessment procedures;* specification of dimensions, materials, performance, design, or operations; measurement of quality and quantity in describing materials, products, systems, services, or practices; or descriptions of fit and measurement of size.

c. *Voluntary Standards* are established generally by private sector bodies, *both domestic and international,* and are available for use by any person or organization, private or governmental. The term includes what are commonly referred to as "industry standards" as well as "consensus standards", but does not include professional standards of personal conduct, institutional codes of ethics, private standards of individual firms, or standards mandated by law, such as those contained in the United States Pharmacopeia and the National Formulary, as referenced in 21 U.S.C. 351.

d. *Government Standards* include individual agency standards and specifications as well as Federal and Military standards and specifications.

e. *Voluntary standards bodies* are private sector *domestic or international* organizations—such as nonprofit organizations, industry associations, professional and technical societies, institutes, or groups, and recognized test laboratories—that plan, develop, establish, or coordinate voluntary standards.

f. *Standards-developing groups* are committees, boards, or any other principal subdivisions of voluntary standards bodies, established by such bodies for the purpose of developing, revising, or reviewing standards, and which are bound by the procedures of those bodies.

g. *Adoption* means the use of the latest edition of a voluntary standard in whole, in part, or by reference for procurement purposes and the inclusion of the latest edition of a voluntary standard in whole, in part, or by reference in regulation(s).

h. *Secretary* means the Secretary of Commerce or that Secretary's designee.

6. *Policy.* It is the policy of the Federal Government in its procurement and regulatory activities to:

a. Rely on voluntary standards, both domestic and international, whenever feasible and consistent with law and regulation pursuant to law;

b. Participate in voluntary standards bodies when such participation is in the public interest and is compatible with agencies' missions, authorities, priorities, and budget resources; and

c. Coordinate agency participation in voluntary standards bodies so that (1) the most effective use is made of agency resources and representatives; and (2) the views expressed by such representatives are in the public interest and, as a minimum, do not conflict with the interests and established views of the agencies.

7. *Policy Guidelines.* In implementing the policy established by this Circular, agencies should recognize the positive contribution of standards development and related activities. When properly conducted, standards development can increase productivity and efficiency in *Government and* industry, expand opportunities for international trade, conserve resources, and improve health and safety. It also must be recognized, however, that these activities, if improperly conducted, can suppress free and fair competition, impede innovation and technical progress, exclude safer and less expensive products, or otherwise adversely affect trade, commerce, health, or safety. Full account in carrying out this policy shall be taken of the import on the economy, applicable Federal laws, policies, and national objectives, including, for example, laws and regulations relating to antitrust, national security, small business, product safety, environment, *metrication,* technological development, and conflicts of interests. It should also be noted, however, that the provisions of this Circular are intended for internal management purposes only and are not intended to (1) create delay in the administrative process, (2) provide new grounds for judicial review, or (3) create legal rights enforceable against agencies or their officers. The following policy guidelines are provided to assist and govern implementation of the policy enunciated in paragraph 6.

a. Reliance on Voluntary Standards

(1) Voluntary standards that will serve agencies' purposes and are consistent with applicable laws and regulations should be adopted and used by Federal agencies in the interests of greater economy and efficiency, unless they are specifically prohibited by law from doing so.

(2) *Voluntary standards that are internationally recognized or accepted should be considered in procurement and regulatory applications in the interests of promoting trade and implementing the provisions of the Standards Code in the General Agreement on Tariffs and Trade.*

(3) Voluntary standards should be given preference over non-mandatory Government standards unless use of such voluntary standards would adversely affect performance or cost, reduce competition, or have other significant disadvantages.

(4) In adopting and using voluntary standards preference should be given to those based on performance criteria when such criteria may reasonably be used in lieu of design, material, or construction criteria. *Preference should also be given, in light of stated national goals and objectives, to the adoption and use of voluntary standards that (i) reflect the metric system of measurement, and (ii) foster materials, products, systems, services, or practices that are environmentally sound and energy efficient.*

(5) Voluntary standards adopted by Federal agencies should be referenced, along with their dates of issuance and sources of availability, in appropriate publications, regulatory orders, and related in-house documents. Such adoption should take into account the requirements of copyright and other similar restrictions.

(6) Agencies should not be inhibited, if within their statutory authorities, from developing and using Government standards in the event that voluntary standards bodies cannot or do not develop a needed, acceptable standard in a timely fashion. Nor should the policy contained in this Circular be construed to commit any agency to the use of a voluntary standard which, after due consideration, is, in its opinion, inadequate, does not meet statutory criteria, or is otherwise inappropriate.

b. Participation in Voluntary Standards Bodies

(1) Participation by knowledgeable agency employees in the standards activities of voluntary standards bodies and standards-developing groups, *both domestic and international,* should be actively encouraged and promoted by agency officials when consistent with the provisions of paragraph 6b.

(2) Agency employees who, at Government expense, participate in standards activities of voluntary standards bodies and standards-developing groups should do so as specifically authorized agency representatives.

(3) Agency participation in voluntary standards bodies and standards-developing groups does not, of itself, connote agency agreement with, or endorsement of, decisions reached by such bodies and groups or of standards approved and published by voluntary standards bodies.

(4) Participation by agency representatives should be aimed at contributing to the development of voluntary standards that (a) will eliminate the necessity for development or maintenance of separate Government standards, *and (b) will further such national goals and objectives as increased use of (i) the metric system of measurement, and (ii) environmentally sound and energy efficient materials, products, systems, services, or practices.*

(5) Agency representatives serving as members of standards-developing groups should participate actively and on a basis of equality with private sector representatives. In doing so, agency representatives should not seek to dominate such groups. Active participation is intended to include full involvement in discussions and technical debates, registering of opinions and, if selected, serving as chairpersons or in other official capacities. Agency representatives may vote, in accordance with the procedures of the voluntary standards body, at each stage of standards development, unless specifically prohibited from doing so by law or their agencies.

(6) The number of individual agency participants in a given voluntary standards activity should be kept to the minimum required for effective presentation of the various program, technical, or other concerns of Federal agencies.

(7) The providing of Agency support to a voluntary standards activity should be limited to that which is clearly in furtherance of an agency's mission and responsibility. Normally, the total amount of Federal support should be no greater than that of all private sector participants in that activity except when it is in the direct and predominant interest of the Government to develop a standard or revision thereto and its development appears unlikely in the absence of such support. The form of agency support, subject to legal and budgetary authority, may include:

(a) Direct financial support; e.g., grants, sustaining memberships, and contracts;

(b) Administrative support; e.g., travel costs, hosting of meetings, and secretarial functions;

(c) Technical support; e.g., cooperative testing for standards evaluation and participation of agency personnel in the activities of standards-developing groups; and

(d) Joint planning with voluntary standards bodies to facilitate a coordinated effort in identifying and developing needed standards.

(8) Participation by agency representatives in the policymaking process of voluntary standards bodies, in accordance with the procedures of those bodies, is encouraged—particularly in matters such as establishing priorities, developing procedures for preparing, reviewing, and approving standards, and creating standards-developing groups. In order to maintain the private, nongovernmental nature of such bodies, however, agency representatives should refrain from decisionmaking involvement in the internal day-to-day management of such bodies (e.g., selection of salaried officers and employees, establishment of staff salaries and administrative policies.

(9) This Circular does not provide guidance concerning the internal operating procedures that may be applicable to voluntary standards bodies because of their relationships to agencies under this Circular. Agencies should, however, carefully consider what laws or rules may apply in a particular instance because of these relationships. For example, these relationships may involve the Federal Advisory Committee Act, as amended (5 U.S.C. app. I), or a provision of an authorizing statute for a particular agency. Agencies are best able to determine what laws and policies should govern particular relationships and to assess the extent to which competition may be enhanced and cost-effectiveness increased. Questions relating to anti-trust implications of such relationships should be addressed to the Attorney General.

8. *Responsibilities.* a. The Secretary will:

(1) Coordinate and foster executive branch implementation of the policy in paragraph 6 of this Circular, and may provide administrative guidance to assist agencies in implementing paragraph *8.b(2)(d)* of this Circular;

(2) Establish an interagency consultative mechanism to advise the Secretary and agency heads in implementing the policy contained herein. That mechanism shall provide for participation by all affected agencies and ensure that their views are considered;

(3) Report to the Office of Management and Budget concerning implementation of this Circular; and

(4) *Pursue, with other nations and international organizations, the mutual recognition of standards, including conformance assessment procedures.*

b. The heads of agencies concerned with standards will:

(1) Implement the policy in paragraph 6 of this Circular in accordance with the policy guidelines in paragraph 7 within 120 days of issuance;

(2) *Within 120 days of issuance, shall designate a senior level official with agency-wide responsibility as the Standards Executive who will implement this Circular. The Standards Executive's responsibilities will include, but not be limited to:*

(a) Establishing procedures to ensure that agency representatives participating in voluntary standards bodies and standards-developing groups will, to the extent possible, ascertain the views of that agency on matters of paramount interest and will, as a minimum, express views that are not inconsistent or in conflict with established agency views;

(b) *Ensuring,* when two or more agencies participate in a given voluntary standards body or standards-developing group, *that they* coordinate their views on matters of paramount importance so as to present, whenever feasible, a single, unified position;

(c) Cooperating with the Secretary in carrying out his responsibilities under this Circular;

(d) Consulting with the Secretary, as necessary, in the development and issuance of internal agency procedures and guidance implementing this Circular, *including the development of an agency-wide directory identifying agency employees participating in standards developing groups; and*

(e) Submitting, in response to the request of the Secretary, reports on the status of agency interaction with voluntary standards bodies.

(3) Review their existing standards within five years of issuance of this Circular, and at least once every five years thereafter, and cancel those for which an adequate and appropriate voluntary standard can be substituted.

9. *Reporting Requirements. One year from the date of issuance of this Circular, and every year thereafter,* the Secretary will submit to the Office of Management and Budget a brief, summary report on the status of agency interaction with voluntary standards bodies. As a minimum, the report will include the following information:

a. The nature and extent of agency participation in the development and utilization of voluntary standards, including:

(1) *The number of voluntary standards each agency currently utilizes for procurement and the number utilized for regulation;*

(2) *The number of voluntary standards each agency has adopted since the last report;*

(3) *The number of agency employees participating in at least one standards developing group;*

b. *Identification of any environmentally sound and energy efficient voluntary standard developed with agency support and/or implemented by the agency.*

c. An evaluation of the effectiveness of the policy promulgated in this Circular and recommendations for change.

10. *Policy Review.* The policy contained in this Circular shall be reviewed for effectiveness by the Office of Management and Budget three years from the date of issuance.

11. *Inquiries.* For information concerning this Circular, contact the Office of Management and Budget, Office of Federal Procurement Policy, telephone 202/395–6810.

BILLING CODE 3110–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–18615; 812–7866]

North American Security Trust, et al.; Application

March 13, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("Act").

APPLICANTS: North American Security Trust (the "Fund"), Goldman, Sachs & Co. ("Goldman Sachs"), Salomon Brothers Asset Management Inc ("SBAM"), and Wellington Management Company ("Wellington").

RELEVANT ACT SECTIONS: Order requested pursuant to section 6(c) of the Act granting an exemption from section 15(a) of the Act.

SUMMARY OF APPLICATION: Applicants seek an order that would permit Goldman Sachs, SBAM, and Wellington to serve as investment subadvisers to certain portfolios of the Fund until the earlier of July 10, 1992 or the date of shareholder approval or disapproval of their respective subadvisory agreements.

FILING DATE: The application was filed on February 11, 1992 and an amended and restated application was filed on March 13, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 7, 1992, and should be accompanied by proof of service on

applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. The Fund, 116 Huntington Avenue, Boston, MA 02116. Goldman Sachs, 32 Old Slip, New York, NY 10005. SBAM, 7 World Trade Center, New York, NY 10048. Wellington, 75 State Street, Boston, MA 02109.

FOR FURTHER INFORMATION CONTACT: Barry A. Mendelson, Staff Attorney, at (202) 504–2284, or Barry D. Miller, Branch Chief, at (202) 272–3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Fund is an open-end, diversified, management investment company organized as a Massachusetts business trust. The Fund currently has nine separate investment portfolios, each of which has a specific investment objective and offers a separate series of shares of beneficial interest to the public. The nine portfolios are: The Global Growth Trust, the Growth Trust, the Growth and Income Trust, the Investment Quality Bond Trust, the Money Market Trust, the U.S. Government Securities Trust, the Conservative Asset Allocation Trust, the Moderate Asset Allocation Trust, and the Aggressive Asset Allocation Trust (the "Trusts").

2. The Fund's investment adviser is NASL Financial Services, Inc. (the "Adviser"), a wholly-owned subsidiary of the Fund's sponsor, North American Security Life Insurance Company, which in turn is a wholly-owned subsidiary of North American Life Assurance Company. The Adviser provides certain expense guarantees and administrative services to the Fund pursuant to an investment advisory contract (the "Advisory Agreement"). In addition, the Adviser contracts with and compensates other parties ("Subadvisers") that provide portfolio management services to the nine Trusts pursuant to subadvisory contracts ("Subadvisory Agreements"). Currently there are four Subadvisers: Goldman Sachs Asset Management ("GSAM"), SBAM, Wellington, and Oechsle International Advisers, L.P. ("Oechsle").

3. Goldman Sachs is a New York limited partnership whose separate operating division, GSAM, serves as Subadviser to the Growth, Conservative Asset Allocation, Moderate Asset Allocation and Aggressive Asset Allocation Trusts. SBAM, an indirect, wholly-owned subsidiary of Salomon Inc, is a Delaware corporation that serves as Subadviser to the U.S. Government Securities Trust. Wellington is a Massachusetts general partnership that serves as Subadviser to the Growth and Income, Investment Quality Bond, and Money Market Trusts. Oechsle is a Delaware limited partnership that serves as Subadviser to the Global Growth Trust.

4. Prior to December 13, 1991, the Subadviser to the Growth, Conservative Asset Allocation, Moderate Asset Allocation, Aggressive Asset Allocation, U.S. Government Securities, and Money Market Trusts was M.D. Sass Investors Services, Inc. ("Sass Investors"). On that date, the Fund's trustees accepted the resignation of Sass Investors as Subadviser to each of those Trusts. Thereafter, the Fund's trustees—including a majority of the trustees who are not "interested persons," as defined in section 2(a)(19) of the Act, of either the Fund, the Adviser, or any of the Subadvisers (the "Independent Trustees")—approved new Subadvisory Agreements for each of the Trusts for which Sass Investors formerly served as Subadviser. In each case, the fee payable to the new Subadviser was less than the fee formerly payable to Sass Investors. Under the terms of rule 15a–4 under the Act (see below), GSAM, SBAM, and Wellington will be able to serve until April 11, 1992 as Subadvisers without obtaining shareholder approval of the applicable Subadvisory Agreements.

5. At a meeting held on January 31, 1992, the Fund's trustees approved changes in the Advisory Agreement to provide lower advisory fees for the Growth, Growth and Income, Investment Quality Bond, Money Market, and U.S. Government Securities Trusts. The trustees also approved combining the three Asset Allocation Trusts into a new Asset Allocation Trust with an investment objective of seeking the highest total return consistent with a moderate level of risk tolerance. The proposed new Asset Allocation Trust, like the three Trusts that would be combined into it, would be managed by GSAM.

6. Although the Fund does not hold annual meetings of shareholders, a shareholders' meeting will be required in 1992 for each of the nine Trusts. The new Subadvisory Agreements must be submitted to the shareholders of the six Trusts that have a new Subadviser in order to satisfy the requirements of section 15(a) of the Act. The amendment to the Advisory Agreement approved at the January 31, 1992 meeting will have to be submitted to shareholders of the five affected Trusts for approval. The proposed combination of the three Asset Allocation Trusts also must be approved or disapproved by the shareholders of such Trusts. Finally, in accordance with undertakings in the Fund's registration statement, the Investment Quality Bond, Growth and Income, and Global Growth Trusts will be holding shareholder meetings in 1992 to vote upon their respective Subadvisory Agreements and the Fund's 12b–1 distribution plan.

Applicants' Legal Analysis

1. Section 15(a) of the Act makes it unlawful for any person to serve as investment adviser except pursuant to a written contract that has been approved by a majority vote of the outstanding voting securities of the investment company. Applicants request an order pursuant to section 6(c) of the Act exempting them from the provisions of section 15(a) to the extent necessary to permit:

(a) GSAM to continue to serve as Subadviser to the Growth, Conservative Asset Allocation, Moderate Asset Allocation and Aggressive Asset Allocation Trusts;

(b) SBAM to continue to serve as Subadviser to the U.S. Government Securities Trust; and

(c) Wellington to continue to serve as Subadviser to the Money Market Trust, in each case until the earlier of July 10, 1992 or the date of shareholder approval of the applicable Subadvisory Agreement.

2. Rule 15a–4 provides a temporary exemption from the shareholder approval requirement of section 15(a) for a period of 120 days after termination of an advisory contract if (i) the contract is approved by the investment company's board, including a majority of the disinterested directors, and (ii) the compensation does not exceed that prescribed under the most recent contract approved by the company's shareholders.

3. Applicants submit that a 90-day extension of the time period provided by rule 15a–4 (from April 11, 1992 to July 10, 1992) is in the best interests of the Fund and its shareholders in that it will enable all matters on which a shareholder vote is required to be considered at a single meeting. Holding a single meeting with a single proxy solicitation will be less costly to the Fund and less confusing to its shareholders.

4. Applicants believe that shareholders of the five Trusts who must vote to amend the Advisory Agreement should vote on adopting new Subadvisory Agreements at the same time, since these matters are related and could influence one another. In addition, applicants believe that shareholders of the three Asset Allocation Trusts should consider the proposed combination of those Trusts at the same meeting that the new Subadvisory Agreements are being considered. If shareholders vote to approve the combination at a meeting held after approval of the new Subadvisory Agreements, the terms of the new Subadvisory Agreements applicable to the Asset Allocation Trusts prior to their combination would be rendered moot.

5. A single meeting to consider changes in the Advisory Agreement, the proposed combination of the Asset Allocation Trusts, and the new Subadvisory Agreements can not be held within the time limitations of rule 15a–4. To solicit shareholder approval of the combination, a registration statement on Form N–14 must be filed under the Securities Act of 1933. Applicants believe they should allow at least 60 days for review of the registration statement by the SEC staff. Moreover, based on its prior experience, the Fund believes that it should allow a period of approximately six weeks after the effective date of the registration statement to solicit and obtain the necessary proxies in order to proceed with the meeting. Accordingly, even if the Fund had filed a registration statement on February 3, 1992, the earliest practicable date following the January 31 meeting, it might not have been possible to mail the proxies until the early part of April or hold a meeting until middle-to-late May, well after the April 11, 1992 deadline necessary to comply with rule 15a–4.

6. Even if shareholders were to consider the combination of the Asset Allocation Trusts at a separate meeting, holding a meeting with respect to all other matters on which a shareholder vote is anticipated within the time frame prescribed by rule 15a–4 would be difficult. As noted, changes made in the Advisory Agreement in light of the new Subadvisory Agreements and other factors were considered by the trustees on January 31, 1992. Although the trustees had sufficient time and information to make determinations with respect to the new Subadvisory Agreements at the December 13 meeting, they lacked the time and information to decide whether the compensation to be paid to the Adviser should be adjusted. Because that issue potentially involved as many as six of the Fund's portfolios, the trustees allowed management until the end of January to complete the necessary analysis to enable the trustees to make an informed decision.

7. The circumstances of this application are much more complicated than those that could be expected when an investment company replaces a single adviser or subadviser. First, the potentially adversarial nature of the relationship between Sass Investors and the Fund rendered impractical the continuation of Sass Investors as Subadviser pending shareholder approval of new Subadvisory Agreements. Second, the trustees' consideration of a proposed merger of the three Asset Allocation Trusts was secondary to their consideration of whether and with whom to replace Sass Investors, the predominant subject matter of the December 13, 1991 trustees' meeting. Following the resignation of Sass Investors, the trustees determined that such a merger should be considered, because the investment policies of the Asset Allocation Trusts had been based in part on a proprietary asset allocation model developed by Sass Investors. As a practical matter, information necessary to consideration of such a merger could not be provided to the trustees until their January 31, 1992 meeting, and the trustees did not decide to seek shareholder approval of such a merger (requiring the filing of Form N–14) until that meeting. Third, the most efficient and cost-effective method for shareholder consideration of the various matters scheduled to be presented to them is to have the Form N–14 filing serve as the proxy statement for a single meeting encompassing all such matters. Multiple proxy statements for one or more meetings would result in additional costs to the Fund, particularly in light of the fact that certain persons are shareholders of more than one Trust.

8. Applicants cite several no-action letters and exemptive orders in support of their request for relief. In particular, applicants rely on Hartford Fund, Inc., Investment Company Act Release Nos. 12446 (May 24, 1982) (notice) and 12501 (June 23, 1982) (order). In Hartford, the Commission permitted an investment adviser to serve for a period of eight months without shareholder approval of the advisory contract, four months beyond the period allowed by rule 15a–4. The relief was granted to allow the advisory contract to be considered at the annual shareholders' meeting rather than at a special meeting, avoiding the necessity of holding two meetings and conducting two proxy solicitations. Applicants assert that the circumstances justifying their request for relief are at least as compelling as those presented in Hartford.

9. In accordance with rule 15a–4, each of the new Subadvisory Agreements for which shareholder approval would be delayed has been approved by the trustees, including a majority of the Independent Trustees, and provides for compensation lower than that paid under the previous Subadvisory Agreement with Sass Investors. In light thereof, the reasonable period of the delay requested, and the avoidance of confusion and unnecessary expense to shareholders that grant of the requested relief would permit, applicants submit that the requested order is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 35–25490]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 13, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 6, 1992 to the Secretary, Securities

and Exchange Commission, Washington, DC 20548, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

The Columbia Gas System, Inc. (70-7921)

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, has filed an application-declaration under sections 9(a), 10, 12(b) and 12(f) of the Act and rules 43 and 45 thereunder.

Since January 16, 1991, Shell LNG Company ("Shell LNG") has held 9.2% of the common stock of Columbia LNG Corporation, a nonutility subsidiary of Columbia, ("Columbia LNG"). Columbia proposes to sell its remaining 90.8% interest in the common stock of Columbia LNG to Shell LNG for a total price of $110 million under an agreement for the sale of stock dated November 25, 1991 between Columbia, Shell Oil Company and Shell LNG ("Agreement"). In addition, the Agreement provides that Columbia LNG shall pay the balance of all its outstanding debt to Columbia, together with interest accrued thereon (the "Debt"). Such Debt is anticipated to be approximately $44 million at the time of final closing. Shell LNG shall arrange refinancing of the Debt and shall issue guarantees to ensure Columbia LNG's refinancing of the Debt.

The Agreement also provides that in the event that Shell LNG elects not to go forward with the interim closing, or the interim closing is not completed by July 29, 1992, or the Agreement is terminated, Columbia shall be entitled, but not obligated, to purchase all (but not part of) the 9.2% of Columbia LNG common stock previously purchased by Shell LNG for a repurchase price equal to the amount Shell LNG had paid for such common stock. Furthermore, if Columbia enters into an agreement to sell any portion of the Columbia LNG common stock to a third party, Columbia must offer to repurchase all the common stock then owned by Shell LNG for a repurchase price equal to the amount paid by Shell LNG for such common stock.

The Agreement further provides for Columbia's indemnification of Shell LNG and Columbia LNG with respect to certain employee claims arising prior to the final closing and certain taxes.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternative designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-8779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, Sec. 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J. W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W. M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 8120-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Announcement of Receipt of Notice to Extend Public Comment Period on Proposed Restriction on Operations of Stage 2 Aircraft at Minneapolis-St. Paul International Airport in Minneapolis, MN

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

The Federal Aviation Administration (FAA) has been notified by the Metropolitan Airports Commission (MAC) that it is extending its public comment period by an additional 31 days. The MAC's original public comment period ended January 23, 1992, and was extended to March 9, 1992. Comments will now be received by the MAC through April 9, 1992.

The MAC's notice of the proposed restriction and an opportunity to comment was published on December 9, 1991, pursuant the Airport Noise and Capacity Act of 1990 and 14 CFR 161.203. Notice of the first extension of the comment period was issued by MAC on January 21, 1992. The second extension of the comment period was issued by MAC on March 5, 1992.

In its original notice, published on December 9, 1991, in the Star Tribune in Minneapolis, Minnesota and Pioneer Press in St. Paul, Minnesota, the Metropolitan Airports Commission indicated that the initial phase of the ordinance restricting operators to their Stage 2 baseline would take effect not earlier than 180 days from the date of publication of MAC's Notice. This date is June 6, 1992. The second phase, a ban on nighttime Stage 2 operations, would take effect on or after that date, as determined by the Commission. These effective dates are not proposed to be changed by the MAC.

Ms. Jennifer Unruh, Committee Secretary at: Metropolitan Airports Commission, General Offices, 6040 28th Avenue South, Minneapolis, Minnesota 55450, (612) 726-8100.

Copies of the complete text of the proposed restriction and the supporting analysis may be obtained by phoning or writing MAC. These documents are also available for public inspection at MAC's General Offices. MAC has indicated that extension of the comment period does not change the proposed restriction or its analysis in any way. Comments to MAC on the proposed restriction should be received by April 9, 1992.

Issued in Des Plaines, Illinois, March 9, 1992.

W. Robert Billingsley,

Manager, Airports Division, Great Lakes Region.

BILLING CODE 4910-13-M

Environmental Document and Scoping Meeting on the Proposed Parallel Runway at 10L-28R at Syracuse Hancock International Airport, Syracuse, New York

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice to hold public scoping meeting.

SUMMARY: The Federal Aviation Administration (FAA) in conjunction with the City of Syracuse, Department of Aviation, is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for a proposed parallel Runway 10L-28R at Syracuse Hancock International Airport (SYR) located in Syracuse, New York. To ensure all significant issues related to the proposed action are identified, a public scoping meeting will be held Tuesday, March 31, 1992, to discuss pertinent environmental issues.

FOR FURTHER INFORMATION CONTACT:

Frank Squeglia, Environmental Specialist, FAA—Eastern Regional Office, Airports Division, AEA-610, Fitzgerald Federal Building, JFK International Airport, Jamaica, NY 11430, (718) 553-0902.

Ralph Napolitano, Commissioner of Aviation, or

Bill Simmons, Noise Abatement Officer, City of Syracuse, Department of Aviation, Syracuse Hancock Int'l Airport, Syracuse, NY 13212, (315) 454-3263.

SUPPLEMENTARY INFORMATION: The FAA, in conjunction with the City of Syracuse, Department of Aviation, will prepare an EIS as part of the planning process for a proposed parallel Runway 10L-28R at SYR. Should a "build" alternative be selected in the planning process, a draft EIS will be prepared and circulated. A scoping meeting is scheduled for March 31, 1992 among Federal, State, and local agencies to discuss the scope of work proposed for the preparation of the EIS.

The proposed project will include the following:

1. Acquisition of approximately 220 acres of land and some improvements thereon.

2. Construction of Runway 10L-28R 3,600 feet (centerline to centerline) north of existing Runway 10-28.

3. The proposed runway would be 150 feet wide with an ultimate length of 9,000 feet. Initially, the runway would be built to a length of 7,500 feet.

Potential significant environmental consequences associated with the runway construction are aircraft noise exposure, compatible land use, social impacts, wetlands, and floodplains.

As stated above, Federal, State and local agencies will be contacted to obtain their comments and suggestions. In conjunction with the Federal notice, this publication serves as positive declaration and notice of intent to prepare a Draft EIS pursuant to part 617 of the implementing regulations pertaining to article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law. Comments and suggestions are invited from all other interested parties to ensure that the full range of issues related to this proposed project are addressed and all significant issues relative to the planning process are identified. Copies of materials to be evaluated can be obtained from Ralph E. Napolitano, the Commissioner of Aviation, Syracuse Hancock International Airport, Syracuse, New York 13212.

Public Scoping Meeting

To facilitate receipt of comments at this stage of the process, a public scoping meeting will be held on March 31, 1992, at 7 p.m. e.s.t., at Syracuse Airport Inn, Syracuse Hancock International Airport. If unable to present verbal and/or written comments at the pubic scoping meeting, written comments will be accepted on or before Tuesday, April 21, 1992 at the FAA address noted under the above heading **"FOR FURTHER INFORMATION CONTACT".**

Issued in Jamaica, NY on March 13, 1992.

Louis P. DeRose,

Manager, Airports Division, Eastern Region.

[FR Doc. 92-6520 Filed 3-19-92; 8:45 am]

BILLING CODE 4910-13-M

Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on April 17, 1992, at 9 a.m. Arrange for oral presentations by March 30, 1992.

ADDRESSES: The meeting will be held in the Boardroom, Air Transport Association of America, 5th floor, 1709 New York Avenue, NW., Washington, DC 20006-5206.

FOR FURTHER INFORMATION CONTACT: Ms. Marge Ross, Aircraft Certification Service (AIR-1), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Transport Airplane and Engine Subcommittee to be held on April 7, 1992, in the Boardroom, Air Transport Association of America, 5th floor, 1709 New York Avenue, NW., Washington, DC 20006-5206. The agenda for this meeting will include:

- Status reports from working groups.
- Plans for near-term priorities.
- Discussion of team building session.

Attendance is open to this interested public, but will be limited to the space available. The public must make arrangements by March 30, 1992, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 25 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed under the heading **"FOR FURTHER INFORMATION CONTACT."**

Issued in Washington, DC, on March 16, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92-6521 Filed 3-19-92; 8:45 am]

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; San Francisco, CA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in San Francisco, California.

FOR FURTHER INFORMATION CONTACT: John R. Schultz, District Engineer, Federal Highway Administration, P.O. 1915, Sacramento, California 95812-1915, telephone: (916) 551-1314.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation and the City and County of San Francisco Department of Public Works, will prepare an environmental impact statement (EIS) on a proposed replacement project for the Embarcadero Freeway which has been demolished as a result of the 1989 Loma Prieta Earthquake.

The proposed project would involve an area bounded by the eastern edge of the Embarcadero Roadway on the east side, Broadway on the north, and Folsom Street on the south side, while portions of Main, Battery, and Sansome Streets form the boundary to the west.

The proposed project is located in an existing urban area and will affect public, commercial, and residential properties, some of which have an historic interest. The project is funded in party by Federal Emergency Relief funds. Alternatives under consideration include:

(1) Taking no action: Local surface roadway (with no connection to the Bay Bridge) which would link the Embarcadero north and south.

(2) Constructing an aerial, surface, subsurface roadway, which includes on/off ramps between a new Bay Bridge terminal connector and the Embarcadero, an underground roadway in front of the Ferry Building, and surface access at Washington Street and at Broadway which would replace demolished on/off ramps at those locations.

(3) Constructing a surface roadway which would have connecting ramps to the new Bay Bridge terminal connector.

(4) Combinations of Alternatives 2 and 3.

(5) Others that may be developed during the scoping session. Alternatives will require reconstructing the existing Embarcadero Roadway.

A Citizens Advisory Committee Embarcadero Replacement Project (CACEP) was formed to provide a public forum for discussing the array of concerns such as transportation, including transit and bicycle, urban design, and open space engendered by the removal of the Embarcadero Freeway. CACEP's recommendations will be considered by the environmental document. Public scoping sessions will be held during June, July, and August, 1992. The draft EIS will be available for public and agency review prior to the required public hearing. Public notice will be given of the time and place of meetings and the hearing.

To ensure that the full range of issues related to this proposed action are addressed, and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address previously provided in this document.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of Federal Programs and activities apply to this program)

Issued on: March 13, 1992.

G. B. Wong,

Senior Area Engineer, Sacramento, California.

[FR Doc. 92-6474 Filed 3-19-92; 8:45 am]

BILLING CODE 4910-22-M

Federal Railroad Administration

Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of 49 CFR Part 236

Pursuant to 49 CFR part 235 and 49 app. U.S.C. 26, the following railroads have petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Block Signal Application (BS-AP)-No. 3151

Applicant: Union Pacific Railroad Company, Mr. P. M. Abaray, Chief Engineer-Signals, 1416 Dodge Street, Room 920, Omaha, Nebraska 68179.

The Union Pacific Railroad Company seeks approval of the proposed modification of the traffic control system, at milepost 4.3 and milepost 5.4, near North Wells Creek, Texas, on the Red River Division, Longview Subdivision, consisting of the conversion of one power-operated switch and one switch to hand-operation equipped with electric locks, the removal of four controlled signals, and the installation of two automatic signals.

The reason given for the proposed changes is that the siding is rarely used for the passing of trains.

BS-AP-No. 3152

Applicant: Union Pacific Railroad Company, Mr. P. M. Abaray, Chief Engineer-Signals, 1416 Dodge Street, room 920, Omaha, Nebraska 68179.

The Union Pacific Railroad Company seeks approval of the proposed discontinuance and removal of the automatic block signal system, between milepost 0.5 and milepost 1.6, near Albina Yard in Portland, Oregon, on the Columbia River Division, Portland Subdivision, consisting of the removal of circuit controllers from 11 hand-operated switches, the removal of 10 automatic block signals, and the conversion of 2 automatic block signals to inoperative approach signals, one requiring relocation. The reason given for the proposed changes is to alleviate excess highway-rail crossing blockage in the Portland area.

BS-AP-No. 3153

Applicant: Union Pacific Railroad Company, Mr. P. M. Abaray, Chief Engineer-Signals, 1416 Dodge Street, room 920, Omaha, Nebraska 68179.

The Union Pacific Railroad Company seeks approval of the proposed discontinuance and removal of the traffic control system, between milepost 399.8 and milepost 406.8, near McGehee, Arkansas, on the Arkansas Division, Wynne Subdivision, consisting of the removal of circuit controllers from two hand-operated switches, the removal of two automatic signals, and the removal of one controlled signal.

The reason given for the proposed changes is that due to the discontinuance of through train service, the signal system is unnecessary.

BS-AP-No. 3154

Applicant: Twin Cities and Western Railroad Company, Mr. Dennis E. Shaffer, President, 723 11th Street East, Glencoe, Minnesota 55336.

The Twin Cities and Western Railroad Company seeks approval of the proposed discontinuance and removal of the traffic control system, between Glencoe, Minnesota, milepost 466.9 and Appleton, Minnesota, milepost 578.9, on the Glencoe Subdivision, a distance of approximately 112 miles.

The reason given for the proposed changes is the low traffic density over the trackage.

BS-AP-No. 3155

Applicant: Burlington Northern Railroad Company, Mr. W. G. Peterson, Chief Engineer-Control Systems, 9401 Indian Creek Parkway, P.O. Box 29136, Overland Park, Kansas 66201-9136.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system on the single main track, between Yakt, Montana, milepost 1344.0, and Leonia, Montana, milepost 1349.0, on the Montana Division, Third Subdivision, consisting of the removal of four automatic signals and the installation of two back to back automatic signals at milepost 1346.6.

The reason given for the proposed changes is due to pole line elimination associated with the installation of electronic coded track circuits.

BS-AP-No. 3156

Applicant: Burlington Northern Railroad Company, Mr. W. G. Peterson, Chief Engineer-Control Systems, 9401 Indian Creek Parkway, P.O. Box 29136, Overland Park, Kansas 66201-9136.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system on the single main track, between Vista, Montana, milepost 1225.4, and Lupfer, Montana, milepost 1230.9, on the Montana Division, Third Subdivision, consisting of the removal of four automatic signals and the installation of two back to back automatic signals at milepost 1228.0.

The reason given for the proposed changes is due to pole line elimination associated with the installation of electronic coded track circuits.

BS-AP-No. 3157

Applicant: Burlington Northern Railroad Company, Mr. W. G. Peterson, Chief Engineer-Control Systems, 9401 Indian Creek Parkway, P.O. Box 29136, Overland Park, Kansas 66201-9136.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system on the double main track, between milepost 7.0 and milepost 10.0, near Fairlawn, Missouri, on the Springfield Division, First Subdivision, consisting of the removal of automatic signal numbers 83 and the relocation of automatic signal numbers 73, 98 and 99.

The reason given for the proposed changes is the equalization track circuit associated with the installation of electronic coded track circuits.

BS-AP-No. 3158

Applicant: CSX Transportation, Inc., Mr. W. J. Scheerer, Chief Engineer-Train Control, 500 Water Street, Jacksonville, Florida 32202.

The CSX Transportation, seeks approval of the proposed discontinuance and removal of the traffic control system between Laughlin Junction, Pennsylvania, milepost 325.1 and Pittsburgh, Pennsylvania, milepost 327.8, on the Baltimore Division, Western Subdivision, consisting of the removal of one controlled signal and two electric locks from hand-operated switches.

The reason given for the proposed changes is that present day operation does not warrant retention of the signal system.

BS-AP-No. 3159

Applicants: Union Pacific Railroad Company, Mr. P.M. Abaray, Chief Engineer-Signals, 1416 Dodge Street, room 920, Omaha, Nebraska 68179. Kansas City Southern Railway Company, Mr. M.W. Hahn, Vice President, Transportation, 114 W. Eleventh Street, Kansas City, Missouri 64105.

The Union Pacific Railroad Company (UP) and Kansas City Southern Railway Company (KCS) jointly seek approval of the proposed modification to Kerr McGee Interlocking, UP milepost 2.43, near Texarkana, Texas, where a single main track of the KCS crosses at grade two main tracks of the UP, Red River Division, Dallas Subdivision, consisting of the discontinuance and removal of electrically locked derail numbers 3 and 4 and replace them with an electric lock gate.

The reason given for the proposed changes is to improve operations.

BS-AP-No. 3160

Applicant: Consolidated Rail Corporation, Mr. J.F. Noffsinger, Chief Engineer-C&S, 15 North 32nd Street, Room 1215, Philadelphia, Pennsylvania 19104-2849.

Consolidated Rail Corporation seeks approval of the proposed modification of the automatic block signal system on the two main tracks between "CP Rock" Interlocking, milepost 8.7, and "CP Norris" Interlocking, milepost 18, near Norristown, Pennsylvania, on the Harrisburg Line, Philadelphia Division, consisting of the removal of automatic signal numbers 167, 173, 176, and 182.

The reason given for the proposed changes is to retire facilities no longer required for present operation.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and contain a concise statement of the interest of the protestant in the proceeding. The original and two copies of the protest shall be filed with the Associate Administrator for Safety, FRA, 400 Seventh Street SW., Washington, DC 20590 within 45 calendar days of the date of issuance of this notice. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, DC on March 13, 1992.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

[FR Doc. 92-6546 Filed 3-19-92; 8:45 am]

BILLING CODE 4910-06-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: March 13, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms

OMB Number: 1512-0082.

Form Number: ATF F 5120.24 (1582-A).

Type of Review: Extension.

Title: Drawback on Wine Exported.

Description: When proprietors export wines that have been produced, packaged, manufactured or bottled in the United States, they file a claim for a drawback or refund for the taxes that have already been paid on the wine. This form notifies ATF that the wine was in fact exported and helps to protect the revenue and prevent fraudulent claims.

Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 900.

Estimated Burden Hours Per Respondent: 1 hour, 8 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 2,025 hours.

OMB Number: 1512-0096.

Form Number: ATF F 5130.12 (1689).

Type of Review: Extension.

Title: Beer for Exportation.

Description: Untaxpaid beer may be removed from a brewery for exportation without payment of the excise taxes normally due. In order that this will be

accomplished, and for ATF to monitor such transactions, brewers complete ATF F 5130.12 (1689). This form monitors exports on ships and aircraft or to military bases. The form is certified by U.S. Customs and ensures that untaxpaid beer does not reach domestic markets.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents: 101.

Estimated Burden Hours Per Respondent: 1 hour, 39 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 10,000 hours.

OMB Number: 1512–0117.

Form Number: ATF F 5620.7 (2147).

Type of Review: Extension.

Title: Claim for Drawback of Tax on Cigars, Cigarettes, Cigarette Papers and Cigarette Tubes.

Description: ATF F 5620.7 documents that cigars, cigarettes, cigarette papers and tubes were shipped to a foreign country, Puerto Rico or the Virgin Islands, and that the tax was already paid on these products. ATF F 5620.7 is used as the claim filed by a person who paid the tax to claim a drawback for the tax that has already been paid.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents: 288.

Estimated Burden Hours Per Respondent: 30 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 144 hours.

OMB Number: 1512–0190.

Form Number: ATF F 5100.11.

Type of Review: Extension.

Title: Withdrawal of Spirits, Denatured Spirits, or Wines for Exportation (Supplemental).

Description: ATF F 5100.11 is completed by exporters to report the withdrawal of spirits, denatured spirits, and wines from internal revenue bonded premises, without payment of tax for direct exportation, transfer to a foreign trade zone, customs manufacturers bonded warehouse, or customs bonded warehouse or for use as supplies on vessels or aircraft.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 500.

Estimated Burden Hours Per Respondent: 1.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 6,000 hours.

OMB Number: 1512–0200.

Form Number: ATF F 5110.31.

Type of Review: Extension.

Title: Application and Permit to Ship Puerto Rican Spirits to the U.S. Without Payment of Tax.

Description: ATF F 5110.31 is used to allow a person to ship spirits in bulk into the U.S. The form identifies the person in Puerto Rico from where shipments are to be made, the person in the U.S. receiving the spirits, amount of spirits to be shipped, and the bond of the U.S. person to cover taxes on such spirits.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 20.

Estimated Burden Hours Per Respondent: 27 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 450 hours.

Clearance Officer: Robert N. Hogarth (202) 927–8930, Bureau of Alcohol, Tobacco and Firearms, room 3200, 650 Massachuetts Avenue, NW., Washington, DC 20226.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Internal Revenue Service

OMB Number: 1545–0257.

Form Number: IRS Forms 8109, 8109–B and 8109–C.

Type of Review: Extension.

Title: Federal Tax Deposit Coupon (8109 and 8109–B) FTD Address Change (8109C).

Description: Federal Tax Deposit Coupons are used to deposit certain types of taxes at authorized depositaries. Coupons are sent to IRS Center for crediting to taxpayers' accounts. Data is used by IRS to make the credit and to verify tax deposits claimed on the returns. The FTD Address Change is used to change the address on the FTD coupons. All taxpayers required to make deposits are affected.

Respondents: State and local governments, Farms, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.

Estimated Number of Respondents: 9,800,700.

ESTIMATED BURDEN HOURS PER RESPONDENT

Form No.	Response time (minutes)
8109	2
8109–B	3
8109C	1

Frequency of Response: On occasion, Monthly, Quarterly, Other (eighth-monthly, semi-monthly).

Estimated Total Reporting Burden: 2,016,425 hours.

Clearance Officer: Garrick Shear (202) 535–4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

BILLING CODE 4830–01–M

UNITED STATES INFORMATION AGENCY

Islamic Culture and Civilization Today

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The Bureau of Educational and Cultural Affairs of the U.S. Information: Agency (USIA) seeks a non-profit educational or professional organization to assist in the administration of the FY 1992 Fulbright "Islamic Culture and Civilization Today" program. The organization, in cooperation with USIA, shall solicit and receive applications from faculty of colleges, universities and community colleges in the U.S. The organization also shall coordinate the competitive review of technically eligible applications and provide panel recommendations and assessments on each application based on academic criteria to be provided by USIA.

The Islamic Culture and Civilization Today program shall support a seminar in a country with a substantial Muslim

population. Eligible seminar sites are limited to selected countries which represent USIA's geographic priorities for this method of academic exchange.

Interested organizations may propose to develop and administer a seminar of up to four to six weeks beginning June 1993 in one of the following countries: Egypt, Jordan, Morocco, Pakistan, Turkey, or Yemen. The seminar, conducted in English for up to 12 U.S. faculty who are neither area nor Islamic studies specialists and who are U.S. citizens with limited or no previous experience in the area, shall examine the political, social, economic, educational and cultural institutions of the subject country, in light of its recent history and current development.

The seminar's perspective shall be interdisciplinary and the sessions led by experts in fields concerned with seminar topics and who are resident in the subject country. The seminar may include sessions or meetings in various locales within the subject country, as well as visits to relevant institutions in the country. The organization shall publicize the opportunity among and accept applications from faculty of social sciences and humanities, such as history, religious studies, political science, art, geography. A Ph.D. shall be generally required and candidacy restricted to applicants who hold full-time teaching appointments and meet other requirements.

DATES: Deadline for proposals: All copies must be received at USIA by 5 p.m. Washington, DC, time on May 15, 1992. Faxed documents will not be accepted, nor will documents postmarked on May 15, 1992, but received at a later date. It is the responsibility of each organization to ensure that proposals are received by USIA by the above deadline. Grants should begin September 1, 1992, and run through August 31, 1993.

FOR FURTHER INFORMATION CONTACT: To request detailed submission material and information additional to this announcement, interested organizations should contact:

For Turkey—Mr. Ted Kniker, U.S. Information Agency, European Academic Exchange Programs (E/AEE), room 208, 301 Fourth Street, SW., Washington, DC 20547 (tel. 202–619–5341).

For Egypt, Jordan, Morocco, Pakistan, Yemen—Mr. Michael B. Graham, U.S. Information Agency, Near East/South Asia Academic Exchange Programs (E/AEN), room 212, 301 Fourth Street SW., Washington, DC 20547 (Tel. 202–619–5368)

ADDRESSES: The original and fifteen (15) copies of the completed submission, including required forms, should be submitted by the deadline to Office of the Executive Director (E/X), Islamic Culture and Civilization, room 357, U.S. Information Agency, 301 Fourth Street SW., Washington, DC 20547.

SUPPLEMENTARY INFORMATION:

Overview

Authority for this activity is the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256 (Fulbright-Hays Act). Through the Fulbright program USIA seeks to increase mutual understanding between the people of the United States and people of other countries. Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life.

Eligibility

Non-profit organizations with experience in international education, such as educational and professional organizations and institutions, American overseas research centers, colleges and universities, are invited to submit proposals for a USIA cooperative agreement.

Guidelines

In preparing a proposal, organizations should address the subjects of program design and scheduling, as well as program administration. At a minimum a successful proposal should clearly cover publicity, logistical and scheduling measures. A plan for post-seminar follow-up evaluation and reporting must also be submitted.

Proposed Budget

A comprehensive line item budget not to exceed $100,000 must be submitted with the proposal. Specific guidelines for budget preparation are included in the application material available from USIA. (Grants awarded to eligible organizations with less then four years' experience conducting international exchange activities and services will be limited to $60,000. Budget submissions from such organizations may not exceed this amount.)

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not adhere to the guidelines established herein. Ineligible proposals will not be considered for funding. Eligible proposals will be forwarded to panels of USIA officers for advisory review. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for awarding a grant resides with USIA's Office of Contracts.

Review Criteria

Technically eligible proposals for this competition will be reviewed according to the following criteria and funding will be allocated on the basis of the degree to which the criteria are met:

1. Quality/responsiveness—Quality of administrative plan and adherence of the proposed activity to the criteria and conditions described in the application material available from USIA. Proposals should clearly demonstrate how the organization will meet the program's objectives and plan.

2. Institutional capacity—Proposed personnel and institutional resources to be applied to the project should be adequate and appropriate to achieve all goals and objectives.

3. Cost-effectiveness—The overhead and administrative components of the proposal, including salary/benefits and indirect costs applied to administrative and program expenses, should be kept to not more than 20 percent of the total request. All budget items should be necessary and appropriate. Proposals should demonstrate cost-sharing and in-kind support.

4. Track record/potential—Proposals should demonstrate potential for excellence and/or a track record of the organization's involvement in international education, particularly academic exchange.

5. Evaluation plan—Proposals should provide a plan for follow up and evaluation by the grantee organization.

6. Reasonableness, feasibility, flexibility—Proposals should demonstrate how the objectives will be met.

7. Multiplier effect/impact—A particular priority is that the seminar strengthen long-term mutual understanding, include maximum sharing of information and views among participants, and provide opportunities to facilitate the establishment of broader institutional and individual scholarly ties for collaborative teaching and research in the U.S. and the subject country.

8. Mutuality of benefits—Proposals should show evidence of strong mutual benefits to the U.S. and foreign institutions and individuals involved, as well as evidence of strong commitment to the goals of the program.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the U.S. Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review of full proposals on or about July 15, 1992. Grant awards will be subject to standard periodic reporting and evaluation requirements.

Dated: 13 March 1992.

William P. Glade,

Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 92–6572 Filed 3–19–92; 8:45 am]

BILLING CODE 8230–01–M

University Development Program in Business Management for Estonia, Latvia and Lithuania

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: Subject to the availability of funds, the United States Information Agency (USIA) invites applications from accredited U.S. educational institutions to conduct exchange programs with post-secondary educational institutions in Estonia, Latvia, and Lithuania to develop their business management capability.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on April 22, 1992. Faxed documents will not be accepted, nor will documents postmarked on April 22, 1992, but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. Grants may not begin prior to September 1, 1992, but must begin no later than September 30, 1992, but must begin no later than September 30, 1992. The duration of the grant should be from twelve (12) to eighteen (18) months.

ADDRESSES: The original and 15 complete copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: University Development in Business Management for Estonia, Latvia and Lithuania, Office of Grants Management, E/XE, room 357, 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested U.S. organizations and institutions should contact Mr. Ted Kniker at the U.S. Information Agency, 301 4th Street SW., European Branch, Academic Exchanges Division, E/AEE room 208, Washington, DC 20547; telephone (202) 619–5341 to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparking proposals, including specific budget preparation information. Other proposal requirements are stipulated and described in the application guidelines for this program .

SUPPLEMENTARY INFORMATION: Overall authority for these exchanges is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act). The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." Pursuant to the Bureau of Educational and Cultural Affairs authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. programs shall also "maintain their scholarly integrity and shall meet the highest standards of academic excellence or artistic achievement."

Overview

The independence of the Baltic States provides a historic opportunity to contribute to the region's successful transition to a free market economy. Under the auspices of the U.S. assistance program for Eastern Europe, the USIA is undertaking a new program in Fiscal Year 1992 to help foster greater expertise in business management in the Baltics.

Guidelines

The purpose of this program is to promote the development of business management programs in Estonia, Latvia, and Lithuania. Applications will be accepted from accredited U.S. colleges and universities to conduct a program with one, two or three foreign partners located in the same country. Regional programs (e.g. programs spanning more than one country) will be considered technically ineligible. Partner institutions may be college or university business departments, faculties, or business education institutes. Preference will be given to projects in which the overseas partner is a university or college. Proposals that are extensions or enhancements of past or current relationships with a partner institution will be acceptable. The development of these programs can be advanced by assisting the Baltic institutions with faculty development and enrichment, curriculum design, administrative organization, and direct teaching. Courses developed may include, but are not limited to, marketing, production management, economics, industrial relations, finance, accounting, and international business. The project may include components for university to private sector linkages. Proposals should provide provisions for a two-way exchange. The length of visits by Americans may vary, but it is expected that at least one of the American participants will be in residence overseas for at least one semester. The length of visits by Estonians, Latvians, or Lithuanians may very, but should not exceed six weeks.

A proposal will be deemed technically ineligible if:

1. The applicant is neither an accredited U.S. college nor university;
2. The project does not constitute a direct partnership with a post-secondary business management program in a Baltic country;
3. The project involves partnerships in more than one country; or
4. The project does not seek to address the faculty, curriculum, and administrative aspects entailed in developing the business management program identified.

Institutional Commitment

Proposals must include documentation of institutional support for the proposed program in the form of signed letters of endorsement from the U.S. and foreign institutions' presidents, chancellors, or directors, or in the form of a signed agreement by the same persons. The Letters of Endorsement must describe each institution's commitment and activities in support of an on-going partner linkage and make specific reference to the proposed

program and each institution's activities in support of that program. The documentation must be included with the proposal submission. Applying institutions are expected to make their own arrangements with the appropriate Estonian, Latvian, or Lithuanian institutions.

Proposed Budget

Project awards to the U.S. institutions will be made in a wide range of amounts but will not exeed $400,000. USIA anticipates awarding three to six grants in amounts ranging from $60,000 to $400,000, with at least one grant awarded for a project in each of the three Baltic countries. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program. For organizations with less than four years of experience in international exchange activities, grants will be limited to a maximum of $60,000. All organizations must submit a comprehensive line item budget, the details and format of which are contained in the application packet.

Allowable Costs

Allowable costs are limited to the following categories:

—International Travel (via American flag carriers);
—Domestic travel;
—Maintenance (including lodging, meals and incidental expenses);
—Educational materials (including books, rfeference materials, computers, etac.);
—Administration (salaries, benefits, communications, other direct and indirect costs) [1]
—Application should demonstrate substantial cost-sharing (dollar and in-kind) in both program and administrative expenses, including overseas partner contributions.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet (E/AEE–92–02). Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Quality of program plan, including academic rigor, thorough conception of project, demonstration of meeting partner needs, contributions to understanding the partner country, proposed follow-up, and qualifications of program staff and participants.

b. Feasibility of the program plan and the capacity of the organization to conduct the exchange. Proposals should clearly demonstrate how the institution will meet the program objectives and plan.

c. Track record—relevant Agency and outside assessments of the organization's experience with international exchanges; for organizations that have not worked with USIA, the demonstrated potential to achieve program goals will be evaluated.

d. Multiplier effect/impact—the impact of the exchange activity on the wider community and on the development of continuing ties, as well as the contribution of the proposed activity in promoting mutual understanding.

e. Value of U.S.-partner country relations—the assessment by USIA's geographic area office of the need, potential impact, and significance of the project with the partner country.

f. Cost effectiveness—greatest return on each grant dollar; degree of cost-sharing exhibited.

g. Adherence of proposed activities to the criteria and conditions described above.

h. Institutional commitment as demonstrated by financial and other support to the program.

i. Follow-on Activities—proposals should provide a plan for continued follow-on activity (without USIA support) which ensures that USIA supported programs are not isolated events. There must be a clear demonstration by both institutions to a long-term commitment.

j. Evaluation plan—proposals should provide a plan for evaluation by the grantee institution.

Notice

The terms and conditions published in the RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about August 15, 1992. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: March 13, 1992.

William P. Glade,

Associate Director, Bureau of Educational and Cultural Affairs.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determinations Under Sections 304 and 305; Thailand Patent Protection

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of determinations under sections 304 and 305 of the Trade Act of 1974, as amended (Trade Act).

SUMMARY: The United States Trade Representative (USTR) has determined pursuant to section 304(a)(1)(A)(ii) of the Trade Act that the Government of Thailand's acts, policies, and practices related to the protection of patents are unreasonable and burden or restrict U.S. commerce. The USTR has further determined, pursuant to section 304(a)(1)(B) of the Trade Act, that action in response to these unreasonable acts, policies and practices is appropriate, but has also determined, pursuant to section 305(2)(A)(ii), that a delay of implementation of such action is desirable to obtain a satisfactory solution with respect to the Government of Thailand's acts, policies and practices relating to patent protection.

EFFECTIVE DATE: March 15, 1992.

FOR FURTHER INFORMATION CONTACT: Peter Collins, Director, Southeast Asian and Indian Affairs (202) 295–6813, or Catherine Field, Associate General Counsel (202) 395–3432, Office of the United States Trade Representative.

SUPPLEMENTARY INFORMATION:

On January 30, 1991, the Pharmaceutical Manufacturers' Association (PMA) filed a petition under section 302(a) of the Trade Act, alleging that the Royal Thai Government denies adequate and effective patent protection for pharmaceutical products. Deficiencies in the Thai patent law included lack of product patent protection for pharmaceuticals, a short term of protection, requirements to manufacture a product or use a process in Thailand, and excessively broad compulsory licensing provisions. PMA also seeks transitional, i.e., "pipeline" protection, for pharmaceutical products that have been patented in other countries but have not been marketed in Thailand.

On February 27, 1992, Thailand's National Legislative Assembly enacted amendments to the current law. These amendments become effective 180 days after the law is signed and published in the Government Gazette. Although the amendments make some improvements in the overall level of patent protection, including providing product patent protection for pharmaceuticals and a 20 year from filing term of protection, other provisions undercut many of these improvements. Some of the amendments diminish the effective level of patent protection, and there is no protection for existing patented pharmaceuticals that have not been marketed in Thailand. The newly-created Pharmaceutical Patent Board has been granted unprecedentedly broad authority to compel owners of pharmaceutical patents to appear and present sensitive information and to subject patent owners to sanctions if patent owners do not comply with the Board's requests. Complusory licensing provisions remain overly broad, and the exclusions from patented subject matter are vague and cover important technologies.

Section 304(a)(2)(B) of the Trade Act requires USTR to determine by March 15, 1992, whether the Government of Thailand's acts, policies and practices under investigation are unreasonable and are a burden or restriction on U.S. commerce. If that determination is affirmative, USTR must determine, subject to the direction of the President, what action, if any, is appropriate in response to that unreasonable act, policy or practice.

Section 304 Determinations

(1) Thailand's Acts, Policies and Practices

On the basis of the investigation pursuant to section 302 of the Trade Act, and consultations with the Government of Thailand and affected U.S. industries, USTR has determined that the Government of Thailand's acts, policies and practices related to the protection of patents are unreasonable and burden or restrict U.S. commerce. The deficiencies in the Thai patent law and amendments adversely affect U.S. owners of patents and trade in products protected by patents.

(2) U.S. Action

The USTR had determined that action under section 301 in response to these unreasonable acts, policies and practices is appropriate and has directed the Section 301 Committee to recommend specific options for consideration.

Determination On Implementation

Section 305(a)(1) provides that any action to be taken under section 301 shall be implemented within 30 days, in this case by April 14, 1992. Section 305(a)(2) further provides that such implementation may be delayed by not more than 180 days if the USTR determines that a delay is necessary or desirable to obtain a satisfactory solution to the acts, policies or practices that are the subject of the action. The USTR has decided that it is necessary and desirable to delay implementation of action under section 301 in this case beyond April 14, 1992, to allow for additional bilateral and multilateral consultations on this matter.

Joanne E. Davidson,

Chairman, Section 301 Committee.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, March 24, 1992, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Memorandum and resolution re: Delegations of Authority to the Corporation's General Counsel.

Memorandum re: Contract for Security Service.

Memorandum re: Contract for Custodial Service.

Discussion Agenda:

Memorandum and resolution re: Statement of Policy Regarding Applications for Deposit Insurance.

Memorandum and resolution re: Proposed amendments to Part 325 of the Corporation's rules and regulations, entitled "Capital Maintenance," which would assign loans secured by multifamily residential properties ("multifamily housing loans") that meet certain prudential criteria to the 50 percent risk weight category.

Memorandum and resolution re: Proposed amendments to Part 325 of the Corporation's rules and regulations, entitled "Capital Maintenance," which would allow limited amounts of purchased mortgage servicing rights and purchased credit card relationships to be recognized for regulatory capital purposes.

Memorandum and resolution re: Proposed amendments to Part 337 of the Corporation's rules and regulations, entitled "Unsafe and Unsound Banking Practices," which are designed to implement changes made by the Federal Deposit Insurance Corporation Improvement Act in the regulatory scheme for brokered deposits.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-6757.

Dated: March 17, 1992.
Federal Deposit Insurance Corporation.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Tuesday, March 24, 1992, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Matters relating to the Corporation's corporate activities.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured depository institutions or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-6757.

Dated: March 17, 1992.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the

Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of March 23, 1992.

A closed meeting will be held on Tuesday, March 24, 1992, at 2:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Roberts, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 24, 1992, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.

Institution of injunctive actions.

Settlement of administrative proceedings of an enforcement nature.

Settlement of injunctive actions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kaye Williams at (202) 272–2400.

Dated: March 17, 1992.

Jonathan G. Katz,

Secretary.

RIN 3235-AD88

Small Business Initiatives

AGENCY: Securities and Exchange Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission today is publishing for comment proposed revisions to the rules and forms under the Securities Act of 1933 ("Securities Act"), the Securities Exchange Act of 1934 ("Exchange Act") and the Trust Indenture Act of 1939 ("Trust Indenture Act") to facilitate capital raising by small businesses and reduce the compliance burdens placed on these companies by the Federal securities laws. The Commission's general small issues exemption from the Securities Act registration requirements, regulation A, as well as the rule 504 exemption, would be revised. The proposals also include simplified registration and reporting disclosure requirements for "small business issuers," as defined.

DATES: Comments must be submitted on or before June 18, 1992.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7-4-92. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Questions should be directed to the Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, as follows: (1) Regulation A and rule 504, Richard Wulff (202-272-2644); (2) Regulation S-B, Securities Act Rules and Forms, Exchange Act Rules and Forms and Trust Indenture Act Rules, Amy S. Bowerman and Martin P. Dunn (202-272-2573); and (3) Financial statement requirements, Teresa E. Iannaconi (202-272-2553).

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment proposed amendments to the Regulation A [1] exemption from the registration requirements of the Securities Act [2] and Forms 1-A [3] and 2-A [4] used for such offerings. In connection with these amendments, the Commission is proposing to repeal current Forms 3-A,[5] 4-A,[6] 5-A,[7] 6-A [8] and 7-A.[9] The proposed changes will simplify the required disclosure. To facilitate the new disclosure format, Securities Act rule 175 [10] and Exchange Act rule 3b-6,[11] the Commission's "safe harbor" provisions for forward looking statements, would be revised to include such statements in a regulation A offering statement.

The proposals to modify regulation A will increase from $1.5 million to $5 million the exemption's yearly dollar limit, and simplify the procedural requirements for use of the exemption. Regulation A also is proposed to be amended to permit an issuer to solicit indications of interest in the company before filing its mandated offering document.

The Commission also is proposing to streamline the conditions to use of rule 504 [12] of regulation D.[13] rule 504 permits non-Exchange Act reporting issuers to raise up to $1 million in a 12-month period without a prescribed disclosure document.

The Commission today also is publishing for comment simplified disclosure requirements both for the registration of securities under the Securities Act and the on-going reporting requirements of the Exchange Act, to be used by "small business issuers." The simplified disclosure requirements for "small business issuers" are contained in proposed regulation S-B.[14] Amendments to rule 405 [15] under the Securities Act and rule 12b-2 [16] under the Exchange Act [17] would define the "small business issuers" that will be eligible to use the simplified disclosure forms. The Commission is proposing to repeal Form S-18 [18] and replace it with Form SB-1.[19] Further, "small business issuers" eligible to use Form S-2,[20] Form S-3 [21] or Form S-6,[22] as well as those "small business issuers" using Form S-4,[23] would be permitted to use the revised disclosure requirements of regulation S-B. Small business issuers would use proposed Form 10-SB,[24] Form 10-KSB [25] and Form 10-QSB [26] to satisfy registration, annual and quarterly reporting obligations under the Exchange Act. Item 7 of Form 8-K [27] is proposed to be amended to provide consistent financial statement instructions regarding small business acquisitions. Revised disclosure requirements would also be available to small business issuers providing information to investors in accordance with Schedule 14A,[28] Schedule 14C,[29] and rule 14a-3 [30] under the Exchange Act.

The Commission is proposing to revise rule 4a-1 [31] under the Trust Indenture Act [32] to increase the dollar ceiling of the exemption from the requirement to issue securities pursuant to an indenture. It is also proposed that rule 4a-2 [33] be redesignated rule 4a-3 [34] and be amended to increase the dollar ceiling of the exemption from the requirement that the securities be issued pursuant to a qualified indenture. Finally, the Commission is proposing new rule 4a-2 [35] which would permit an exemption from the Trust Indenture Act for issuances of securities under regulation A.

I. BACKGROUND

Small businesses are the cornerstone of the U.S. economy. The approximately 20 million small businesses in the United States employ more than half of the domestic labor force,[36] produce nearly half of the gross domestic product [37]

and created the vast preponderance of new jobs during the period from 1988 through 1990.[38] These small businesses are frequently in the vanguard of developing new technology, patents, products and services.[39]

A critical factor in the viability of these small business ventures is access to capital and debt financings, both in their start-up and development stages, as well as their ability, when they are ready, to have their securities traded in the public markets without undue regulatory complexity and cost. The vital importance to the nation's economy and society of simplifying the regulatory requirements for capital formation, particularly for small businesses, was specifically recognized in the Small Business Securities Act Amendments to the Securities Act, Exchange Act and Trust Indenture Act in 1980.[40]

Likewise, the Commission has historically recognized the distinct financing concerns of start-up and development stage businesses and companies newly entering the public markets. In 1978 and 1980, the Commission sought authority from Congress to raise its small issue exemptive authority from $500,000 to $1,500,000 to $2,000,000 to $5,000,000.[41] Concurrently in 1978, the Commission provided a simplified registration form, Form S-18, to register small IPOs, raising the registrable amount to $7.5 million in 1982. A series of limited offering exemptions was adopted as regulation D in 1982, and the threshold for Exchange Act registration under section 12(g) was raised to $5 million in total assets in 1986. In 1988, the Commission, using its small issue exemptive authority, adopted Securities Act Rule 701 [42] to exempt from registration securities of non-Exchange Act reporting companies offered to employees as compensation.

Recent market developments warrant the Commission's review of its exemptive and regulatory requirements as they apply to small businesses, with a view to simplifying access to the public financing markets. While initial public offerings of equity rose to $16 billion in 1991, a four-fold increase over 1990 levels,[43] the availability of financings for companies not yet ready to enter the public market has declined dramatically in the last several years. The availability of both venture capital [44] and bank financing [45] reportedly has substantially contracted.

Since 1986, equity IPOs have declined each year until the turnaround in 1991. Forty-four Regulation A financings were filed in fiscal year 1991 with the Commission, representing financings of $41.5 million, in contrast with 439 filings covering financings of $408 million in fiscal year 1981. Further, the number of start-up businesses decreased significantly in 1991, with more than 50,000 fewer new businesses founded in 1991 than 1990. [46]

Today, a small business that needs capital beyond the resources of the founder and that of his or her family confronts an array of regulations that govern the offering of securities, whether in a limited private offering or in a widespread public offering. Under current requirements, an entrepreneur who wants to tap public financing typically must incur the full costs of preparing mandated disclosures and financial statements—costs that can exceed $200,000—without knowing whether there is any interest in investing in his or her business.

There are, of course, exemptions for limited offerings to more sophisticated professional investors that may reduce compliance costs. The restricted nature of these offerings, however, does not replace the advantages of having access to the public capital markets, and the potentially greater liquidity that publicly offered securities enjoy. The Commission, therefore, has focused its proposals on facilitating access to the public market for start-up and developing companies, and on lowering the costs for small businesses that undertake to have their securities traded in the public market.

Key to the success of these proposals to reduce the impediments to small business financing in the securities markets is that the revisions do not compromise the basic protection of investors mandated by the federal securities laws. As historically recognized by the Commission, and articulated by the Congress in passing the 1980 Small Business Securities Acts Amendments, "reform that results in undermining investor confidence in the integrity of the marketplace would have an effect precisely the opposite of its intended benefits on capital formation." [47] Thus, the proposals published today focus on increasing the utility of regulation A, which assures investors of a mandated disclosure document subject to Commission review, and on simplifying compliance with disclosure requirements for those small businesses that become subject to registration under the Exchange Act, or that choose to have their securities traded on a national exchange or on NASDAQ. By lowering these compliance costs, small companies may, in fact, be encouraged to provide their investors with the benefits of trading in these markets, and the concomitant continuous reporting under the Exchange Act.

II. Small Business Initiatives

A. Executive Summary of Proposals

1. Exempt Offerings

A start-up company, with no established market, is at great risk of loss when it must expend funds to prepare for an offering of securities without knowing whether there will be any investor interest in the company. To remedy this situation, the Commission today is proposing for the first time to permit those companies to "test the waters" for potential interest in the company before beginning an offering exempt from registration under the

[47] Senate Report at 5.

Securities Act, without bringing into play at that early stage the full range of regulatory prescriptions.[48]

The Commission is also proposing other significant revisions to the availability and operation of the regulation A exemption. Regulation A would be extended to offerings up to $5 million, an increase from the present $1.5 million limit, and a new disclosure format—the question-and-answer form now being used in over 20 states—would be used in regulation A offering documents.

To facilitate further the ability of small companies to raise seed capital, the Commission is proposing amendments to rule 504, one of the exemptive rules under Regulation D. Under current rule 504, the Commission exempts from registration annual offerings of up to $1 million by non-Exchange Act reporting issuers. While rule 504 does not restrict the kind or number of investors to whom the securities may be sold, it does limit the company's ability to engage in general advertising or other general offering activity. These limitations result in the investor receiving restricted securities, unless the securities are state registered. Similarly, state registration is required to rely on the exemption for securities offered in excess of $500,000. As proposed, a company could issue up to $1 million per year through sales of securities which could be freely traded without registration and without the conditions regarding state registration currently imposed by that rule. As proposed, rule 504 would permit general solicitation and general advertisement in connection with all offers and sales under the exemption.

2. Registration and Reporting

Smaller businesses are disproportionately affected by the complexities in the disclosure requirements for both the initial registration of securities and on-going disclosure under the Exchange Act. Building on its successful experience with current Form S–18, the Commission is proposing to provide new disclosure requirements for use by small companies, which will be used for both Securities Act registration and Exchange Act proxy and reporting requirements.

The proposed forms would continue to require audited financial statements and narrative disclosure of information necessary to make an informed investment decision. As in the case of Form S–18,[49] GAAP financial statements will suffice; compliance with Regulation S–X [50] will not be required. The disclosure requirements have been rewritten to be more easily understood by persons less familiar with the federal securities laws and regulations and, thus, reduce the filing costs for smaller companies. To facilitate this small business disclosure system, a new regulation containing all of the small business disclosure requirements, regulation S–B,[51] is proposed.

Finally, the Commission is proposing to amend the rules under the Trust Indenture Act to increase the levels of debt which may be offered without full compliance with that Act.

B. Regulation A

1. Background

Regulation A permits the unregistered, public offering of securities under specified conditions. Currently, an issuer may use the exemption to offer up to $1.5 million in any 12-month period.[52] Use of the exemption requires qualification of an offering statement, which must be filed with and reviewed by the Commission.[53] The core of the offering statement is the offering circular, which must be delivered to prospective purchasers [54] and includes narrative disclosure similar to that required by the Commission's registration statement forms, particularly Form S–18.

Unlike offerings under the Securities Act, unaudited financial statements, covering only one year, may be used for a regulation A offering. Further, the use of regulation A does not automatically give rise to a reporting obligation under section 15(d) of the Exchange Act.[55]

Since they are exempt from the registration requirements of the Securities Act, regulation A offering documents are not subject to the strict liability provisions of Section 11 of the Securities Act.[56] However, the anti-fraud and other civil liability provisions of the securities laws are applicable to the offer and sale of securities in reliance upon regulation A.[57]

2. Proposed Revisions to Regulation A

Regulation A is an effective tool for developing companies that may not be able to raise sufficient funds to justify the significant costs of registration and the further costs of reporting under the federal securities laws. The current limitations of the exemption, including the relatively low dollar ceiling and strict prohibition on pre-offering communications, constrain its usefulness and, as previously noted, regulation A offerings have declined markedly. The reform of regulation A proposed by the Commission would reduce costs, expand the exemption's availability, streamline its procedural regimen and allow pre-offering solicitation of indications of interests subject to Commission oversight.

a. *Dollar limit.* The proposals would raise the dollar ceiling for a regulation A offering to the statutory limit of $5 million in any 12-month period for issuer sales,[58] including no more than $1.5 million in secondary offerings.[59] Use of other "small issues" exemptions would not reduce the regulation A dollar ceiling.[60]

[48] Pre-offering material soliciting indications of interest would be subject to the antifraud and other civil liability provisions of the securities laws. This material would be required to be filed with the Commission not later than its first use.

[49] 17 CFR 239.29.

[50] 17 CFR 210.1 *et seq.*

[51] 17 CFR 228.10 *et seq.*

[52] See Rule 254(a) (17 CFR 230.254(a)).

[53] Filings made under regulation A currently are reviewed by the staff of the Commission's regional offices. This practice would be modified to offer issuers a choice of filing locally or with the Commission's office in Washington, DC.

[54] Rule 257 (17 CFR 230.257) currently permits issuers to make offerings of up to $100,000 without the delivery of an offering document. Under the proposals, this provision would be eliminated as unnecessary in view of the changes proposed to rule 504.

[55] 15 U.S.C. 78o(d). An issuer may as a result of one or more exempt equity offerings, become subject to Exchange Act registration under section 12(g) if any class of equity securities becomes held by more than 500 record holders, and the company also has assets of at least $5 million.

[56] 15 U.S.C. 77k.

[57] See sections 12(2) and 17 of the Securities Act (15 U.S.C. 77*l*(2) and q) and section 10(b) of the Exchange Act (15 U.S.C. 78j(b)).

[58] Regulation A has been adopted pursuant to the authority granted to the Commission under section 3(b) of the Securities Act (15 U.S.C. 77c(b)) to provide exemptions from the registration requirements for issues of securities which do not exceed $5 million under conditions which further the public interest and protection of investors.

[59] Secondary offerings by affiliates would continue to be ineligible for a regulation A exemption where the issuer has had no net income for each of the two most recent fiscal years. See proposed rule 251(b) (17 CFR 230.251(b)).

In addition to the restriction upon affiliate resales for non-income generating issuers under current rule 253 (17 CFR 230.253), securities held by certain affiliates and promoters are deducted from the regulation A ceiling, unless they are placed in escrow. Form 7–A provides a format for satisfaction of the escrow requirement. Since the proposal would no longer call for that deduction, the optional escrow provision would be deleted.

[60] *E.g.*, Securities Act rules 230, 504, and 505 (17 CFR 230.230, 504 and 505) and regulations B (17 CFR 230.300–346), E (17 CFR 230.601–610e) and F (17 CFR 230.651–656).

The proposed regulation also would provide a "safe harbor" provision regarding integration of other offerings. A regulation A offering would not be integrated with any previously completed registered or exempt offering or with any subsequent offering that was registered under the Securities Act, made pursuant to an employee benefit plan, in reliance on rule 701 or under regulation S, or made more than six months after the regulation A offering.[61]

b. *Scope of exemption.* As proposed, regulation A would continue to be available to a wide range of operating businesses organized in the United States. Canadian issuers have rarely used regulation A,[62] and it is proposed that the exemption be available only to domestic issuers.[63]

As is the case today, issuers of fractional undivided interests in certain oil, gas or mineral rights [64] and investment companies [65] could not use the exemption. In addition, under the proposals, regulation A also would not be available to "blank check" companies,[66] commodity pools and other non-operating entities.[67] As under the current rules, an issuer's securities could not be sold in a regulation A offering if the company, or a controlling person or underwriter were subject to one of a series of enumerated legal remedies and sanctions.[68]

Reporting issuers have rarely used regulation A.[69] In light of the simplified registration and reporting forms being proposed to meet the needs for capital raising by reporting small business issuers, they would no longer be permitted to rely upon the regulation A exemption.[70] Comments are specifically requested as to the appropriateness of this exclusion. Commenters who believe that the exclusion is not appropriate should also address whether regulation A should be available for all reporting companies or only those that are small business issuers. Comment is requested as to whether other aspects of the issuer qualification provisions of regulation A should be revised. In particular, commenters are requested to address whether offerings of "penny stocks" should be prohibited under the regulation A exemption.[71]

c. *Fee.* The Commission proposes to increase the filing fee for regulation A filings to $500 to parallel the increase in the offering ceiling.

d. *Disclosure requirements.* Regulation A would continue to be conditioned upon the qualification of an offering statement filed with the Commission and reviewed by the staff.[72] The form and content of the required offering circular is proposed to be revised substantially [73] to allow companies to use the question and answer format currently used by a number of the states for registration of small offerings. This format was developed through a cooperative effort of the state securities administrators, working through NASAA, and the securities bar, working through the ABA State Regulation of Securities Committee. The SCOR form, as it is frequently called, has been endorsed by NASAA [74] and represents a balanced approach to the capital raising process, providing a registration form that small business can easily use at a reduced cost while still maintaining investor protection. From all reports, the form has proved to be user friendly,[75] with one commentator describing it as "an elegant solution to a long-standing problem." [76] Two alternative models are permitted for non-corporate issuers and those preferring not to use the question-and-answer format, responding to the narrative disclosure items of Form SB–1 or using the existing disclosure model in regulation A.

The question-and-answer format calls for significant forward-looking or "soft" information. The Commission is proposing to extend the Commission's "safe harbor" rules regarding such statements, rule 175 under the Securities Act and rule 3b–6 under the Exchange Act, to apply to statements made in the offering circular mandated to be distributed pursuant to regulation A. The Commission requests comment on the appropriateness of the inclusion of regulation A filings within the scope of the safe harbors in view of the non-reporting status of the company following the offering.

Proposed Part F/S of Form 1–A would contain all of the financial statement requirements for a regulation A offering.

[61] See proposed rule 251(c) (17 CFR 230.251(c)). The longstanding Commission guidance regarding the integration of offerings would continue to be applicable to those offerings which are not within the "safe harbor" provision. See, Release No. 33–4552 (November 6, 1962) (27 FR 11316).

[62] In the past three years, there have been 177 regulation A filings. During that time, no Canadian issuers have filed under regulation A.

[63] Canadian persons are required to consent to service of process on forms established by the Commission. (Forms 3–A, 4–A, 5–A and 6–A have been adopted for this purpose.) As Canadian issuers would no longer be eligible for use of regulation A, these forms would be rescinded.

[64] Current rule 252(b) (17 CFR 230.252(b)) contains this prohibition. Regulation B provides exemptive relief for such issuers.

[65] Companies registered or required to be registered under the Investment Company Act of 1940, 15 U.S.C. 80a–1 *et seq.*, including business development companies, are prohibited from using regulation A. See current rule 252(b)(2) (17 CFR 230.252(b)(2)). A "business development company" is a closed-end company which is permitted to provide significant managerial assistance to its portfolio companies under certain conditions. See also regulation E. The Commission is issuing a companion release concerning regulation E.

[66] A "blank check" company is one that has no specific business or plan except to locate and acquire a presently unknown business or opportunity. See section 7(b) of the Securities Act, 15 U.S.C. 77g(b). See also proposed rule 419(a)(2) under the Securities Act (17 CFR 230.419), Release No. 33–6891 (April 17, 1991).

[67] Only entities with operating businesses would be permitted to use regulation A. The exemption thus would be available only to raise funds to put into the operations of an actual business and not simply for investment. Proposed rule 251(a)(4) (17 CFR 230.251(a)(4)) specifically excludes those enterprises with the principal business of investing or reinvesting funds in securities, properties, commodities, business opportunities or similar media of speculative opportunity.

[68] The disqualification provisions describe specific sanctions against the issuer, its controlling persons and any underwriter in its employ which preclude reliance upon regulation A. Current rule 252(c), (d) and (e) (17 CFR 230.252(c), (d) and (e)). The Commission may, in appropriate circumstances, waive such disqualifications upon a showing of good cause. Current rule 252(g) (17 CFR 230.252(g)).

[69] Of the 177 regulation A filings made with the Commission in the past three years, only 30 were made by reporting companies.

[70] Since it is proposed that reporting companies no longer be eligible to use regulation A, the disqualification provision regarding failure to file Exchange Act reports, current rule 252(f) (17 CFR 230.252(f)), would be eliminated.

[71] See The Penny Stock Reform Act of 1990 (S.647, Public Law 101–429). See also proposed Exchange Act Rule 3a51–1 (17 CFR 240.3a51–1), Release No. 34–29093 (April 17, 1991).

[72] Current rule 255 (17 CFR 230.255) requires that the offering statement be on file with the Commission for no less than 10 days prior to commencement of any offering. No contact of any type is permitted with investors during this waiting period, unless the offering is underwritten by broker-dealers registered with the Commission, in which case a preliminary offering circular procedure may be used.

[73] While the proposal would not change significantly either the notification of the offering (part I) or exhibit (part III) requirements for the Form 1–A offering statement.

[74] The Form U–7 guideline was adopted by the membership of the North American Securities Administrators Association, Inc. ("NASAA") to satisfy the state registration requirement for a qualifying public offering under the existing terms of rule 504 of regulation D. Twenty-three states have adopted or permit the use of Form U–7 for this purpose: Alaska, Arizona, Idaho, Indiana, Iowa, Kansas, Maine, Massachusetts, Mississippi, Missouri, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Washington, Wisconsin and Wyoming. NASAA reports that 9 additional states are expected to adopt the Form. Form U–7 also is referred to as ULOR (uniform limited offering registration) and SCOR (small corporate offering registration).

[75] "Use of the fifty question Form U–7 has resulted in lower costs for issuers and has provided investors with an offering document that is clear and easily understood." Harris, "Introduction to the Review of Developments in State Securities Regulation," 47 Bus. Law. 271 (1991).

[76] See, Sargent, "Blue Sky Law: The SCOR Solution," 16 Sec. Reg. L. J. 90 (1988).

regardless of the narrative disclosure format used. Unaudited financial statements would continue to be permitted, unless the issuer already has audited financial statements available.

e. *"Testing the waters".* Under the proposals, for the first time, an issuer relying upon the regulation A exemption would be permitted to solicit indications of interest prior to filing the mandated offering statement. Under this "test the waters" provision, a regulation A-eligible issuer could use a written statement to gauge investor receptiveness to a possible offering. The issuer should then be better able to determine whether to incur the expense of proceeding with a public offering of its securities under regulation A or to follow some other capital-raising plan.

The proposals generally do not specify the content of the written material that can be used to solicit indications of interest. However, while issuers would be permitted to "free write" and include whatever factual information would be useful to inform potential investors about the company and its business, only factual presentation would be permitted.

An issuer could send the solicitation material to prospective investors, or publish it in a newspaper or other print media. Use of broadcast media for this purpose, whether radio or television, would not be permitted. Commenters should address whether only one-on-one delivery to individual investors, and not general advertising or publication, should be permitted.

The issuer is not permitted to accept any consideration in response to the "test the waters" material, and no commitments to buy, formal or otherwise, can be made. The material is required to so state, and to include a statement that an offering circular containing financial statements and other required disclosure will be delivered to the purchaser prior to any sale being made. The issuer would be permitted to include a coupon that potential investors could return to the company apprising it of their interest.

Any solicitation of interest document would be required to be filed with the Commission on the date it is first used. The issuer must provide the name and telephone number of a person who can respond to questions regarding the document. The filing would be made at the Commission office (whether a Regional Office or Headquarters) where the issuer intends to file its regulation A offering statement. Comment is requested on whether it would be more appropriate to require that the solicitation document be transmitted to, rather than filed with, the Commission when first used. Comment is also requested on whether the solicitation document should be filed simultaneously with the offering circular. On the other hand, comment is also requested on whether it would be more appropriate to require that the document be filed with the Commission for a period of time—such as one or two business days—before it is used. Would such a pre-use filing requirement deter public exempt offerings under regulation A?

As proposed, the rules would permit oral communications between the issuer and prospective investors, but only after a solicitation of interest document had been filed with the Commission. The Commission requests comment on whether the rules should be revised to incorporate a simple notice filing, so that an issuer could choose to begin the regulation A "test the waters" process with oral communications. On the other hand, should oral communications before the filing of the required offering statement be prohibited? In any case, any oral communications will be subject to the antifraud and civil liability provisions of the federal securities laws.

After filing the required offering statement, the issuer would no longer be permitted to use its written "test the waters" solicitation materials, under the rules as proposed. Would it be preferable, however, to permit such post-offering statement filing use, if the solicitation of interest statement were required to be accompanied or preceded by the offering circular, which will contain the mandated financial statements and other disclosures about the issuer and the offering?

The proposals require that at least 20 calendar days elapse between last use of the solicitation of interest document and any sale of securities in the regulation A offering. Is such a "cooling off" period necessary or appropriate to guard against potential abuse? If so, is 20 calendar days, as proposed, the appropriate length of time, or should it be longer or shorter, such as 30 or 10 calendar days?

In addition, the Commission more generally requests comment on whether the "test the waters" provision proposed to be added to regulation A will be useful, and on whether it provides adequate protection to prospective investors.

f. *Procedural provisions and timing of offers and sales.* The procedural and timing requirements for commencement of a regulation A offering would be revised to conform to those used for registered offerings. Requirements as to form, legibility and signatures for the required offering statement are specified in the proposed regulation.[77]

The proposals would accelerate the time when an issuer could begin to offer the securities to be sold in a regulation A offering. Today, offers, like sales, must be postponed until 10 business days after the offering statement is filed. Under the proposals, oral and written offers could be made as soon as the offering statement is filed with the Commission.

Once an offering statement is filed, a written offer could be made only through the use of a preliminary or final offering circular.[78] No further distribution or publication of the pre-filing indication of interest document would be permitted. As is the case today, advertisements and radio and television broadcasts containing limited information concerning the issuer and the securities being offered may be used, so long as they indicate from whom an offering circular may be obtained. The Commission requests specific comment on the reliance on the offering circular as the principal selling document after the offering statement is filed.

Sales may not be made under regulation A until the offering statement is qualified. Regulation A currently prohibits sales until 10 business days after the filing of the offering statement with the Commission.[79] In practice, however, regulation A offerings are rarely commenced immediately upon the tenth business day after filing; issuers prefer to have the benefit of the staff's comments prior to proceeding with the offering. In recognition of industry practice, it is proposed that the timing of qualification of the offering statement be conformed to that in registered offerings.[80] Under this proposal, absent the use of a delaying procedure,[81] an offering statement would be deemed qualified 20 calendar days after being first filed with the Commission.[82]

Delivery of a preliminary or final offering circular at least 48 hours prior to the confirmation of sale would continue to be required. Offering circulars would continue to be subject to annual updating during the term of a continuous offering,[83] as well as revision whenever the information presented becomes false and misleading, material developments have occurred, or there has been a fundamental change in the information initially presented.[84]

Under the proposed procedures, periodic information regarding the course of the distribution, as well as information about the application of the proceeds from the offering, would continue to be filed with the Commission. Form 2–A, the form now used for that purpose, would be substantially revised to parallel the data sought in connection with registered offerings.[85] Comment is requested as to whether these filings are needed or should be discontinued.

Regulation A provides specific bases upon which the Commission may suspend any regulation A offering. It is not proposed that those provisions or the procedures for such suspension be revised.[86]

g. *Substantial and good faith compliance.* The Commission proposes to add a rule protecting those who substantially and in good faith comply with the terms, conditions and requirements of regulation A. Under this proposed rule, which is patterned after a similar provision in regulation D,[87] an issuer would not lose the exemption with respect to a particular investor if the issuer failed to comply with a requirement under regulation A, provided that the failure did not pertain to a provision of the rule directly intended to protect that person. The failure would violate a Commission rule. Thus, for example, failure to deliver the mandated offering circular to a single investor, would preclude reliance on the exemption for that particular sale, but would not, in and of itself, preclude reliance on the exemption for other offers and sales made in compliance with the regulation.

As proposed, the exemption would continue to be available if the issuer could show that the requirement was not intended to protect the particular investor, the violation was not material to the offering as a whole and the issuer had made a good faith attempt to comply with all of the requirements of regulation A. The rule would specify that the issuer qualification, as well as the requirements to file an offering statement and to stay within specified dollar limitations, are always material to the offering as a whole. Should the filing of the solicitation of indications of interest document be included as always material to the offering as a whole? If so, should the timing of that filing also be material to the offering as a whole? Similarly, should other requirements be included as always material?

C. Rule 504

The Commission is proposing to eliminate the current restrictions on the rule 504 exemption. As proposed, general solicitations would be permitted for all rule 504 offerings. Under this proposal, a public offering of up to $1 million in a 12-month period by a non-Exchange Act reporting company [88] would be subject only to the anti-fraud and other civil liability provisions of the federal securities laws. Further, securities sold under this provision would be available for immediate resale by non-affiliates of the issuer. The filing of a Form D with the Commission would continue to be required, but the availability of the exemption would continue to be not contingent on that filing.[89]

In light of the proposed revisions to rule 504, it appears that the special $100,000 exemption under regulation A,[90] which permits offerings of that size to be made without the use of an offering circular [91] would no longer be useful and thus would be eliminated. The Commission requests comment as to whether the $100,000 exemption would continue to have some utility and thus should be retained.

D. Proposed System of Integrated Registration and Reporting for Small Business Issuers

1. Introduction

The Commission today is proposing a comprehensive registration, reporting and qualification system for "small business issuers" under the Securities Act, Exchange Act and Trust Indenture Act. Based upon the Commission's successful experience with the simplified disclosure requirements of Form S–18, that form would be re-designated Form SB–1 and made available as the registration form upon which small business issuers may offer an unlimited amount of securities. The simplified disclosure requirements of Form SB–1 would be placed in proposed Regulation S–B and would serve as the disclosure requirements for small business issuers throughout the registration and reporting system. In addition, the Commission is proposing rules that would permit offerings of debt securities up to $10 million without full compliance with the Trust Indenture Act.

2. Definition of "Small Business Issuer"

The Commission proposes to define "small business issuer" based upon an issuer's revenues and the eligibility criteria for current Form S–18. Accordingly, a "small business issuer" would be an entity: (1) With revenues of less than $15,000,000 for its most recent fiscal year; (2) which is not a foreign private issuer or foreign government; (3) which is not an investment company; and (4) which is not a majority-owned subsidiary of a non- "small business issuer."

Comment is requested with regard to this proposed definition of "small business issuer." Is a revenue standard

---

[77] A specific provision would be added with respect to the confidential treatment of certain information in the offering statement, which mirrors the approach used for both Securities Act registration statements and Exchange Act filings. Compare proposed rule 252(c) (17 CFR 230.252(c)) with Securities Act rule 406 (17 CFR 230.406) and Exchange Act rule 24b–2 (17 CFR 240.24b–2).

[78] See proposed rule 255 (17 CFR 230.255).

[79] See current rule 255 (17 CFR 230.255).

[80] Technical requirements relating to the procedure which will be followed in the case of a withdrawal or the abandonment of a regulation A offering statement would be specified and generally adopt the same approach and procedures which are used with respect to registration statements filed under the Securities Act. See rules 477 and 479 (17 CFR 230.477 and 479) under the Securities Act.

[81] This delaying procedure would operate in the same manner as the delaying amendment procedure for registered offerings. See section 8(a) of the Securities Act (15 U.S.C. 77h(a)) and rule 473 under the Securities Act (17 CFR 230.473).

[82] Interim amendments to the offering statement would restart the 20 calendar day period.

[83] The Commission is proposing to revise rule 263 (17 CFR 230.263), the exemption's current provision regarding continuous offerings. See proposed rule 251(d)(3) (17 CFR 230.251(d)(3)). Under the revised provision, those continuous or delayed offerings permitted by rule 415 could be made under regulation A.

[84] See proposed rule 253(e)(1) (17 CFR 230.253(e)(2)).

[85] See rule 463 (17 CFR 230.463) and Form SR (17 CFR 239.61). Several of the post-commencement provisions in regulation A, such as the filing of additional sales materials used and the filing of Form 2–A, have caused concern that failure of compliance with these rules alone would cause the loss of the regulation A exemption. These rules would be amended to clearly show that such failure of compliance would not necessarily cause the exemption to be lost (*see* section II.B.2.g., *infra*); however such failures would continue to be grounds for suspending the exemption.

[86] Current rule 261 (17 CFR 230.261) permits a temporary suspension, which after notice and opportunity to be heard may be made permanent. The grounds for suspension include unavailability of the exemption, provision of false and misleading information, violation of section 17 of the Securities Act, proceedings which could lead to application of the disqualification provisions and failure to cooperate or obstructing a Commission investigation of the offering.

[87] See rule 508 (17 CFR 230.508).

[88] Rule 504 is not available to investment companies.

[89] See Securities Act rules 504(b)(1), 505(a)(1) and 506(a)(1) (17 CFR 230.504(b)(1), 505(a)(1), and 506(a)(1)).

[90] In the past three years, only 6 of the 177 regulation A filings made with the Commission were pursuant to the terms of rule 257.

[91] Current rule 257 is not available for issues of assessable stock or by those within the descriptions of rule 253(a), i.e., an entity incorporated or organized within one year prior to filing without a net income from operations, or if a longer existence but no net income from operations in at least one of the prior two fiscal years.

appropriate and, if so, should the dollar level be placed at a higher level, such as $20–25 million, or a lower level, such as $5–10 million?

Comment is requested as to whether another measure, such as assets or market capitalization, should be used to define "small business issuers." Comment is also requested as to whether a test based on assets would discriminate against capital intensive companies.

Commenters favoring an asset or market capitalization test should indicate what dollar level, such as $5 million, $10 million, $15 million, $20 million, or $25 million, would be appropriate. Commenters should consider the following table, which provides information with regard to the revenues, assets and market capitalization of Exchange Act reporting companies: [92]

Market capitalization	No. (percentage) of public companies
Public Companies—Classified by Market Capitalization	
Less than $5 million	3,003 (38%)
Less than $10 million	3,909 (49%)
Less than $15 million	4,393 (55%)
Less than $20 million	4,756 (60%)
Less than $25 million	5,017 (63%)
Public Companies—Classified by Assets	
Assets	No. (percentage) of public companies
Less than $5 million	2,325 (25%)
Less than $10 million	2,961 (32%)
Less than $15 million	3,326 (36%)
Less than $20 million	3,612 (39%)
Less than $25 million	3,769 (41%)
Public Companies—Classified by Revenues	
Revenues	No. (percentage) of public companies
Less than $5 million	1,845 (22%)
Less than $10 million	2,494 (29%)
Less than $15 million	2,937 (35%)
Less than $20 million	3,287 (39%)
Less than $25 million	3,562 (42%)

3. Registration Requirements of the Securities Act

The Commission has over ten years of experience with the simplified disclosure requirements of Form S–18.[93] Since its adoption in 1979 on an experimental basis,[94] small issuers have registered more than $25 billion of securities on more than 6,000 Form S–18 registration statements. By replacing Form S–18 with Form SB–1, which has no size limitations on its use, and further simplifying the disclosure requirements, the Commission intends to extend the benefits of streamlined disclosure requirements to additional small businesses seeking to tap the public capital markets.

a. *Form SB–1 eligibility requirements.* Under the proposals, Form SB–1 could be used by any "small business issuer" to offer an unlimited dollar amount of securities for cash.[95] Form SB–1 would have no dollar limit for primary offerings. In recognition of the fact that resales of securities may increase the investment liquidity for insiders, affiliates, and public stockholders, and thereby release funds for reinvestment in new small businesses, secondary offerings of small business securities similarly would be subject to no dollar limit.

Form SB–1 would be limited to small business issuers. Thus, a company that exceeds the size specified for a small business issuer that previously would have been able to use Form S–18 for an initial public offering of up to $7.5 million will not be eligible to use Form SB–1.

Comment is requested regarding the proposed absence of a dollar limit. Commenters favoring the retention of a dollar limit for primary offerings should address what dollar amount, such as $10–25 million annually, would be appropriate. Comment also is requested as to whether Form SB–1 should be available for all initial public offerings. Similarly, should secondary offerings on Form SB–1 be restricted and, if so, should the dollar amount be different from any limitation applicable to a primary offering?

Canadian issuers would not be eligible to use proposed Form SB–1.[96] Given the significant steps taken by the Commission to facilitate offerings in the United States by all foreign private issuers, and particularly Canadian issuers, since the adoption of Form S–18,[97] the availability of proposed Form SB–1 appears unnecessary.

Issuers making initial public offerings on Form SB–1 would have the option of filing the registration statement with the Commission's regional office or at the Commission's headquarters in Washington, DC.[98] All subsequent filings by small business issuers would be made at the Commission's headquarters.

4. Registration and Reporting under the Exchange Act

a. *Background of proposals.* Building on Form SB–1, the Commission proposes to fully integrate the disclosures required of small business issuers under the Securities Act and Exchange Act. The disclosure requirements of Form SB–1, based on Form S–18, are proposed to be incorporated into the Exchange Act disclosure requirements applicable to these small business issuers.

A new series of forms for registration and periodic reporting by small business issuers is proposed,[99] as well as amendment of the annual report and proxy requirements of Exchange Act companies.[100] The proposed series of forms and amendments to existing Exchange Act forms and rules (collectively the "SB series") will integrate the Securities Act and the Exchange Act disclosure requirements for small business issuers.

As proposed, the disclosure requirements of the SB series of forms would consist of references to proposed regulation S–B, which tracks in simple and understandable language the requirements of Form S–18 and regulation S–K. While the proposed forms would be available only to small business issuers, the use of those forms would be optional for those companies.

b. *Financial information required by regulation S–B.* Consistent with current Form S–18, the financial statement requirements of regulation S–B would be based solely on GAAP for the determination of form and content to be provided. Regulation S–B will not require conformity with Commission regulation S–X, which governs the form and content of financial statements, except for the requirements relating to the qualification of accountants and audit reports and certain requirements related to oil and gas operations.[101]

The periods for which audited fiscal year financial statements are proposed to be required are consistent with the current requirements of Form S–18. Thus, an audited balance sheet for the latest fiscal year and audited statements of income, cash flows and changes in stockholders' equity for each of the latest two fiscal years would be required.

Where interim financial statements would be required, the periods for which such statements would be necessary would track the current requirements of Form 10–Q—a balance sheet as of the end of the latest fiscal quarter, statements of income and cash flows for the interim period since the end of the latest fiscal year as well as the comparable period of the preceding fiscal year, and statements of income for the latest interim quarter and the comparable period of the preceding fiscal year.

The financial statement requirements of regulation S–B will include requirements applicable to:

(1) Historical and pro forma financial statements for significant acquired businesses including real estate operations;

(2) The maximum age of financial statements at the expected effective date; and

(3) Limited partnerships.[102]

c. *Narrative disclosure in SB series of forms.* The proposed narrative disclosure requirements for small business issuers in regulation S–B will be applicable to all registration and reporting obligations of small business issuers. The simplified format of regulation S–B is intended to present the disclosure requirements in a "plain English" format. More easily understandable disclosure requirements should reduce the costs of compliance with those requirements.

The disclosure requirements in regulation S–B are based on regulation S–K. However, where such requirements were simplified or not required by Form S–18, proposed regulation S–B tracks Form S–18. For example, like Form S–18, proposed regulation S–B does not require a disclosure equivalent to Item 301 (selected financial data) or Item 302 (supplementary financial information) of regulation S–K.[103] The exhibits which are not applicable to small business issuers have been deleted from regulation S–B.[104] Executive compensation disclosure is based upon Form S–18,[105] rather than Item 402 of regulation S–K.[106] The description of business, including the industry segment disclosure standard, is derived from Form S–18, rather than Item 101 of regulation S–K. Finally, the financial statement requirements for "small business issuers" are contained in proposed Item 310 of regulation S–B.[107]

Of particular note, for both registration statements on proposed Form SB–1 and in regulation S–B, is proposed Item 303. Currently, Form S–18, anticipating its use principally by startup and developing companies, requires business plan disclosure and does not include the Management's Discussion and Analysis required currently of all issuers reporting under the Exchange Act. Proposed regulation S–B would require business plan disclosure comparable to that in Form S–18 for small business issuers that have not had operating revenues in each of their last three fiscal years; where such operating revenues exist, however, MD&A disclosure requirements will apply in place of the business plan disclosures. This would be the case for both Securities Act registration on Form SB–1 and Exchange Act reporting purposes.

The Commission staff applies the disclosure requirements of Item 17A of Form S–18 to all Securities Act and Exchange Act filings of mining companies. As this disclosure requirement applies generally, it is proposed that the mining disclosure requirements be placed in new Industry Guide 7,[108] rather than regulation S–B.

With respect to issuers primarily involved in real estate, Form SB–1 would include a cross-reference to the disclosure required by Item 13 (Investment Policies of Registrant), Item 14 (Description of Real Estate) and Item 15 (Operating Data) of Form S–11.[109] This cross-reference is necessary in light of the specialized disclosure requirements for real estate companies. Comment is requested as to the appropriateness of this cross-reference.

Comment is requested as to the appropriateness of proposed regulation S–B. Commenters should address whether each of the distinctions between Form S–18 and regulation S–K disclosures should be carried forward in regulation S–B.

d. *Operation of SB reporting system.* As proposed, the Exchange Act SB series of forms would be optional for small business issuers. The election to use the SB series of forms would be made in the annual report filed by the issuer.[110] If an issuer selected the SB disclosure format, it would use the SB forms until its next annual report under section 13(a).

At the time an issuer that was using the SB format filed its next annual report, it would be faced with three possibilities. First, the issuer might no longer fall within the definition of small business issuer. In this instance, the annual report would be filed on Form 10–K and the issuer would be required to use the traditional disclosure format throughout that fiscal year.

---

[92] Data is provided for those companies for which it was readily available—market capitalization, 7,952; assets, 9,157; and revenues, 8,456.

[93] See Release No. 33–6049 (April 3, 1979). Form S–18 does not require disclosure of the following items that would be required to be disclosed if a company were using Form S–1: (1) Ratio of earnings to fixed charges; (2) foreign and domestic financial information and export sales; (3) selected financial information; (4) supplementary quarterly financial information; and (5) management's discussion and analysis. In addition, Form S–18 requires only 2 years certified financial statements, while Form S–1 requires 3 years.

[94] As Form S–18 was an experimental form, the Commission limited the issuers that were eligible to use the Form as well as the amount of securities that could be registered. As adopted, Form S–18 was not available for limited partnerships, mining companies, oil and gas companies, non-Canadian foreign private issuers, investment companies, Exchange Act exempt insurance companies and any majority owned subsidiary of the foregoing, and was limited to the registration of $5 million in securities (later raised to $7.5 million). The Commission nevertheless undertook to monitor Form S–18 and to revisit those limitations if it proved beneficial to small issuers in raising capital.

[95] This proposal is consistent with and responds to the recommendations of small businesses to the Commission. See, *e.g.*, Recommendation of the SEC Government-Business Forum on Small Business Capital Formation, Final Report p. 4 (1982); Release No. 33–6471 (July 6, 1983).

[96] Canadian issuers are currently eligible to use Form S–18. See Instruction I.A.(1) to Form S–18.

[97] For example, the adoption of the Multijurisdictional Disclosure System, Form F–1, Form 20–F and Form 40–F.

[98] Post-effective amendments to initial public offerings on Form S–B would be filed in the Commission office which accepted the initial registration statement.

[99] The Commission is proposing Form 10–SB as an Exchange Act registration statement form for small business issuers. It also is proposing Form 10–KSB as an annual report form and Form 10–QSB as a quarterly report form for small business issuers. An instruction to Item 7 of Form 8–K, relating to small business acquisitions, is also proposed.

[100] The Commission is proposing the inclusion of "small business issuer" instructions to Schedules 14A and 14C, as well as rule 14a–3.

[101] Rule 4–10 of regulation S–X (17 CFR 210.4–10) sets forth the Commission's "full cost ceiling" requirement which limits the capitalized carrying cost of oil and gas properties. Rule 4–10(j) requires application of the deferred method of income tax accounting and rule 4–10(k) requires extensive disclosures. Accounting standards issued by FASB permit the liability method of income tax accounting and require disclosures, which are substantially the same as those in 410–(k). The Commission has proposed amendments to rule 4–10, which would conform the rule to the recently issued tax accounting standards and would eliminate duplicative requirements. Pending final rule adoption, registrants are permitted to apply rule 4–10 in a manner which conforms with promulgated accounting standards.

[102] A financial statement requirement in current Form S–18, which relates to accounting for internally developed software costs, is not being carried forward since it has been superseded by promulgated accounting standards which address that issue. The Commission proposes to delete the obsolete item.

[103] 17 CFR 229.301 and 229.302.

[104] The proposal would delete the exhibits required by Item 601(b) (6), (12), (20) and (23) of regulation S–K (17 CFR 229.601(b) (6), (12), (20) and (23)).

[105] See Items 16 and 20 of Form S–18.

[106] 17 CFR 229.402. The Commission expects to publish proposed changes to the executive compensation disclosure requirements as part of a separate rulemaking initiative.

[107] 17 CFR 228.310.

[108] See proposed Items 601(g) and 602(g) of regulation S–K (17 CFR 229.601(g) and 602(g)).

[109] 17 CFR 239.18.

[110] It is proposed that the cover page of Form 10–KSB require disclosure of the issuer's revenues for its most recent fiscal year. This disclosure would provide the basis for determining an issuer's eligibility for the SB series of forms.

Second, a company might continue to be a small business issuer but elect to use the traditional disclosure format for its Exchange Act periodic reports. The issuer would evidence this election by filing its annual report on Form 10–K and would then be subject to the traditional disclosure format until its next annual report.

Third, a company might continue to be a small business issuer and elect to continue to use the SB disclosure format. This election would be evidenced by filing a Form 10–KSB.

Comment is requested regarding the procedure by which small business issuers may enter and exit the SB Exchange Act reporting system.

e. *Use of forms S–2, S–3, S–4 and S–8 by small business issuers.* The Commission is proposing amendments to the disclosure requirements of Forms S–2, S–3 and S–8 to enable small business issuers to take advantage of these disclosure formats. Under the proposed amendments, "small business issuers" would be permitted to register securities on Forms S–2, S–3 and S–8 if they otherwise met the requirements for use of those forms.[111] Accordingly, small business issuers would use their simplified Exchange Act reports to satisfy the eligibility requirements of Forms S–2 and S–3 relating to Exchange Act reporting by the issuer.[112] The narrative and financial disclosure requirements of Forms S–2, S–3 and S–8 would be satisfied through disclosure complying with regulation S–B.

Business combination transactions are not uncommon in the growth of small businesses. As proposed, Form S–4, the Securities Act registration form for business combinations, would be amended to permit its use by small business issuers through satisfaction of the regulation S–B requirements.[113] The proposed disclosure provisions of Form S–4 would be available to Form S–2 eligible small business issuers which are registering securities or are being acquired in the business combination transaction.

f. *Form 8–K revisions.* To complete the "SB" series of forms, the instructions to Item 7 of Form 8–K, which includes a requirement to file historical and pro forma financial statements for significant business acquisitions, would be amended. Item 7 refers to Regulation S–X for the determination of the periods for which the financial statements are required. A parallel instruction is included in Form SB–1 but the criteria for significance and the periods for which financial statements are required differs from regulation S–X. The proposed amendments would incorporate an instruction in Form 8–K cross referencing financial statement requirements in regulation S–B which tracks the standard of significance which is found in Form SB–1, and derived from Form S–18.

E. Amendments to Rules Under Trust Indenture Act.

Under the current Trust Indenture Act rules, issuers may offer annually up to $2 million worth of debt securities without an indenture. Issuers offering between $2 million and $5 million of debt securities in a 36-month period are required to issue such securities pursuant to an indenture, but that indenture need not be qualified under the Act. The indenture qualification provisions of the Act must be satisfied for offerings of more than $5 million of debt securities. This graduated application of the Act recognizes the relatively greater Trust Indenture Act compliance costs associated with offering smaller amounts of debt securities, particularly the cost of retaining an independent trustee through the maturity of the debt securities.

The Commission is proposing to amend the rules under the Trust Indenture Act to parallel its proposed limited offering exemptive scheme. Under the Securities Act exemptive proposals issued today, an issuer would be entitled to raise $5 million in a regulation A offering, as well as an additional $5 million under rules 504 and 505.

Rule 4a–1 under the Trust Indenture Act is proposed to be amended to increase to $5 million the aggregate principal amount of securities that could be issued without an indenture.[114] This proposal thus would permit, for example, the issuance of up to $5 million in securities pursuant to rules 504 and 505.

Using its authority under section 304(d) of the Trust Indenture Act, the Commission is proposing new rule 4a–2 that would exempt from compliance with the Trust Indenture Act any offering of debt securities exempt from registration pursuant to regulation A.[115] In this regard, the Commission is proposing the exemption from the Trust Indenture Act in order to facilitate the operation of the revised scheme for the offering of securities under regulation A. Application of the Trust Indenture Act could unnecessarily complicate the offering of securities under regulation A and would place an unneeded burden on small issuers attempting to take advantage of the revised regulation. In addition, the Commission reviews the offering statements used in connection with the issuance of securities under regulation A. Investor protection does not call for compliance with the requirements of the Trust Indenture Act in these limited offerings.

Finally, current rule 4a–2 under the Trust Indenture Act is proposed to be redesignated as rule 4a–3 and amended to increase to $10 million the aggregate principal amount of debt securities that may be issued under an indenture which need not be qualified.[116] Issuers making

---

[111] The proposed inclusion of a "small business issuer" disclosure item in Form S–3 is intended to recognize the potential use of that Form by "small business issuers" for offerings which do not require the non-affiliate public float specified in General Instruction B.1. to Form S–3.

[112] All other eligibility requirements for the use Form S–2 and Form S–3 are not proposed to be revised.

[113] As proposed, Form SB–1 would be available only in "for cash" offerings of securities. Accordingly, "small business issuers" wishing to enter business combination transactions which involve the offer and sale of securities would continue to be required to register those transactions on Form S–4 or Form S–1. Small business issuers engaged in roll-up transactions on Form S–4 would also furnish the disclosure required by Item 901 *et seq.* of regulation S–K. See, Securities Act Release No. 33–6922, n.15 (October 30, 1991). Furthermore, small business issuers using Form S–1 would be subject to the disclosure requirements of Regulation S–K.

[114] See rule 4a–1 (17 CFR 260.4a–1) promulgated under section 304(a)(8) of the Trust Indenture Act. Section 304(a)(8) exempts from the provisions of the Trust Indenture Act any security issued otherwise than under an indenture. This exemption is limited within a twelve month period to the amount of securities stated in section 3(b) of the Securities Act, or such lesser amount as the Commission shall establish by rule. Section 3(b) of the Securities Act, as noted previously in this release, states that its provisions shall apply to the offering of securities of no more than $5,000,000. Rule 4a–1 currently limits the section 304(a)(8) exemption to $2,000,000.

[115] Section 304(d) of the Trust Indenture Act permits the Commission to adopt rules to exempt securities or transactions from the provisions of the Act to the extent that "such exemption is necessary or appropriate in the public interest and consistent with the protection of investors * * *."

[116] See Rule 4a–2 (17 CFR 260.4a–2) promulgated under section 304(a)(9) of the Trust Indenture Act. The rights of the holders of the securities issued would be evidenced by the instrument sold to the holder and contract (indenture) under which that instrument was issued. Where debt securities are proposed to be issued without qualification of an indenture in reliance upon section 304(a)(9) of the Trust Indenture Act, the staff of the Division of Corporation Finance takes the following interpretive position: "Among the provisions which we believe should be included in the indenture are the usual covenants, events of default, and the procedures by which the collective rights of security holders may be enforced. Although it is possible that a provision for the enforcement of collective rights might be effected without providing an indenture trustee, as a practical matter such collective rights are best enforced by a trustee who is accorded specific powers for this purpose. Such trustee need not meet the qualification and conflict requirements of

Continued

a registered offering of debt securities that will be issued under such an indenture should file the indenture as an exhibit to the Securities Act registration statement.[117]

Comment is requested as to whether the proposed exemptions from compliance with the Trust Indenture Act should extend to all issuers of debt securities or should be limited to "small business issuers." Comment also is requested as to whether, instead of increasing the current exemptive dollar limits to those set by the statute, the current limits should be retained, or lesser dollar limits should be set. Will the proposed increase for debt securities issued under an unqualified indenture from $5 million to $10 million be helpful to issuers? Should the Commission require that such an indenture meet minimal standards? For example, should the Commission formalize the requirement that an indenture meet certain requirements under the Act, such as provisions for enforcement of collective rights of security holders, events of default and an independent trustee for the benefit of security holders? On the other hand, given the newly self-executing nature of the Trust Indenture Act,[118] is it unduly burdensome to require qualification of the indenture?

F. General Request for Comment

Any interested person wishing to submit written comments on the proposed rules and forms amendments or suggest additional changes or comments on other matters that might have an impact on the proposals set forth in this release are invited to do so by submitting them in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment is requested on the impact of the proposals from the point of view of the public, as well as the entities or persons making filings with the Commission. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 19(a) of the Securities Act.[119] The Commission further requests comment on any competitive burdens that may result from adoption of the proposals. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.[120] Comment letters should refer to File No. S7–4–92. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

G. Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 regarding the proposed revisions.

The analysis notes that regulation A is proposed to be amended, in order to aid small businesses in connection with their needs to raise capital. It would accomplish this goal by making the exemption more useful and complementary to exemptions as well as registration alternatives currently offered under the Securities Act. Changes to the Trust Indenture Act rules would help to carry out this intent.

The analysis also notes that small businesses seeking to register their securities and become reporting issuers will benefit from the proposed simplified Form SB–1 and the Exchange Act reporting forms based on regulation S–B.

A copy of the Initial Regulatory Flexibility Analysis may be obtained from Amy S. Bowerman, Division of Corporation Finance, U.S. Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

H. Cost-Benefit Analysis

As an aid in the evaluation of the costs and benefits of these proposals, the Commission requests the views and other supporting information from the public. It appears to the Commission that the proposals if adopted would work significant cost savings for issuers without compromising investor protection.

III. Statutory Basis, Text of Proposals and Authority

The amendments to the Commission's rules and forms are being proposed pursuant to sections 3(b), 6, 7, 8, 10, and 19(a) of the Securities Act, sections 12, 13, 15(d) and 23(a) of the Exchange Act, and sections 304(a)(8), 304(a)(9) and 304(d) of the Trust Indenture Act.

Section 310 of the 1939 Act." Division of Corporation Finance interpretive letter to Allied-Carson Corporation (February 12, 1976).

[117] The indenture, which is an "[i]nstrument[] affecting the rights of security holders," is required to be filed as an exhibit to the registration statement by Item 601(b)(4) of regulation S–K (17 CFR 229.601(b)(4)).

[118] Under the Trust Indenture Reform Act of 1990, the duties previously imposed by contract now also are imposed by statutory command. Section 318 of the Trust Indenture Act, 15 U.S.C. 77sss.

Trusts and trustees.

For the reasons set out in the preamble, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

1. Part 228 is added to read as follows:

PART 228—SMALL BUSINESS DISCLOSURE REQUIREMENTS

Subpart A—Regulation S–B

Sec.

228.10 (Item 10) General.
228.101 (Item 101) Description of business.
228.102 (Item 102) Description of property.
228.103 (Item 103) Legal proceedings.
228.201 (Item 201) Market for common stock and related stockholder matters.
228.202 (Item 202) Description of securities.
228.303 (Item 303) Management's discussion and analysis or plan of operation.
228.304 (Item 304) Changes in and disagreements with accountants on accounting and financial disclosure.
228.310 (Item 310) Financial statements.
228.401 (Item 401) Directors, Executive Officers, promoters and control persons.
228.402 (Item 402) Executive compensation.
228.403 (Item 403) Security ownership of certain beneficial owners and management.
228.404 (Item 404) Certain relationships and related transactions.
228.405 (Item 405) Compliance with section 16(a) of the Exchange Act.
228.501 (Item 501) Front of registration statement and outside front cover of prospectus.
228.502 (Item 502) Inside front and outside back cover pages of prospectus.
228.503 (Item 503) Summary information and risk factors.
228.504 (Item 504) Use of proceeds.
228.505 (Item 505) Determination of offering price.
228.506 (Item 506) Dilution.
228.507 (Item 507) Selling security holders.
228.508 (Item 508) Plan of distribution.
228.509 (Item 509) Interest of named experts and counsel.
228.510 (Item 510) Disclosure of Commission position on indemnification for Securities Act liabilities.
228.511 (Item 511) Other expenses of issuance and distribution.
228.512 (Item 512) Undertakings.
228.601 (Item 601) Exhibits.
228.701 (Item 701) Recent sales of unregistered securities.
228.702 (Item 702) Indemnification of directors and officers.

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77aa[25], 77aa[26], 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss, 78l, 78m,

78n, 78o, 78w, 80a–8, 80a–29, 80a–30, 80a–37, 80b–11, unless otherwise noted.

§ 228.10 (Item 10) General.

(a) *Application of regulation S–B.* Regulation S–B is the source of disclosure requirements for filings under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"). Filings must also conform to the General Rules and Regulations under the Securities Act and the Exchange Act (parts 230 and 240 of this chapter), and the forms under these Acts (parts 239 and 249 of this chapter).

(b) To use regulation S–B, a company must be a "small business issuer." A small business issuer is a company that meets all of the following criteria:

(1) Had revenues of less than $15,000,000 during its last fiscal year;

(2) Is not a foreign private issuer or a foreign government;

(3) Is not an investment company; and

(4) Is not a wholly owned subsidiary of a non-small business issuer.

(c) *Definitions of terms.*—(1) *Capital stock* means common stock and preferred stock or other equity interest in the small business issuer.

(2) *Common stock* means the small business issuer's common equity. If the small business issuer is a limited partnership, the term means the equity interests in the partnership.

(3) *Market value* means the trading price for the securities if there is a public market. If there is no public market (sporadic trades do not constitute a public market) then market value means the public offering price for the securities.

(4) *Reporting company* means a company that is obligated to file periodic reports with the Securities and Exchange Commission under section 15(d) or 13(a) of the Exchange Act.

(5) *Small business issuer* refers to the issuer and all of its subsidiaries. Financial statements of the small business issuer must be presented on a consolidated basis.

(d) *Preparing the disclosure document.* (1) The purpose of a disclosure document is to inform investors. Hence, information should be presented in a clear, concise and understandable fashion. Avoid details, repetition or the use of technical language. The responses to the items of this regulation should always be brief and to the point. Small business issuers should disclose only material information.

(2) Small business issuers should consult the General Rules and Regulations under the Securities Act and Exchange Act for requirements concerning the preparation and filing of documents. Small business issuers should be aware that there are special rules concerning such matters as the kind and size of paper that is allowed and how filings should be bound. These special rules are located in regulation C of the Securities Act (17 CFR 230.400 *et seq.*) and in regulation 12B of the Exchange Act (17 CFR 240.12b–1 *et seq.*) and apply to all disclosure documents.

(e) *Commission policy on projections.* The Commission encourages the use of management's projections of future economic performance that have a reasonable basis and are presented in an appropriate format. The guidelines below set forth the Commission's views on important factors to be considered in preparing and disclosing such projections.

(1) *Basis for projections.* Management has the option to present in Commission filings its good faith assessment of a small business issuer's future performance. Management, however, must have a reasonable basis for such an assessment. An outside review of management's projections may furnish additional support in this regard. If management decides to include a report of such a review in a Commission filing, it should also disclose the qualifications of the reviewer, the extent of the review, the relationship between the reviewer and the registrant, and other material factors concerning the process by which any outside review was sought or obtained. Moreover, in the case of a registration statement under the Securities Act, the reviewer would be deemed an expert and an appropriate consent must be filed with the registration statement.

(2) *Format for projections.* Traditionally, projections have been given for three financial items generally considered to be of primary importance to investors (revenues, net income (loss) and earnings (loss) per share), projection information need not necessarily be limited to these three items. However, management should take care to assure that the choice of items projected is not susceptible of misleading inferences through selective projection of only favorable items. It generally would be misleading to present sales or revenue projections without one of the foregoing measures of income. The period that appropriately may be covered by a projection depends to a large extent on the particular circumstances of the company involved. For certain companies in certain industries, a projection covering a two or three year period may be entirely reasonable. Other companies may not have a reasonable basis for projections beyond the current year.

(3) *Investor understanding.* Disclosures accompanying the projections should facilitate investor understanding of the basis for and limitations of projections. The Commission believes that investor understanding would be enhanced by disclosure of the assumptions which in management's opinion are most significant to the projections or are the key factors upon which the financial results of the enterprise depend and encourages disclosure of assumptions in a manner that will provide a frame-work for analysis of the projection. Management also should consider whether disclosure of the accuracy or inaccuracy of previous projections would provide investors with important insights into the limitations of projections.

(f) *Commission policy on security ratings.* In view of the importance of security ratings ("ratings") to investors and the marketplace, the Commission permits small business issuers to disclose ratings assigned by rating organizations to classes of debt securities, convertible debt securities and preferred stock in registration statements and periodic reports. In addition, the Commission permits, disclosure of ratings assigned by any nationally recognized statistical rating organizations ("NRSROs") in certain communications deemed not to be a prospectus ("tombstone advertisements"). Below are the Commission's views on important matters to be considered in disclosing security ratings.

(1)(i) If a small business issuer includes in a filing any rating(s) assigned to a class of securities, it should consider including any other rating assigned by a different NRSRO that is materially different. A statement that a security rating is not a recommendation to buy, sell or hold securities and that it may be subject to revision or withdrawal at any time by the assigning rating organization should also be included.

(ii)(A) If the rating is included in a filing under the Securities Act, the written consent of any rating organization that is not a NRSRO whose rating is included should be filed. The consent of any NRSRO is not required. (See rule 436(g) under the Securities Act (§ 230.436(g) of this chapter.)

(B) If a change in a rating already included is available before effectiveness of the registration statement, the small business issuer should consider including such rating

change in the prospectus. If the rating change is material, consideration should be given to recirculating the preliminary prospectus.

(C) If a materially different additional NRSRO rating or a material change in a rating already included becomes available during any period in which offers or sales are being made, the small business issuer should consider disclosing this information in a sticker to the prospectus.

(iii) If there is a material change in the rating(s) assigned by any NRSRO(s) to any outstanding class(es) of securities of a reporting company, the registrant should consider filing a report on Form 8–K (§ 249.308 of this chapter) or other appropriate report under the Exchange Act disclosing such rating change.

§ 228.101 (Item 101) Description of business.

(a) *Business development.* Describe the development of the small business issuer during the last five years. If the small business issuer has not been in business for five years, give the same information for predecessor(s) of the small business issuer if there are any. This business development description should include:

(1) Form and year of organization;

(2) Any bankruptcy, receivership or similar proceeding;

(3) Any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets not in the ordinary course of business; and

(4) Number of total employees and number of full time employees.

(b) *Business of issuer.* Briefly describe the business and include, to the extent material to an understanding of the issuer:

(1) Principal products or services and their markets;

(2) Distribution methods of the products or services;

(3) Status of any publicly announced new product or service;

(4) Competitive business conditions and the small business issuer's competitive position in the industry and methods of competition;

(5) Sources and availability of raw materials and the names of principal suppliers;

(6) Name of any customer(s), the loss of whom would have a material adverse effect upon the business, and the importance of the named customer(s) to the small business issuer's business (for example, percentage of total sales);

(7) Patents, trademarks, licenses, franchises, concessions, royalty agreements or labor contracts, including duration;

(8) Need for any government approval of principal products or services. If government approval is necessary and the small business issuer has not yet received that approval, discuss the status of the approval within the government approval process;

(9) Effect of existing or probable governmental regulations on the business;

(10) Dollar amount of firm backlog orders, as of a recent date and as of a comparable date in the preceding fiscal year;

(11) Estimate of the amount spent during each of the last two fiscal years on sponsored research activities for the development of new products or services or the improvement of existing products or service; and

(12) Costs and effects of compliance with environmental laws (federal, State and local).

§ 228.102 (Item 102) Description of property.

(a) Give the location of the principal plants and other property of the small business issuer and describe the condition of the property. If the small business issuer does not have complete ownership of the property, for example, others also own the property or there is a mortgage or lien on the property, describe the limitations on the ownership.

Instructions to Item 102

1. Small business issuers engaged in significant mining operations also should provide the information in Guide 7 (§ 229.801(g) and § 229.802(g) of this chapter).

2. Small business issuers engaged in oil and gas producing activities also should provide the information in Guide 2 (§ 229.801(b) and § 229.802(b) of this chapter).

3. Small business issuers engaged in real estate activities should provide the information in Guide 5 (§ 229.801(e) of this chapter) and Items 13, 14 and 15 of Form S–11 (§ 239.18 of this chapter).

§ 228.103 (Item 103) Legal proceedings.

(a) If a small business issuer is a party to any pending legal proceeding (or its property is the subject of a pending legal proceeding), give the following information (no information is necessary as to routine litigation that is incidental to the business):

(1) Name of court or agency where proceeding is pending;

(2) Date proceeding began;

(3) Principal parties;

(4) Description of facts underlying the proceedings; and

(5) Relief sought. If damages also include amount.

(b) Include the information called for by paragraphs (a) (1) through (5) of this item for any proceeding that a governmental authority is contemplating (if the small business issuer is aware of the proceeding).

Instructions to Item 103

1. A proceeding that primarily involves a claim for damages does not need to be described if the amount involved, exclusive of interest and costs, does not exceed 10% of the current assets of the small business issuer. If any proceeding presents the same legal and factual issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

2. The following types of proceedings are not "routine litigation incidental to the business" and, notwithstanding instruction 1 of this Item, must be described: Bankruptcy, receivership, or similar proceeding.

3. Any proceeding that involves Federal, State or local environmental laws must be described if it is material; involves a damages claim for more than 10% of the current assets of the issuer; or potentially involves more than $100,000 in sanctions and a governmental authority is a party.

4. Any material proceeding to which any director, officer or affiliate of the issuer, any owner of record or beneficially of more than 5% of any class of voting securities of the small business issuer, or security holder is a party adverse to the small business issuer or has a material interest adverse to the small business issuer.

§ 228.201 (Item 201) Market for common stock and related stockholder matters.

(a) *Market information.* Identify the principal market or markets where the small business issuer's common stock is traded. If there is no public trading market, so state. Limited or sporadic quotations are not considered a "public trading market."

(1) If the principal market for the small business issuer's common stock is an exchange, give the high and low sales prices for each quarter within the last two fiscal years and to date in the current year.

(2) If the principal market is not an exchange, give the range of high and low bid information for the small business issuer's common stock for each quarter within the last two fiscal years and to date in the current year. Show the source of the high and low bid information. If over-the-counter market quotations are provided, also state that the quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

(b) *Holders.* Give the approximate number of holders of each class of common stock.

(c) *Dividends.* (1) Discuss any cash dividends declared on each class of

common stock for the last two fiscal years and to date in the current year.

(2) Describe any restrictions that limit the ability to pay dividends on common stock or that are likely to do so in the future.

§ 228.202 (Item 202) Description of securities.

(a) *Common or preferred stock.* (1) If the small business issuer is offering common stock, describe any dividend, voting and preemption rights.

(2) If the small business issuer is offering preferred stock, describe the dividend, voting, conversion and liquidation rights as well as redemption or sinking fund provisions.

(3) Describe any other material rights of common or preferred stockholders.

(4) Describe any provision in the charter or by-laws that would delay, defer or prevent a change in control of the small business issuer.

(b) *Debt securities.* (1) If the small business issuer is offering debt securities, describe the maturity date, interest rate, conversion or redemption features and sinking fund requirements.

(2) Describe all other provisions giving or limiting the rights of debtholders. For example, describe subordination provisions, limitations on the declaration of dividends, restrictions on the issuance of additional debt, maintenance of asset ratios, etc.

(3) Give the name of any trustee(s) designated by the indenture and describe the circumstances under which the trustee must act on behalf of the debtholders.

(4) Discuss the tax effects of any securities offered at an "original issue discount."

(c) *Other securities to be registered.* If the small business issuer is registering other securities, provide similar information concerning the material provisions of those securities.

§ 228.303 (Item 303) Management's discussion and analysis or plan of operation.

Small business issuers that have not had revenues in each of the last three fiscal years shall provide the information in paragraph (a) of this Item. All other issuers shall provide the information in paragraph (b) of this Item.

(a) *Plan of operation.* (1) Describe the small business issuer's plan of operation for the next twelve months. This description should include such matters as:

(i) A discussion of how long the small business issuer can satisfy its cash requirements and whether it will have to raise additional funds in the next twelve months;

(ii) A summary of product research and development that the small business issuer will perform for the term of the plan;

(iii) Any expected purchase or sale of plant and significant equipment; and

(iv) Any expected significant changes in the number of employees.

(b) *Management's discussion and analysis of financial condition and results of operations*—(1) *Full fiscal years.* Discuss the small business issuer's financial condition, changes in financial condition and results of operations for each of the last two fiscal years. This discussion should address the past and future financial condition and results of operation of the small business issuer, with particular emphasis on the prospects for the future. The discussion should also address those key variable and other qualitative and quantitative factors which are necessary to an understanding and evaluation of the small business issuer. If material, the small business issuer should disclose the following:

(i) Any known trends, events or uncertainties that have or are reasonably likely to have a material impact on the small business issuer's short-term or long-term liquidity;

(ii) Internal and external sources of liquidity;

(iii) Any material commitments for capital expenditures and the expected sources of funds for such expenditures;

(iv) Any known trends, events or uncertainties that have had or that are reasonably expected to have a material impact on the net sales or revenues or income from continuing operations;

(v) Any significant elements of income or loss that do not arise from the small business issuer's continuing operations;

(vi) The causes for any material changes from period to period in one or more line items of the small business issuer's financial statements; and

(vii) Any seasonal aspects that had a material effect on the financial condition or results of operation.

(2) *Interim periods.* If the small business issuer must include interim financial statements in the registration statement or report, provide a comparable discussion that will enable the reader to assess material changes in financial condition and results of operations since the end of the last fiscal year and for the comparable interim period in the preceding year.

Instruction to Item 303

1. In preparing MD&A disclosure, registrants should be guided by the general purpose of the MD&A requirement: To give investors an opportunity to look at the registrant through the eyes of management by providing a historic and prospective analysis of the registrant's financial condition and results of operation with particular emphasis on the small business issuer's prospects for the future.

§ 228.304 (Item 304) Changes in and disagreements with accountants on accounting and financial disclosure.

(a)(1) If, during the small business issuer's two most recent fiscal years or any later interim period, the principal independent accountant or a significant subsidiary's independent accountant on whom the principal accountant expressed reliance in its report, resigned (or declined to stand for re-election) or was dismissed, then the small business issuer shall state:

(i) Whether the former accountant resigned, declined to stand for re-election or was dismissed and the date;

(ii) Whether the principal accountant's report on the financial statements for either of the past two years contained an adverse opinion or disclaimer of opinion, or was modified as to uncertainty, audit scope, or accounting principles, and also describe the nature of each such adverse opinion, disclaimer of opinion or modification;

(iii) Whether the decision to change accountants was recommended or approved by the board of directors or an audit or similar committee of the board of directors; and

(iv)(A) Whether there were any disagreements with the former accountant, whether or not resolved, on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which, if not resolved to the former accountant's satisfaction, would have caused it to make reference to the subject matter of the disagreement(s) in connection with its report; or

(B) The following information only if applicable. Indicate whether the former accountant advised the small business issuer that:

(*1*) Internal controls necessary to develop reliable financial statements did not exist; or

(*2*) Information has come to the attention of the former accountant which made the accountant unwilling to rely on management's representations, or unwilling to be associated with the financial statements prepared by management; or

(*3*) The scope of the audit should be expanded significantly, or information has come to the accountant's attention that the accountant has concluded will, or if further investigated might, materially impact the fairness or

reliability of a previously issued audit report or the underlying financial statements, or the financial statements issued or to be issued covering the fiscal period(s) subsequent to the date of the most recent audited financial statements (including information that might preclude the issuance of an unqualified audit report), and the issue was not resolved to the accountant's satisfaction prior to its resignation or dismissal; and

(C) The subject matter of each such disagreement or event identified in response to paragraph (a)(1)(iv) of this Item;

(D) Whether any committee of the board of directors, or the board of directors, discussed the subject matter of the disagreement with the former accountant; and

(E) Whether the small business issuer has authorized the former accountant to respond fully to the inquiries of the successor accountant concerning the subject matter of each of such disagreements or events and, if not, describe the nature of and reason for any limitation.

(2) If during the period specified in paragraph (a)(1) of this Item, a new accountant has been engaged as either the principal accountant to audit the issuer's financial statements or as the auditor of a significant subsidiary and on whom the principal accountant is expected to express reliance in its report, identify the new accountant and the engagement date. Additionally, if the issuer (or someone on its behalf) consulted the new accountant regarding:

(i) The application of accounting principles to a specific completed or contemplated transaction, or the type of audit opinion that might be rendered on the small business issuer's financial statements and either written or oral advice was provided that was an important factor considered by the small business issuer in reaching a decision as to the accounting, auditing or financial reporting issue; or

(ii) Any matter that was the subject of a disagreement or event identified in response to paragraph (a)(1)(iv) of this Item, then the small business issuer shall:

(A) Identify the issues that were the subjects of those consultations;

(B) Briefly describe the views of the new accountant given to the small business issuer and, if written views were received by the small business issuer, file them as an exhibit to the report or registration statement;

(C) State whether the former accountant was consulted by the small business issuer regarding any such issues, and if so, describe the former accountant's views; and

(D) Request the new accountant to review the disclosure required by this Item before it is filed with the Commission and provide the new accountant the opportunity to furnish the small business issuer with a letter addressed to the Commission containing any new information, clarification of the small business issuer's expression of its views, or the respects in which it does not agree with the statements made in response to this Item. Any such letter shall be filed as an exhibit to the report or registration statement containing the disclosure required by this Item.

(3) The small business issuer shall provide the former accountant with a copy of the disclosures it is making in response to this Item no later than the day that the disclosures are filed with the Commission. The small business issuer shall request the former accountant to furnish a letter addressed to the Commission stating whether it agrees with the statements made by the issuer and, if not, stating the respects in which it does not agree. The small business issuer shall file the letter as an exhibit to the report or registration statement containing this disclosure. If the letter is unavailable at the time of filing, the small business issuer shall request the former accountant to provide the letter so that it can be filed with the Commission within ten business days after the filing of the report or registration statement. Notwithstanding the ten business day period, the letter shall be filed within two business days of receipt. The former accountant may provide an interim letter highlighting specific areas of concern and indicating that a more detailed letter will be forthcoming within the ten business day period noted above. The interim letter, if any, shall be filed with the report or registration statement or by amendment within two business days of receipt.

(b) If the conditions in paragraphs (b)(1) through (3) of this Item exist, the small business issuer shall describe the nature of the disagreement or event and the effect on the financial statements if the method had been followed which the former accountants apparently would have concluded was required (unless that method ceases to be generally accepted because of authoritative standards or interpretations issued after the disagreement or event):

(1) In connection with a change in accountants subject to paragraph (a) of this Item, there was any disagreement or event as described in paragraph (a)(1)(iv) of this Item;

(2) During the fiscal year in which the change in accountants took place or during the later fiscal year, there have been any transactions or events similar to those involved in such disagreement or event; and

(3) Such transactions or events were material and were accounted for or disclosed in a manner different from that which the former accountants apparently would have concluded was required.

Instructions to Item 304

1. The disclosure called for by paragraph (a) of this item need not be provided if it has been previously reported as that term is defined in rule 12b–2 under the Exchange Act (§ 240.12b–2); the disclosure called for by paragraph (a) of this item must be provided, however, notwithstanding prior disclosure, if required pursuant to item 9 of schedule 14A (§ 249.14a–101 *et seq.*). The disclosure called for by paragraph (b) of this item must be furnished, where required, notwithstanding any prior disclosure about accountant changes or disagreements.

2. When disclosure is required by paragraph (a) of this item in an annual report to security holders pursuant to rule 14a–3 or rule 14c–3 (§§ 240.14a–3 and 240.14c–3 of this chapter), or in a proxy or information statement filed pursuant to the requirements of schedule 14A (§ 240.14a–101 *et seq.*) or 14C (§ 240.14c–101 *et seq.*), in lieu of a letter pursuant to paragraph (a)(2)(ii)(D) or (a)(3) of this item, before filing such materials with or furnishing such materials to the Commission, the small business issuer shall furnish the disclosure required by paragraph (a) of this item to each accountant who was engaged during the period set forth in paragraph (a) of this item. If any such accountant believes that the statements made in response to paragraph (a) of this item are incorrect or incomplete, it may present its views in a brief statement, ordinarily expected not to exceed 200 words, to be included in the annual report or proxy or information statement. This statement shall be submitted to the small business issuer within ten business days of the date the accountant receives the small business issuer's disclosure. Further, unless the written views of the newly engaged accountant required to be filed as an exhibit by paragraph (a)(2)(ii)(D) of this item have been before filed with the Commission, the small business issuer shall file a Form 8–K (§ 249.308 of this chapter) along with the annual report or proxy or information statement for the purpose of filing the written views as exhibits.

3. The information required by this item need not be provided for a company being acquired by the small business issuer if such acquiree has not been subject to the filing requirements of either section 13(a) or 15(d) of the Exchange Act, or, because of section 12(i) of the Exchange Act, has not furnished an annual report to security holders pursuant to rule 14a–3 or rule 14c–3 (§§ 240.14a–3 and 240.14c–3 of this chapter) for its latest fiscal year.

4. In determining whether any disagreement or reportable event has occurred, an oral communication from the engagement partner or another person

responsible for rendering the accounting firm's opinion (or their designee) will generally suffice as the accountant advising the small business issuer of a reportable event or as a statement of a disagreement at the "decision-making level" within the accounting firm and require disclosure under this item.

§ 228.310 (Item 310) Financial statements.

Notes

1. Financial statements of a small business issuer, its predecessors or any businesses to which the small business issuer is a successor shall be prepared in accordance with generally accepted accounting principles in the United States.

2. Regulation S–X (17 CFR 210.1 through 210.12), Form and Content of and Requirements for Financial Statements, shall not apply to the preparation of such financial statements, except that the report and qualifications of the independent accountant shall comply with the requirements of article 2 of regulation S–X (17 CFR 210.2), and small business issuers engaged in oil and gas producing activities shall follow the financial accounting and reporting standards specified in article 4–10 of regulation S–X (17 CFR 210.4–10) with respect to such activities. To the extent that article 11–01 (17 CFR 210.11–01) (Pro Forma Presentation Requirements) offers enhanced guidelines for the preparation, presentation and disclosure of pro forma financial information, small business issuers may wish to consider these items.

3. The Commission, where consistent with the protection of investors, may permit the omission of one or more of the financial statements or the substitution of appropriate statements of comparable character. The Commission by informal written notice may require the filing of other financial statements where necessary or appropriate.

(a) *Annual financial statements.* Small business issuers shall file an audited balance sheet as of the end of the most recent fiscal year and audited statements of income, cash flows and changes in stockholders' equity for each of the two fiscal years preceding the date of such audited balance sheet (or such shorter period as the registrant has been in business).

(b) *Interim financial statements.* Interim financial statements, which may be unaudited, shall include a balance sheet as of the end of the issuer's most recent fiscal quarter or other more recent interim period and income statements and statements of cash flows for the interim period up to the date of such balance sheet and the comparable period of the preceding fiscal year.

Instructions to Item 310(b)

1. Where Item 310 is applicable to a Form 10–QSB (§ 249.308b) and the interim period is more than one quarter, income statements must also be provided for the most recent interim quarter and the comparable quarter of the preceding fiscal year.

2. Interim financial statements must include all adjustments which in the opinion of management are necessary in order to make the financial statements not misleading. An affirmative statement that the financial statements have been so adjusted must be included with the interim financial statements.

(1) *Condensed format.* Interim financial statements may be condensed as follows:

(i) Balance sheets should include separate captions for each balance sheet component presented in the annual financial statements which represents 10% or more of total assets. Cash and retained earnings should be presented regardless of relative significance to total assets. Registrants which present a classified balance sheet in their annual financial statements should present totals for current assets and current liabilities.

(ii) Income statements should include net sales or gross revenue, each cost and expense category presented in the annual financial statements which exceeds 20% of sales or gross revenues, provision for income taxes, discontinued operations, extraordinary items and cumulative effects of changes in accounting principles or practices. (Financial institutions should substitute net interest income for sales for purposes of determining items to be disclosed.) Dividends per share should be presented.

(iii) Cash flow statements should include cash flows from operating, investing and financing activities as well as cash at the beginning and end of each period and the increase or decrease in such balance.

(iv) Additional line items may be presented to facilitate the usefulness of the interim financial statements including their comparability with annual financial statements.

(2) *Disclosure required and additional instructions as to content*—(i) *Footnotes.* Footnote and other disclosures should be provided as needed for fair presentation and to ensure that the financial statements are not misleading.

(ii) *Material subsequent events and contingencies.* Disclosure must be provided of material subsequent events and material contingencies notwithstanding disclosure in the annual financial statements.

(iii) *Significant equity investees.* Sales, gross profit, net income (loss) from continuing operations and net income must be disclosed for equity investees which constitute 20% or more of a registrant's consolidated assets, equity or income from continuing operations.

(iv) *Significant dispositions and purchase business combinations.* If a significant disposition or purchase business combination has occurred during the most recent interim period and the transaction required the filing of a Form 8–K (§ 249.308 of this chapter), pro forma data must be presented which reflects revenue, income from continuing operations, net income and income per share for the current interim period and the corresponding interim period of the preceding fiscal year as though the transaction occurred at the beginning of the periods.

(v) *Material accounting changes.* Disclosure must be provided of the date and reasons for any material accounting change. The registrant's independent accountant must provide a letter in the first Form 10–QSB (§ 249.308b of this chapter) filed subsequent to the change indicating whether or not the change is to a preferable method. Disclosure must be provided of any retroactive change to prior period financial statements, including the effect of any such change on income and income per share.

(vi) *Development stage companies.* A registrant in the development stage must provide cumulative from inception financial information.

(c) *Financial statements of businesses acquired or to be acquired.* (1) Financial statements for the periods specified in paragraph (c)(3) of this item should be furnished if any of the following conditions exist:

(i) Consummation of a significant business combination accounted for as a purchase has occurred or is probable (the term "purchase" encompasses the purchase of an interest in a business accounted for by the equity method); or

(ii) Consummation of a significant business combination to be accounted for as a pooling is probable.

(2) A business combination is considered significant if a comparison of the most recent annual financial statements of the business acquired or to be acquired and the small business issuer's most recent annual financial statements filed at or prior to the date of acquisition indicates that the business would be significant pursuant to the conditions specified in rule 405 of regulation C (§ 230.405 of this chapter).

(3)(i) Financial statements shall be furnished for the periods prior to the date of acquisition, for those periods for which the small business issuer is required to furnish financial statements.

(ii) The financial statements covering fiscal years shall be audited.

(iii) The separate audited balance sheet of the acquired business is not required when the small business issuer's most recent audited balance sheet filed is for a date after the acquisition was consummated.

(iv) If none of the conditions in the definitions of significant subsidiary in rule 405 (§ 230.405 of this chapter) exceeds 20%, income statements of the acquired business for only the most recent fiscal year and any interim period need be filed.

(4) If consummation of more than one transaction has occurred or is probable, the significance tests shall be made using the aggregate impact of the businesses and the financial statements may be presented on a combined basis, if appropriate.

(d) *Pro Forma financial information.* (1) Pro forma information shall be furnished if any of the following conditions exist (for purposes of this item, the term "purchase" encompasses the purchase of an interest in a business accounted for by the equity method):

(i) During the most recent fiscal year or subsequent interim period for which a balance sheet is required by paragraph (b) of this item, a significant business combination accounted for as a purchase has occurred;

(ii) After the date of the most recent balance sheet filed pursuant to paragraph (a) or (b) of this item, consummation of a significant business combination accounted for as a purchase or a pooling has occurred or is probable.

(2) The provisions of paragraphs (c)(2) and (4) of this item apply to this paragraph.

(3) Pro forma statements should be condensed, in columnar form showing pro forma adjustments and results and should include the following:

(i) If the transaction was consummated during the most recent fiscal year or subsequent interim period, pro forma statements of income reflecting the combined operations of the entities for the latest fiscal year and interim period, if any, or;

(ii) If consummation of the transaction has occurred or is probable after the date of the most recent balance sheet required by paragraph (a) or (b) of this item, a pro forma balance sheet giving effect to the combination as of the date of the most recent balance sheet. For a purchase, pro forma statements of income reflecting the combined operations of the entities for the latest fiscal year and interim period, if any, and for a pooling of interests, pro forma statements of income for all periods for which income statements of the small business issuer are required.

(e) *Real estate operations acquired or to be acquired.* If, during the period for which income statements are required, the small business issuer has acquired one or more properties which in the aggregate are significant, or since the date of the latest balance sheet required by paragraph (a) or (b) of this item, has acquired or proposes to acquire one or more properties which in the aggregate are significant, the following shall be furnished with respect to such properties:

(1) Audited income statements (not including earnings per unit) for the two most recent years, which shall exclude items not comparable to the proposed future operations of the property such as mortgage interest, leasehold rental, depreciation, corporate expenses and Federal and State income taxes; *Provided, however,* That such audited statements need be presented for only the most recent fiscal year if:

(i) The property is not acquired from a related party;

(ii) Material factors considered by the small business issuer in assessing the property are described with specificity in the registration statement with regard to the property, including source of revenue (including, but not limited to, competition in the rental market, comparative rents, occupancy rates) and expenses (including but not limited to, utilities, ad valorem tax rates, maintenance expenses, capital improvements anticipated); and

(iii) The small business issuer indicates that, after reasonable inquiry, it is not aware of any material factors relating to the specific property other than those discussed in response to paragraph (e)(1)(ii) of this item that would cause the reported financial information not to be necessarily indicative of future operating results.

(2) If the property will be operated by the small business issuer a statement shall be furnished showing the estimated taxable operating results of the small business issuer based on the most recent twelve month period including such adjustments as can be factually supported. If the property will be acquired subject to a net lease, the estimated taxable operating results shall be based on the rent to be paid for the first year of the lease. In either case, the estimated amount of cash to be made available by operations shall be shown. Disclosure must be provided of the principal assumptions which have been made in preparing the statements of estimated taxable operating results and cash to be made available by operations.

(3) If appropriate under the circumstances, a table should be provided which shows, for a limited number of years, the estimated cash distribution per unit indicating the portion reportable as taxable income and the portion representing a return of capital with an explanation of annual variations, if any. If taxable net income per unit will be greater than the cash available for distribution per unit, that fact and approximate year of occurrence shall be stated, if significant.

(f) *Limited partnerships.* (1) Small business issuers which are limited partnerships must provide the balance sheets of the general partners as described in paragraphs (f)(2) through (4) of this item.

(2) Where a general partner is a corporation, the audited balance sheet of the corporation as of the end of its most recently completed fiscal year must be filed. Receivables, other than trade receivables, from affiliates of the general partner should be deducted from shareholders' equity of the general partner. Where an affiliate has committed itself to increase or maintain the general partner's capital, the audited balance sheet of such affiliate must also be presented.

(3) Where a general partner is a partnership, there shall be filed an audited balance sheet of such partnership as of the end of its most recently completed fiscal year.

(4) Where the general partner is a natural person, there shall be filed, as supplemental information, a balance sheet of such natural person as of a recent date. Such balance sheet need not be audited. The assets and liabilities should be carried at estimated fair market value, with provisions for estimated income taxes on unrealized gains. The net worth of such general partner(s), based on such balance sheet(s), singly or in the aggregate, shall be disclosed in the registration statement.

(g) *Age of financial statements.* If required financial statements are as of a date 135 days or more prior to the date a registration statement becomes effective or proxy material is expected to be mailed, the financial statements shall be updated to include financial statements for an interim period ending within 135 days of the effective or expected mailing date. Interim financial statements should be prepared and presented in accordance with paragraph (b) of this item:

(1) When the anticipated effective or mailing date falls within 45 days after the end of the fiscal year, the filing may include financial statements only as current as the end of the third fiscal quarter; *Provided, however,* That if the audited financial statements for the recently completed fiscal year are available or become available prior to

effectiveness or mailing, they must be included in the filing;

(2) If the effective date or anticipated mailing date falls after 45 days but within 90 days of the end of the small business issuer's fiscal year, the small business issuer is not required to provide the audited financial statements for such year end provided that the following conditions are met:

(i) The small business issuer is a reporting company and all reports due have been filed;

(ii) For the most recent fiscal year for which audited financial statements are not yet available, the small business issuer reasonably and in good faith expects to report income from continuing operations before taxes; and

(iii) For at least one of the two fiscal years immediately preceding the most recent fiscal year the small business issuer reported income from continuing operations before taxes.

§ 228.401 (Item 401) Directors, executive officers, promoters and control persons.

(a) *Identify directors and executive officers.* (1) List the names and ages of all directors and executive officers and all persons nominated or chosen to become such (however do not name any such person who has not consented to act as a director or executive officer);

(2) List the positions and offices that each such person held with the small business issuer;

(3) Give the person's term of office and the period during which the person has served;

(4) Briefly describe the person's business experience during the past five years; and

(5) If a director, identify other directorships held naming the company.

(b) *Identify significant employees.* Give the information specified in paragraph (a) of this item for each person who is not an executive officer but who is expected by the small business issuer to make a significant contribution to the business.

(c) *Family relationships.* Describe any family relationships between directors, executive officers, or persons nominated or chosen by the small business issuer to become directors or executive officers.

(d) *Involvement in certain legal proceedings.* Describe any of the following events that occurred during the past five years that are material to an evaluation of the ability or integrity of any director, person nominated to become a director, executive officer, promoter or control person of the small business issuer:

(1) Any bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time;

(2) The person was convicted in a criminal proceeding or is the subject of a pending criminal proceeding (excluding traffic violations and other minor offenses);

(3) The person was the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking activities; and

(4) The person was found by a court of competent jurisdiction (in a civil action), the Commission or the Commodity Futures Trading Commission to have violated a federal or state securities or commodities law, and the judgment has not been reversed, suspended, or vacated.

§ 228.402 (Item 402) Executive compensation.

(a) *Cash compensation.* Complete the following table and include all cash compensation paid or to be paid to the following persons for services rendered in all capacities to the small business issuer during the last fiscal year:

(1) Each of the small business issuer's five most highly paid executive officers whose cash compensation exceeds $60,000, giving their names; and

(2) All executive officers as a group, stating the number of persons in the group without naming them.

CASH COMPENSATION TABLE

A	B	C
Name of individual or number in group	Capacities in which served	Cash compensation

Instructions to Item 402(a)

1. This table shall include:

(a) All cash bonuses paid or to be paid for all services rendered during the last fiscal year unless the amounts have not been allocated at the time of filing the registration statement or report and

(b) All compensation that would have been paid in cash but was deferred.

2. Paragraph (a) of this item applies to any person who was an executive officer at any time in the most recent fiscal year. However, information need not be given for any part of that year during which a person was not an executive officer of the small business issuer, if it so states.

(b)(1) *Compensation under plans.* Describe briefly all plans under which the small business issuer paid or distributed cash or non-cash compensation during the most recent fiscal year and all plans under which the small business issuer proposes to pay or distribute cash or non-cash compensation in the future to the individuals and group named in paragraph (a) of this item. State the amounts provided. No information need be given for:

(i) Any plans that do not discriminate in favor of officers or directors and that are available to all salaried employees; or

(ii) Any pension or retirement benefits where amounts to be paid are computed on an actuarial basis under any plan that provides for fixed benefits for retirement at a specified age or after a specified number of years of service.

(2) *Stock option plans.* (i) For stock options granted during the last fiscal year, indicate:

(A) the title and amount of securities subject to options;

(B) the average per share exercise price; and

(C) if the exercise price was less than 100 percent of the market value of the security on the date of grant, so state and give the market price on such date.

(ii) For stock options exercised during the last fiscal year, regardless of the year that the small business issuer granted the options, give the net value realized upon the exercise, calculated by subtracting the exercise price from the market value.

(c) *Other compensation.* Give the amount and a description of any other compensation paid or distributed during the last fiscal year to the named individuals and group specified in paragraph (a) of this Item. The compensation shall be valued on the basis of the issuers' aggregate incremental cost. No information need be provided if:

(1) For any individual, the total amount of such other compensation is less than $25,000 or 10% of the compensation reported in the Cash Compensation Table for that person; or

(2) For the group, the total amount of such other compensation is the lessor of $25,000 times the number of persons in the group or 10% of the compensation reported in the Cash Compensation Table for the group under paragraph (a) of this Item and a statement to that effect is made.

(d) *Compensation of directors.* Describe and give the amounts of all compensation received by directors of the small business issuer for all services as a director.

§ 228.403 (Item 403) Security ownership of certain beneficial owners and management.

(a) *Security ownership of certain beneficial owners.* Complete the table below for any person (including any "group") who is known to the small business issuer to be the beneficial owner of more than 5 percent of any class of the small business issuer's voting securities.

(1) Title of class	(2) Name and address of beneficial owner	(3) Amount and nature of beneficial owner	(4) Percent of class

(b) *Security ownership of management.* Complete the following table for each class of equity securities of the small business issuer or its parent beneficially owned by all directors and nominees, naming them, and directors and officers of the small business issuer as a group, without naming them.

(1) Title of class	(2) Name and address of beneficial owner	(3) Amount and nature of beneficial owner	(4) Percent of class

(c) *Changes in control.* Describe any arrangements which may result in a change in control of the small business issuer.

Instructions to Item 403

1. Of the number of shares shown in column (3) of paragraphs (a) and (b) of this Item, state in a footnote the amount which the listed beneficial owner has the right to acquire within sixty days, from options, warrants, rights, conversion privilege or similar obligations.

2. Where persons hold more than 5% of a class under a voting trust or similar agreement, provide the following:

(a) The title of such securities;

(b) The amount that they hold under the trust or agreement (if not clear from the table);

(c) The duration of the agreement;

(d) The names and addresses of the voting trustees; and

(e) A brief outline of the voting rights and other powers of the voting trustees under the trust or agreement.

3. Calculate the percentages on the basis of the amount of outstanding securities (not including securities held by or for the account of the small business issuer). Securities that are subject to options, warrants, rights, conversion privilege or similar obligations that provide the holder with the right to acquire beneficial ownership of that security within sixty days shall be "outstanding."

4. In this Item, a beneficial owner of a security means:

(a) Any person who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise has or shares:

(1) Voting power, which includes the power to vote, or to direct the voting of, such security; or

(2) Investment power, which includes the power to dispose, or to direct the disposition of, such security.

(b) Any person who, directly or indirectly, creates or uses a trust, proxy, power of attorney, pooling arrangement or any other contract, arrangement or device with the purpose or effect of divesting such person of beneficial ownership of a security or preventing the vesting of such beneficial ownership.

5. All securities of the same class beneficially owned by a person, regardless of the form that such beneficial ownership takes, shall be totaled in calculating the number of shares beneficially owned by such person.

6. The small business issuer is responsible for knowing the contents of any statements filed with the Commission under section 13(d) or 13(g) of the Exchange Act concerning the beneficial ownership of securities and may rely upon the information in such statements unless it knows or has reason to believe that the information is not complete or accurate.

7. The term *group* means two or more persons acting as a partnership, syndicate, or other group for the purpose of acquiring, holding or disposing of securities of an issuer.

8. Where the small business issuer lists more than one beneficial owner for the same securities, adequate disclosure should be included to avoid confusion.

§ 228.404 (Item 404) Certain relationships and related transactions.

(a) Describe any transaction during the last two years, or proposed transactions, to which the small business issuer was or is to be a party, in which any of the following persons had or is to have a direct or indirect material interest. Give the name of the person, the relationship to the issuer, nature of the person's interest in the transaction and, the amount of such interest:

(1) Any director or executive officer of the small business issuer;

(2) Any nominee for election as a director;

(3) Any security holder named in response to item 403 (§ 228.403); and

(4) Any member of the immediate family (including spouse, parents, children, siblings, and in-laws) of any of the persons in paragraph (a)(1), (2) or (3) of this Item.

(b) No information need be included for any transaction where:

(1) Competitive bids determine the rates or charges involved in the transaction;

(2) The transaction involves services at rates or charges fixed by law or governmental authority;

(3) The transaction involves services as a bank depositary of funds, transfer agent, registrar, trustee under a trust indenture, or similar services;

(4) The amount involved in the transaction or a series of similar transactions does not exceed $60,000; or

(5) The interest of the person arises solely from the ownership of securities of the small business issuer and the person receives no extra or special benefit that was not shared equally (pro rata) by all holders of securities of the class.

(c) List all parents of the small business issuer showing the basis of control and as to each parent, the percentage of voting securities owned or other basis of control by its immediate parent if any.

(d) *Transactions with promoters.* Issuers organized within the past five years shall:

(1) State the names of the promoters, the nature and amount of anything of value (including money, property, contracts, options or rights of any kind) received or to be received by each promoter, directly or indirectly, from the issuer and the nature and amount of any assets, services or other consideration therefore received or to be received by the registrant; and

(2) As to any assets acquired or to be acquired from a promoter, state the

amount at which the assets were acquired or are to be acquired and the principle followed or to be followed in determining such amount and identify the persons making the determination and their relationship, if any, with the registrant or any promoter. If the assets were acquired by the promoter within two years prior to their transfer to the issuer, also state the cost thereof to the promoter.

Instructions to Item 404

1. A person does not have a material indirect interest in a transaction within the meaning of this Item where:

(a) The interest arises only:

(1) From such person's position as a director of another corporation or organization (other than a partnership) which is a party to the transaction and/or

(2) From the total (direct or indirect) by all specified persons of less than a 10% equity interest in another person (other than a partnership) which is a party to the transaction;

(b) The interest arises only from such person's position as a limited partner in a partnership in which he and all other specified persons had an interest of less than 10 percent; or

(c) The interest of such person arises solely from holding an equity interest (but not a general partnership interest) or a creditor interest in another person that is a party to the transaction and the transaction is not material to such other person.

2. Include information for any material underwriting discounts and commissions upon the sale of securities by the small business issuer where any of the specified persons was or is to be a principal underwriter or is a controlling person or member of a firm that was or is to be a principal underwriter.

3. As to any transaction involving the purchase or sale of assets by or to the small business issuer otherwise than in the ordinary course of business, state the cost of the assets to the purchase and if acquired by the seller within two years before the transaction, the cost thereof to the seller.

§ 228.406 (Item 405) Compliance with section 16(a) of the Exchange Act.

Every small business issuer that has a class of equity securities registered pursuant to section 12 of the Exchange Act (15 U.S.C. 78*l*) shall:

(a) Based solely upon a review of Forms 3 and 4 (§§ 249.103 and 249.104 of this chapter) and amendments thereto furnished to the registrant under Rule 16a–3(d) (§ 240.16a–3(e) of this chapter) during its most recent fiscal year and Forms 5 and amendments thereto (§ 249.105 of this chapter) furnished to the registrant with respect to its most recent fiscal year, and any written representation referred to in paragraph (b)(2)(i) of this item:

(1) Identify each person who, at any time during the fiscal year, was a director, officer, beneficial owner of more than ten percent of any class of equity securities of the registrant registered pursuant to section 12 ("reporting person") that failed to file on a timely basis, as disclosed in the above Forms, reports required by section 16(a) during the most recent fiscal year or prior years.

(2) For each such person, set forth the number of late reports, the number of transactions that were not reported on a timely basis, and any known failure to file a required Form.

Note: The disclosure requirement is based on a review of the forms submitted to the registrant during and with respect to its most recent fiscal year, as specified above. Accordingly, a failure to file timely need only be disclosed once. For example, if in the most recently concluded fiscal year a reporting person filed a Form 4 disclosing a transaction that took place in the prior fiscal year, and should have been reported in that year, the registrant should disclose that late filing and transaction pursuant to this Item for the most recent fiscal year, but not in material filed with respect to subsequent years.

(b) With respect to the disclosure required by paragraph (a) of this Item:

(1) A form received by the registrant within three calendar days of the required filing date may be presumed to have been filed with the Commission by the required filing date.

(2) If the registrant:

(i) Receives a written representation from the reporting person that no Form 5 is required; and

(ii) Maintains the representation for two years, making a copy available to the Commission or its staff upon request, the registrant need not identify such reporting person pursuant to paragraph (a) of this item as having failed to file a Form 5 with respect to that fiscal year.

§ 228.501 (Item 501) Front of registration statement and outside front cover of prospectus.

(a) On the outside front cover page of prospectus, give the following information:

(1) Name of the small business issuer;

(2) Title, amount and description of securities offered;

(3) If there are selling security holders, a statement to that effect;

(4) Cross reference to the risk factors section of the prospectus;

(5) The following statement in capital letters:

THESE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION NOR HAS THE COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

(6) If the small business issuer is not reporting and a preliminary prospectus will be circulated, a bona fide estimate of the range of the maximum offering price and maximum number of shares or other units of securities to be offered, or a bona fide estimate of the principal amount of debt securities to be offered;

(7) The following table as to all securities to be registered (estimated, if necessary):

	Price to public	Underwriting discounts and commissions	Proceeds to issuer or other persons	Other expenses of issuance and distribution
Per unit				
Total				
Total minimum				
Total maximum				

The "total minimum" and "total maximum" items are required only if the offering is made on a best efforts basis. If so, disclose in the summary section (or on the cover page if material): The date the offering will end; any minimum purchase requirement and any arrangements to place funds in an escrow, trust, or similar account. If there is an over-allotment option, the maximum-minimum information must be based on the purchase of all or none of the shares subject to that option;

(8) If a prospectus will be used before the effective date of the registration statement (or, prior to the determination of the initial public offering price in the case of a prospectus that omits information as permitted by rule 430A under the Securities Act (§ 230.430A of this chapter)), include, in red ink, the caption "Subject to Completion," the date of its issuance, and the following statement printed in type as large as that generally used in the body of the prospectus:

Information contained herein is subject to completion or amendment. A registration statement relating to these securities has been filed with the Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State.

(9) Any legend or information required by the law of any State in which the securities are to be offered; and

(10) The date of the prospectus.

§ 228.502 (Item 502) Inside front and outside back cover pages of prospectus.

On the inside front cover page of the prospectus (or on the outside back cover page for paragraphs (e) and (f) of this Item) disclose the following:

(a)(1) *Available information.* State whether or not the small business issuer is a reporting company.

(2) If the small business issuer is a reporting company, state that the reports and other information filed by the small business issuer may be inspected and copied at the public reference facilities of the Commission in Washington, DC, and at some of its Regional Offices, (include addresses), and that copies of such material can be obtained from the Public Reference Section of the Commission, Washington, DC 20549 at prescribed rates; and

(3) Name any national securities exchange on which the small business issuer's securities are listed and state that reports and other information concerning the small business issuer can be inspected at such exchanges.

(b) *Reports to security holders.* Where a small business issuer is not required to deliver an annual report to security holders, indicate whether voluntary reports will be sent and, if so, the frequency of such reports and whether they will include audited financial statements.

(c) *Incorporation by reference.* State that small business issuer will provide without charge to each person who receives a prospectus, upon written or oral request of such person, a copy of any of the information that was incorporated by reference in the prospectus (not including exhibits to the information that is incorporated by reference unless the exhibits are themselves specifically incorporated by reference) and the address (including title or department) and telephone number to which such a request is to be directed.

(d) *Stabilization.* (1) Include the following statement, if true:

IN CONNECTION WITH THIS OFFERING, THE UNDERWRITERS MAY OVER-ALLOT OR EFFECT TRANSACTIONS WHICH STABILIZE OR MAINTAIN THE MARKET PRICE OF (IDENTIFY EACH CLASS OF SECURITIES IN WHICH SUCH TRANSACTIONS MAY BE EFFECTED) AT A LEVEL ABOVE THAT WHICH MIGHT OTHERWISE PREVAIL IN THE OPEN MARKET. SUCH TRANSACTIONS MAY BE EFFECTED ON (IDENTIFY EACH EXCHANGE ON WHICH STABILIZING TRANSACTIONS MAY BE EFFECTED; IF NONE, OMIT THIS SENTENCE.) SUCH STABILIZING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME.

(2) If the stabilizing began before the effective date of the registration statement, state the amount of securities bought, the prices at which they were bought and the period within which they were bought. In the event that Rule 430A under the Securities Act (§ 230.430A of this chapter) is used, the final prospectus must include information as to stabilizing transactions before the public offering price was set.

(3) If the securities are to be offered to existing security holders pursuant to warrants or rights and any securities not taken by security holders are to be reoffered to the public after the expiration of the rights offering period, state in the prospectus used to reoffer the securities:

(i) The amount of securities bought in stabilization activities during the rights offering period and the price or range of prices at which such securities were bought;

(ii) The amount of the offered securities subscribed for during such period;

(iii) The amount of the offered securities subscribed for by the underwriters during such period;

(iv) The amount of the offered securities sold during such period by the underwriters and the price, or range of prices, at which such securities were sold; and

(v) The amount of the offered securities to be reoffered to the public and the public offering price.

(e) *Delivery of prospectuses by dealers.* The following legend shall be printed in bold-face or italic type:

Until (insert date) all dealers effecting transactions in the registered securities, whether or not participating in this distribution, may be required to deliver a prospectus. This is in addition to the obligation of dealers to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

The date to be inserted should be determined by reference to section 4(3) of the Securities Act and rule 174 (§ 230.174 of this chapter).

(f) *Table of contents.* Include a detailed table of contents showing the various sections or subdivisions of the prospectus and the page number on which each such section or subdivision begins.

§ 228.503 (Item 503) Summary information and risk factors.

(a) *Summary.* A summary of the information contained in the prospectus where the length and complexity of the prospectus make a summary useful.

(b) *Address and telephone number.* In the beginning of the prospectus the complete mailing address and the telephone number of their principal executive offices.

(c) *Risk factors.* Immediately following the cover page of the prospectus or the summary section, discuss the factors that make the offering speculative or risky. These factors may include no operating history, no recent profit from operations, poor financial position, the kind of business in which the small business issuer is engaged or proposes to engage, or no market for the small business issuer's securities.

§ 228.504 (Item 504) Use of proceeds.

State how the net proceeds of the offering will be used, indicating the amount to be used for each purpose and the priority of each purpose, if all of the securities are not sold. If all or a substantial part of the proceeds are not allocated for a specific purpose, so state and discuss the principal reasons for the offering.

Instructions to Item 504

1. If a material amount of proceeds will discharge debt, state the interest rate and maturity. If that debt was incurred within one year, describe the use of the proceeds of that debt other than short-term borrowings used for working capital.

2. If any material amount of the proceeds is to be used to acquire assets or finance the acquisitions of other businesses, describe the assets or businesses and identify the persons from whom they will be bought. State the cost of the assets and, where such assets are to be acquired from affiliates of the small business issuer or their associates, give the names of the persons from whom they are to be acquired and set forth the principle

followed in determining the cost to the small business issuer.

§ 228.505 (Item 505) Determination of offering price.

(a) If there is no established public trading market for the common stock being registered or if there is a significant difference between the offering price and the market price of the stock, give the factors that were considered in determining the offering price. (Sporadic trades do not constitute a public trading market.)

(b) If warrants, rights and convertible securities are being registered and there is no public trading market for the underlying securities, describe the factors considered in determining the exercise or conversion price.

§ 228.506 (Item 506) Dilution.

(a) If the small business issuer is not a reporting company and is selling common stock at a price significantly less than the price paid by officers, directors, promoters and affiliated persons for common stock purchased by them during the past five years (or which they have rights to purchase), compare these prices.

(b) If paragraph (a) of this Item applies and the issuer had losses in each of its last three fiscal years and there is a material dilution of the purchasers' equity interest, disclose the following:

(1) The net tangible book value per share before and after the distribution;

(2) The amount of the increase in such net tangible book value per share attributable to the cash payments made by purchasers of the shares being offered; and

(3) The amount of the immediate dilution from the public offering price which will be absorbed by such purchasers.

§ 228.507 (Item 507) Selling security holders.

If security holders of a small business issuer is offering securities, name each selling security holder, state any position, office, or other material relationship which the selling security holder has had within the past three years with the small business issuer or any of its predecessors or affiliates, and state the amount of securities of the class owned by such security holder before the offering, the amount to be offered for the security holder's account, the amount and (if one percent or more) the percentage of the class to be owned by such security holder after the offering is complete.

§ 228.508 (Item 508) Plan of distribution.

(a) *Underwriters and underwriting obligation.* If the securities are to be offered through underwriters, name the principal underwriters, and state the respective amounts underwritten. Identify each such underwriter having a material relationship with the small business issuer and state the nature of the relationship. State the nature of the obligation of the underwriter(s) to take the securities, i.e., firm commitment, best efforts.

(b) *New underwriters.* Describe the business experience of managing or principal underwriters that have been in business less than three years, state their principal business function and identify any material relationships between the promoters of the issuer and the underwriter(s). This information need not be given if:

(1) The issuer is a reporting company; and

(2) An offering has no material risks.

(c) *Other distributions.* Outline briefly the plan of distribution of any securities to be registered that are to be offered otherwise than through underwriters.

(d) *Underwriter's representative on board of directors.* Describe any arrangement whereby the underwriter has the right to designate or nominate a member or members of the board of directors of the small business issuer. Identify any director so designated or nominated and indicate any relationship with the small business issuer.

(e) *Indemnification of underwriters.* If the underwriting agreement provides for indemnification by the small business issuer of the underwriters or their controlling persons against any liability arising under the Securities Act, furnish a brief description of such indemnification provisions.

(f) *Dealers' compensation.* State briefly the discounts and commissions to be allowed or paid to dealers, including all cash, securities, contracts or other considerations to be received by any dealer in connection with the sale of the securities.

(g) *Finders.* Identify any finder and describe the nature of any material relationship between such finder and the small business issuer or associates or affiliates of the small business issuer.

(h) *Discretionary accounts.* If the small business issuer is not a reporting company, identify any principal underwriter that intends to sell to any discretionary accounts and include an estimate of the amount of securities so intended to be sold. The response to this paragraph shall be contained in a pre-effective amendment which shall be circulated if the information is not available when the registration statement is filed.

§ 228.509 (Item 509) Interest of named experts and counsel.

If an "expert" or "counsel" was hired on a contingent basis, will receive a direct or indirect interest in the small business issuer or was a promoter, underwriter, voting trustee, director, officer, or employee, of the small business issuer, describe the contingent basis, interest, or connection.

(a) *Expert* is a person who is named as preparing or certifying all or part of the small business issuer's registration statement or a report or valuation for use in connection with the registration statement.

(b) *Counsel* is counsel named in the prospectus as having given an opinion on the validity of the securities being registered or upon other legal matters concerning the registration or offering of the securities.

Instruction to Item 509

1. The small business issuer does not need to disclose the interest of an expert (other than an accountant) or counsel if their interest (including the fair market value of all securities of the small business issuer received and to be received, or subject to options, warrants or rights received or to be received) does not exceed $50,000.

§ 228.510 (Item 510) Disclosure of commission position on indemnification for securities act liabilities.

If the small business issuer does not request acceleration of the effective date of the registration statement, describe the indemnification provisions for directors, officers and controlling persons of the small business issuer against liability under the Securities Act. This includes any provision in the underwriting agreement which indemnifies the underwriter or its controlling persons against such liabilities where a director, officer or controlling person of the small business issuer is such an underwriter or controlling person or a member of any firm which is such an underwriter. In addition, include the following statement:

Insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act") may be permitted to directors, officers or persons controlling the issuer under the foregoing provisions, the issuer has been informed that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is therefore unenforceable.

§ 228.511 (Item 511) Other expenses of issuance and distribution.

(a) Give an itemized statement of all expenses of the offering, other than underwriting discounts and commissions. If any of the securities are registered for sale by security holders, state how much of the expenses the security holders will pay.

(1) The itemized list should generally include registration fees, federal taxes, state taxes and fees, trustees' and transfer agents' fees, costs of printing and engraving, and legal, accounting, and engineering fees.

(2) Include as a separate item any premium paid by the small business issuer or any selling security holder on any policy to insure or indemnify directors or officers against any liabilities they may incur in the registration, offering, or sale of these securities.

Instruction to Item 511

1. If the amounts of any items are not known, give estimates but identify them as such.

§ 228.512 (Item 512) Undertakings.

Include each of the following undertakings that apply to the offering.

(a) *Rule 415 offering.* If the small business issuer is registering securities under rule 415 of the Securities Act (§ 230.415 of this chapter), that the small business issuer will:

(1) File, during any period in which it offers or sells securities, a post-effective amendment to this registration statement to:

(i) Include any prospectus required by section 10(a)(3) of the Securities Act;

(ii) Reflect in the prospectus any facts or events which, individually or together, represent a fundamental change in the information in the registration statement; and

(iii) Include any additional or changed material information on the plan of distribution.

Note: Small business issuers do not need to give the statements in paragraphs (a)(1)(i) and (a)(1)(ii) of this Item if the registration statement is on Form S–3 or S–8 (§§ 239.13 and 239.16b), and the information required in a post-effective amendment is incorporated by reference from periodic reports filed by the small business issuer under the Exchange Act.

(2) For determining liability under the Securities Act, treat each post-effective amendment as a new registration statement of the securities offered, and the offering of the securities at that time to be the initial bona fide offering.

(3) File a post-effective amendment to remove from registration any of the securities that remain unsold at the end of the offering.

(b) *Warrants and rights offerings.* If the small business issuer will offer the securities to existing security holders under warrants or rights and the small business issuer will reoffer to the public any securities not taken by security holders, with any modifications that suit the particular case:

(1) The small business issuer will supplement the prospectus, after the end of the subscription period, to include the results of the subscription offer, the transactions by the underwriters during the subscription period, the amount of unsubscribed securities that the underwriters will purchase and the terms of any later reoffering. If the underwriters make any public offering of the securities on terms different from those on the cover page of the prospectus, the small business issuer will file a post-effective amendment to state the terms of such offering.

(c) *Competitive bids.* If the small business issuer is offering securities at competitive bidding, with modifications to suit the particular case, that the small business issuer will:

(1) use its best efforts to distribute before the opening of bids, to prospective bidders, underwriters, and dealers, a reasonable number of copies of a prospectus that meet the requirements of section 10(a) of the Securities Act, and relating to the securities offered at competitive bidding, as contained in the registration statement, together with any supplements, and

(2) file an amendment to the registration statement reflecting the results of bidding, the terms of the reoffering and related matters where required by the applicable form, not later than the first use, authorized by the issuer after the opening of bids, of a prospectus relating to the securities offered at competitive bidding, unless the issuer proposes no further public offering of such securities by the issuer or by the purchasers.

(d) *Equity offerings of nonreporting small business issuers.* If a small business issuer that before the offering had no duty to file reports with the Commission under section 13(a) or 15(d) of the Exchange Act is registering equity securities for sale in an underwritten offering:

(1) The small business issuer will provide to the underwriter at the closing specified in the underwriting agreement certificates in such denominations and registered in such names as required by the underwriter to permit prompt delivery to each purchaser.

(e) *Request for acceleration of effective date.* If the small business issuer will request acceleration of the effective date of the registration statement under rule 461 under the Securities Act, include the following:

Insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act") may be permitted to directors, officers and controlling persons of the small business issuer pursuant to the foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

In the event that a claim for indemnification against such liabilities (other than the payment by the small business issuer of expenses incurred or paid by a director, officer or controlling person of the small business issuer in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the small business issuer will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

(f) If a registration statement is filed under rule 430A of the Securities Act (§ 230.430A of this chapter), that the small business issuer will:

(1) For determining any liability under the Securities Act, treat the information omitted from the form of prospectus filed as part of this registration statement in reliance upon rule 430A and contained in a form of prospectus filed by the small business issuer under rule 424(b) (1) or (4) or 497(h) under the Securities Act (§§ 230.424(b) (1), (4) or 230.497(h)) as part of this registration statement as of the time the Commission declared it effective.

(2) For determining any liability under the Securities Act, treat each post-effective amendment that contains a form of prospectus as a new registration statement for the securities offered in the registration statement, and that offering of the securities at that time as the initial bona fide offering of those securities.

§ 228.601 (Item 601) Exhibits.

(a) *Exhibits and index of exhibits.* (1) The exhibits required by the exhibit table must be filed or incorporated by reference.

(2) Each filing must have an index of exhibits. The exhibit index must list exhibits in the same order as the exhibit table. If the exhibits are incorporated by reference, this fact should be noted in the exhibit index. In the manually signed registration statement or report, the exhibit index should give the page number of each exhibit.

Instructions to Item 601

1. If an exhibit (other than an opinion or consent) is filed in preliminary form and is later changed to include only interest, dividend or conversion rates, redemption or conversion prices, purchase or offering prices, underwriters' or dealers' commissions, names, addresses or participation of underwriters or similar matters and the information appears elsewhere in the registration statement or a prospectus, no amendment need be filed.

2. Small business issuers may file copies of each exhibit, rather than originals, except as otherwise specifically noted.

** Where the opinion of the expert or counsel has been incorporated by reference into a previously filed Securities Act registration statement.

*** An issuer need not provide an exhibit if: (1) an election was made under Form S–4 to provide S–2 or S–3 disclosure; and (2) the form selected (S–2 or S–3) would not requre the company to provide the exhibit.

**** If required under Item 304 of Regulation S–B.

BILLING CODE 8010–01–C

(b) *Description of exhibits.* Below is a description of each document listed in the exhibit table.

(1) *Underwriting agreement.* Each agreement with a principal underwriter for the distribution of the securities. If the terms have been determined and the securities are to be registered on Form S–3 (§ 239.13), the agreement may be filed on Form 8–K (§ 249.308) after the effectiveness of the registration statement.

(2) *Plan of purchase, sale, reorganization, arrangement, liquidation or succession.* Any such plan described in the filing. Schedules or attachments may be omitted if they are listed in the index and provided to the Commission upon request.

(3) *Articles of incorporation and by-laws.* The complete copies of articles of incorporation and by-laws or comparable instruments, as amended.

(4) *Instruments defining the rights of security holders, including indentures.* (i) All instruments that define the rights of holders of the equity or debt securities that the issuer is registering, including the pages from the articles of incorporation or by-laws that define those rights.

(ii) All instruments defining the rights of holders of long term debt unless the total amount of debt covered by the instrument does not exceed 10% of the total assets of the small business issuer.

(iii) Copies of indentures to be qualified under the Trust Indenture Act of 1939 shall include an itemized table of contents and a cross reference sheet showing the location of the provisions inserted in accordance with sections 310 through 318(a) of that Act.

(5) *Opinion on legality.* (i) An opinion of counsel on the legality of the securities being registered stating whether they will, when sold, be legally issued, fully paid and non-assessable, and, if debt securities, whether they will be binding obligations of the small business issuer.

(ii) If the securities being registered are issued under a plan that is subject to the requirements of ERISA furnish either:

(A) An opinion of counsel which confirms compliance with ERISA; or

(B) A copy of the Internal Revenue Service determination letter that the plan is qualified under section 401 of the Internal Revenue Code.

If the plan is later amended, the small business issuer must have the opinion of counsel and the IRS determination letter updated to confirm compliance and qualification.

(6) *No exhibit required.*

(7) *Opinion on liquidation preference.* If the liquidation preference of shares exceeds their par or stated value, an opinion of counsel as to whether there are any resulting restrictions on surplus. The opinion should also state any remedies available to security holders before or after payment of any dividend that would reduce surplus to an amount less than the amount of such excess. The opinion shall cite to applicable constitutional and statutory provisions and controlling case law.

(8) *Opinion on tax matters.* If tax consequences of the transaction are material to an investor, an opinion of counsel, an independent public or certified public accountant or, a revenue ruling from the Internal Revenue Service, supporting the tax matters and consequences to the shareholders. The exhibit is required for filings to which Securities Act Industry Guide 5 applies.

(9) *Voting trust agreement and amendments.*

(10) *Material contracts.* (i) Every material contract, not made in the ordinary course of business, that will be performed after the filing of the registration statement or report or was entered into not more than two years before such filing. Also include the following contracts:

(A) Any contract to which directors, officers, promoters, voting trustees, security holders named in the registration statement or report, or underwriters are parties other than contracts involving only the purchase or sale of current assets having a determinable market price, at such market price;

(B) Any contract upon which the small business issuer's business is substantially dependent, such as contracts with principal customers, principal suppliers, franchise agreements, etc.;

(C) Any contract for the purchase or sale of any property, plant or equipment for a consideration exceeding 15 percent of such assets of the small business issuer; or

(D) Any material lease under which a part of the property described in the registration statement or report is held by the small business issuer.

(ii)(A) Any management contract or any compensatory plan, contract or arrangement in which any director or any of the five most highly compensated executive officers of the small business issuer participates and any other management contract or any compensatory plan in which any other executive officer of the small business issuer participates shall be filed unless immaterial in amount or significance.

(B) The following management contracts or compensatory plans need not be filed:

(*1*) Ordinary purchase and sales agency agreements;

(*2*) Agreements with managers of stores in a chain organization or similar organization;

(*3*) Contracts providing for labor or salesmen's bonuses or payments to a class of security holders, as such;

(*4*) Any compensatory plan which is available to employees, officers or directors generally and which in operation provides for the same method of allocation of benefits between management and nonmanagement participants; and

(*5*) Any compensatory plan if the issuer is a wholly owned subsidiary of a reporting company and is filing a report on Form 10–KSB (§ 249.310b), or registering debt or non-voting preferred stock on Form S–2 (§ 239.12).

Instruction to Item 601(b)(10)

1. Only copies of the various remunerative plans need be filed. Each individual director's or executive officer's personal agreement under the plans need not be filed, unless they contain material provisions.

(11) *Statement re computation of per share earnings.* An explanation of the computation of per share earnings on both a primary and fully diluted basis unless the computation can be clearly determined from the registration statement or report.

(12) *No exhibit required.*

(13) *Annual report to security holders, Form 10–QSB (§ 249.308b) or quarterly report to security holders, if incorporated by reference in the filing.* Such reports, except for the parts which are expressly incorporated by reference in the filing are not deemed "filed" as part of the filing. If the financial statements in the report have been incorporated by reference in the filing, the accountant's certificate shall be manually signed in one copy. See rule 411(b) (§ 230.411(b) of this chapter).

(14) *Material foreign patents.* Each material foreign patent for an invention not covered by a United States patent.

(15) *Letter on unaudited interim financial information.* A letter, where applicable, from the independent accountant which acknowledges awareness of the use in a registration statement of a report on unaudited interim financial information. The letter is not considered a part of a registration statement prepared or certified by an accountant or a report prepared or certified by an accountant within the meaning of sections 7 and 11 of the Securities Act. Such letter may be filed with the registration statement, an amendment thereto, or a report on Form 10–QSB (§ 249.308b) which is incorporated by reference into the registration statement.

(16) *Letter on change in certifying accountant.* File the letter required by Item 304(a)(3).

(17) *Letter on director resignation.* Any letter from a former director which describes a disagreement with the small business issuer that led to the director's resignation or refusal to stand for re-election and which requests that the matter be disclosed.

(18) *Letter on change in accounting principles.* Unless previously filed, a letter from the issuer's accountant stating whether any change in accounting principles or practices followed by the issuer, or any change in the method of applying any such accounting principles or practices, which affected the financial statements being filed with the Commission in the report or which is expected to affect the financial statements of future fiscal years is to an alternative principle which in his judgment is preferable under the circumstances. No such letter need be filed when such change is made in response to a standard adopted by the Financial Accounting Standards Board that creates a new accounting principle, that expresses a preference for an accounting principle, or that rejects a specific accounting principle.

(19) *Previously unfiled documents.* (i) Any unfiled document, which was executed or in effect during the reporting period, if such document would have been required to be filed as an exhibit to a registration statement on Form 10SB (§ 249.210b).

(ii) Any amendment or change to a document which was previously filed.

(20) *No exhibit required.*

(21) *Other documents or statements* to security holders or any document incorporated by reference.

(22) *Subsidiaries of the small business issuer.* A list of all subsidiaries, the state or other jurisdiction of incorporation or organization of each, and the names under which such subsidiaries do business.

(23) *No exhibit required.*

(24) *Consents of experts and counsel.* (i) Securities Act filings. Dated and manually signed written consents or a reference in the index to the location of the consent.

(ii) Exchange Act reports. If required to file a consent for material incorporated by reference in a previously filed registration statement under the Securities Act, the dated and manually signed consent to the material incorporated by reference. The consents shall be dated and manually signed.

(25) *Power of attorney.* If a person signs a registration statement or report under a power of attorney, a manually signed copy of such power of attorney or if located elsewhere in the registration statement, a reference in the index to where it is located. In addition, if an officer signs a registration statement for the small business issuer by a power of attorney, a certified copy of a resolution of the board of directors authorizing such signature.

(26) *Statement of eligibility of trustee.* Form T–1 (§ 269.1 of this chapter) if an indenture is being qualified under the Trust Indenture Act, bound separately from the other exhibits.

(27) *Invitations for competitive bids.* If the registration statement covers securities that the small business issuer is offering at competitive bidding, any invitation for competitive bid that the small business issuer will send or give to any person shall be filed.

(28) *Additional exhibits.* Any additional exhibits if listed and described in the exhibit index.

(29) *Information from reports furnished to state insurance regulatory authorities.* (i) If reserves for unpaid property-casualty ("P/C") claims and claim adjustment expenses of the small business issuer, its unconsolidated subsidiaries and the proportionate share of the small business issuer and the other subsidiaries in the unpaid P/C claims and claim adjustment expenses of its 50%-or-less-owned equity investees, taken in the aggregate after small business issuer eliminations, exceed one-half of the common stockholders' equity of the small business issuer as of the beginning of the latest fiscal year the following information should be supplied.

(ii) The information included in schedules O and P of Annual Statements provided to state regulatory authorities by the small business issuer or its P/C insurance small business issuer affiliates for the latest year on a combined or consolidated basis as appropriate, separately for each of the following:

(A) The small business issuer;

(B) Its unconsolidated subsidiaries; and

(C) Fifty percent-or-less-owned equity investees of the small business issuer and its subsidiaries.

(iii) Small business issuers may omit the combined or consolidated schedules O and P of fifty percent-or-less-owned equity investees, if they file the same information with the Commission as companies in their own right, and if they state that fact and the name and ownership percentage of such companies.

(iv) If ending reserves in paragraphs (b)(29)(ii) (A) and (B) of this Item or the proportionate share of the small business issuer and its other subsidiaries in paragraph (b)(29)(ii)(C) of this item are less than 5% of the total ending reserves in paragraphs (b)(29)(ii) (A) and (B) of this Item, and the proportionate share of (C) of this item, small business issuers may omit that category and note that fact. If the amount of the reserves attributable to fifty percent-or-less-owned equity investees that file this information as companies in their own right exceeds 95% of the total paragraph (b)(29)(ii)(C) of this item small business issuers do not need to provide reserves, information for the other fifty percent-or-less-owned equity investees.

(v) Small business issuers do not need to include schedules O and P information if they are not required to file schedules O and P with insurance regulatory authorities. However, clearly note the nature and extent of any such exclusions in the Exhibit.

(vi) Companies whose fiscal year differs from the calendar year should present schedules O and P as of the end of the calendar year that falls within their fiscal year.

(vii) The nature and amount of the difference between reserves for claims and claim adjustment expenses reflected on schedules O and P and the total P/C statutory reserves for claims and disclose claim adjustment expenses as of the latest calendar year in a note to those schedules.

§ 228.701 (Item 701) Recent sales of unregistered securities.

Give the following information for all securities that the small business issuer sold within the past three years without registering the securities under the Securities Act.

(a) The date, title and amount of securities sold.

(b) Give the names of the principal underwriters, if any. If the small business issuer did not publicly offer any securities, identify the persons or class of persons to whom the small business issuer sold the securities.

(c) For securities sold for cash, the total offering price and the total underwriting discounts or commissions. For securities sold other than for cash, describe the transaction and the type and amount of consideration received by the small business issuer.

(d) The section of the Securities Act or the rule of the Commission under which the small business issuer claimed

exemption from registration and the facts relied upon to make the exemption available.

§ 228.702 (Item 702) Indemnification of directors and officers.

State whether any statute, charter provisions, by-laws, contract or other arrangements that insures or indemnifies a controlling person, director or officer of the small business issuer affects his or her liability in that capacity.

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S-K

2. The authority citation for part 229 continues to read as follows:

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77aa[25], 77aa[26], 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss, 78*l*, 78m, 78n, 78o, 78w, 80a–8, 80a–29, 80a–30, 80a–37, 80b–11, unless otherwise noted.

3. In § 229.801, paragraph (g) is added to read as follows:

§ 229.801 Securities Act industry guides.

* * * * *

(g) *Guide 7.* Description of Property by Issuers Engaged or To Be Engaged in Significant Mining Operations.

Note: The text of Guide 7 will not appear in the CFR.

Guide 7—Description of Property by Issuers Engaged or to be Engaged in Significant Mining Operations

(a) *Definitions.* The following definitions apply to registrants engaged or to be engaged in significant mining operations:

(1) *Reserve.* That part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.

Note: Reserves are customarily stated in terms of "ore" when dealing with metalliferous minerals; when other materials such as coal, oil, shale, tar, sands, limestone, etc. are involved, an appropriate term such as "recoverable coal" may be substituted.

(2) *Proven (measured) reserves.* Reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; grade and/or quality are computed from the results of detailed sampling and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth and mineral content of reserves are well-established.

(3) *Probable (indicated) reserves.* Reserves for which quantity and grade and/or quality are computed from information similar to that used for proven (measure) reserves, but the sites for inspection, sampling, and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven (measured) reserves, is high enough to assume continuity between points of observation.

(4) (i) *Exploration stage* includes all issuers engaged in the search for mineral deposits (reserves) which are not in either the development or production stage.

(ii) *Development stage* includes all issuers engaged in the preparation of an established commercially minable deposit (reserves) for its extraction which are not in the production stage.

(iii) *Production stage* includes all issuers engaged in the exploitation of a mineral deposit (reserve).

Instruction to paragraph (a)

1. Mining companies in the exploration stage should not refer to themselves as development stage companies in the financial statements, even though such companies should comply with FASB Statement No. 7, if applicable.

(b) *Mining operations disclosure.* Furnish the following information as to each of the mines, plants and other significant properties owned or operated, or presently intended to be owned or operated, by the registrant:

(1) The location and means of access to the property;

(2) A brief description of the title, claim, lease or option under which the registrant and its subsidiaries have or will have the right to hold or operate the property, indicating any conditions which the registrant must meet in order to obtain or retain the property. If held by leases or options, the expiration dates of such leases or options should be stated. Appropriate maps may be used to portray the locations of significant properties;

(3) A brief history of previous operations, including the names of previous operators, insofar as known;

(4)(i) A brief description of the present condition of the property, the work completed by the registrant on the property, the registrant's proposed program of exploration and development, and the current state of exploration and/or development of the property. Mines should be identified as either open-pit or underground. If the property is without known reserves and the proposed program is exploratory in nature, a statement to that effect shall be made;

(ii) The age, details as to modernization and physical condition of the plant and equipment, including subsurface improvements and equipment. Further, the total cost for each property and its associated plant and equipment should be stated. The source of power utilized with respect to each property should also be disclosed.

(5) A brief description of the rock formations and mineralization of existing or potential economic significance on the property, including the identity of the principal metallic or other constituents insofar as known. If proven (measured) or probable (indicated) reserves have been established, state (i) the estimated tonnages and grades (or quality, where appropriate) of such classes of reserves, and (ii) the name of the person making the estimates and the nature of his relationship to the registrant.

Instructions to paragraph (b)(5)

1. It should be stated whether the reserve estimate is of in-place material or of recoverable material. Any in-place estimate should be qualified to show the anticipated losses resulting from mining methods and beneficiation or preparation.

2. The summation of proven (measured) and probable (indicated) ore reserves is acceptable if the difference in degree of assurance between the two classes of reserves cannot be readily defined.

3. Estimates other than proved (measured) or probable (indicated) reserves, and any estimated values of such reserves shall not be disclosed unless such information is required to be disclosed by foreign or state law; provided, however, that where such estimates previously have been provided to a person (or any of its affiliates) that is offering to acquire, merge, or consolidate with, the registrant or otherwise to acquire the registrant's securities, such estimates may be included.

(6) If technical terms relating to geology, mining or related matters whose definition cannot readily be found in conventional dictionaries (as opposed to technical dictionaries or glossaries) are used, an appropriate glossary should be included in this report.

(7) Detailed geographic maps and reports, feasibility studies and other highly technical data should not be included in the report but should be, to the degree appropriate and necessary for the Commission's understanding of the registrant's presentation of business and property matters, furnished as supplemental information.

(c) *Supplemental information.* (1) If an estimate of proven (measured) or probable (indicated) reserves is set forth in the report, furnish:

(i) Maps drawn to scale showing any mine workings and the outlines of the reserve blocks involved together with the pertinent sample-assay thereon.

(ii) All pertinent drill data and related maps.

(iii) The calculations whereby the basic sample-assay or drill data were translated into the estimates made of the grade and tonnage of reserves in each block and in the complete reserve estimate.

Instructions to paragraph (c)(1).

1. Maps and drawings submitted to the staff should include:

(a) A legend or explanation showing, by means of pattern or symbol, every pattern or symbol used on the map or drawing; the use of the symbols used by the U.S. Geological Survey is encouraged;

(b) A graphical bar scale should be included; additional representations of scale such as "one inch equals one mile" may be utilized provided the original scale of the map has not been altered;

(c) A north arrow on the maps;

(d) An index map showing where the property is situated in relationship to the state or province, etc., in which it was located;

(e) A title of the map or drawing and the date on which it was drawn;

(f) In the event interpretive data is submitted in conjunction with any map, the identity of the geologist or engineer that prepared such data; and

(g) Any drawing should be simple enough or of sufficiently large scale to clearly show all features on the drawing.

(2) Furnish a complete copy of every material engineering, geological or metallurgical report concerning the registrant's property, including governmental reports, which are known and available to the registrant. Every such report should include the name of its author and the date of its preparation, if known to the registrant.

Instruction to paragraph (c)(2).

1. Any of the above-required reports as to which the staff has access need not be submitted. In this regard, issuers should consult with the staff prior to filing the report. Any reports not submitted should be identified in a list furnished to the staff. This list should also identify any known governmental reports concerning the registrant's property.

(3) Furnish copies of all documents such as title documents, operating permits and easements needed to support representations made in the report.

(4) In § 229.802, paragraphs (e) and (f) are reserved and paragraph (g) is added to read as follows:

§ 229.802 Exchange Act industry guides.

* * * * *

(e) [Reserved].

(f) [Reserved].

(g) *Guide 7.* Description of Property by Issuers Engaged or To Be Engaged in Significant Mining Operations.

Note: The text of Guide 7 will not appear in the CFR. The text of Guide 7 is identical to § 229.801(g) of this chapter and is not reprinted here.

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

5. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78*l*, 78m, 78n, 78o, 78w, 79t, and 80a–37, unless otherwise noted.

§ 230.175 [Amended]

6. By amending paragraph (b)(1)(i) of § 230.175 after the words "Securities Act of 1933" add the words ", offering statement under Regulation A" and in paragraph (b)(2)(i) after the parenthetical "(§ 229.303 of this chapter)" add the words "or regulation S–B (§ 228.303 of this chapter)".

7. By revising Regulation A—Conditional Small Issues Exemption, §§ 230.251–230.262, to read as follows:

Regulation A—Conditional Small Issues Exemption

Sec.

230.251 Scope of Exemption.
230.252 Offering Statement.
230.253 Offering Circular.
230.254 Solicitation of Interest Document for Use Prior to an Offering Statement.
230.255 Preliminary Offering Circulars.
230.256 Filing of Sales Material.
230.257 Reports of Sales and Use of Proceeds.
230.258 Suspension of the Exemption.
230.259 Withdrawal or Abandonment of Offering Statements.
230.260 Insignificant Deviations from a Term, Condition or Requirement of Regulation A.
230.261 Definitions.
230.262 Disqualification Provisions.

Authority: Secs. 230.251 to 230.262 issued under 15 U.S.C. 77c, 77s.

Regulation A—Conditional Small Issues Exemption

§ 230.251 Scope of exemption.

A public offer or sale of securities that meets the following terms and conditions shall be exempt under section 3(b) from the registration requirements of the Securities Act of 1933 (the "Securities Act"):

(a) *Issuer.* The issuer of the securities:

(1) Is an entity organized under the laws of the United States, any State, Territory or possession thereof, or the District of Columbia, with its principal place of business in the United States;

(2) Is not subject to section 13 or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a *et seq.*) immediately before the offering;

(3) Is not a blank check company within the meaning of section 7(b) of the Securities Act;

(4) Is not a partnership or other entity organized primarily for the purpose of investing or reinvesting monies in securities, properties, commodities, business opportunities or similar media of speculative opportunity;

(5) Is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*);

(6) Is not issuing fractional undivided interests in oil or gas rights as defined in § 230.300, or a similar interest in other mineral rights; and

(7) Is not disqualified because of § 230.262.

(b) *Aggregate offering price.* The sum of all cash and other consideration to be received for the securities ("aggregate offering price") in any continuous 12-month period does not exceed $5,000,000, including no more than $1,500,000 offered by all selling security holders. No affiliate resales are permitted if the issuer has not had net income from continuing operations in at least one of its last two fiscal years.

Note: Where a mixture of cash and non-cash consideration is to be received, the aggregate offering price shall be based on the price at which the securities are offered for cash. Any portion of the aggregate offering price attributable to cash received in a foreign currency shall be translated into United States currency at a currency exchange rate in effect on or at a reasonable time prior to the date of the sale of the securities. If securities are not offered for cash, the aggregate offering price shall be based on the value of the consideration as established by bona fide sales of that consideration made within a reasonable time, or, in the absence of sales, on the fair value as determined by an accepted standard. Valuations of non-cash consideration must be reasonable at the time made.

(c) *Integration with other offerings.* Offers and sales made in reliance on this Regulation A will not be integrated with:

(1) Prior offers or sales of securities; or

(2) Subsequent offers or sales of securities that are:

(i) Registered under the Securities Act;

(ii) Made in reliance on § 230.701;

(iii) Made pursuant to an employee benefit plan;

(iv) Made in reliance on Regulation S (§ 230.901–904); or

(v) Made more than six months after the completion of the Regulation A offering.

Note: If the issuer offers or sells securities for which the safe harbor rules are unavailable, such offers and sales still may not be integrated with the Regulation A offering, depending on the particular facts and circumstances. See Securities Act Release No. 4552 (November 6, 1962) (27 FR 11316).

(d) *Offering conditions*—(1) *Offers.* (i) Except as allowed by § 230.254, no offer of securities shall be made unless a Form 1–A offering statement has been filed with the Commission. No money or other consideration sent in response to a notice allowed by § 230.254 shall be accepted.

(ii) After the Form 1–A offering statement has been filed:

(A) Oral offers may be made;

(B) Written offers under § 230.255 may be made;

(C) Printed advertisements may be published or radio or television broadcasts made, if they state from whom a Preliminary Offering Circular or Final Offering Circular may be obtained, and contain no more than the following information:

(*1*) The name of the issuer of the security;

(*2*) The title of the security, the amount being offered and the per unit offering price to the public;

(*3*) The general type of the issuer's business; and

(*4*) A brief statement as to the general character and location of its property.

(iii) After the Form 1–A offering statement has been qualified, other written offers may be made, but only if accompanied with or preceded by a Final Offering Circular.

(2) *Sales.* (i) No sale of securities shall be made until:

(A) The Form 1–A offering statement has been qualified;

(B) A Preliminary Offering Circular or Final Offering Circular is furnished to the prospective purchaser at least 48 hours prior to the mailing of the confirmation of sale to that person; and

(C) A Final Offering Circular is delivered to the purchaser with the confirmation of sale, unless it has been delivered to that person at an earlier time.

(ii) Sales by a dealer (including an underwriter no longer acting in that capacity for the security involved in such transaction) that take place within 90 days after the qualification of the Regulation A offering statement may be made only if the dealer delivers a copy of the current offering circular to the purchaser before or with the confirmation of sale. The issuer or underwriter of the offering shall provide requesting dealers with reasonable quantities of the offering circular for this purpose.

(3) *Continuous or delayed offerings.* Continuous or delayed offerings may be made under this regulation A if permitted by § 230.415.

§ 230.252 Offering Statement.

(a) *Documents to be included.* The offering statement consists of the facing sheet of Form 1–A (§ 239.90 of this chapter), the contents required by the form and any other material information necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.

(b) *Paper, printing, language and pagination.* The requirements for offering statements are the same as those specified in § 230.403 for registration statements under the Act.

(c) *Confidential treatment.* A request for confidential treatment may be made under § 230.406 for information required to be filed, and § 200.83 of this chapter for information not required to be filed.

(d) *Signatures.* The issuer, its Chief Executive Officer, Chief Financial Officer, a majority of the members of its board of directors or other governing body, and each selling security holder shall sign the offering statement. If a signature is by a person on behalf of any other person, evidence of authority to sign shall be filed, except where an executive officer signs for the issuer. If the issuer is a limited partnership, a majority of the board of directors of any corporate general partner also shall sign.

(e) *Number of copies and where to file.* Seven copies of the offering statement, at least one of which is manually signed, shall be filed either with the Commission's Office for the region in which the issuer's principal business operations are conducted or are proposed to be conducted or with the Commission's main office in Washington, DC. Since no filing may be made with the Philadelphia Regional Office, filings within the jurisdiction of that office may be made either at the Atlanta or New York Regional Office or in Washington, DC.

(f) *Fee.* There is a filing fee of $500 which shall accompany the initial filing of the offering statement. There is no fee for amendments.

(g) *Qualification.* (1) If there is no delaying notation as permitted by paragraph (g)(2) of this section or suspension proceeding under § 230.258, an offering statement is qualified without Commission action on the 20th calendar day after its filing.

(2) An offering statement containing the following notation can be qualified only by order of the Commission, unless such notation is removed prior to Commission action as described in paragraph (g)(3) of this section:

This offering statement shall only be qualified upon order of the Commission, unless a subsequent amendment is filed indicating the intention to become qualified by operation of the terms of Regulation A.

(3) The delaying notation specified in paragraph (g)(2) of this section can be removed only by an amendment to the offering statement that contains the following language:

This offering statement shall become qualified on the 20th calendar day following the filing of this amendment.

(h) *Amendments.* If any information in the offering statement is amended, an amendment, signed in the same manner as the initial filing, shall be filed. Seven copies of every amendment shall be filed with the Commission's Office that accepted the initial filing. Subsequent amendments to an offering shall recommence the time period for qualification.

§ 230.253 Offering circular.

(a) *Contents.* An offering circular shall include the narrative and financial information required by Form 1–A.

(b) *Presentation of information.* Information in the offering circular shall be presented in a clear, concise and understandable manner and in a type size that is easily readable. Repetition of information should be avoided; cross-referencing of information within the document is permitted.

(c) *Date.* An offering circular shall be dated approximately as of the date of the qualification of the offering statement of which it is a part.

(d) *Cover page legend.* The cover page of every offering circular shall display the following statement in capital letters printed in boldfaced type at least as large as that used generally in the body of such offering circular:

The United States Securities and Exchange Commission does not pass upon the merits of or give its approval to any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering circular or other selling literature. These securities are offered pursuant to an exemption from registration with the Commission; however, the Commission has not made an independent determination that the securities offered hereunder are exempt from registration.

(e) *Revisions.* (1) An offering circular shall be revised during the course of an offering whenever the information it contains has become false or misleading in light of existing circumstances, material developments have occurred, or there has been a fundamental change in the information initially presented.

(2) An offering circular for a continuous offering shall be updated to include, among other things, updated financial statements, 12 months after the date the offering statement was qualified.

(3) Every revised or updated offering circular shall be filed as an amendment to the offering statement and requalified in accordance with § 230.252.

230.254 Solicitation of interest document for use prior to an offering statement.

(a) An issuer may publish or deliver to prospective purchasers a written document to determine whether there is any interest in a contemplated securities offering. Following publication or delivery, oral communications with prospective investors are permitted. The written document and oral communications are subject to the antifraud provisions of the federal securities laws, and neither may be the basis to solicit or receive money, or any commitment, binding or otherwise, from any prospective investor.

(b) Any written document under this section shall state:

(1) that no money or other consideration sent in response will be accepted; and

(2) that no sales of the securities will be made or commitment to purchase will be accepted until delivery of an offering circular that will include complete information about the issuer and the offering.

(c) Any written document under this section may include a coupon, returnable to the issuer indicating interest in a potential offering, revealing the name, address and telephone number of the prospective investor.

(d) On or before the date of its first use, the issuer shall file a copy of any written document under this section to the Commission's Regional Office for the region in which the issuer's principal business operations are conducted or are proposed to be conducted or with the Commission's main office in Washington, DC. The document shall either contain or be accompanied by the name and telephone number of a person able to answer questions about the document.

(e) No sale may be made until qualification of the offering statement and in no event may sales be made until 20 calendar days after the publication or delivery of the document.

(f) For purposes of this section, no radio or television broadcast is permitted.

§ 230.255 Preliminary offering circulars.

(a) Prior to qualification of the required offering statement, but after its filing, a written offer of securities may be made if it meets the following requirements:

(1) The outside front cover page of the material bears the caption "Preliminary Offering Circular," the date of issuance, and the following statement, which shall run along the left hand margin of the page and be printed perpendicular to the text, in boldfaced type at least as large as that used generally in the body of such offering circular:

An offering statement pursuant to Regulation A relating to these securities has been filed with the _____ Office of the Securities and Exchange Commission.

Information contained in this Preliminary Offering Circular is subject to completion or amendment. These securities may not be sold nor may offers to buy be accepted prior to the time an offering circular which is not designated as a Preliminary Offering Circular is delivered and the offering statement filed with the Commission becomes qualified. This Preliminary Offering Circular shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sales of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the laws of any such state.

(2) The Preliminary Offering Circular contains substantially the information required in an offering circular by Form 1–A (§ 239.90 of this chapter), except that information with respect to offering price, underwriting discounts or commissions, discounts or commissions to dealers, amount of proceeds, conversion rates, call prices, or other matters dependent upon the offering price may be omitted. The outside front cover page of the Preliminary Offering Circular shall include a bona fide estimate of the range of the maximum offering price and maximum number of shares or other units of securities to be offered or a bona fide estimate of the principal amount of debt securities to be offered.

(3) The material is filed as a part of the offering statement.

(b) If a Preliminary Offering Circular is inaccurate or inadequate in any material respect, a revised Preliminary Offering Circular or a complete Offering Circular shall be furnished to all persons to whom securities are to be sold at least 48 hours prior to the mailing of any confirmation of sale to such persons, or shall be sent to such persons under such circumstances that it would normally be received by them 48 hours prior to receipt of confirmation of the sale.

§ 230.256 Filing of sales material.

Seven copies of any advertisement or written communication, or the script of any radio or television broadcast, shall be filed with the Office of the Commission where the offering statement was initially filed when the material is first published or delivered.

§ 230.257 Reports of sales and use of proceeds.

The issuer and/or each selling security holder shall file seven copies of a report concerning sales and use of proceeds on Form 2–A (§ 239.91 of this chapter), or other form prescribed by the Commission, with the Office of the Commission where the offering statement was initially filed. This report shall be filed at the following times:

(a) Every six months after the qualification of the offering statement or any amendment until substantially all the proceeds have been applied; and

(b) Within 30 calendar days after the termination, completion or final sale of securities in the offering, or the application of the proceeds from the offering, whichever is the latest event. This report should be labeled the final report. For purposes of this section, the temporary investment of proceeds pending final application shall not constitute application of the proceeds.

§ 230.258 Suspension of the exemption.

(a) The Commission may at any time enter an order temporarily suspending a Regulation A exemption if it has reason to believe that:

(1) No exemption is available or any of the terms, conditions or requirements of the Regulation have not been complied with, including failures to provide the Commission a copy of the document under § 230.254, to file any sales material as required by § 230.256 or report as required by § 230.257;

(2) The offering statement or any sales material contains any untrue statement of a material fact or omits to state a material fact necessary in order to make the statements made, in light of the circumstances under which they are made, not misleading;

(3) The offering is being made or would be made in violation of section 17 of the Securities Act;

(4) An event has occurred after the filing of the offering statement which would have rendered the exemption hereunder unavailable if it had occurred prior to such filing;

(5) Any person specified in paragraph (a) of § 230.262 has been indicted for

any crime or offense of the character specified in paragraph (a)(3) of § 230.262, or any proceeding has been initiated for the purpose of enjoining any such person from engaging in or continuing any conduct or practice of the character specified in paragraph (a)(4) of § 230.262;

(6) Any person specified in paragraph (b) of § 230.262 has been indicted for any crime or offense of the character specified in paragraph (b)(1) of § 230.262, or any proceeding has been initiated for the purpose of enjoining any such person from engaging in or continuing any conduct or practice of the character specified in paragraph (b)(2) of § 230.262; or

(7) The issuer or any promoter, officer, director or underwriter has failed to cooperate, or has obstructed or refused to permit the making of an investigation by the Commission in connection with any offering made or proposed to be made in reliance on regulation A.

(b) Upon the entry of an order under paragraph (a) of this section, the Commission will promptly give notice to the issuer, any underwriter and any selling security holder:

(1) That such order has been entered, together with a brief statement of the reasons for the entry of the order; and

(2) That the Commission, upon receipt of a written request within 30 calendar days after the entry of the order, will within 20 calendar days after receiving the request, order a hearing at a place to be designated by the Commission.

(c) If no hearing is requested and none is ordered by the Commission, an order entered under paragraph (a) of this section shall become permanent on the 30th calendar day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission. Where a hearing is requested or is ordered by the Commission, the Commission will, after notice of and opportunity for such hearing, either vacate the order or enter an order permanently suspending the exemption.

(d) The Commission may, at any time after notice of and opportunity for hearing, enter an order permanently suspending the exemption for any reason upon which it could have entered a temporary suspension order under paragraph (a) of this section. Any such order shall remain in effect until vacated by the Commission.

(e) All notices required by this section shall be given by personal service, registered or certified mail to the addresses given by the issuer, any underwriter and any selling security holder in the offering statement.

§ 230.259 Withdrawal or abandonment of offering statements.

(a) If none of the securities which are the subject of an offering statement have been sold and such offering statement is not the subject of a proceeding under § 230.258, the offering statement may be withdrawn with the Commission's consent. The application for withdrawal shall state the reason the offering statement is to be withdrawn, to be signed by an authorized representative of the issuer and to be directed to the Commission's Office where the offering statement was filed.

(b) When an offering statement has been on file with the Commission for nine months without amendment and has not become qualified, the Commission may, in its discretion, proceed in the following manner to determine whether such offering statement has been abandoned by the issuer. If the offering statement has been amended, the 9-month period shall be computed from the date of the latest amendment.

(1) Notice will be sent to the issuer, and to any counsel for the issuer named in the offering statement, by registered or certified mail, return receipt requested, addressed to the most recent addresses for the issuer and issuer's counsel as reflected in the offering statement. Such notice will inform the issuer and issuer's counsel that the offering statement or amendments thereto is out of date and must be either amended to comply with applicable requirements of regulation A or be withdrawn within 30 calendar days after the notice.

(2) If the issuer or issuer's counsel fail to respond to such notice by filing a substantive amendment or withdrawing the offering statement or do not furnish a satisfactory explanation as to why the issuer has not done so within 30 calendar days, the Commission may declare the offering statement abandoned.

§ 230.260 Insignificant deviations from a term, condition or requirement of regulation A.

(a) A failure to comply with a term, condition or requirement of regulation A will not result in the loss of the exemption from the requirements of section 5 of the Securities Act for any offer or sale to a particular individual or entity, if the person relying on the exemption establishes:

(1) the failure to comply did not pertain to a term, condition or requirement directly intended to protect that particular individual or entity;

(2) the failure to comply was insignificant with respect to the offering as a whole, provided that any failure to comply with paragraphs (a), (b), (d) (1) and (3) of § 230.251 shall be deemed to be significant to the offering as a whole; and

(3) a good faith and reasonable attempt was made to comply with all applicable terms, conditions and requirements of regulation A.

(b) A transaction made in reliance upon regulation A shall comply with all applicable terms, conditions and requirements of the regulation. Where an exemption is established only through reliance upon paragraph (a) of this section, the failure to comply shall nonetheless be actionable by the Commission under section 20 of the Act.

(c) This provision provides no relief or protection from a proceeding under § 230.258.

§ 230.261 Definitions.

As used in this regulation A, all terms have the same meanings as in § 230.405, except that all references to *registrant* in those definitions shall refer to the issuer of the securities to be offered and sold under regulation A. In addition, these terms have the following meanings:

(a) *Final offering circular.* The current offering circular contained in a qualified offering statement;

(b) *Preliminary offering circular.* The offering circular described in § 230.255(a).

§ 230.262 Disqualification provisions.

Unless, upon a showing of good cause and without prejudice to any other action by the Commission, the Commission determines that it is not necessary under the circumstances that the exemption provided by this regulation A be denied, the exemption shall not be available for the offer or sale of securities, if:

(a) The issuer, any of its predecessors or any affiliated issuer:

(1) Has filed a registration statement which is the subject of any pending proceeding or examination under section 8 of the Act, or has been the subject of any refusal order or stop order thereunder within 5 years prior to the filing of the offering statement required by § 230.252;

(2) Is subject to any pending proceeding under § 230.258 or any similar section adopted under section 3(b) of the Securities Act, or to an order entered thereunder within 5 years prior to the filing of such offering statement;

(3) Has been convicted within 5 years prior to the filing of such offering statement of any felony or misdemeanor in connection with the purchase or sale of any security or involving the making of any false filing with the Commission;

(4) Is subject to any order, judgment, or decree of any court of competent jurisdiction temporarily or preliminarily restraining or enjoining, or is subject to any order, judgment or decree of any court of competent jurisdiction, entered within 5 years prior to the filing of such offering statement, permanently restraining or enjoining, such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security or involving the making of any false filing with the Commission; or

(5) Is subject to a United States Postal Service false representation order entered under 39 U.S.C. 3005 within 5 years prior to the filing of the offering statement, or is subject to a temporary restraining order or preliminary injunction entered under 39 U.S.C. 3007 with respect to conduct alleged to have violated 39 U.S.C. 3005. The entry of an order, judgment or decree against any affiliated entity before the affiliation with the issuer arose, if the affiliated entity is not in control of the issuer and if the affiliated entity and the issuer are not under the common control of a third party who was in control of the affiliated entity at the time of such entry does not come within the purview of this paragraph (a) of this section.

(b) Any director, officer or general partner of the issuer, beneficial owner of 10 percent or more of any class of its equity securities, any promoter of the issuer presently connected with it in any capacity, any underwriter of the securities to be offered, or any partner, director or officer of any such underwriter:

(1) Has been convicted within 10 years prior to the filing of the offering statement required by § 230.252 of any felony or misdemeanor in connection with the purchase or sale of any security, involving the making of a false filing with the Commission, or arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, or investment adviser;

(2) Is subject to any order, judgment, or decree of any court of competent jurisdiction temporarily or preliminarily enjoining or restraining, or is subject to any order, judgment, or decree of any court of competent jurisdiction, entered within 5 years prior to the filing of such offering statement, permanently enjoining or restraining such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security, involving the making of a false filing with the Commission, or arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, or investment adviser;

(3) Is subject to an order of the Commission entered pursuant to section 15(b), 15B(a), or 15B(c) of the Exchange Act, or section 203(e) or (f) of the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*);

(4) Is suspended or expelled from membership in, or suspended or barred from association with a member of, a national securities exchange registered under section 6 of the Exchange Act or a national securities association registered under section 15A of the Exchange Act for any act or omission to act constituting conduct inconsistent with just and equitable principles of trade; or

(5) Is subject to a United States Postal Service false representation order entered under 39 U.S.C. 3005 within 5 years prior to the filing of the offering statement required by § 230.252, or is subject to a restraining order or preliminary injunction entered under 39 U.S.C. 3007 with respect to conduct alleged to have violated 39 U.S.C. 3005.

(c) Any underwriter of such securities was an underwriter or was named as an underwriter of any securities:

(1) Covered by any registration statement which is the subject of any pending proceeding or examination under section 8 of the Act, or is the subject of any refusal order or stop order entered thereunder within 5 years prior to the filing of the offering statement required by § 230.252; or

(2) Covered by any filing which is subject to any pending proceeding under § 230.258 or any similar rule adopted under section 3(b) of the Securities Act, or to an order entered thereunder within 5 years prior to the filing of such offering statement.

8. Section 230.405 is amended by adding the following definition of *small business issuer* in the appropriate alphabetical order to read as follows:

§ 230.405 Definitions of terms.

* * * * *

Small business issuer. The term *small business issuer* means an entity that meets the following criteria:

(1) Had revenues of less than $15,000,000 during its last fiscal year;

(2) Is not a foreign private issuer or a foreign government;

(3) Is not an investment company; and

(4) Is not a wholly owned subsidiary of a non-small business issuer.

* * * * *

§ 230.502 [Amended]

9. In § 230.502 by amending the note to paragraph (b) by removing the last sentence and in the flush text of paragraph (d) by removing the words "and § 230.504(b)(2)(ii) require" and adding the word "requires".

10. By revising paragraphs (b) (1) and (2), and Notes 1 and 2 to paragraph (b)(2) and removing paragraph (b)(2)(ii) of § 230.504 to read as follows:

§ 230.504 Exemption for limited offerings and sales of securities not exceeding $1,000,000.

* * * * *

(b) *Conditions to be met.* (1) To qualify for exemption under this § 230.504, offers and sales must satisfy the terms and conditions of §§ 230.501 and 230.502, except that the provisions of § 230.502(c) and (d) shall not apply to offers and sales made under this § 230.504.

(2) The aggregate offering price for an offering of securities under this § 230.504, as defined in § 230.501(c), shall not exceed $1,000,000, less the aggregate offering price for all securities sold within the twelve months before the start of and during the offering of securities under this § 230.504, in reliance on any exemption under section 3(b), or in violation of section 5(a) of the Securities Act.

Note 1: The calculation of the aggregate offering price is illustrated as follows:

If an issuer sold $900,000 on June 1, 1987 under this § 230.504 and an additional $4,100,000 on December 1, 1987 under § 230.505, the issuer could not sell any of its securities under this § 230.504 until December 1, 1988. Until then the issuer must count the December 1, 1987 sale towards the $1,000,000 limit within the preceding twelve months.

Note 2: If a transaction under § 230.504 fails to meet the limitation on the aggregate offering price, it does not affect the availability of this § 230.504 for the other transactions considered in applying such limitation. For example, if an issuer sold $1,000,000 worth of its securities on January 1, 1988 under this § 230.504 and an additional $500,000 worth on July 1, 1988, this § 230.504 would not be available for the later sale, but would still be applicable to the January 1, 1988 sale.

* * * * *

11. By revising paragraph (a)(2) of § 230.508 to read as follows:

§ 230.508 Insignificant deviations from a term, condition or requirement of regulation D.

(a) * * *

(2) The failure to comply was insignificant with respect to the offering as a whole, provided that any failure to comply with paragraph (c) of § 230.502, paragraph (b)(2) of § 230.504, paragraphs (b)(2)(i) and (ii) of § 230.505 and paragraph (b)(2)(i) of § 230.506 shall be

deemed to be significant to the offering as a whole; and

* * * * *

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

12. The authority citation for part 239 continues to read as follows:

Authority: 15 U.S.C. 77a, *et seq.*, unless otherwise noted.

§§ 239.28, 239.92, 239.93, 239.94, 239.95 and 239.96 [Removed]

13. By removing §§ 239.28, 239.92, 239.93, 239.94, 239.95, and 239.96.

14. Section 239.29 is added to read as follows:

§ 239.29 Form SB–1, optional form for the registration of securities to be sold to the public by small business issuers.

Small business issuers defined in rule 405 (17 CFR 230.405 of this chapter) may use this form to register securities to be sold for cash.

Note: The Text and Instructions of Form SB–1 will not appear in the Code of Federal Regulations.

U.S. Securities and Exchange Commission, Washington, DC 20549

Form SB–1

Registration Statement Under the Securities Act of 1933

(Amendment No.)

(Name of small business issuer in its charter)

(State or jurisdiction of incorporation or organization)

(Primary Standard Industrial Classification Code Number)

(I.R.S. Employer Identification No.)

(Address and telephone number of principal executive offices)

(Address of principal place of business or intended principal place of business)

(Name, address and telephone number of agent for service)

Approximate date of proposed sale to the public _____

Calculation of Registration Fee

Title of each class of securities to be registered	Dollar amount to be registered	Proposed maximum offering price per unit	Proposed maximum aggregate offering price	Amount of registration fee

The following delaying amendment is optional, but see rule . before omitting it: The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to said section 8(a), may determine.

General Instructions

A. Use of Form and Place of Filing

1. A "small business issuer," defined in rule 405 of the Securities Act of 1933 (the "Securities Act") may use this form to register securities to be sold for cash.

2. If the small business issuer is not a reporting company, it should file the registration statement in the regional office that is closest to its principal place of business or the Washington DC office. However, no filing may be made in the Philadelphia regional office; small business issuers in that region should file in the Atlanta, New York or Washington, DC offices.

3. If the small business issuer is a reporting company or a holding company of a bank (see the definition of "bank" in section 12(i) of the Exchange Act), it should file the registration statement in the Commission's Washington DC headquarters.

4. Post-effective amendments should be filed with the office that declare the registration statement effective.

5. The Commission will attempt to process the registration statement at the place of filing. However, due to workload or other special considerations, the Commission may refer processing to a different office.

B. General Requirements

1. Regulation S–B (17 CFR 228.10 *et seq.*) contains the disclosure requirements for Form SB–1. In preparing a registration statement on this Form, reference also should be made to the General Rules and Regulations under the Securities Act, particularly regulation C which sets forth requirements for the preparation and filing of a registration statement such as paper type and size.

2. Issuers registering securities for the first time should be aware of Form SR and rule 463 under the Securities Act concerning sales of registered securities and the use of proceeds. First time issuers also should be aware of Exchange Act rule 15c2–8 (240.15c2–8) which requires broker dealers to deliver a prospectus 48 hours before a sale of securities can be confirmed.

3. Issuers engaged in real estate, oil and gas or mining activities should consult the Industry Guides in Item 801 of Regulation S–K (17 CFR 229.801). Real estate companies also should refer to Item 13 (Investment Policies of Registrant), Item 14 (Description of Real Estate), and Item 15 (Operating Data) of Form S–11 (17 CFR 239.18).

Part I—Information Required in Prospectus

Item 1. Front of Registration Statement and Outside Front Cover of Prospectus.

Furnish the information required by Item 501 of regulation S–B.

Item 2. Inside Front and Outside Back Cover Pages of Prospectus.

Furnish the information required by Item 502 of regulation S–B.

Item 3. Summary Information and Risk Factors.

Furnish the information required by Item 503 of regulation S–B.

Item 4. Use of Proceeds.

Furnish the information required by Item 504 of regulation S–B.

Item 5. Determination of Offering Price.

Furnish the information required by Item 505 of regulation S–B.

Item 6. Dilution.

Furnish the information required by Item 506 of regulation S–B.

Item 7. Selling Security Holders.

Furnish the information required by Item 507 of regulation S–B.

Item 8. Plan of Distribution.

Furnish the information required by Item 508 of regulation S–B.

Item 9. Legal Proceedings.

Furnish the information required by Item 103 of regulation S–B.

Item 10. Directors, Executive Officers, Promoters and Control Persons.

Furnish the information required by Item 401 of regulation S–B.

Item 11. Security Ownership of Certain Beneficial Owners and Management.

Furnish the information required by Item 403 of regulation S–B.

Item 12. Description of Securities.

Furnish the information required by Item 202 of regulation S–B.

Item 13. Interest of Named Experts and Counsel.

Furnish the information required by Item 509 of regulation S–B.

Item 14. Disclosure of Commission position on Indemnification for Securities Act Liabilities.

Furnish the information required by Item 510 of regulation S–B.

Item 15. Organization within Last Five Years.

Furnish the information required by Item 404 of regulation S–B.

Item 16. Description of Business.

Furnish the information required by Item 101 of regulation S–B.

Item 17. Management's Discussion and Analysis or Plan of Operation.

Furnish the information required by Item 303 of regulation S–B.

Item 18. Description of Property.

Furnish the information required by Item 102 of regulation S–B.

Item 19. Certain Relationships and Related Transactions.

Furnish the information required by Item 404 of regulation S–B.

Item 20. Market for Common Stock and Related Stockholder Matters.

Furnish the information required by Item 201 of regulation S–B.

Item 21. Executive Compensation.

Furnish the information required by Item 402 of regulation S–B.

Item 22. Financial Statements.

Furnish the information required by Item 310 of regulation S–B.

Item 23. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure.

Furnish the information required by Item 304 of regulation S–B.

Part II—Information Not Required in Prospectus

Item 24. Indemnification of Directors and Officers.

Furnish the information required by Item 702 of regulation S–B.

Item 25. Other Expenses of Issuance and Distribution.

Furnish the information required by Item 511 of regulation S–B.

Item 26. Recent Sales of Unregistered Securities.

Furnish the information required by Item 701 of regulation S–B.

Item 27. Exhibits.

Furnish the exhibits required by Item 601 of regulation S–B.

Item 28. Undertakings.

Furnish the undertakings required by Item 512 of regulation S–B.

Signatures

In accordance with the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets all of the requirements of filing on Form SB–1 and authorized this registration statement to be signed on its behalf by the undersigned, in the City of_____, State of_____, on _____, 19___.

(Registrant) _____

By (Signature and Title)_____

In accordance with the requirements of the Securities Act of 1933, this registration statement was signed by the following persons in the capacities and on the dates stated.

(Signature) _____

(Title)_____

(Date)_____

Instructions for Signatures

(1) Who must sign: The small business issuer, its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer and at least the majority of the board of directors or persons performing similar functions. If the issuer is a limited partnership then the general partner and a majority of its board of directors if a corporation.

(2) Beneath each signature, type or print the name of each signatory. Any person who occupies more than one of the specified positions shall indicate each capacity in which he or she signs the registration statement. See rule 402 of regulation C concerning manual signatures and Item 601 of regulation S–B concerning signatures by powers of attorney.

§ 239.12 [Amended]

15. Form S–2 (§ 239.12) is amended by adding paragraph C to General Instruction II to read as follows:

Note: The text of Form S–2 does not appear in the Code of Federal Regulations.

Form S–2

General Instruction

* * * * *

II. Application of General Rules and Regulations

* * * * *

C. A "small business issuer," defined in rule 405 (17 CFR 230.405), that is eligible to use Form S–2, shall refer to the disclosure items in regulation S–B (17 CFR 228.10 *et seq.*) and not regulation S–K. For example, while Item 1 of Form S–2 requires the information required by Item 501 of regulation S–K, a small business issuer shall provide the information in Item 501 of regulation S–B. Where regulation S–B does not contain a comparable item, for example, there is no Item "301" in regulation S–B, then a small business issuer may omit the item. A small business issuer shall provide the financial information in item 310 of regulation S–B in lieu of the financial information called for by item 11 of Form S–2.

* * * * *

§ 239.13 [Amended]

16. Form S–3 (§ 239.13) is amended by adding paragraph C to General Instruction II to read as follows:

Note: The text of Form S–3 does not appear in the Code of Federal regulations.

19. By revising §§ 239.90 and 239.91 to read as follows:

§ 239.90 Form 1–A, offering statement under regulation A.

This form shall be used for filing under regulation A (§§ 230.251–230.262 of this chapter).

239.91 Form 2–A, report pursuant to rule 257 of regulation A.

This form shall be used for reports of sales and use of proceeds pursuant to rule 257 of regulation A (§ 230.257 of this chapter).

§§ 239.90 and 239.91 [Amended]

20. By revising Form 1–A (§ 239.90) and Form 2–A (§ 239.91) to read as follows:

Note: Forms 1–A and 2–A do not appear in the Code of Federal Regulations.

Securities and Exchange Commission

Form 1–A

Regulation A Offering Statement Under the Securities Act of 1933

(Exact name of issuer as specified in its charter)

(State or other jurisdiction of incorporation or organization)

(Address, including zip code, and telephone number, including area code of issuer's principal executive offices)

(Name, address, including zip code, and telephone number, including area code, of agent for service)

(Primary Standard Industrial Classification Code Number)

(I.R.S. Employer Identification Number)

General Instructions

I. Eligibility Requirements for Use of Form 1–A

This form is to be used for securities offerings made pursuant to regulation A, 17 CFR 230.251 *et seq.* Careful attention should be directed to the terms, conditions and requirements of the regulation, especially rule 251, inasmuch as the exemption is not available to all issuers or to every type of securities transaction. Further, the aggregate offering amount of securities which may be sold in any 12 month period is strictly limited to $5 million.

II. Preparation and Filing of the Offering Statement

An offering statement shall be prepared by all persons seeking exemption pursuant to the provisions of regulation A. Parts I, II and III shall be addressed by all issuers. Part II of the form which relates to the content of the required offering circular provides several alternate formats depending upon the nature and/or business of the issuer; only one format needs to be followed and provided in the offering statement. General information regarding the preparation, format, content of, and where to file the offering statement is contained in rule 252. Requirements relating to the offering circular are contained in rules 253 and 255. The offering statement may be printed, mimeographed, lithographed, or typewritten or prepared by any similar process which will result in clearly legible copies.

III. Supplemental Information

The following information shall be furnished to the Commission as supplemental information:

(1) A statement as to whether or not the amount of compensation to be allowed or paid to the underwriter has been cleared with the NASD.

(2) Any engineering, management or similar report referenced in the offering circular.

(3) Such other information as requested by the staff in support of statements, representations and other assertions contained in the offering statement.

Part I—Notification

The information requested shall be provided in the order which follows specifying each item number; the text of each item as presented in this form may be omitted. All items shall be addressed and negative responses should be included.

Item 1. Significant Parties

(a) List the full names and business and residential addresses, as applicable, for the following persons:

(1) The issuer's directors;

(2) The issuer's officers;

(3) The issuer's general partners;

(4) Record owners of 5 percent or more of any class of the issuer's equity securities;

(5) Beneficial owners of 5 percent or more of any class of the issuer's equity securities;

(6) Promoters of the issuer;

(7) Affiliates of the issuer;

(8) Counsel to the issuer with respect to the proposed offering;

(9) Each underwriter with respect to the proposed offering;

(10) The underwriter's directors;

(11) The underwriter's officers;

(12) The underwriter's general partners; and

(13) Counsel to the underwriter.

Item 2. Application of Rule 262

(a) State whether any of the persons identified in response to Item 1 are subject to any of the disqualification provisions set forth in rule 262.

(b) If any such person is subject to these provisions, provide a full description including pertinent names, dates and other details, as well as whether or not an application has been made pursuant to rule 262 for a waiver of such disqualification and whether or not such application has been granted or denied.

Item 3. Affiliate Sales

If any part of the proposed offering involves the resale of securities by affiliates of the issuer, confirm that the following description does not apply to the issuer.

The issuer has not had a net income from operations of the character in which the issuer intends to engage for at least one of its last two fiscal years.

Item 4. Jurisdictions in Which Securities Are to be Offered

(a) List the jurisdiction in which the securities are to be offered by underwriters, dealers or salespersons.

(b) List the jurisdictions in which the securities are to be offered other than by underwriters, dealers or salesmen and state the method by which such securities are to be offered.

Item 5. Unregistered Securities Issued or Sold Within One Year

(a) As to any unregistered securities issued by the issuer or any of its predecessors or affiliated issuers within one year prior to the filing of this Form 1–A, state:

(1) The name of such issuer;

(2) The title and amount of securities issued;

(3) The aggregate offering price or other consideration for which they were issued and the basis for computing the amount thereof;

(4) The names and identities of the persons to whom the securities were issued.

(b) As to any unregistered securities of the issuer or any of its predecessors or affiliated issuers which were sold within one year prior to the filing of this Form 1–A by or for the account of any person who at the time was a director, officer, promoter or principal security holder of the issuer of such securities, or was an underwriter of any securities of such issuer, furnish the information specified in subsections (1) through (4) of paragraph (a).

(c) Indicate the section of the Securities Act or Commission rule or regulation relied upon for exemption from the registration requirements of such Act and state briefly the facts relied upon for such exemption.

Item 6. Other Present or Proposed Offerings

State whether or not the issuer or any of its affiliates is currently offering or contemplating the offering of any securities in addition to those covered by this Form 1–A. If so, describe fully the present or proposed offering.

Item 7. Marketing Arrangements

(a) Briefly describe any arrangement known to the issuer or to any person named in response to Item 1 above or to any selling securityholder in the offering covered by this Form 1–A for any of the following purposes:

(1) To limit or restrict the sale of other securities of the same class as those to be offered for the period of distribution;

(2) To stabilize the market for any of the securities to be offered;

(3) For withholding commissions, or otherwise to hold each underwriter or dealer responsible for the distribution of its participation.

(b) Identify any underwriter that intends to confirm sales to any accounts over which it exercises discretionary authority and include an estimate of the amount of securities so intended to be confirmed.

Item 8. Relationship With Issuer of Experts Named in Offering Statement

If any expert named in the offering statement as having prepared or certified any part thereof was employed for such purpose on a contingent basis or, at the time of such preparation or certification or at any time thereafter, had a material interest in the issuer or any of its parents or subsidiaries or was connected with the issuer or any of its subsidiaries as a promoter, underwriter, voting trustee, director, officer or employee furnish a brief statement of the nature of such contingent basis, interest or connection.

Item 9. Use of a Solicitation of Interest Document

Indicate whether or not a publication authorized by rule 254 was used prior to the filing of this notification. If so, indicate the date(s) of publication and of the last communication with prospective purchasers.

Part II—Offering Circular

Financial Statement requirements, regardless of the applicable disclosure model, are specified in Part F/S of this Form 1–A.

The narrative disclosure contents of offering circulars are specified as follows:

A:For all corporate issuers—the information required by Model A of this Part II of Form 1–A.

B:For all other issuers and for any issuer that so chooses—the information required by either Part I of Form S–B, 17 CFR 239.28, except for the financial statements called for there, or Model B of this Part II of Form 1–A. Offering circulars prepared pursuant to this instruction need not follow the order of the items or other requirements of the disclosure form. Such information shall not, however, be set forth in such a fashion as to obscure any of the required information or any information necessary to keep the required information from being incomplete or misleading. Information requested to be presented in a specified tabular format shall be given in substantially the tabular form specified in the item.

Offering Circular Model A

General Instructions

Each question in each paragraph of this part shall be responded to; and each question and any notes, but not any instructions thereto, shall be restated in its entirety. If the question or series of questions is inapplicable, so state. If the space provided in the format is insufficient, additional space should be created by cutting and pasting the format to add more lines.

Be very careful and precise in answering all questions. Give full and complete answers so that they are not misleading under the circumstances involved. Do not discuss any future performance or other anticipated event unless you have a reasonable basis to believe that it will actually occur within the foreseeable future. If any answer requiring significant information is materially inaccurate, incomplete or misleading, the Company, its management and principal shareholders may have liability to investors. The selling agents should exercise appropriate diligence to determine that no such inaccuracy or incompleteness has occurred, or they may be liable.

(See Questions 9 and 10)

Is a commissioned selling agent selling the securities in this offering?

[ ] Yes [ ] No

If yes, what percent is commission of price to public? ____%.

Is there other compensation to selling agent(s)?

[ ] Yes [ ] No

Is there a finder's fee or similar payment to any person?

[ ] Yes [ ] No (See Question No. 22)

Is there an escrow of proceeds until minimum is obtained?

[ ] Yes [ ] No (See Question No. 26)

Is this offering limited to members of a special group, such as employees of the Company or individuals?

[ ] Yes [ ] No (See Question No. 25)

Is transfer of the securities restricted?

[ ] Yes [ ] No (See Question No. 25)

Investment in small businesses involves a high degree of risk, and investors should not invest any funds in this offering unless they can afford to lose their entire investment. See question No. 2 for the risk factors that management believes present the most substantial risks to an investor in this offering.

In making an investment decision investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any Federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document. Any representation to the contrary is a criminal offense.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering circular or selling literature. These securities are offered under an exemption from registration; however, the Commission has not made an independent determination that these securities are exempt from registration.

This Company:

[ ] Has never conducted operations.

[ ] Is in the development stage.

[ ] Is currently conducting operations.

[ ] Has shown a profit in the last fiscal year.

[ ] Other (Specify):

(Check at least one, as appropriate)

This offering has been registered for offer and sale in the following states:

State	State file No.	Effective date

Instruction: The Cover Page of the Offering Circular is a summary of certain essential information and should be kept on one page if at all possible. For purposes of characterizing the Company on the cover page, the term "development stage" has the same meaning as that set forth in Statement of Financial Accounting Standards No. 7 (June 1, 1975).

Note: In addition to the above risks, businesses are often subject to risks not foreseen or fully appreciated by management. In reviewing this Offering Circular potential investors should keep in mind other possible risks that could be important.

Instruction: The Company should avoid generalized statements and include only those factors which are unique to the Company. No specific number of risk factors is required to be identified. If more than 16 significant risk factors exist, add additional lines and number as appropriate. Risk factors may be due to such matters as cash flow and liquidity problems, inexperience of management in managing a business in the particular industry, dependence of the Company on an unproven product, absence of an existing market for the product (even though management may believe a need exists), absence of an operating history of the Company, absence of profitable operations in recent periods, an erratic financial history, the financial position of the Company, the nature of the business in which the Company is engaged or proposes to engage, conflicts of interest with management, arbitrary establishment of offering price, reliance on the efforts of a single individual, or absence of a trading market if a trading market is not expected to develop. Cross references should be made to the Questions where details of the risks are described.

Business and Properties

3. With respect to the business of the Company and its properties:

(a) Describe in detail what business the Company does and proposes to do, including what products or goods are or will be produced or services that are or will be rendered.

_____

(b) Describe how these products or services are to be produced or rendered and how and when the Company intends to carry out its activities. If the Company plans to offer a new product(s), state the present stage of development, including whether or not a working prototype(s) is in existence. Indicate if completion of development of the product would require a material amount of the resources of the Company, and the estimated amount. If the Company is or is expected to be dependent upon one or a limited number of suppliers for essential raw materials, energy or other items, describe. Describe any major existing supply contracts.

_____

(c) Describe the industry in which the Company is selling or expects to sell its products or services and, where applicable, any recognized trends within that industry. Describe that part of the industry and the geographic area in which the business competes or will compete.

Indicate whether competition is or is expected to be by price, service, or other basis. Indicate (by attached table if appropriate) the current or anticipated prices or price ranges for the Company's products or services, or the formula for determining prices, and how these prices compare with those of competitors' products or services, including a description of any variations in product or service features. Name the principal competitors that the Company has or expects to have in its area of competition. Indicate the relative size and financial and market strengths of the Company's competitors in the area of competition in which the Company is or will be operating. State why the Company believes it can effectively compete with these and other companies in its area of competition.

_____

Note: Because this Offering Circular focuses primarily on details concerning the Company rather than the industry in which the Company operates or will operate, potential investors may wish to conduct their own separate investigation of the Company's industry to obtain broader insight in assessing the Company's prospects.

(d) Describe specifically the marketing strategies the Company is employing or will employ in penetrating its market or in developing a new market. Set forth in response to Question 4 below the timing and size of the results of this effort which will be necessary in order for the Company to be profitable. Indicate how and by whom its products or services are or will be marketed (such as by advertising, personal contact by sales representatives, etc.), how its marketing structure operates or will operate and the basis of its marketing approach, including any market studies. Name any customers that account for, or based upon existing orders will account for a major portion (20% or more) of the Company's sales. Describe any major existing sales contracts.

_____

(e) State the backlog of written firm orders for products and/or services as of a recent date (within the last 90 days) and compare it with the backlog of a year ago from that date.

As of: ____/____/____ $_____
(a recent date)

As of: ____/____/____ $_____
(one year earlier)

Explain the reason for significant variations between the two figures, if any. Indicate what types and amounts of orders are included in the backlog figures. State the size of typical orders. If the Company's sales are seasonal or cyclical, explain.

_____

(f) State the number of the Company's present employees and the number of employees it anticipates it will have within the next 12 months. Also, indicate the number by type of employee (i.e., clerical, operations, administrative, etc.) the Company will use, whether or not any of them are subject to collective bargaining agreements, and the expiration date(s) of any collective bargaining agreement(s). If the Company's employees are on strike, or have been in the past three years, or are threatening to strike, describe the dispute. Indicate any supplemental benefits or incentive arrangements the Company has or will have with its employees.

_____

(g) Describe generally the principal properties (such as real estate, plant and equipment, patents, etc.) that the Company owns, indicating also what properties it leases and a summary of the terms under those leases, including the amount of payments, expiration dates and the terms of any renewal options. Indicate what properties the Company intends to acquire in the immediate future, the cost of such acquisitions and the sources of financing it expects to use in obtaining these properties, whether by purchase, lease or otherwise.

_____

(h) Indicate the extent to which the Company's operations depend or are expected to depend upon patents, copyrights, trade secrets, know-how or other proprietary information and the steps undertaken to secure and protect this intellectual property, including any use of confidentiality agreements, covenants-not-to-compete and the like. Summarize the principal terms and expiration dates of any significant license agreements. Indicate the amounts expended by the Company for research and development during the last fiscal year, the amount expected to be spent this year and what percentage of revenues research and development expenditures were for the last fiscal year.

_____

(i) If the Company's business, products, or properties are subject to material regulation (including environmental regulation) by federal, state, or local governmental agencies, indicate the nature and extent of regulation and its effects or potential effects upon the Company.

_____

(j) State the names of any subsidiaries of the Company, their business purposes and ownership, and indicate which are included in the Financial Statements attached hereto. If not included, or if included but not consolidated, please explain.

_____

(k) Summarize the material events in the development of the Company (including any material mergers or acquisitions) during the past five years, or for whatever lesser period the Company has been in existence. Discuss any pending or anticipated mergers, acquisitions, spin-offs or recapitalizations. If the Company has recently undergone a stock split, stock dividend or recapitalization in anticipation of this offering, describe (and adjust historical per share figures elsewhere in this Offering Circular accordingly).

_____

4.(a) If the Company was not profitable during its last fiscal year, list below in chronological order the events which in management's opinion must or should occur or the milestones which in management's opinion the Company must or should reach in order for the Company to become profitable, and indicate the expected manner of occurrence or the expected method by which the Company will achieve the milestones.

Event or milestone	Expected manner of occurrence or method of achievement	Date or number of months after receipt of proceeds when should be accomplished
(1)		
(2)		
(3)		
(4)		
(5)		

(b) State the probable consequences to the Company of delays in achieving each of the events or milestones within the above time schedule, and particularly the effect of any delays upon the Company's liquidity in view of the Company's then anticipated level of operating costs. (See Question Nos. 11 and 12)

_____

Note: After reviewing the nature and timing of each event or milestone, potential investors should reflect upon whether achievement of each within the estimated time frame is realistic and should assess the consequences of delays or failure of achievement in making an investment decision.

Instruction: The inquiries under Business and Properties elicit information concerning the nature of the business of the Company and its properties. Make clear what aspects of the business are presently in operation and what aspects are planned to be in operation in the future. The description of principal properties should provide information which will reasonably inform investors as to the suitability, adequacy, productive capacity and extent of utilization of the facilities used in the enterprise. Detailed descriptions of the physical characteristics of the individual properties or legal descriptions by metes and bounds are not required and should not be given.

As to Question 4, if more than five events or milestones exist, add additional lines as necessary. A "milestone" is a significant point in the Company's development or an obstacle which the Company must overcome in order to become profitable.

Offering Price Factors

If the securities offered are common stock, or are exercisable for or convertible into common stock, the following factors may be relevant to the price at which the securities are being offered.

5. What were net, after-tax earnings for the last fiscal year? (If losses, show in parenthesis.)

Total $_____ ($_____ per share)

6. If the Company had profits, show offering price as a multiple of earnings. Adjust to reflect for any stock splits or recapitalizations, and use conversion or exercise price in lieu of offering price, if applicable.

Offering Price Per Share / Net After-Tax Earnings Last Year Per Share = (price/earnings multiple)

7. (a) What is the net tangible book value of the Company? (If deficit, show in parenthesis.) For this purpose, net tangible book value means total assets (exclusive of copyrights, patents, goodwill, research and development costs and similar intangible items) minus total liabilities.

$_____ ($_____ per share)

If the net tangible book value per share is substantially less than this offering (or exercise or conversion) price per share, explain the reasons for the variation.

_____

(b) State the dates on which the Company sold or otherwise issued securities during the last 12 months, the amount of such securities sold, the number of persons to whom they were sold, any relationship of such persons to the Company at the time of sale, the price at which they were sold and, if not sold for cash, a concise description of the consideration. (Exclude bank debt.)

8. (a) What percentage of the outstanding shares of the Company will the investors in this offering have? Assume exercise of outstanding options, warrants or rights and conversion of convertible securities, if the respective exercise or conversion prices are at or less than the offering price. Also assume exercise of any options, warrants or rights and conversions of any convertible securities offered in this offering.)

If the maximum is sold: _____%
If the minimum is sold: _____%

(b) What post-offering value is management implicitly attributing to the entire Company by establishing the price per security set forth on the cover page (or exercise or conversion price if common stock is not offered)? (Total outstanding shares after offering times offering price, or exercise or conversion price if common stock is not offered.)

If maximum is sold: $_____*
If minimum is sold: $_____*

(For above purposes, assume outstanding options are exercised in determining "shares" if the exercise prices are at or less than the offering price. All convertible securities, including outstanding convertible securities, shall be assumed converted and any options, warrants or rights in this offering shall be assumed exercised.)

* These values assume that the Company's capital structure would be changed to reflect any conversions of outstanding convertible securities and any use of outstanding securities as payment in the exercise of outstanding options, warrants or rights included in the calculation. The type and amount of convertible or other securities thus eliminated would be: _____. These values also assume an increase in cash in the Company by the amount of any cash payments that would be made upon cash exercise of options, warrants or rights included in the calculations. The amount of such cash would be: $_____.

Note: After reviewing the above, potential investors should consider whether or not the offering price (or exercise or conversion price, if applicable) for the securities is appropriate at the present stage of the Company's development.

Instruction: Financial information in response to Questions 5, 6 and 7 should be consistent with the Financial Statements. Earnings per share for purposes of Question 5 should be calculated by dividing earnings for the last fiscal year by the weighted average of outstanding shares during that year. No calculations should be shown for periods of less than one year or if earnings are negative or nominal. For purposes of Question 8, the "offering price" of any options, warrants or rights or convertible securities in the offering is the respective exercise or conversion price.

Use of Proceeds

9.(a) The following table sets forth the use of the proceeds from this offering:

	If minimum sold		If maximum sold	
	Amount	Percent	Amount	Percent
Total Proceeds	$_____	100	$_____	100
Less: Offering Expenses				
Commissions & Finders Fees				
Legal & Accounting				
Copying & Advertising				
Other (Specify):				
_____				
Net Proceeds from Offering				
Use of Net Proceeds				
_____				
_____				
_____				
_____				
Total Use of Net Proceeds	$_____		$_____	
	$_____	100	$_____	100

(b) If there is no minimum amount of proceeds that must be raised before the Company may use the proceeds of the offering, describe the order of priority in which the proceeds set forth above in the column "If Maximum Sold" will be used.

Note: After reviewing the portion of the offering allocated to the payment of offering expenses, and to the immediate payment to management and promoters of any fees, reimbursements, past salaries or similar payments, a potential investor should consider whether the remaining portion of his investment, which would be that part available for future development of the Company's business and operations, would be adequate.

10.(a) If material amounts of funds from sources other than this offering are to be used in conjunction with the proceeds from this offering, state the amounts and sources of such other funds, and whether funds are firm or contingent. If contingent, explain.

(b) If any material part of the proceeds is to be used to discharge indebtedness, describe the terms of such indebtedness, including interest rates. If the indebtedness to be discharged was incurred within the current or previous fiscal year, describe the use of proceeds of such indebtedness.

(c) If any material amount of proceeds is to be used to acquire assets, other than in the ordinary course of business, briefly describe and state the cost of the assets and other material terms of the acquisitions. If the assets are to be acquired from officers, directors, employees or principal stockholders of the Company or their associates, give the names of the persons from whom the assets are to be acquired and set forth the cost to the Company, the method followed in determining the cost, and any profit to such persons.

(d) If any amount of the proceeds is to be used to reimburse any officer, director, employee or stockholder for services already rendered, assets previously transferred, or monies loaned or advanced, or otherwise, explain:

11. Indicate whether the Company is having or anticipates having within the next 12 months any cash flow or liquidity problems and whether or not it is in default or in breach of any note, loan, lease or other indebtedness or financing arrangement requiring the Company to make payments. Indicate if a significant amount of the Company's trade payables have not been paid within the stated trade term. State whether the Company is subject to any unsatisfied judgments, liens or settlement obligations and the amounts thereof. Indicate the Company's plans to resolve any such problems.

12. Indicate whether proceeds from this offering will satisfy the Company's cash requirements for the next 12 months, and whether it will be necessary to raise additional funds. State the source of additional funds, if known.

Instruction: Use of net proceeds should be stated with a high degree of specificity. Suggested (but not mandatory) categories are: leases, rent, utilities, payroll (by position or type), purchase or lease of specific items of equipment or inventory, payment of notes, accounts payable, etc., marketing or advertising costs, taxes, consulting fees, permits, professional fees, insurance and supplies. Categories will vary depending on the Company's plans. Use of footnotes or other explanation is recommended where appropriate. Footnotes should be used to indicate those items of offering expenses that are estimates. Set forth in separate categories all payments which will be made immediately to the Company's executive officers, directors and promoters, indicating by footnote that these payments will be so made to such persons. If a substantial amount is allocated to working capital, set forth separate sub-categories for use of the funds in the Company's business.

If any substantial portion of the proceeds has not been allocated for particular purposes, a statement to that effect as one of the Use of Net Proceeds categories should be included together with a statement of the amount of proceeds not so allocated and a footnote explaining how the Company expects to employ such funds not so allocated.

Capitalization

13. Indicate the capitalization of the Company as of the most recent balance sheet date (adjusted to reflect any subsequent stock splits, stock dividends, recapitalizations or refinancings) and as adjusted to reflect the sale of the minimum and maximum amount of securities in this offering and the use of the net proceeds therefrom:

	Amount outstanding		
	As of: / / (date)	As adjusted	
		Minimum	Maximum
Debt:			
Short-term debt (average interest rate __%)	$	$	$
Long-term debt (average interest rate __%)	$	$	$
Total debt	$	$	$
Stockholders equity (deficit):			
Preferred stock—par or stated value (by class of preferred in order of preferences)			
_____	$	$	$
_____	$	$	$
_____	$	$	$
Common stock—par or stated value	$	$	$
Additional paid in capital	$	$	$
Retained earnings (deficit)	$	$	$
Total stockholders equity (deficit)	$	$	$
Total Capitalization	$	$	$

Number of preferred shares authorized to be outstanding:

Par Value		
Number of class of preferred	Shares authorized	Par share
		$
		$
		$

Number of common shares authorized:____ shares. Par or stated value per share, if any: $____

Number of common shares reserved to meet conversion requirements or for the issuance upon exercise of options, warrants or rights: __ shares.

Instruction: Capitalization should be shown as of a date no earlier than that of the most recent Financial Statements provided pursuant to Question 46. If the Company has mandatory redeemable preferred stock, include the amount thereof in "long term debt" and so indicate by footnote to that category in the capitalization table.

Description of Securities

14. The securities being offered hereby are:
[ ] Common Stock
[ ] Preferred or Preference Stock
[ ] Notes or Debentures
[ ] Units of two or more types of securities composed of:_____
[ ] Other: _____

15. These securities have:

Yes	No	
[ ]	[ ]	Cumulative voting rights
[ ]	[ ]	Other special voting rights
[ ]	[ ]	Preemptive rights to purchase in new issues of shares
[ ]	[ ]	Preference as to dividends or interest
[ ]	[ ]	Preference upon liquidation
[ ]	[ ]	Other special rights or preferences (specify): _____

Explain:

16. Are the securities convertible? [ ] Yes [ ] No
If so, state conversion price or formula.
_____
Date when conversion becomes effective: __/__/__
Date when conversion expires: __/__/__

17.(a) If securities are notes or other types of debt securities:
(1) What is the interest rate? ____%
If interest rate is variable or multiple rates, describe:

(2) What is the maturity date? __/__/__
If serial maturity dates, describe:

(3) Is there a mandatory sinking fund?
[ ] Yes [ ] No
Describe:

(4) Is there a trust indenture? [ ] Yes [ ] No
Name, address and telephone number of Trustee _____

(5) Are the securities callable or subject to redemption? [ ] Yes [ ] No
Describe, including redemption prices: _____

(6) Are the securities collateralized by real or personal property?
[ ] Yes [ ] No Describe: _____

(7) If these securities are subordinated in right of payment of interest or principal, explain the terms of such subordination.

How much currently outstanding indebtedness of the Company is senior to the securities in right of payment of interest or principal? $_____

How much indebtedness shares in right of payment on an equivalent (pari passu) basis? $_____

How much indebtedness is junior (subordinated) to the securities? $_____

(b) If notes or other types of debt securities are being offered and the Company had earnings during its last fiscal year, show the ratio of earnings to fixed charges on an actual and pro forma basis for that fiscal year. *Earnings* means pretax income from continuing operations plus fixed charges and capitalized interest. *Fixed charges* means interest (including capitalized interest), amortization of debt discount, premium and expense, preferred stock dividend requirements of majority owned subsidiary, and such portion of rental expense as can be demonstrated to be representative of the interest factor in the particular case. The pro forma ratio of earnings to fixed charges should include incremental interest expense as a result of the offering of the notes or other debt securities.

	Last fiscal year		
"Earnings" / "Fixed charges" =	Actual	Pro forma minimum	Maximum
If no earnings show "Fixed Charges" only.....			

Note: Care should be exercised in interpreting the significance of the ratio of earnings to fixed charges as a measure of the "coverage" of debt service, as the existence of earnings does not necessarily mean that the Company's liquidity at any given time will permit payment of debt service requirements to be timely made. See Question Nos. 11 and 12. See also the Financial Statements and especially the Statement of Cash Flows.

18. If securities are Preference or Preferred stock:

Are unpaid dividends cumulative? [ ] Yes [ ] No

Are securities callable? [ ] Yes [ ] No

Explain:

Note: Attach to this Offering Circular copies or a summary of the charter, bylaw or contractual provision or document that gives rise to the rights of holders of Preferred or Preference Stock, notes or other securities being offered.

19. If securities are capital stock of any type, indicate restrictions on dividends under loan or other financing arrangements or otherwise:

20. Current amount of assets available for payment of dividends if deficit must be first made up, show deficit in parenthesis): $_____.

Plan of Distribution

21. The selling agents (that is, the persons selling the securities as agent for the Company for a commission or other compensation) in this offering are:

Name:

Address:

Telephone No. ( ) _____-_____

Name:

Address:

Telephone No. ( ) _____-_____

22. Describe any compensation to selling agents or finders, including cash, securities, contracts or other consideration, in addition to the cash commission set forth as a percent of the offering price on the cover page of this Offering Circular. Also indicate whether the Company will indemnify the selling agents or finders against liabilities under the securities laws. (*Finders* are persons who for compensation act as intermediaries in obtaining selling agents or otherwise making introductions in furtherance of this offering.)

23. Describe any material relationships between any of the selling agents or finders and the Company or its management.

Note: After reviewing the amount of compensation to the selling agents or finders for selling the securities, and the nature of any relationship between the selling agents or finders and the Company, a potential investor should assess the extent to which it may be inappropriate to rely upon any recommendation by the selling agents or finders to buy the securities.

24. If this offering is not being made through selling agents, the names of persons at the Company through which this offering is being made:

Name:

Address:

Telephone No. (____) ____-____

Name:

Address:

Telephone No. (____) ____-____

25. If this offering is limited to a special group, such as employees of the Company, or is limited to a certain number of individuals (as required to qualify under Subchapter S of the Internal Revenue Code) or is subject to any other limitations, describe the limitations and any restrictions on resale that apply:

Will the certificates bear a legend notifying holders of such restrictions?

[ ] Yes [ ] No

26. (a) Name, address and telephone number of independent bank or savings and loan association or other similar depository institution acting as escrow agent if proceeds are escrowed until minimum proceeds are raised:

(b) Date at which funds will be returned by escrow agent if minimum proceeds are not raised:

Will interest on proceeds during escrow period be paid to investors? [ ] Yes [ ] No

27. Explain the nature of any resale restrictions on presently outstanding shares, and when those restrictions will terminate, if this can be determined:

Note: Equity investors should be aware that unless the Company is able to complete a further public offering or the Company is able to be sold for cash or merged with a public company that their investment in the Company may be illiquid indefinitely.

Dividends, Distributions and Redemptions

28. If the Company has within the last five years paid dividends, made distributions upon its stock or redeemed any securities, explain how much and when:

Officers and Key Personnel of the Company

29. Chief Executive Officer:

Name:

Office Street Address:

Title:

Age:

Telephone No.:

(____) ____-____

Name of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

Also a Director of the Company [ ] Yes [ ] No

Indicate amount of time to be spent on Company matters if less than full time:

30. Chief Operating Officer:

Name:

Office Street Address:

Title:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

Also a Director of the Company? [ ] Yes [ ] No

Indicate amount of time to be spent on Company matters if less than full time:

31. Chief Financial Officer:

Name:

Office Street Address:

Title:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

Also a Director of the Company? [ ] Yes [ ] No

Indicate amount of time to be spent on Company matters if less than full time:

32. Other Key Personnel:

(A) Name:

Title:

Office Street Address:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

Also a Director of the Company? [ ] Yes [ ] No

Indicate amount of time to be spent on Company matters if less than full time:

(B) Name:

Title:

Office Street Address:

Age:

Telephone No.:

(____) ____-____

Names of employers, tfiles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

Also a Director of the Company? [ ] Yes [ ] No

Indicate amount of time to be spent on Company matters if less than full time:

Instruction: The term *Chief Executive Officer* means the officer of the Company who has been delegated final authority by the board of directors to direct all aspects of the Company's affairs. The term *Chief Operating Officer* means the officer in charge of the actual day-to-day operations of the Company's business. The term *Chief Financial Officer* means the officer having accounting skills who is primarily in charge of assuring that the Company's financial books and records are properly kept and maintained and financial statements prepared.

The term *key personnel* means persons such as vice presidents, production managers, sales managers, or research scientists and similar persons, who are not included above, but who make or are expected to make significant contributions to the business of the Company, whether as employees, independent contractors, consultants or otherwise.

Directors of the Company

33. Number of Directors: ____ If Directors are not elected annually, or are elected under a voting trust or other arrangement, explain:

34. Information concerning outside or other Directors (i.e. those not described above):

(A) Name:

Office Street Address:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

(B) Name:

Office Street Address:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

(C) Name:

Office Street Address:

Age:

Telephone No.:

(____) ____-____

Names of employers, titles and dates of positions held during past five years with an indication of job responsibilities.

Education (degrees, schools, and dates):

35.(a) Have any of the Officers or Directors ever worked for or managed a company (including a separate subsidiary or division of a larger enterprise) in the same business as the Company? [ ] Yes [ ] No Explain:

(b) If any of the Officers, Directors or other key personnel have ever worked for or managed a company in the same business or industry as the Company or in a related business or industry, describe what precautions, if any, (including the obtaining of releases or consents from prior employers) have been taken to preclude claims by prior employers for conversion or theft of trade secrets, know-how or other proprietary information.

(c) If the Company has never conducted operations or is otherwise in the development stage, indicate whether any of the Officers or Directors has ever managed any other company in the start-up or development stage and describe the circumstances, including relevant dates.

(d) If any of the Company's key personnel are not employees but are consultants or other independent contractors, state the details of their engagement by the Company.

(e) If the Company has key man life insurance policies on any of its Officers, Directors or key personnel, explain, including the names of the persons insured, the amount of insurance, whether the insurance proceeds are payable to the Company and whether there are arrangements that require the proceeds to be used to redeem securities or pay benefits to the estate of the insured person or a surviving spouse.

36. If a petition under the Bankruptcy Act or any State insolvency law was filed by or against the Company or its Officers, Directors or other key personnel, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of any such persons, or any partnership in which any of such persons was a general partner at or within the past five years, or any corporation or business association of which any such person was an executive officer at or within the past five years, set forth below the name of such persons, and the nature and date of such actions.

Note: After reviewing the information concerning the background of the Company's Officers, Directors and other key personnel, potential investors should consider whether or not these persons have adequate background and experience to develop and operate this Company and to make it successful. In this regard, the experience and ability of management are often considered the most significant factors in the success of a business.

Principal Stockholders

37. Principal owners of the Company (those who beneficially own directly or indirectly 10% or more of the common and preferred stock presently outstanding) starting with the largest common stockholder. Include separately all common stock issuable upon conversion of convertible securities (identifying them by asterisk) and show average price per share as if conversion has occurred. Indicate by footnote if the price paid was for a consideration other than cash and the nature of any such consideration.

Class of shares	Average price per share	No. of shares now held	Percentage of total	No. of shares held after offering if all securities sold	Percentage of total
Name:					
Office Street Address:					
Telephone No. (___) ___-___					
Principal occupation:					
Name:					
Office Street Address:					
Telephone No. (___) ___-___					
Principal occupation:					
Name:					
Office Street Address:					
Telephone No. (___) ___-___					
Principal occupation:					
Name:					
Office Street Address:					
Telephone No. (___) ___-___					
Principal occupation:					

38. Number of shares beneficially owned by Officers and Directors as a group:

Before offering: ____ shares (____% of total outstanding)

After offering: (a) Assuming minimum securities sold:

____ shares (____% of total outstanding)

(b) Assuming maximum securities sold:

____ shares (____% of total outstanding)

(Assume all options exercised and all convertible securities converted.)

Instruction: If shares are held by family members, through corporations or partnerships, or otherwise in a manner that would allow a person to direct or control the voting of the shares (or share in such direction or control—as, for example, a co-trustee) they should be included as being "beneficially owned." An explanation of these circumstances should be set forth in a footnote to the "Number of Shares Now Held."

Management Relationships, Transactions and Remuneration

39.(a) If apy of the Officers, Directors, key personnel or principal stockholders are related by blood or marriage, please describe.

(b) If the Company has made loans to or is doing business with any of its Officers, Directors, key personnel or 10% stockholders, or any of their relatives (or any entity controlled directly or indirectly by any such persons) within the last two years, or proposes to do so within the future, explain. (This includes sales or lease of goods, property or services to or from the Company, employment or stock purchase contracts, etc.) State the principal terms of any significant loans, agreements, leases, financing or other arrangements.

(c) If any of the Company's Officers, Directors, key personnel or 10% stockholders has guaranteed or co-signed any of the Company's bank debt or other obligations, including any indebtedness to be retired from the proceeds of this offering, explain and state the amounts involved.

40.(a) List all remuneration by the Company to Officers, Directors and key personnel for the last fiscal year:

	Cash	Other
Chief Executive Officer	$	$
Chief Operating Officer	$	$
Chief Accounting Officer.	$	$
Key Personnel:		
	$	$
	$	$
	$	$
Others:		
	$	$
	$	$
	$	$
Total:	$	$
Directors as a group (number of persons ___).	$	$

(b) If remuneration is expected to change or has been unpaid in prior years, explain:

(c) If any employment agreements exist or are contemplated, describe:

41.(a) Number of shares subject to issuance under presently outstanding stock purchase agreements, stock options, warrants or rights: ____ shares (____% of total shares to be outstanding after the completion of the offering if all securities sold, assuming exercise of options and conversion of convertible securities). Indicate which have been approved by shareholders. State the expiration dates, exercise prices and other basic terms for these securities:

(b) Number of common shares subject to issuance under existing stock purchase or option plans but not yet covered by outstanding purchase agreements, options or warrants: ____shares.

(c) Describe the extent to which future stock purchase agreements, stock options, warrants or rights must be approved by shareholders.

42. If the business is highly dependent on the services of certain key personnel, describe any arrangements to assure that these persons will remain with the Company and not compete upon any termination:

Note: After reviewing the above, potential investors should consider whether or not the compensation to management and other key personnel directly or indirectly, is reasonable in view of the present stage of the Company's development.

Instruction: For purposes of Question 39(b), a person directly or indirectly controls an entity if he is part of the group that directs or is able to direct the entity's activities or affairs. A person is typically a member of a control group if he is an officer, director, general partner, trustee or beneficial owner of a 10% or greater interest in the entity. In Question 40, the term "Cash" should indicate salary, bonus, consulting fees, non-accountable expense accounts and the like. The column captioned "Other" should include the value of any options or securities given, any annuity, pension or retirement benefits, bonus or profit-sharing plans, and personal benefits (club memberships, company cars, insurance benefits not generally available to employees, etc.). The nature of these benefits should be explained in a footnote to this column.

Litigation

43. Describe any past, pending or threatened litigation or administrative action which has had or may have a material effect upon the Company's business, financial condition, or operations, including any litigation or action involving the Company's Officers, Directors or other key personnel. State the names of the principal parties, the nature and current status of the matters, and amounts involved. Give an evaluation by management or counsel, to the extent feasible, of the merits of the proceedings or litigation and the potential impact on the Company's business, financial condition, or operations.

Federal Tax Aspects

44. If the Company is an S corporation under the Internal Revenue Code of 1986, and it is anticipated that any significant tax benefits will be available to investors in this offering, indicate the nature and amount of such anticipated tax benefits and the material risks of their disallowance. Also, state the name, address and telephone number of any tax advisor that has passed upon these tax benefits. Attach any opinion or description of the tax consequences of an investment in the securities by the tax advisor.

Name of Tax Advisor: _____

Address: _____

Telephone No. (___) ___-___

Note: Potential investors are encouraged to have their own personal tax consultant contact the tax advisor to review details of the tax benefits and the extent that the benefits would be available and advantageous to the particular investor.

Miscellaneous Factors

45. Describe any other material factors, either adverse or favorable, that will or could affect the Company or its business (for example, discuss any defaults under major contracts, any breach of bylaw provisions, etc.) or which are necessary to make any other information in this Offering Circular not misleading or incomplete.

Financial Statements

46. Provide the financial statements required by Part F/S of this Offering Circular section of Form 1-A.

Management's Discussion and Analysis of Certain Relevant Factors

47. If the Company's financial statements show losses from operations, explain the causes underlying these losses and what steps the Company has taken or is taking to address these causes.

48. Describe any trends in the Company's historical operating results. Indicate any changes now occurring in the underlying economics of the industry or the Company's business which, in the opinion of Management, will have a significant impact (either favorable or adverse) upon the Company's results of operations within the next 12 months, and give a rough estimate of the probable extent of the impact, if possible.

49. If the Company sells a product or products and has had significant sales during its last fiscal year, state the existing gross margin (net sales less cost of such sales as presented in accordance with generally accepted accounting principles) as a percentage of sales for the last fiscal year: __%. What is the anticipated gross margin for next year of operations? Approximately __%. If this is expected to change, explain. Also, if reasonably current gross margin figures are available for the industry, indicate these figures and the source or sources from which they are obtained.

50. Foreign sales as a percent of total sales for last fiscal year: __%. Domestic government sales as a percent of total domestic sales for last fiscal year: __%. Explain the nature of these sales, including any anticipated changes:

Offering Circular Model B

Item 1. Cover Page

The cover page of the offering circular shall include the following information:

(a) Name of the issuer;

(b) The mailing address of the issuer's principal executive offices including the zip code and the issuer's telephone number;

(c) Date of the offering circular;

(d) Description and amount of securities offered (Note: this description should include, for example, appropriate disclosure of redemption and conversion features of debt securities);

(e) The statement required by rule 253;

(f) The table(s) required by Item 2;

(g) The name of the underwriter or underwriters;

(h) Any materials required by the law of any state in which the securities are to be offered;

(i) If applicable, identify material risks in connection with the purchase of the securities; and

(j) Approximate date of commencement of proposed sale to the public.

Instruction: Where the name of the issuer is the same as the name of another well-known company or indicates a line of business in which the issuer is not engaged or is engaged to only a limited extent, a statement should be furnished to that effect. In some circumstances, however, disclosure may not be sufficient, and a change of name may be the only way to cure its misleading character.

Item 2. Distribution Spread

(a) The information called for by the following table shall be given, in substantially the tabular form indicated, on the outside front cover page of the offering circular as to all securities being offered (estimate, if necessary).

	Price to public	Underwriting discount and commissions	Proceeds to issuer or other persons
Per unit			
Total			

If the securities are to be offered on a best efforts basis, the cover page should set forth the termination date, if any, of the offering, any minimum required sale and any arrangements to place the funds received in an escrow, trust, or similar arrangement. The following tabular presentation of the total maximum and minimum securities to be offered should be combined with the table required above.

	Price to public	Underwriting discount and commissions	Proceeds to issuer or other persons
Total minimum			
Total maximum			

Instructions

1. The term *commissions* shall include all cash, securities, contracts, or anything else of value, paid, to be set aside, disposed of, or understandings with or for the benefit of any other persons in which any underwriter is interested, made in connection with the sale of such security.

2. Only commissions paid by the issuer in cash are to be indicated in the table. Commissions paid by other persons or any form of non-cash compensation shall be briefly identified in a note to the table with a cross-reference to a more complete description elsewhere in the offering circular.

3. Prior to the commencement of sales pursuant to regulation A, the issuer shall inform the Commission whether or not the amount of compensation to be allowed or paid to the underwriters, as described in the offering statement, has been cleared with the National Association of Securities Dealers, Inc.

4. If the securities are not to be offered for cash, state the basis upon which the offering is to be made.

5. If it is impracticable to state the price to the public, the method by which it is to be determined shall be explained.

(b) Any finder's fees or similar payments shall be disclosed on the cover page with a reference to a more complete discussion in the offering circular. Such disclosure should identify the finder, the nature of the services rendered and the nature of any relationship between the finder and the issuer, its officers, directors, promoters, principal stockholders and underwriters (including any affiliates thereof).

(c) The amount of the expenses of the offering borne by the issuer, including underwriting expenses to be borne by the issuer, should be disclosed in a footnote to the table.

Item 3. Summary Information, Risk Factors and Dilution

(a) Where appropriate to a clear understanding by investors, there should be set forth in the forepart of the offering circular, under an appropriate caption, a carefully organized series of short, concise paragraphs, summarizing the principal factors which make the offering one of high risk or speculative. Note: These factors may be due to such matters as an absence of an operating history of the issuer, an absence of profitable operations in recent periods, an erratic financial history, the financial position of the issuer, the nature of the business in which the issuer is engaged or proposes to engage, conflicts of interest with management, reliance on the efforts of a single individual, or the method of determining the market price where no market currently exists. Issuers should avoid generalized statements and include only those factors which are unique to the issuer.

(b) Where there is a material disparity between the public offering price and the effective cash cost to officers, directors, promoters and affiliated persons for shares acquired by them in a transaction during the past three years, or which they have a right to acquire, there should be included a comparison of the public contribution under the proposed public offering and the effective cash contribution of such persons. In such cases, and in other instances where the extent of the dilution makes it appropriate, the following shall be given: (1) The net tangible book value per share before and after the distribution; (2) the amount of the increase in such net tangible book value per share attributable to the cash payment made by purchasers of the shares being offered; and (3) the amount of the immediate dilution from the public offering price which will be absorbed by such purchasers.

Item 4. Plan of Distribution

(a) If the securities are to be offered through underwriters, give the names of the principal underwriters, and state the respective amounts underwritten. Identify each such underwriter having a material relationship to the issuer and state the nature of the relationship. State briefly the nature of the underwriters' obligation to take the securities.

(b) State briefly the discounts and commissions to be allowed or paid to dealers, including all cash, securities, contracts or other consideration to be received by any dealer in connection with the sale of the securities.

(c) Outline briefly the plan of distribution of any securities being issued which are to be offered through the selling efforts of brokers or dealers or otherwise than through underwriters.

(d) If any of the securities are to be offered for the account of security holders, indicate on the cover page the total amount to be offered for their account and include a cross-reference to a fuller discussion elsewhere in the offering circular. Such discussion should identify each selling security holder, state the amount owned by him, the amount offered for his account and the amount to be owned after the offering.

(e)(1) Describe any arrangements for the return of funds to subscribers if all of the securities to be offered are not sold; if there are no such arrangements, so state.

(2) If there will be a material delay in the payment of the proceeds of the offering by the underwriter to the issuer, the salient provisions in this regard and the effects on the issuer should be stated.

Instruction

Attention is directed to the provisions of rules 10b–9 (17 CFR 240.10b–9) and 15c2–4 (17 CFR 240.15c2–4) under the Securities Exchange Act of 1934. These rules outline, among other things, antifraud provisions concerning the return of funds to subscribers

and the transmission of proceeds of an offering to a seller.

Item 5. Use of Proceeds to Issuer

State the principal purposes for which the net proceeds to the issuer from the securities to be offered are intended to be used, and the approximate amount intended to be used for each such purpose.

Instructions

1. If any substantial portion of the proceeds has not been allocated for particular purposes, a statement to that effect shall be made together with a statement of the amount of proceeds not so allocated and how the registrant expects to employ such funds not so allocated.

2. Include a statement as to the use of the actual proceeds if they are not sufficient to accomplish the purpose set forth and the order of priority in which they will be applied. However, such statement need not be made if the underwriting arrangements are such that, if any securities are sold to the public, it can be reasonably expected that the actual proceeds of the issue will not be substantially less than the estimated aggregate proceeds to the issuer as shown under Item 2.

3. If any material amounts of other funds are to be used in conjunction with the proceeds, state the amounts and sources of such other funds.

4. If any material part of the proceeds is to be used to discharge indebtedness, describe the terms of such indebtedness. If the indebtedness to be discharged was incurred within one year, describe the use of the proceeds of such indebtedness.

5. If any material amount of the proceeds is to be used to acquire assets, otherwise than in the ordinary course of business, briefly describe and state the cost of the assets. If the assets are to be acquired from affiliates of the issuer or their associates, give the names of the persons from whom they are to be acquired and set forth the principle followed in determining the cost to the issuer.

6. The issuer may reserve the right to change the use of proceeds provided that such reservation is due to certain contingencies which are adequately disclosed.

Item 6. Description of Business

(a) Narrative description of business.

(1) Describe the business done and intended to be done by the issuer and its subsidiaries and the general development of the business during the past five years or such shorter period as the issuer may have been in business. Such description should include, but not be limited to, a discussion of the following factors if such factors are material to an understanding of the issuer's business:

(i) The principal products produced and services rendered and the principal markets for and method of distribution of such products and services.

(ii) The status of a product or service if the issuer has made public information about a new product or service which would require the investment of a material amount of the assets of the issuer or is otherwise material.

(iii) The estimated amount spent during each of the last two fiscal years on company-sponsored research and development activities determined in accordance with generally accepted accounting principles. In addition, state the estimated dollar amount spent during each of such years on material customer-sponsored research activities relating to the development of new products, services or techniques or the improvement of existing products, services or techniques.

(iv) The number of persons employed by the issuer, indicating the number employed full time.

(v) The material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, may have upon the capital expenditures, earnings and competitive position of the issuer and its subsidiaries. The issuer shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and for such further periods as the issuer may deem material.

(2) The issuer should also describe those distinctive or special characteristics of the issuer's operation or industry which may have a material impact upon the issuer's future financial performance. Examples of actors which might be discussed include dependence on one or a few major customers or suppliers (including suppliers of raw materials or financing), existing or probable governmental regulation, material terms of and/or expiration of material labor contracts or patents, trademarks, licenses, franchises, concessions or royalty agreements, unusual competitive conditions in the industry, cyclicality of the industry and anticipated raw material or energy shortages to the extent management may not be able to secure a continuing source of supply.

(3) The following requirement in subparagraph (i) applies only to issuers (including predecessors) which have not received revenue from operations during each of the three fiscal years immediately prior to the filing of the offering statement.

(i) Describe, if formulated, the issuer's plan of operation for the twelve months following the commencement of the proposed offering. If such information is not available, the reasons for its unavailability shall be stated. Disclosure relating to any plan should include, among other things, a statement indicating whether, in the issuer's opinion, the proceeds from the offering will satisfy its cash requirements and whether, in the next six months, it will be necessary to raise additional funds.

(ii) Any engineering, management or similar reports which have been prepared or provided for external use by the issuer or by a principal underwriter in connection with the proposed offering should be furnished to the Commission at the time of filing the offering statement or as soon as practicable thereafter. There should also be furnished at the same time a statement as to the actual or proposed use and distribution of such report or memorandum. Such statement should identify each class of persons who have received or will receive the report or memorandum, and state the number of copies distributed to each such class. If no such report or memorandum has been prepared, the Commission should be so informed in writing at the time the report or memorandum would otherwise have been submitted.

(b) Segment Data. If the issuer is required to include segment information in its financial statements, an appropriate cross-reference shall be included in the description of business.

Item 7. Description of Property

State briefly the location and general character of the principal plants, and other materially important physical properties of the issuer and its subsidiaries. If any such property is not held in fee or is held subject to any major encumbrance, so state and briefly describe how held.

Instruction

What is required is information essential to an investor's appraisal of the securities being offered. Such information should be furnished as will reasonably inform investors as to the suitability, adequacy, productive capacity and extent of utilization of the facilities used in the enterprise. Detailed descriptions of the physical characteristics of individual properties or legal descriptions by metes and bounds are not required and should not be given.

Item 8. Directors, Executive Officers and Significant Employees

(a) List the names and ages of each of the following persons stating his term of office and any periods during which he has served as such and briefly describe any arrangement or understanding between him and any other person(s) (naming such person(s)) pursuant to which he was or is to be selected to his office or position:

(1) Directors;

(2) Persons nominated to be chosen to become directors;

(3) Executive officers;

(4) Persons chosen to become executive officers;

(5) Significant employees.

Instructions

1. No nominee or person chosen to become a director or person chosen to be an executive officer who has not consented to act as such should be named in response to this item.

2. The term *executive officer* means the president, secretary, treasurer, any vice-president in charge of a principal business function (such as sales, administration, or finance) and any other person who performs similar policy making functions for the issuer.

3. The term *significant employee* means persons such as production managers, sales managers, or research scientists, who are not executive officers, but who make or are expected to make significant contributions to the business of the issuer.

(b) Family relationships. State the nature of any family relationship between any director, executive officer, person nominated or chosen by the issuer to become a director or executive officer or any significant employee.

Instruction

The term *family relationship* means any relationship by blood, marriage, or adoption, not more remote than first cousin.

(c) Business experience. Give a brief account of the business experience during the past five years of each director, person nominated or chosen to become a director or executive officer, and each significant employee, including his principal occupations and employment during that period and the name and principal business of any corporation or other organization in which such occupations and employment were carried on. When an executive officer or significant employee has been employed by the issuer for less than five years, a brief explanation should be included as to the nature of the responsibilities undertaken by the individual in prior positions to provide adequate disclosure of this prior business experience. What is required is information relating to the level of his professional competence which may include, depending upon the circumstances, such specific information as the size of the operation supervised.

(d) Involvement in certain legal proceedings. Describe any of the following events which occurred during the past five years and which are material to an evaluation of the ability or integrity of any director, person nominated to become a director or executive officer of the issuer.

(1) A petition under the Bankruptcy Act or any State insolvency law was filed by or against, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of such person, or any partnership in which he was general partner at or within 2 years before the time of such filing, or any corporation or business association of which he was an executive officer at or within two years before the time of such filing;

(2) Such person was convicted in a criminal proceeding (excluding traffic violations and other minor offenses).

Item 9. Remuneration of Directors and Officers

(a) Furnish, in substantially the tabular form indicated, the aggregate annual remuneration of each of the three highest paid persons who are officers or directors as a group during the issuer's last fiscal year. State the number of persons in the group referred to above without naming them.

Name of individual or identity of group	Capacities in remuneration was received	Aggregate remuneration

Instructions

1. In case of remuneration paid or to be paid otherwise than in cash, if it is impracticable to determine the cash value thereof, state in a note to the table the nature and amount thereof.

2. This item is to be answered on an accrual basis if practicable; if not so answered, state the basis used.

(b) Briefly describe all remuneration payments proposed to be made in the future pursuant to any ongoing plan or arrangement to the individuals and group specified in Item 9(a). The description should include a summary of how each plan operates, any performance formula or measure in effect (or the criteria used to determine payment amounts), the time periods over which the measurements of benefits will be determined, payment schedules, and any recent material amendments to the plan. Information need not be furnished with respect to any group life, health, hospitalization, or medical reimbursement plans which do not discriminate in scope, terms or operation in favor of officers or directors of the registrant and which are available generally to all salaried employees.

Item 10. Security Ownership of Management and Certain Securityholders

(a) Voting securities and principal holders thereof. Furnish the following information, in substantially the tabular form indicated, with respect to voting securities held of record by:

(1) Each of the three highest paid persons who are officers and directors of the issuer; Note—In the event none of the issuer's officers or directors have received a salary in the past twelve months, this item should be responded to for every officer and director;

(2) All officers and directors as a group;

(3) Each shareholder who owns more than 10% of any class of the issuer's securities, including those shares subject to outstanding options.

(1)	(2)	(3)	(4)	(5)
Title of class	Name and address of owner	Amount owned before the offering	Amount owned after the offering	Percent of class

Instruction

Column (4) need not be responded to if the information would be the same as that appearing under column (3).

(b) If, to the knowledge of the issuer, any other person holds or shares the power to vote or direct the voting of securities described pursuant to subsection (a) above, appropriate disclosure should be made. In addition, if any person other than those named pursuant to subsection (a) holds or shares the power to vote 10% or more of the issuer's voting securities, the information required by the table should be provided with respect to such person.

(c) Non-voting securities and principal holders thereof. Furnish the same information as required in subsection (a) above with respect to securities that are not entitled to vote.

(d) Options, warrants, and rights. Furnish the information required by the table as to options, warrants or rights to purchase securities from the issuer or any of its subsidiaries held by each of the individuals and referred to in subsection (a) above:

Name of holder	Title and amount securities called for by options, warrants or rights	Exercise price	Date of exercise

Instruction

Where the total market value of securities called for by all outstanding options, warrants or rights does not exceed $10,000 for any officer, director, or principal shareholder named in answer to this item, or $50,000 for all officers and directors as a group, this item need not be answered with respect to options, warrants or rights held by such person or group. If the issuer cannot ascertain the market value of its securities, the offering price may be used for purposes of this subsection. If, as is the case with offerings of debt securities, the offering price cannot be determined at the time of filing the offering statement, the issuer may utilize any reasonable method of valuation.

(e) List all parents of the issuer, showing the basis of control and as to each parent the percentage of voting securities owned or other basis of control by its immediate parent, if any.

Item 11. Interest of Management and Others in Certain Transactions

Describe briefly any transactions during the previous two years or any presently proposed transactions, to which the issuer or any of its subsidiaries was or is to be a party, in which any of the following persons had or is to have a direct or indirect material interest, naming such person and stating his relationship to the issuer, the nature of his interest in the transaction and, where practicable, the amount of such interest:

(1) Any director or officer of the issuer;

(2) Any nominee for election as a director;

(3) Any principal securityholder named in answer to Item 10(a);

(4) If the issuer was incorporated or organized within the past three years, any promoter of the issuer;

(5) Any relative or spouse of any of the foregoing persons, or any relative of such spouse, who has the same house as such person or who is a director or officer of any parent or subsidiary of the issuer.

Instructions

1. No information need be given in answer to this item as to any transaction where:

(a) The rates of charges involved in the transaction are determined by competitive bids, or the transaction involves the rendering of services as a common or contract carrier fixed in conformity with law or governmental authority;

(b) The transaction involves services as a bank depositary of funds, transfer agent, registrar, trustee under a trust indenture, or similar services;

(c) The amount involved in the transaction or a series of similar transactions, including all periodic installments in the case of any lease or other agreement providing for periodic payments or installments does not exceed $50,000; or

(d) The interest of the specified person arises solely from the ownership of securities of the issuer and the specified person receives no extra or special benefit not shared on a pro-rata basis by all of the holders of securities of the class.

2. It should be noted that this Item calls for disclosure of indirect as well as direct material interests in transactions. A person who has a position or relationship with a firm, corporation, or other entity which engages in a transaction with the issuer or its subsidiaries may have an indirect interest in such transaction by reason of such position or relationship. However, a person shall be deemed not to have a material indirect interest in a transaction within the meaning of this Item where:

(a) The interest arises only (i) from such person's position as a director of another corporation or organization (other than a partnership) which is a party to the transaction, or (ii) from the direct or indirect ownership by such person and all other persons specified in subparagraphs (1) through (5) above, in the aggregate, of less than a 10 percent equity interest in another person (other than a partnership) which is a party to the transaction, or (iii) from both such position and ownership;

(b) The interest arises only from such person's position as a limited partner in a partnership in which he and all other persons specified in (1) through (5) above had an interest of less than 10 percent; or

(c) The interest of such person arises solely from the holding of an equity interest (including a limited partnership interest but excluding a general partnership interest) or a creditor interest in another person which is a party to the transaction with the issuer or any of its subsidiaries and the transaction is not material to such other person.

3. Include the name of each person whose interest in any transaction is described and the nature of the relationships by reason of which such interest is required to be described. The amount of the interest of any specified person shall be computed without regard to the amount of the profit or loss involved in the transaction. Where it is not practicable to state the approximate amount of the interest, the approximate amount involved in the transaction shall be disclosed.

4. Information should be included as to any material underwriting discounts and commissions upon the sale of securities by the issuer where any of the specified persons was or is to be a principal underwriter or is a controlling person, or member, of a firm which was or is to be a principal underwriter. Information need not be given concerning ordinary management fees paid by underwriters to a managing underwriter pursuant to an agreement among underwriters the parties to which do not include the issuer or its subsidiaries.

5. As to any transaction involving the purchase or sale of assets by or to any issuer or any subsidiary, otherwise than in the ordinary course of business, state the cost of the assets to the purchaser and, if acquired by the seller within two years prior to the transaction, the cost thereof to the seller.

6. Information shall be furnished in answer to this Item with respect to transactions not excluded above which involve remuneration from the issuer or its subsidiaries, directly or indirectly, to any of the specified persons for services in any capacity unless the interest of such persons arises solely from the ownership individually and in the aggregate of less than 10 percent of any class of equity securities of another corporation furnishing the services to the issuer or its subsidiaries.

Item 12. Securities Being Offered

(a) If capital stock is being offered, state the title of the class and furnish the following information:

(1) Outline briefly: (i) Dividend rights; (ii) voting rights; (iii) liquidation rights; (iv) preemptive rights; (v) conversion rights; (vi) redemption provisions; (vii) sinking fund provisions; and (viii) liability to further calls or to assessment by the issuer.

(2) Briefly describe potential liabilities imposed on shareholders under state statutes or foreign law, e.g., to laborers, servants or employees of the registrant, unless such disclosure would be immaterial because the financial resources of the registrant are such as to make it unlikely that the liability will ever be imposed.

(b) If debt securities are being offered, outline briefly the following:

(1) Provisions with respect to interest, conversion, maturity, redemption, amortization, sinking fund or retirement.

(2) Provisions with respect to the kind and priority of any lien securing the issue, together with a brief identification of the principal properties subject to such lien.

(3) Provisions restricting the declaration of dividends or requiring the maintenance of any ratio of assets, the creation or maintenance of reserves or the maintenance of properties.

(4) Provisions permitting or restricting the issuance of additional securities, the withdrawal of cash deposited against such issuance, the incurring of additional debt, the release or substitution of assets securing the issue, the modification of the terms of the security, and similar provisions.

Instruction

In the case of secured debt there should be stated (i) the approximate amount of unbonded property available for use against the issuance of bonds, as of the most recent practicable date, and (ii) whether the securities being issued are to be issued against such property, against the deposit of cash, or otherwise.

(c) If securities described are to be offered pursuant to warrants, rights, or convertible securities, state briefly:

(1) The amount of securities called for by such warrants, convertible securities or rights;

(2) The period during which and the price at which the warrants, convertible securities or rights are exercisable;

(3) The amounts of warrants, convertible securities or rights outstanding; and

(4) Any other material terms of such securities.

(d) In the case of any other kind of securities, appropriate information of a comparable character.

Part F/S

The following financial statements of the issuer, or the issuer and its predecessors or any businesses to which the issuer is a successor shall be filed as part of the offering statement and included in the offering circular which is distributed to investors.

Such financial statements shall be prepared in accordance with generally accepted accounting principles (GAAP) in the United States.

Issuers which have audited financial statements because they prepare them for other purposes, shall provide them.

The Commission's Regulation S–X, 17 CFR 210.1 et seq. relating to the form, content of and requirements for financial statements shall not apply to the financial statements required by this part, except that if audited financial statements are filed, the qualifications and reports of an independent auditor shall comply with the requirements of Article 2 of Regulation S–X.

Issuers which are limited partnerships are required to also file the balance sheets of general partners: (1) If such general partner is a corporation, the balance sheet shall be as of the end of its most recently completed fiscal year; receivables from a parent or affiliate of such general partner (including notes receivable, but excluding trade receivables) should be deductions from shareholders equity of the general partner; where a parent or affiliate has committed to increase or maintain the general partner's capital, there shall also be filed the balance sheet of such parent or affiliate as of the end of its most recently completed fiscal year; (2) if such general partner is a partnership, its balance sheet as of the end of its most recently completed fiscal year; (3) if such general partner is a natural person, the net worth of such general partner(s) based on the estimated fair market value of their assets and liabilities, singly or in the aggregate shall be disclosed in the offering circular, and balance sheets of each of the individual general partners supporting such net worth shall be provided as supplemental information.

(1) Balance Sheet

As of a date within 90 days prior to filing the offering statement or such longer time, not exceeding 6 months, as the Commission may permit at the written request of the issuer upon a showing of good cause; for filings made after 90 days subsequent to the issuer's most recent fiscal year, the balance sheet shall be dated as of the end of the most recent fiscal year.

(2) Statements of Income, Cash Flows, and Other Stockholders Equity

For each of the 2 fiscal years preceding the date of the most recent balance sheet being filed, and for any interim period between the end of the most recent of such fiscal years and the date of the most recent balance sheet being filed, or for the period of the issuer's existence if less than the period above.

Income statements shall be accompanied by a statement that in the opinion of management all adjustments necessary for a fair statement of results for the interim period have been included. If all such adjustments

are of a normal recurring nature, a statement to that effect shall be made. If otherwise, there shall be furnished as supplemental information and not as part of the offering statement, a letter describing in detail the nature and amount of any adjustments other than normal recurring adjustments entering into the determination of results shown.

(3) Financial Statements of Businesses Acquired or To Be Acquired

(a) Financial statements for the periods specified in (c) below should be furnished if any of the following conditions exist:

(i) Consummation of a significant business combination accounted for as a purchase has occurred or is probable (for purposes of this rule, the term "purchase" encompasses the purchase of an interest in a business accounted for by the equity method); or

(ii) Consummation of a significant business combination to be accounted for as a pooling is probable.

(b) A business combination shall be considered significant if a comparison of the most recent annual financial statements of the business acquired or to be acquired and the registrant's most recent annual consolidated financial statements filed at or prior to the date of acquisition indicates that the business would be a significant subsidiary pursuant to the conditions specified in Rule 405 of Regulation C, 17 CFR 230.405.

(c)(i) The financial statements shall be furnished for the periods up to the date of acquisition, for those periods for which the registrant is required to furnish financial statements.

(ii) These financial statements need not be audited.

(iii) The separate balance sheet of the acquired business is not required when the registrant's most recent balance sheet filed is for a date after the acquisition was consummated.

(iv) If none of the conditions in the definitions of significant subsidiary in rule 405 exceeds 20%, income statements of the acquired business for only the most recent fiscal year and any interim period need be filed.

(d) If consummation of more than one transaction has occurred or is probable, the tests of significance shall be made using the aggregate impact of the businesses and the required financial statements may be presented on a combined basis, if appropriate.

(e) This paragraph (3) shall not apply to a business which is totally held by the registrant prior to consummation of the transaction.

(4) Pro Forma Financial Information

(a) Pro forma information shall be furnished if any of the following conditions exist (for purposes of this rule, the term *purchase* encompasses the purchase of an interest in a business accounted for by the equity method):

(i) During the most recent fiscal year or subsequent interim period for which a balance sheet of the registrant is required, a significant business combination accounted for as a purchase has occurred;

(ii) After the date of the registrant's most recent balance sheet, consummation of a significant business combination to be accounted for by either the purchase method or pooling of interests method of accounting has occurred or is probable.

(b) The provisions of paragraph (3)(b), (d) and (e) apply to this paragraph (4).

(c) Pro forma statements shall ordinarily be in columnar form showing condensed historical statements, pro forma adjustments, and the pro forma results and should include the following:

(i) If the transaction was consummated during the most recent fiscal year or in the subsequent interim period, pro forma statements of income reflecting the combined operations of the entities for the latest fiscal year and interim period, if any, or

(ii) If consummation of the transaction has occurred or is probable after the date of the most recent balance sheet, a pro forma balance sheet giving effect to the combination as of the date of the most recent balance sheet required by paragraph (b). For a purchase, pro forma statements of income reflecting the combined operations of the entities for the latest fiscal year and interim period, if any, and for a pooling of interests, pro forma statements of income for all periods for which income statements of the registrant are required.

Part III—Exhibits

Item 1 Index to Exhibits

(a) An index to the exhibits filed should be presented immediately following the cover page to part III.

(b) Each exhibit should be listed in the exhibit index according to the number assigned to it under Item 2 below.

(c) The index to exhibits should identify the location of the exhibit under the sequential page numbering system for this Form 1–A.

(d) Where exhibits are incorporated by reference, the reference shall be made in the index of exhibits.

Instructions

1. Any document or part thereof filed with the Commission pursuant to any Act administered by the Commission may, subject to the limitations of rule 24 of the Commission's Rules of Practice, be incorporated by reference as an exhibit to any offering statement.

2. If any modification has occurred in the text of any document incorporated by reference since the filing thereof, the issuer shall file with the reference a statement containing the text of such modification and the date thereof.

3. Procedurally, the techniques specified in rule 411(d) of Regulation C shall be followed.

Item 2 Description of Exhibits

As appropriate, the following documents should be filed as exhibits to the offering statement.

(1) *Underwriting Agreement*—Each underwriting contract or agreement with a principal underwriter or letter pursuant to which the securities are to be distributed; where the terms have yet to be finalized, proposed formats may be provided.

(2) *Charter and by-laws*—The charter and by-laws of the issuer or instruments corresponding thereto as presently in effect and any amendments thereto.

(3) *Instruments defining the rights of security holders*—(a) All instruments defining the rights of any holder of the issuer's securities, including but not limited to (i) holders of equity or debt securities being issued; (ii) holders of long-term debt of the issuer, and of all subsidiaries for which consolidated or unconsolidated financial statements are required to be filed.

(b) The following instruments need not be filed if the issuer agrees to provide them to the Commission upon request: (i) Instruments defining the rights of holders of long-term debt of the issuer and all of its subsidiaries for which consolidated financial statements are required to be filed if such debt is not being issued pursuant to this regulation A offering and the total amount of such authorized issuance does not exceed 5% of the total assets of the issuer and its subsidiaries on a consolidated basis; (ii) any instrument with respect to a class of securities which is to be retired or redeemed prior to the issuance or upon delivery of the securities being issued pursuant to this regulation A offering and appropriate steps have been taken to assure such retirement or redemption; and (iii) copies of instruments evidencing scrip certificates or fractions of shares.

(4) *Subscription agreement*—The form of any subscription agreement to be used in connection with the purchase of securities in this offering.

(5) *Voting trust agreement*—Any voting trust agreements and amendments thereto.

(6) *Material contracts*—(a) Every contract not made in the ordinary course of business which is material to the issuer and is to be performed in whole or in part at or after the filing of the offering statement or was entered into not more than 2 years before such filing. Only contracts need be filed as to which the issuer or subsidiary of the issuer is a party or has succeeded to a party by assumption or assignment or in which the issuer or such subsidiary has a beneficial interest.

(b) If the contract is such as ordinarily accompanies the kind of business conducted by the issuer and its subsidiaries, it is made in the ordinary course of business and need not be filed unless it falls within one or more of the following categories, in which case it should be filed except where immaterial in amount or significance: (i) Any contract to which directors, officers, promoters, voting trustees, security holders named in the offering statement, or underwriters are parties except where the contract merely involves the purchase or sale of current assets having a determinable market price, at such market price; (ii) any contract upon which the issuer's business is substantially dependent, as in the case of continuing contracts to sell the major part of the issuer's products or services or to purchase the major part of the issuer's requirements of goods, services or raw materials or any franchise or license or other agreement to use a patent, formula, trade secret, process or trade name upon which the issuer's business depends to a material extent; (iii) any contract calling for the acquisition or sale of any property, plant or equipment for a consideration exceeding 15% of such fixed assets of the issuer on a consolidated basis; or (iv) any material lease under which a part of the property described in the offering statement is held by the issuer.

(c) Any management contract or any compensatory plan, contract or arrangement including but not limited to plans relating to options, warrants or rights, pension, retirement or deferred compensation or bonus, incentive or profit sharing (or if not set forth in any formal document, a written description thereof) shall be deemed material and shall be filed except for the following: (i) Ordinary purchase and sales agency agreements; (ii) agreements with managers of stores in a chain organization or similar organization; (iii) contracts providing for labor or salesmen's bonuses or payments to a class of security holders, as such; (iv) any compensatory plan, contract or arrangement which pursuant to its terms is available to employees generally and which in operation provides for the same method of allocation of benefits between management and non-management participants.

(7) *Material foreign patents*—Each material foreign patent for an invention not covered by a United States patent. If a substantial part of the securities to be offered or if the proceeds therefrom have been or are to be used for the particular purposes of acquiring, developing or exploiting one or more material foreign patents or patent rights, furnish a list showing the number and a brief identification of each such patent or patent right.

(8) *Plan of acquisition, reorganization, arrangement, liquidation, or succession*—Any material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation or arrangement and any amendments thereto described in the offering statement. Schedules (or similar attachments) to these exhibits shall not be filed unless such schedules contain information which is material to an investment decision and which is not otherwise disclosed in the agreement or the offering statement. The plan filed shall contain a list briefly identifying the contents of all omitted schedules, together with an agreement to furnish supplementally a copy of any omitted schedule to the Commission upon request.

(9) *Escrow agreements*—Any escrow agreement or similar arrangement which has been executed in connection with the Regulation A offering.

(10) *Consents*—(a) Experts: The written consent of (i) any accountant, engineer, geologist, appraiser or any person whose profession gives authority to a statement made by them and who is named in the offering statement as having prepared or certified any part of the document or is named as having prepared or certified a report or evaluation whether or not for use in connection with the offering statement; (ii) the expert that authored any portion of a report quoted or summarized as such in the offering statement, expressly stating their consent to the use of such quotation or summary; (iii) any persons who are referenced as having reviewed or passed upon any information in the offering statement, and that such information is being included on the basis of their authority or in reliance upon their status as experts.

(b) Underwriters: A written consent and certification in the form which follows signed by each underwriter of the securities proposed to be offered. All underwriters may, with appropriate modifications, sign the same consent and certification or separate consents and certifications may be signed by any underwriter or group of underwriters.

Consent and Certification by Underwriter

1. The undersigned hereby consents to being named as underwriter in an offering statement filed with the Securities and Exchange Commission by (insert name of issuer) pursuant to regulation A in connection with a proposed offering of (insert title of securities) to the public.

2. The undersigned hereby certifies that it furnished the statements and information set forth in the offering statement with respect to the undersigned, its directors and officers or partners, that such statements and information are accurate, complete and fully responsive to the requirements of Parts I, II and III of the Offering Statement thereto, and do not omit any information required to be stated therein with respect of any such persons, or necessary to make the statements and information therein with respect to any of them not misleading.

3. If Preliminary Offering Circulars are distributed, the undersigned hereby undertakes to keep an accurate and complete record of the name and address of each person furnished a Preliminary Offering Circular and, if such Preliminary Offering Circular is inaccurate or inadequate in any material respect, to furnish a revised Preliminary Offering Circular or a Final Offering Circular to all persons to whom the securities are to be sold at least 48 hours prior to the mailing of any confirmation of sale to such persons, or to send such a circular to such persons under circumstances that it would normally be received by them 48 hours prior to their receipt of confirmation of the sale.

(Underwriter)
By _____

Date ___/___/___

(d) All written consents shall be dated and manually signed.

(11) *Opinion re legality*—An opinion of counsel as to the legality of the securities covered by the Offering Statement, indicating whether they will when sold, be legally issued, fully paid and non-assessable, and if debt securities, whether they will be binding obligations of the issuer.

(12) *Sales Material*—Any material required to be filed by virtue of rule 256.

(13) *"Test the Water" Material*—Any material published under the authorization of rule 254.

(14) *Additional exhibits*—Any additional exhibits which the issuer may wish to file, which shall be so marked as to indicate clearly the subject matters to which they refer.

Signatures

The issuer has duly caused this offering statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of _____, State of _____, on _____, 19___.

Instructions

1. The offering statement shall be signed by the issuer, its Chief Executive Officer, Chief Financial Officer, a majority of the members of its board of directors or other governing instrumentality, and each person, other than the issuer, for whose account any of the securities are to be offered. If a signature is by a person on behalf of any other person, evidence of authority to sign shall be filed with the offering statement, except where an executive officer signs on behalf of the issuer. Where the issuer is a limited partnership, the offering statement shall also be signed by a majority of the board of directors of any corporate general partner.

2. The name of each person signing the offering statement shall be typed or printed beneath the signature.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

21. The authority citation for part 240 continues to read as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 77ttt, 78c, 78d, 78i, 78j, 78*l*, 78m, 78n, 78*o*, 78p, 78s, 78w, 78x, 79q, 79t, 80a–29, 80a–37, unless otherwise noted.

§ 240.3b–6 [Amended]

22. By amending § 240.3b–6 paragraph (b)(1)(i) after the words "Securities Act of 1933" add the words ", offering statement under regulation A", and in paragraph (b)(2)(i) after the parenthetical "(§ 229.303 of this chapter)" add the words "or regulation S–B (§ 228.303 of this chapter)" and after the words "rule 3–20(c)" add the words "of regulation S–X (§ 210.3–20(c)".

23. Section 240.12b–2 is amended by adding the definition of "small business issuer" in the appropriate alphabetical order to read as follows:

§ 240.12b–2 Definitions.

* * * * *

Small business issuer. The term *small business issuer* means an entity that meets the following criteria:

(1) Had revenues of less than $15,000,000 during its last fiscal year;

(2) Is not a foreign private issuer or a foreign government;

(3) Is not an investment company; and

(4) Is not a wholly owned subsidiary of a non-small business issuer.

* * * * *

24. By amending paragraph (b)(5)(ii) of § 240.14a–3 to add the words "or, if applicable, a plan of operation required by Item 303(a) of regulation S–B (§ 228.303(a) of this chapter)" after the words "(§ 229.303 of this chapter)" and to add the following Note after the introductory text of paragraph (b) to read as follows:

§ 240.14a–3 Information to be furnished to security holders.

* * * * *

(b) * * *

Note to Small Business Issuers—A *small business issuer*, defined under rule 12b–2 of the Exchange Act (§ 240.12b–2), shall refer to the disclosure items in regulation S–B (§ 228.10 *et seq.* of this chapter) rather than regulation S–K (§ 229.10 *et seq.*). If there is no comparable disclosure item in regulation S–B, a small business issuer need not provide the information requested. A small business issuers shall provide the information in item 310(a) of regulation S–B in lieu of the financial information required by rule 14a–3(b)(1) (§ 240.14a–3(b)(1)).

* * * * *

25. By adding Note F to § 240.14a–101 to read as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

Notes:

* * * * *

F. Note to Small Business Issuers—Registrants and acquirees that meet the definition of "small business issuer" under rule 12b–2 of the Exchange Act (§ 240.12b–2) shall refer to the disclosure items in regulation S–B (§ 228.10 *et seq.* of this chapter) and not regulation S–K (§ 229.10 *et seq.* of this chapter). If there is no comparable disclosure item in regulation S–B, small business issuers need not provide the information requested. Small business issuers shall provide the financial information in item 310 of regulation S–B in lieu of the financial statements required in schedule 14A.

* * * * *

26. By adding the following text to the end of the introductory Note to § 240.14c–101 to read as follows:

§ 240.14c–101 Schedule 14C. Information required in information statement.

Note. * * * Registrants and acquirees that meet the definition of "small business issuer" under rule 12b–2 of the Exchange Act (§ 240.12b–2) shall refer to the disclosure items in regulation S–B (§ 228.10 *et seq.* of this chapter) and not regulation S–K (§ 229.10 *et seq.* of this chapter). If there is no comparable disclosure item in regulation S–B, small business issuers need not provide the information requested. Small business issuers shall provide the financial information in Item 310 of regulation S–B in lieu of any financial statements required by Item 1 of § 240.14c–101.

* * * * *

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

27. The authority for part 249 continues to read as follows:

Authority: 15 U.S.C. 78a, *et seq.*, unless otherwise noted.

28. By adding § 249.210b to read as follows:

§ 249.210b Form 10SB, optional form for the registration of securities of a small business issuer.

A "small business issuer," defined in rule 12b–2 (§ 240.12b–2 of this chapter) may use Form 10SB to register a class of its securities under section 12(b) or (g) of the Exchange Act.

Note: The text and instructions of Form 10SB will not appear in the Code of Federal Regulations.

Name of each exchange on which each class is to be registered

Securities to be registered under Section 12(g) of the Act:

(Title of class)

(Title of class)

General Instructions

A. *Use of Form 10SB*

This Form may be used by a "small business issuer," defined in rule 12b–2 (§ 240.12b–2) of the Securities Exchange Act of 1934 (the "Exchange Act"), to register a class of securities under section 12 (b) or (g) of the Exchange Act.

B. *Application of General Rules and Regulations*

The General Rules and Regulations under the Exchange Act (§ 240.0–1 *et seq.*), particularly regulation 12B (§ 240.12b–1 *et seq.*) contain certain general requirements for reports on any form which should be carefully read and observed in the preparation and filing of reports on this Form.

C. *Signature and Filing of Registration Statement*

1. File three "complete" copies and five "additional" copies of the registration statement with the Commission and file at least one complete copy with each exchange on which the securities will be registered. A "complete" copy includes financial statements, exhibits and all other papers and documents. An "additional" copy excludes exhibits.

2. Manually sign at least one copy of the report filed with the Commission and each exchange; other copies should have typed or printed signatures.

D. *Information to be Incorporated by Reference*

Refer to rule 12b–23 (§ 240.12b–23 of this chapter) if information will be incorporated by reference from other documents in answer or partial answer to any item of this Form.

Information Required in Registration Statement

Item 1. Description of Business.
Furnish the information required by item 101 of regulation S–B.
Item 2. Management's Discussion and Analysis or Plan of Operation.
Furnish the information required by item 303 of regulation S–B.
Item 3. Description of Property.
Furnish the information required by item 102 of regulation S–B.
Item 4. Security Ownership of Certain Beneficial Owners and Management.
Furnish the information required by item 403 of regulation S–B.
Item 5. Directors, Executive Officers, Promoters and Control Persons.
Furnish the information required by item 401 of regulation S–B.
Item 6. Executive Compensation.
Furnish the information required by item 402 of regulation S–B.
Item 7. Certain Relationships and Related Transactions.
Furnish the information required by item 404 of regulation S–B.
Item 8. Legal Proceedings.
Furnish the information required by item 103 of regulation S–B.
Item 9. Market for Common Stock and Related Stockholder Matters.
Furnish the information required by item 201 of regulation S–B.
Item 10. Recent Sales of Unregistered Securities.
Furnish the information required by item 701 of regulation S–B.
Item 11. Description of Securities.
Furnish the information required by item 202 of regulation S–B.
Item 12. Indemnification of Directors and Officers.
Furnish the information required by item 702 of regulation S–B.
Item 13. Financial Statements.
Furnish the information required by item 310 of regulation S–B.
Item 14. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure.
Furnish the information required by item 304 of regulation S–B.
Item 15. Financial Statements and Exhibits.
(a) List separately all financial statements filed as part of the registration statement.
(b) Furnish the exhibits required by item 601 of regulation S–B.

Signatures

In accordance with section 12 of the Securities Exchange Act of 1934, the registrant caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized.

If the following documents are incorporated by reference, briefly describe them and identify the part of the Form 10–KSB (e.g., part I, part II, etc.) into which the document is incorporated: (1) Any annual report to security holders; (2) any proxy or information statement; and (3) any prospectus filed pursuant to rule 424 (b) or (c) of the Securities Act of 1933 ("Securities Act"). The listed documents should be clearly described for identification purposes (e.g., annual report to security holders for fiscal year ended December 24, 1990).

General Instructions

A. Use of Form 10–KSB

This Form may be used by a "small business issuer," defined in rule 12b–2 of the Exchange Act, for its annual and transitional reports under section 13 or 15(d) of that Act. Annual reports on this form shall be filed within 90 days after the end of the fiscal year covered by the report. Transition reports shall be filed within the time period specified in rules 13a–10 or 15d–10 of the Exchange Act (§§ 240.13a–10 or 240.15d–10 of this chapter).

B. Application of General Rules and Regulations

The General Rules and Regulations under the Exchange Act (§ 240.0–1 *et seq.*), particularly regulation 12B (§ 240.12b–1 *et seq.*) contain certain general requirements for reports on any form which should be carefully read and observed in the preparation and filing of reports on this Form.

C. Signature and Filing of Report

1. File three "complete" copies and five "additional" copies of the registration statement with the Commission and file at least one complete copy with each exchange on which the securities will be registered. A "complete" copy includes financial statements, exhibits and all other papers and documents. An "additional" copy excludes exhibits. One of the copies filed with the Commission and each exchange should be manually signed; all other copies should have typed or printed signatures.

2. Who must sign: the small business issuer, its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer and at least the majority of the board of directors or persons performing similar functions. If the issuer is a limited partnership then the general partner and a majority of its board of directors if a corporation. Any person who occupies more than one of the specified positions shall indicate each capacity in which he signs the report. See rule 12b–11 concerning manual signatures under powers of attorney.

D. Information as to Employee Stock Purchase, Savings and Similar Plans

Separate annual and other reports need not be filed under section 15(d) of the Exchange Act for any employee stock purchase, savings or similar plan if the issuer of the securities offered under the plan furnishes to the Commission the information and documents specified in the rule 15d–21 of the Exchange Act.

E. Information to be Incorporated by Reference

1. Refer to rule 12b–23 (§ 240.12b–23 of this chapter) if information will be incorporated by reference from other documents in answer or partial answer to any item of this Form.

2. The information called for in parts I and II of this Form, Items 1–6, may be incorporated by reference from:

(a) the registrant's annual report to security holders furnished to the Commission under rule 14a–3(b) or rule 14c–3(a) of the Exchange Act (§§ 240.14a–3(b), 240.14c–3(a) of this chapter); or

(b) the registrant's annual report to shareholders if it contains the information required by rule 14a–3 (§ 240.14–3 of this chapter).

3. The information required by part III may be incorporated by reference from the registrant's definitive proxy statement (filed or to be filed in accordance with § 240.14a–101, schedule 14A) or definitive information statement (filed or to be filed pursuant to § 240.14c–101, schedule 14C) which involves the election of directors, if such definitive proxy or information statement is filed with the Commission not later than 120 days after the end of the fiscal year covered by this Form. If the definitive proxy or information statement is not filed within the 120-day period, the information called for in part III information must be filed as part of the Form 10–KSB, or as an amendment to the Form 10–KSB under cover of Form 8 (§ 249.460 of this chapter), not later than the end of the 120-day period.

4. No item numbers of captions or items need be contained in the material incorporated by reference into the report. However, the registrant's attention is directed to rule 12b–23(b) of the Exchange Act (§ 240.12b–23(b)) regarding the specific disclosure required in the report concerning information incorporated by reference. When the registrant combines all of the information in parts I and II of this Form by incorporation by reference from the registrant's annual report to security holders and all of the information in part III of this Form by incorporating by reference from a definitive proxy statement or information statement involving the election of directors, then this Form shall consist of the facing or cover page, those sections incorporated from the annual report to security holders, the proxy or information statement, and the information, if any, required by part IV of this Form, signatures and a cross-reference sheet setting forth the item numbers and captions in parts I, II and III of this Form and page and/or pages in the referenced materials where the corresponding information appears.

F. Integrated Reports to Security Holders

Annual reports to security holders may be combined with the required information of this Form and will be suitable for filing with the Commission if the following conditions are satisfied:

1. The combined report contains complete answers to all items required by Form 10–KSB. When responses to a certain item of required disclosure are separated within the combined report, an appropriate cross-reference should be made. If the information required by part III of Form 10–KSB is omitted by virtue of General Instruction E, a definitive proxy or information statement shall be filed.

2. The cover page and required signatures are included. A cross-reference sheet should be filed indicating the location of information required by items of the Form.

G. Omission of Information by Certain Wholly-Owned Subsidiaries

If, on the date of the filing of its report on Form 10–KSB, the registrant meets the conditions specified in paragraph (1) below, then it may furnish the abbreviated narrative disclosure specified in paragraph (2) below.

1. Conditions for availability of relief specified in paragraph (2) below.

(a) All of the registrant's equity securities are owned, either directly or indirectly, by a single person which is a reporting company and which has filed all the material required to be filed under sections 13, 14 or 15(d), as applicable, and which is named in conjunction with the registrant's description of its business;

(b) During the past thirty-six months and any subsequent period of days, there has not been any material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within thirty days, with respect to any indebtedness of the registrant or its subsidiaries, and there has not been any material default in the payment of rental under material long-term leases; and

(c) There is prominently set forth on the cover page of the Form 10–KSB, a statement that the registrant meets the conditions set forth in General Instruction G(1) (a) and (b) of Form 10–KSB and therefore filing this Form with the reduced disclosure format.

2. Registrants meeting the conditions specified in paragraph 1 above are entitled to the following relief:

(a) Such registrants may omit the information called for by Item 303(b), Management's Discussion and Analysis, if required by the Instruction to that Item, provided that the registrant includes in the Form 10–KSB a narrative analysis of the results of operations explaining the reasons for material changes in the amount of revenue and expense items between the most recent fiscal year presented and the fiscal year immediately preceding it. Explanations of material changes should include, but not be limited to, changes in the various elements which determine revenue and expense levels, such as unit sales volume, prices charged and paid, production levels, production cost variances, labor costs and discretionary spending programs. In addition, the analysis should include an explanation of the effect of any changes in accounting principles and practices or method of application that have a material effect on net income as reported.

(b) Such registrants may omit the list of subsidiaries exhibit required by Item 601 of regulation S–B.

(c) Such registrants may omit the information called for by the following Items: Item 4, Submission of Matters to a Vote of Security Holders; Item 10 Directors and Executive Officers, etc.; Item 11, Executive Compensation; Item 12, Security Ownership of Certain Beneficial Owners, etc.; Item 13, Certain Relationships and Related Transactions.

Part I

Item 1. Description of Business.
Furnish the information required by item 101 of regulation S–B.
Item 2. Description of Property.
Furnish the information required by item 102 of regulation S–B.
Item 3. Legal Proceedings.
Furnish the information required by item 103 of regulation S–B.
Item 4. Submission of Matters to a Vote of Security Holders.
If any matter was submitted during the fourth quarter of the fiscal year covered by this report to a vote of security holders, through the solicitation of proxies or otherwise, furnish the following information:

(a) The date of the meeting and whether it was an annual or special meeting.

(b) If the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

(c) A brief description of each other matter voted upon at the meeting and the number of affirmative votes and the number of negative votes cast with respect to each such matter.

(d) A description of the terms of any settlement between the registrant and any other participant (as defined in rule 14a–11 of regulation A under the Act) terminating any solicitation subject to rule 14a–11, including the cost or anticipated cost to the registrant.

Instructions to Item 4

1. If any matter has been submitted to a vote of security holders otherwise than at a meeting of such security holders, corresponding information with respect to such submission should be furnished. The solicitation of any authorization or consent (other than a proxy to vote at a shareholders' meeting) with respect to any matter shall be deemed a submission of such matter to a vote of security holders within the meaning of this item.

2. Paragraph (a) need be answered only if paragraph (b) or (c) is required to be answered.

3. Paragraph (b) need not be answered if (i) proxies for the meeting were solicited pursuant to regulation 14A under the Act, (ii) there was no solicitation in opposition to the management's nominees as listed in the proxy statement, and (iii) all of such nominees were elected. If the registrant did not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect in answer to paragraph (b) will suffice as an answer thereto.

4. Paragraph (c) need not be answered as to procedural matters or as to the selection or approval of auditors.

5. If the registrant has furnished to its security holders proxy soliciting material containing the information called for by paragraph (d), the paragraph may be answered by reference to the information contained in such material.

6. If the registrant published a report containing all of the information called for by this item, the item may be answered by reference to the information in that report.

Part II

Item 5. Market for Common Stock and Related Stockholder Matters.
Furnish the information required by item 201 of regulation S–B.
Item 6. Management's Discussion and Analysis or Plan of Operation.
Furnish the information required by item 303 of regulation S–B.
Item 7. Financial Statements.
Furnish the information required by item 310(a) of regulation S–B.
Item 8. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.
Furnish the information required by item 304 of regulation S–B.

Part III

Item 9. Directors, Executive Officers, Promoters and Control Persons; Compliance With section 16(a) of the Exchange Act.
Furnish the information required by items 401 and 405 of regulation S–B.

Instruction to Item 9

Checking the box provided on the cover page of this Form to indicate that item 405 disclosure of delinquent Form 3, 4, or 5 filers is not contained herein is intended to facilitate Form processing and review. Failure to provide such indication will not create liability for violation of the federal securities laws. The space should be checked only if there is no disclosure in this Form of reporting person delinquencies in response to item 405 of regulation S–B (§ 228.405 of this chapter) and the registrant, at the time of filing of the Form 10–KSB, has reviewed the information necessary to ascertain, and has determined that, item 405 disclosure is not expected to be contained in Part III of the Form 10–KSB or incorporated by reference.

Item 10. Executive Compensation.
Furnish the information required by item 402 of regulation S–B.
Item 11. Security Ownership of Certain Beneficial Owners and Management.
Furnish the information required by item 403 of regulation S–B.

Item 12. Certain Relationships and Related Transactions.

Furnish the information required by item 404 of regulation S–B.

Item 13. Exhibits and Reports on Form 8–K.

(a) Furnish the exhibits required by item 601 of regulation S–B. Where any financial statement or exhibit is incorporated by reference, the incorporation by reference shall be set forth in the list required by this item. See Exchange Act rule 12b–23 (§ 240.12b–23 of this chapter).

(b) Reports on Form 8–K. State whether any reports on Form 8–K were filed during the last quarter of the period covered by this report, listing the items reported, any financial statements filed and the dates of such reports.

Signatures

In accordance with section 13 or 15(d) of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Supplemental Information to be Furnished With Reports Filed Pursuant to Section 15(d) of the Exchange Act By Non-reporting Issuers

(a) Except to the extent that the materials enumerated in (1) and/or (2) below are specifically incorporated into this Form by reference (in which case, see rule 12b–23(b)), every issuer which files an annual report on this Form under section 15(d) of the Exchange Act shall furnish the Commission for its information, at the time of filing its report on this Form, four copies of the following:

(1) Any annual report to security holders covering the registrant's last fiscal year; and

(2) Every proxy statement, form of proxy or other proxy soliciting material sent to more than ten of the registrant's security holders with respect to any annual or other meeting of security holders.

(b) The Commission will not consider the material to be "filed" or subject to the liabilities of section 18 of the Exchange Act, except if the issuer specifically incorporates it in its annual report on this Form by reference.

(c) If no such annual report or proxy material has been sent to security holders, a statement to that effect shall be included under this caption. If such report or proxy material is to be furnished to security holders subsequent to the filing of the annual report on this Form, the registrant shall so state under this caption and shall furnish copies of such material to the Commission when it is sent to security holders.

30. Section 249.308b is added to read as follows:

§ 249.308b Form 10–QSB, optional form for quarterly and transition reports of small business issuers under sections 13 or 15(d) of the Securities Exchange Act of 1934 ("Exchange Act").

A "small business issuer," defined in rule 12b–2, may use this Form for its transition and quarterly reports under section 13 or 15(d) of the Exchange Act and rules 13a–13 and 15d–13 (§§ 240.13a–13 or 240.15d–13 of this chapter). A small business issuer shall file a quarterly report on this form within 45 days after the end of each of the first three fiscal quarters of each fiscal year. No report need be filed for the fourth quarter of any fiscal year. Transition reports shall be filed in accordance with the requirements set forth in rule 13a–10 or rule 15d–10.

Note: The text and instructions of Form 10–QSB will not appear in the Code of Federal Regulations.

Applicable Only to Corporate Issuers

State the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: _____

General Instructions

A. *Use of Form 10–QSB*

1. A *small business issuer*, defined in rule 12b–2, may use this Form for its transition and quarterly reports under section 13 or 15(d) of the Exchange Act and rules 13a–13 and 15d–13 (§§ 240.13a–13 and 240.15d–13 of this chapter). A small business issuer shall file a quarterly report on this form within 45 days after the end of each of the first three fiscal quarters of each fiscal year. No report need be filed for the fourth quarter of any fiscal year. Transition reports shall be filed in accordance with the requirements set forth in rule 13a–10 or rule 15d–10.

B. *Application of General Rules and Regulations*

1. The General Rules and Regulations under the Exchange Act (§ 240.0–1 *et seq.*), particularly regulation 12B (§ 240.12b–1 *et seq.*) contain certain general requirements for reports on any form which should be carefully read and observed in the preparation and filing of reports on this Form.

C. *Incorporation by Reference*

1. If the registrant makes available to its stockholders or otherwise publishes, within the period prescribed for filing the report, a document or statement containing information meeting some or all of the requirements of part I of this form, the information may be incorporated by reference from such published document or statement, in answer or partial answer to any item or items of part I of this form provided copies of the document or statement are filed as an exhibit to part I of the report on this form.

2. Other information may be incorporated by reference in answer or partial answer to any item or items of part II of this form in accordance with the provisions of rule 12b–23 of the Exchange Act.

D. *Integrated Reports to Security Holders*

Quarterly reports to security holders may be combined with the required information of Form 10–QSB and will be suitable for filing with the Commission if the following conditions are satisfied:

1. The combined report contains full and complete answers to all items required by part I of this form. When responses to a certain item of required disclosure are separated within the combined report, an appropriate cross-reference should be made.

2. If not included in the combined report, the cover page, appropriate responses to part II and the required signatures shall be included in the Form 10–QSB. Additionally, as appropriate, a cross-reference sheet should be filed indicating the location of information required by items of the form.

E. *Filed Status of Information Presented*

1. Under Rules 13a–13(d) and 15d–13(d) of the Exchange Act (§§ 240.13a–13(d), 240.15d–13(d) of this chapter), the information presented in satisfaction of the requirements of items 1 and 2 of part I of this form, whether included directly in a report on this form, incorporated therein by reference from a report, document or statement filed as an exhibit to part I of this form pursuant to Instruction D(1) above, included in an integrated report pursuant to Instruction D above, or contained in a statement regarding computation of per share earnings or a letter regarding a change in accounting principles filed as an exhibit to part I under item 601 of Regulation S–B (§ 228.601 of this chapter) shall not be deemed filed for the purpose of section 18 of the Exchange Act or otherwise subject to the liabilities of that section of the Act but shall be subject to the other provisions of the Act.

2. Information presented in satisfaction of the requirements of this form other than those of items 1 and 2 or part I shall be deemed filed for the purpose of section 18 of the Exchange Act; except that, where information presented in response to item 1 or 2 of part I (or an exhibit thereto) is also used to satisfy part II requirements through incorporation by reference, only that portion of part I (or exhibit thereto) consisting of the information required by part II shall be deemed so filed.

F. *Signature and Filing of Report*

1. File three "complete" copies and five "additional" copies of the registration statement with the Commission and file at least one complete copy with each exchange on which the securities will be registered. A "complete" copy includes financial statements, exhibits and all other papers and documents. An "additional" copy excludes exhibits.

2. Manually sign at least one copy of the report filed with the Commission and each exchange; other copies should have typed or printed signatures. In the case where the principal financial or chief accounting officer is also authorized to sign on behalf of the registrant, one signature is acceptable provided that the registrant clearly indicates the dual responsibilities of the signatory.

G. *Omission of Information by Certain Wholly Owned Subsidiaries*

If, on the date of the filing of its Form 10–QSB, the registrant meets the conditions in paragraph (1) below, then it may omit the information in paragraph (2) below.

1. Conditions for availability of relief specified in paragraph (2) below:

(a) All of the registrant's equity securities are owned, either directly or indirectly, by a single person which is a reporting company and which has filed all the material required to be filed pursuant to section 13, 14 or 15(d) of the Exchange Act.

(b) During the past thirty-six calendar months and any later period, there has not been any material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within thirty days, with respect to any indebtedness of the small business issuer, and there has not been any material default in the payment of rentals under material long-term leases; and

(c) There is prominently set forth, on the cover page of the Form 10-QSB, a statement that the registrant meets the conditions set forth in this instruction and is therefore filing this form with the reduced disclosure format.

2. Registrants meeting the conditions in paragraph (1) above are entitled to:

(a) Omit the information called for by item 303 of Regulation S–B (§ 228.303 of this chapter), Management's Discussion and Analysis provided that the issuer includes in the Form 10–QSB a management's narrative analysis of the results of operations explaining the reasons for material changes in the amount of revenue and expense items between the most recent fiscal year-to-date period presented and the corresponding year-to-date period in the preceding fiscal year. Explanations of material changes should include, but not be limited to, changes in the various elements which determine revenue and expense levels such as unit sales volume, prices charged and paid, production levels, production cost variances, labor costs and discretionary spending programs. In addition, the analysis should include an explanation of the effect of any changes in accounting principles and practices or method of application that have a material effect on net income as reported.

(b) Such registrants may omit the information called for by the following items in part II: Items 2, 3 and 4.

Part I—Financial Information

Item 1. Financial Statements.

Furnish the information required by Item 310(b) of regulation S–B.

Item 2. Management's Discussion and Analysis or Plan of Operation.

Furnish the information required by Item 303 of regulation S–B.

Part II—Other Information

Instruction to Part II

Any item which is inapplicable or to which the answer is negative may be omitted and no reference thereto need be made in the report. If substantially the same information has been previously reported by the registrant, an additional report of the information on this form need not be made. The term "previously reported" is defined in rule 12b–2 of the Exchange Act. A separate response need not be presented in Part II where information called for is already disclosed in the financial information in Part I and is incorporated by reference into part II of the report by means of a statement to that effect in part II which specifically identifies the incorporated information.

Item 1. Legal Proceedings

Furnish the information required by item 103 of regulation S–B. As to proceedings that terminated during the period covered by this report, furnish information similar to that required by item 103 of regulation S–B.

Instruction to Item 1

A legal proceeding need only be reported in the Form 10–QSB filed for the quarter in which it first became a reportable event and in subsequent quarters in which there have been material developments. Subsequent Form 10–QSB filings in the same fiscal year in which a legal proceeding or a material development is reported should reference any previous reports in that year.

Item 2. Changes in Securities

(a) If the instruments defining the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved and state briefly the general effect of such modification upon the rights of holders of such securities.

(b) If the rights evidenced by any class of registered securities have been materially limited or qualified by the issuance or modification of any other class of securities, state briefly the general effect of the issuance or modification of such other class of securities upon the rights of the holders of the registered securities.

Instruction to Item 2

1. Working capital restrictions and other limitations upon the payment of dividends are to be reported.

Item 3. Defaults Upon Senior Securities

(a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within 30 days, with respect to any indebtedness of the small business issuer exceeding 5 percent of the total assets of the issuer identify the indebtedness and state the nature of the default. In the case of such a default in the payment of principal, interest, or a sinking or purchase fund installment, state the amount of the default and the total arrearage on the date of filing this report.

Instruction to Item 3(a)

1. This paragraph refers only to events which have become defaults under the governing instruments, i.e., after the expiration of any period of grace and compliance with any notice requirements.

(b) If any material arrearage in the payment of dividends has occurred or if there has been any other material delinquency not cured within 30 days, with respect to any class of preferred stock of the registrant which is registered or which ranks prior to any class of registered securities, or with respect to any class of preferred stock of any significant subsidiary of the registrant, give the title of the class and state the nature of the arrearage or delinquency. In the case of such a default in the payment of dividends,

state the amount and the total arrearage on the date of filing this report.

Instruction to Item 3

1. Item 3 need not be answered as to any default or arrearage with respect to any class of securities all of which is held by, or for the account of, the registrant or its totally held subsidiaries.

Item 4. Submission of Matters to a Vote of Security Holders

If any matter was submitted to a vote of security holders, through the solicitation of proxies or otherwise, furnish the following information:

(a) The date of the meeting and whether it was an annual or special meeting.

(b) If the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

(c) A brief description of each other matter voted upon at the meeting and the number of affirmative votes and the number of negative votes cast with respect to each such matter.

(d) A description of the terms of any settlement between the registrant and any other participant (as defined in rule 14a–11 of regulation A under the Exchange Act) terminating any solicitation subject to rule 14a–11, including the cost or anticipated cost to the registrant.

Instructions to Item 4

If any matter has been submitted to a vote of security holders otherwise than at a meeting of such security holders, corresponding information with respect to such submission should be furnished. The solicitation of any authorization or consent (other than a proxy to vote at a shareholders' meeting) with respect to any matter shall be deemed a submission of such matter to a vote of security holders within the meaning of this item.

2. Paragraph (a) need be answered only if paragraph (b) or (c) is required to be answered.

3. Paragraph (b) need not be answered if (i) proxies for the meeting were solicited pursuant to regulation 14A under the Exchange Act, (ii) there was no solicitation in opposition to the management's nominees as listed in the proxy statement, and (iii) all of such nominees were elected. If the registrant did not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect in answer to paragraph (b) will suffice as an answer thereto.

4. Paragraph (c) need not be answered as to procedural matters or as to the selection or approval of auditors.

5. If the registrant has furnished to its security holders proxy soliciting material containing the information called for by paragraph (d), the paragraph may be answered by reference to the information contained in such material.

6. If the registrant has published a report containing all of the information called for by this item, the item may be answered by reference to the information in that report.

Item 5. Other Information

(a) The registrant may, at its option, report under this item any information, not previously reported in a report on Form 8–K, with respect to which information is not otherwise called for by this form. If disclosure of such other information is made under this item, it need not be repeated in a Form 8–K which would otherwise be required to be filed with respect to such information or in a subsequent report on Form 10–QSB.

Item 6. Exhibits and Reports on Form 8–K

(a) Furnish the exhibits required by Item 601 of Regulation S–B.

(b) *Reports on Form 8–K.* State whether any reports on Form 8–K were filed during the quarter for which this report is filed, listing the items reported, any financial statements filed and the dates of such reports.

Signatures

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

§ 249.308 [Amended]

31. Form 8–K (§ 249.308) is amended by adding paragraph 3 to General Instruction C to read as follows:

Note: The text and instructions of Form 8–K does not appear in the Code of Federal Regulations.

Form 8–K

* * * * *

General Instructions

* * * * *

C. Application of General Rules and Regulations.

* * * * *

3. A *small business issuer*, defined under rule 12b–2 of the Exchange Act (§ 240.12b–2 of this chapter), shall refer to the disclosure items in regulation S–B (17 CFR 228.10 *et seq.*) and not regulation S–K. If there is no comparable disclosure item in regulation S–B, a small business issuer need not provide the information requested. A small business issuer shall provide the information required by item 310(a) of regulation S–B in lieu of the financial information required by item 7 of this Form.

PART 260—GENERAL RULES AND REGULATIONS, TRUST INDENTURE ACT OF 1939

32. The authority citation for part 260 continues to read as follows:

Authority: 15 U.S.C. 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss.

33. By revising § 260.4a–1 as to read as follows:

§ 260.4a–1 Exempted securities under section 304(a)(8).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security that has been or will be issued otherwise than under an indenture. The same issuer may not claim this exemption within a period of twelve consecutive months for more than $5,000,000 aggregate principal amount of any securities.

34. § 260.4a–2 is redesignated as § 260.4a–3, in newly redesignated section § 260.4a–3 remove both cites to "$5,000,000" and add in their place the words "$10,000,000", and add new § 260.4a–2 to read as follows:

§ 260.4a–2 Exempted securities under section 304(d).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security that has been issued or will be issued in accordance with the provisions of Regulation A (17 CFR 230.251 *et seq.*) under the Securities Act of 1933.

PARTS 210, 229, 230, 239, 240, 249, and 260—[AMENDED]

35. In addition to the amendments set forth above, in 17 CFR parts 210, 229, 230, 239, 240, 249, and 260 all references to:

a. "Form 10–Q" are revised to read "Form 10–Q and Form 10QSB";

b. "Form 10–K" are revised to read "Form 10–K and Form 10KSB";

c. "Form 10" are revised to read "Form 10 and Form 10SB";

By the Commission.

Dated: March 11, 1992.
Margaret H. McFarland,
Deputy Secretary.

[Release No. 33–6926; IC–18611; S7–5–92]

RIN 3235–AE96

Amendments to the Offering Exemption Under Regulation E of the Securities Act of 1933

AGENCY: Securities and Exchange Commission.

ACTION: Proposed amendments to rules.

SUMMARY: The Commission is proposing for public comment amendments to the Regulation E exemption from registration of securities of small business investment companies and business development companies under the Securities Act of 1933 to increase the aggregate offering price of a qualified offering of securities that may be sold during a twelve-month period. Under the proposal, the aggregate offering price of securities of a small business investment company that could be sold in reliance on Regulation E would increase from $5,000,000 to $15,000,000. Offerings of the securities of a small business investment company or a business development company by any person other than the issuer would increase from $100,000 to $1,500,000. The proposed amendments are intended to enhance the ability of small business investment companies to raise capital for small businesses and to increase the liquidity of investments in small business investment companies and business development companies.

DATES: Comments must be received on or before May 19, 1992.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. All comment letters should refer to File No. S7–5–92. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 5th Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Kenneth J. Berman, Deputy Chief, or Kathleen K. Clark, Special Counsel, Office of Disclosure and Adviser Regulation, Division of Investment Management, (202) 272–2107, Securities and Exchange Commission, 450 Fifth Street, NW., Mail Stop 10–6, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission (the "Commission") today is proposing for comment amendments to regulation E (17 CFR 230.601 *et seq.*) under the Securities Act of 1933 ("1933 Act") (15 U.S.C. 77a *et seq.*), which exempts from registration under the 1933 Act certain securities offerings by small business investment companies ("SBICs") registered under the Investment Company Act of 1940 ("1940 Act") (15 U.S.C. 80a–1 *et seq.*) and business development companies ("BDCs"). The amendments would increase, from $5,000,000 to $15,000,000, the aggregate offering price of SBIC securities that may be sold annually without registration under the 1933 Act. The amount of SBIC or BDC securities that may be sold annually by any person other than the issuer ("selling securityholder") would increase from $100,000 to $1,500,000. In addition, certain other revisions are proposed to modify the procedural requirements for using regulation E.

I. Background and Discussion of Proposals

SBICs and BDCs are entities the principal business of which is to provide capital to small businesses. Regulation E exempts securities of SBICs registered as investment companies under the 1940 Act and BDCs [1] from registration under the 1933 Act provided certain conditions are met. The Commission is proposing amendments to regulation E to further the objective of stimulating investment in small businesses. The amendments would increase the aggregate offering price limitation for securities of a SBIC to $15,000,000. BDCs that are not SBICs would continue to be subject to the $5,000,000 limitation. In addition, the offering price of securities of a SBIC or BDC that could be offered by a selling securityholder would be increased from $100,000 to $1,500,000.

A. Background

In 1958, Congress enacted the Small Business Investment Act ("SBIA") [2] to improve and to stimulate the flow of private equity capital and long-term loan funds to small businesses for financing, expansion, and growth.[3] Under this legislation, the Small Business Administration ("SBA") is authorized, among other things, to license and to provide funding to SBICs. A SBIC is a private company organized under state law whose activities are limited to investing in independent small businesses [4] by purchasing securities or making loans.[5]

As part of the SBIA, Congress added section 3(c) to the 1933 Act [6] which authorizes the Commission to exempt completely or conditionally securities issued by SBICs from the registration provisions of the 1933 Act. Under this authority, the Commission, in 1958, adopted regulation E [7] exempting securities issued by SBICs registered under the 1940 Act from registration under the 1933 Act provided certain conditions are met.[8] Regulation E is patterned after regulation A under the 1933 Act,[9] which provides an exemption from registration for small offerings of securities by companies other than investment companies,[10] although the two regulations are not identical.

Regulation E requires, among other things, the filing with the Commission of a notification of the offering [11] and, in

---

[1] BDCs, created by the Small Business Investment Incentive Act of 1980 ("1980 Act") (Pub. L. No. 96–477), are a category of venture capital companies subject to special provisions under the 1940 Act designed to accommodate their characteristics. A BDC is a closed-end management investment company with securities registered or to be registered under section 12 of the Securities Exchange Act of 1934 ("1934 Act") (15 U.S.C. 78*l*) that elects to be treated as a BDC and is operated for the purpose of making specific types of investments in small businesses and makes available significant managerial assistance to the companies in which it invests. Under the 1940 Act, BDCs are subject to provisions that differ somewhat from those applicable to other investment companies with respect to conflicts of interest (section 57 (15 U.S.C. 80a–56)), executive compensation (section 57(j) (15 U.S.C. 80a–56(j))), and leverage (section 61 (15 U.S.C. 80a–60)).

[2] 15 U.S.C. 661 *et seq.*

[3] Section 102 of the SBIA (15 U.S.C. 661).

[4] A small business, in general, means any business with net worth of $6,000,000 or less and average net income, after taxes, in the preceding two years of $2,000,000 or less. SBA rule 121.802(a)(2) (13 CFR 121.802(a)(2)).

[5] Section 304(a) of the SBIA (15 U.S.C. 684(a)); rule 303 (13 CFR 107.303).

[6] 15 U.S.C. 77c(c).

[7] Securities Act Rel. No. 4085 (Dec. 17, 1958) (23 FR 10483 (Dec. 30, 1958)) ("Rel. No. 4085").

[8] Rule 602(a) of regulation E (17 CFR 230.602(a)).

[9] 17 CFR 230.251–264. Regulation A was adopted under section 3(b) of the 1933 Act (15 U.S.C. 77c(b)), which gives the Commission the authority to exempt from registration offerings of securities not exceeding $5,000,000. See Securities Act Rel. No. 3663 (July 23, 1956 (21 FR 5739 (Aug. 1, 1956)).

[10] The offering price exemption under regulation A is currently $1,500,000. Rule 254(a)(1)(i) (17 CFR 230.254(a)(1)).

[11] Rule 604(a) (17 CFR 230.604(a)). This notification is required to be filed on Form 1–E (17 CFR 239.200).

most cases, the delivery to offerees, and the filing with the Commission, of an offering circular containing specified disclosures.[13] The maximum aggregate offering price of securities that currently can be offered under regulation E within a twelve-month period is $5,000,000.[14]

B. Aggregate Offering Price Limitations

The Commission is proposing amendments to regulation E to further the objective of stimulating investment in small businesses reflected in the SBIA. The proposed amendments would increase the aggregate offering price of all securities of a SBIC that may be offered under regulation E within a twelve month period from $5,000,000 to $15,000,000.[15] Comments are requested on whether the proposed offering price level will serve to encourage offerings of securities under regulation E or whether the limit should be lower or higher. For example, should SBICs be permitted to sell under regulation E the amount of equity securities required to satisfy SBA debt to equity ratio requirements?[16]

Currently, the amount of securities permitted to be sold annually under regulation E can include securities sold by selling securityholders provided the offering price of any such securities does not exceed $100,000 per person.[16] This provision was intended to limit offerings that could be made under regulation E which would not directly benefit the issuer. Such offerings do, however, encourage investments in SBICs or BDCs because they serve to increase shareholder liquidity by facilitating secondary offerings of securities. The Commission therefore is proposing to raise the offering price of securities of a SBIC or a BDC that may be offered by a selling securityholder from $100,000 to $1,500,000. The offering price of securities sold in these offerings would be counted in determining whether securities sold under regulation E during the twelve-month period did not exceed the $15,000,000 limit for SBICs or the $5,000,000 limit for BDCs.

C. Other Revisions

1. Preliminary Offering Circular

Under regulation A and regulation E, a preliminary offering circular may be used prior to the effective date of an offering under these regulations if the offering is underwritten. The Commission is proposing to eliminate the underwritten offering requirement in regulation A [17] and regulation E to permit the use of a preliminary offering circular in any otherwise eligible offering. The purpose of the underwritten offering requirement was, among other things, to assure, through participation of the underwriter, adequate disclosure in the preliminary offering circular. This requirement does not appear to be necessary in view of the other substantive disclosure requirements of regulation A and regulation E.

2. Substantial and Good Faith Compliance

The proposed amendments to regulation E include a provision protecting those who substantially and in good faith comply with its terms, conditions, and requirements. Under this provision, which is patterned after a similar provision in regulation D under the 1933 Act,[18] an issuer would not lose the exemption with respect to a particular investor even if the issuer failed to comply with a requirement of regulation E, although it would violate a Commission rule.

Under the proposed safe harbor, the exemption would continue to be available if the issuer could show that the requirement not complied with was not intended to protect the particular investor, the violation was not material to the offering as a whole, and the issuer had made a good faith attempt to comply with all the requirements of regulation E. Regulation E would specify that the requirements concerning issuer eligibility, filing offering statements, and the specific dollar limitations in the regulation are always material to the offering as a whole.

3. Integration Safe Harbor

Comment is requested on whether a "safe harbor" provision, similar to that proposed for regulation A,[19] regarding integration of offerings with previous or subsequent offerings of securities should be included in regulation E. Under the regulation A proposal, an offering would not be integrated with any previous registered offering or with any subsequent offering that is registered or made more than six months after the regulation A offering. In addition, other specified offerings would not be integrated with a regulation A offering even if they are made within a six-month period. These include offerings pursuant to an employee benefit plan or made in reliance on regulation S under the 1933 Act.[20] Comment is specifically requested on whether an integration safe harbor is necessary or appropriate for SBICs and BDCs under regulation E, and, if so, whether it should cover the same types of offerings and time periods.

II. General Request for Comments

Any interested persons wishing to submit written comments on the proposed rule changes that are the subject of this release, to suggest additional changes (including changes to provisions of the rules that the Commission is not proposing to amend), or to submit comments on other matters that might have an impact on the proposals contained herein, are requested to do so. Commenters suggesting alternate approaches are encouraged to submit proposed rule text.

III. Cost/Benefit of the Proposals

To assist the Commission in its evaluation of the costs and benefits that may result from the proposed amendments to regulation E, commenters are requested to provide views and data relating to any costs and benefits associated with these proposals. The proposed amendments to regulation E are not expected to impose any significant additional burdens on SBICs and should significantly reduce the costs they may now incur in connection with the registration of securities for an aggregate offering price exceeding $5,000,000 by eliminating the need to file registration statements for public offerings of securities that do not exceed $15,000,000.

IV. Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an initial regulatory flexibility analysis in accordance with 5 U.S.C. 603 regarding the proposed amendments. The analysis notes that the rule proposals contained in this release are intended to improve the access to SBICs to public equity sources and stimulate investment in small businesses. Other aggregate cost-benefit information reflected in the "Cost/Benefit Analysis" section of this release also is reflected in the analysis. A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Kathleen K. Clarke, Office of Disclosure and Adviser Regulation, 450 5th Street, NW., Washington, DC 20549.

V. Statutory Authority

The Commission is proposing to amend regulation E under sections 3(b) and 3(c) (15 U.S.C. 77c (b) and (c)) and 19(a) (15 U.S.C. 77s(a)) of the 1933 Act and section 38 of the 1940 Act (15 U.S.C. 80a–39).The authority citations for the amendments to the rules precede the text of the amendments.

List of Subjects in 17 CFR Part 230

Reporting and recordkeeping requirements, Securities.

VI. Text of Proposed Rule Amendments

For the reasons set out in the preamble, the Commission is proposing to amend title 17, chapter II of the Code of Federal Regulations as follows:

PART 230—GENERAL RULES AND REGULATIONS SECURITIES ACT OF 1933

1. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78*l*, 78m, 78n, 78o, 78w, 79t, and 80a–37, unless otherwise noted.

2. By amending § 230.601 to add the following definitions in the appropriate alphabetical order:

§ 230.601 Definitions of terms used in §§ 230.601 to 230.610a.

* * * * *

Business Development Company. The term *business development company* means any closed-end investment company that meets the definitional requirements of section 2(a)(48) (A) and (B) of the Investment Company Act of 1940 and that has elected to be regulated, or has notified the Commission that it intends to elect to be regulated, as a business development company under section 54 of the Investment Company Act 1940.

* * * * *

Small Business Investment Company. The term *small business investment company* means any company that is licensed as a small business investment company under the Small Business Investment Act of 1958 or that has received the preliminary approval of the Small Business Administration and has been notified by the Administration that it may submit a license application.

* * * * *

2. By amending § 230.602 to revise paragraph (a) to read as follows:

§ 230.602 Securities exempted.

(a) Except as hereinafter provided in §§ 230.602 to 230.610a, securities issued by any of the following persons shall be exempt from registration under the Act if offered in accordance to the terms and conditions of §§ 230.601 to 230.610a:

(1) Any small business investment company that is registered under the Investment Company Act of 1940;

(2) Any business development company; or

(3) Any small business investment company that is a business development company.

* * * * *

3. By amending § 230.603 to revise paragraph (a) to read as follows:

§ 230.603 Amount of securities exempted.

(a) The aggregate offering price of all securities of the issuer offered or sold pursuant to this regulation and any other securities previously offered or sold pursuant to an offering under this regulation or in violation of section 5(a) of the Act within one year prior to the commencement of the proposed offering shall not exceed the following amounts

(1) $15,000,000 if the securities are offered or sold by or on behalf of an issuer that is a small business investment company or a small business investment company that is a business development company; or

(2) $5,000,000 if the securities are offered or sold by or on behalf of an issuer that is a business development company and is not a small business investment company;

Provided, however, that the aggregate offering price of all securities offered or sold by any one selling securityholder shall not exceed $1,500,000, except that this limitation shall not apply if the securities are to be offered on behalf of the estate of a deceased person within two years after the death of such person.

* * * * *

4. By amending § 230.605 to remove paragraph (f)(3) and to redesignate paragraph (f)(4) as (f)(3).

5. By adding § 230.609a to read as follows:

§ 230.609a Insignificant deviations from a term, condition or requirement of Regulation E.

(a) A failure to comply with a term, condition, or requirement of regulation E will not result in the loss of the exemption from the requirements of section 5 of the Act for any offer or sale to a particular individual or entity, if the person relying on the exemption establishes:

(1) The failure to comply did not pertain to a term, condition, or requirement directly intended to protect that particular individual or entity;

(2) The failure to comply was insignificant with respect to the offering as a whole, provided that any failure to comply with § 230.602(a), § 230.603, and § 230.605(a) shall be deemed to be significant to the offering as a whole; and

(3) A good faith and reasonable attempt was made to comply with all applicable terms, conditions, and requirements of regulation E.

(b) A transaction made in reliance upon regulation E shall comply with all applicable terms, conditions, and requirements of the regulation. Where an exemption is established only through reliance upon paragraph (a) of this section, the failure to comply shall nonetheless be actionable by the Commission under section 20 of the Act.

(c) This provision provides no relief or protection from a proceeding under § 230.610.

By the Commission.

Dated: March 12, 1992.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–6178 Filed 3–19–92; 8:45 am]

BILLING CODE 8010–01–M

---

[13] Rule 605(a) (17 CFR 230.605(a)). Under rule 606 (17 CFR 230.606), an offering circular currently is not required for an offering not exceeding $100,000.

[14] Rule 603 (17 CFR 230.603). When regulation E was adopted in 1956, the maximum aggregate offering price of securities that could be offered was $300,000. Rel. No. 4005. This amount was increased in 1971 to $500,000 (Securities Act Rel. No. 5134 (Mar. 26, 1971) (36 FR 7050 (Apr. 14, 1971))) and in 1984 to $5,000,000 (Securities Act Rel. No. 6646 (Aug. 30, 1984) (49 FR 35342 (Sept. 7, 1984))).

[15] The 1980 Act did not provide for any exemption for BDCs from registration under the 1933 Act comparable to that in section 3(c) of the 1933 Act for SBICs. In 1984, the Commission extended the exemption provided by regulation E to include BDCs under section 3(b) of the 1933 Act, which gives the Commission authority to exempt securities offerings not exceeding $5,000,000. The proposed amendments would only be applicable to SBICs under the authority of section 3(c). Thus, the proposed amendment would be available to a BDC only if it is also an SBIC.

[16] SBA financing for SBICs is currently permitted in amounts up to three times the equity capital of SBICs with a maximum of $35,000,000. Thus, the equity capital necessary for the maximum financing amount is approximately $12,000,000. If the SBA financing amount, which has not been changed since 1958, is increased, comment is requested on whether the Commission should adopt an offering price limit that will enable SBICs to satisfy equity ratio requirements through offerings under regulation E.

[17] Rule 605(a). A person who directly or indirectly controls or is controlled by an issuer, such as an officer, director or 10% stockholder, is considered to be an issuer for the purpose of the definition of an "underwriter" in section 2(11) of the 1933 Act (15 U.S.C. 77b(11)). Unless an exemption is applicable, a registration statement is required under section 5(a) of the 1933 Act (15 U.S.C. 77e(a)) for the offer or sale of securities by such persons.

[18] See proposed rule 255 in Securities Act Rel. No. 6924, (Mar. 11, 1992) ("Regulation A Release").

[19] 17 CFR 230.501–508. The Commission is proposing a similar provision for Regulation A. See proposed rule 260 in the regulation A Release.

[20] See proposed rule 251(c) in the regulation A Release.

[21] 17 CFR 230.901–904.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 239 and 274

[Release No. 33-6927; IC-18612]

Revisions of Guidelines to Form N-1A

AGENCY: Securities and Exchange Commission.

ACTION: Revisions to Guidelines.

SUMMARY: The Commission is publishing revisions to the Guidelines to Form N-1A to permit open-end management investment companies to increase from 10% to 15% the amount of illiquid assets they may hold. Revising the Guidelines will permit investment companies more flexibility to make investments in the illiquid securities of small businesses. This could provide small businesses with better access to the capital markets in a manner consistent with the public interest and the protection of investment company shareholders.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Jeremiah de Michaelis, Branch Chief (202) 272-2096, or Richard Pfordte, Attorney (202) 272-2103, Division of Investment Management, Securities and Exchange Commission, 450 5th Street NW., Washington DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing revisions of the Guidelines to Form N-1A (17 CFR 239.15A, 274.11A), the registration form used by open-end management investment companies ("mutual funds") to register under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) ("1940 Act") and to register their securities under the Securities Act of 1933 (15 U.S.C. 77a-1 *et seq.*). The revised Guidelines will permit a mutual fund to invest up to 15% of its net assets in illiquid securities. Currently, the Guidelines recommend a 10% limit on mutual fund investments in illiquid assets. In addition, the revisions make other minor changes to the Guidelines and place the discussion of liquidity requirements in one place. The Guidelines, which consist of a compilation and adaptation of applicable Commission releases and staff positions, are prepared by the Division of Investment Management for use in the preparation and filing of registration statements on Form N-1A.

I. Background

The Guidelines are being revised in connection with the Commission's efforts to remove unnecessary barriers to capital formation and to facilitate access to the capital markets by small businesses.[1] Historically, small local enterprises have satisfied a large portion of their capital needs by using the financial resources of local banks and similar institutions. In recent years, concern has been expressed about the ability of U.S. small businesses to obtain financing from traditional sources.[2] The health and existence of small business is critical to local economies and to the national economy.

Mutual funds represent a significant potential source of capital for small business.[3] Currently there are 1,787 funds which have aggregate total assets of $474.2 billion that could be a source of capital for small businesses.[4] Allowing mutual funds to invest an additional 5% of their net assets in illiquid securities, including illiquid securities of U.S. small businesses, could make a significant amount of capital available to small business without significantly increasing the risk to any fund.

However, the securities of small businesses are generally illiquid and mutual funds are constrained in the amount of illiquid assets they may hold. Under the 1940 Act, mutual funds must stand ready to redeem shares daily and pay redeeming shareholders within seven days of receiving a redemption request.[5] In addition, a mutual fund must compute its net asset value each business day and give purchase and redemption orders the price next computed after receipt of an order.[6] Moreover, most mutual funds allow shareholders easily to exchange their fund shares for shares of another mutual fund managed by the same investment adviser, in transactions which generally can include only nominal costs. Shareholders thus easily may move their money among equity, income, and money market funds as they choose, increasing the need for liquidity of mutual fund assets.

To compute an accurate net asset value per share, a mutual fund must be able to value each portfolio security accurately. Mutual funds must use market price to value securities for which market quotations are readily available; the board of directors must make a good faith determination of the fair value of securities for which market prices are not readily available.[7] If the net asset value of a mutual fund is not accurate, purchasing or redeeming shareholders may pay or receive too little or too much for their shares, and the interests of remaining shareholders may be overvalued or diluted.

To meet these requirements, a mutual fund must maintain a high degree of portfolio liquidity. In 1969, the Commission stated that a prudent limit on mutual fund holdings of illiquid securities would be 10 percent.[8] This conservative standard was designed to ensure that mutual funds will be ready at all times to meet even remote contingencies. The 10% standard has been reflected in the Guidelines to Form N-1A, the mutual fund registration form. The Commission has determined it is consistent with investor protection to increase the limit in the Guidelines to 15%. The Commission believes that a 15% standard should satisfactorily assure that mutual funds will be able to make timely payment for redeemed shares. Experience has shown that mutual funds generally have not had difficulty in meeting redemption requests from available cash reserves, even during times of abnormally high selling activities in the securities markets.[9] Even if a fund were forced to sell securities to meet redemption requests, substantially all of its remaining assets would be required to be liquid securities which it could sell

[1] See Securities Act Rel. No. 6924 (Mar. 11, 1982) ("Small Business Initiatives" proposing, among other things, amendments to regulation A and Rule 504) and Securities Act Rel. No. 6926 (Mar. 12, 1992) (proposing amendments to regulation E).

[2] See The Small Business Credit Crunch. Hearings Before the House of Representatives Comm. on Small Business, 101st Cong., 2nd Sess. (1990).

[3] See section 1(a)(4) of the 1940 Act (15 U.S.C. 80a-1(a)(4)) (mutual funds are "media for investment in the national economy of a substantial part of the national savings and may have a vital effect upon the flow of savings into the capital markets").

[4] This estimate was derived by subtracting from the total assets of mutual funds the assets of funds that ordinarily would not invest in the securities of small businesses—money market funds, funds investing primarily in securities of the U.S. government and its agencies and instrumentalities, and funds investing primarily in securities of state and local governments. See Investment Company Institute Trends in Mutual Fund Activity (Nov. 1991), table 6A.

[5] Section 22(e) of the 1940 Act (15 U.S.C. 80a-22(e)) prohibits a mutual fund from suspending the right of redemption or postponing the date of payment or satisfaction upon redemption for more than seven days after the tender of such security to the mutual fund.

[6] Rule 22c-1(a) (17 CFR 270.22c-1(a)).

[7] Rule 2a-4 (17 CFR 270.2a-4).

[8] Investment Company Act Rel. No. 5847 (Oct. 21, 1969).

[9] During the 1987 market break, approximately 2% of all equity mutual fund shares were redeemed on October 16 and 19, 1987, and most funds were able to meet these redemptions from available cash reserves. See Securities and Exchange Commission, Division of Market Regulation, The October 1987 Market Break 2-17 to -18 (1988).

consistent with appropriate portfolio management.

II. Revision of Liquidity Test in Guidelines to Form N-1A

As revised, Guide 4 will permit a mutual fund to invest up to 15% of its assets in illiquid assets. An illiquid asset is defined as an asset which may not be sold or disposed of in the ordinary course of business within seven days at approximately the value at which the mutual fund has valued the investment on its books.[10]

While the changes to the Guidelines will permit mutual funds to increase their holdings of illiquid assets, it will not require them to do so.[11] Nor will it relieve a fund from the requirements concerning valuation and the general responsibility to maintain a level of portfolio liquidity that is appropriate under the circumstances. If no market quotations for an illiquid security are available, the board of directors of the fund will be required to determine the fair value of the security. In addition, the Commission expects funds to monitor portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained. For example, an equity fund that begins to experience a net outflow of assets because investors increasingly shift their money from equity to income funds should consider reducing its holdings of illiquid securities in an orderly fashion in order to maintain adequate liquidity. Finally, the Commission intends to review the operation of the Guideline revision through its investment company inspection program to determine whether the revision is achieving its intended purposes in a manner consistent with investor protection.

[10] Investment Company Act Rel. No. 14983 (Mar. 12, 1986) (51 FR 9773 (Mar. 21, 1986) (adopting amendments to rule 2a-7 under the 1940 Act) (17 CFR 270.2a-7).

[11] Funds that have fundamental investment policies restricting their ability to invest in illiquid securities would be required by section 13(a) of the 1940 Act (15 U.S.C. 80a-13(a)) to obtain shareholder approval to change those policies. In addition, funds that choose to make additional investments in illiquid assets, as permitted by the Guideline revision, should consider whether to amend or "sticker" their disclosure documents to reflect these changes.

III. Text of Revisions to the Guidelines

List of Subjects in 17 CFR Parts 239 and 274

Investment companies, Reporting and recordkeeping requirements, Securities.

For the reasons set out in the preamble, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

1. The authority citation for part 239 continues to read as follows:

Authority: 15 U.S.C. 77a, *et seq.*, unless otherwise noted.

2. The authority citation for part 274 continues to read as follows:

Authority: The Investment Company Act of 1940, 15 U.S.C. 80a-1 *et seq.*, unless otherwise noted;

Note: The Guides to Forms N-1A are not codified in the Code of Federal Regulations.

3. Amending Guide 4 to Form N-1A (239.15A and 274.11A) by adding at the end a paragraph to read as follows:

Guide 4. Types of Securities

* * * * *

If an open-end company holds a material percentage of its assets in securities or other assets for which there is no established market, there may be a question concerning the ability of the fund to make payment within seven days of the date its shares are tendered for redemption. The usual limit on aggregate holdings by an open-end investment company of illiquid assets is 15 percent of its net assets. An illiquid asset is any asset which may not be sold or disposed of in the ordinary course of business within seven days at approximately the value at which the mutual fund has valued the investment. *See* Investment Company Act Release No. 14983 (Mar. 12, 1986).

4. Amending Guide 12 to Form N-1A (239.15A and 274.11A) by removing the last sentence and adding a new last sentence to read as follows:

Guide 12. Purchase and Sale of Real Estate

* * * * *

For the limits on the aggregate holdings by open-end companies of illiquid assets, see Guide 4.

5. Amending Guide 13 to Form N-1A (239.15A and 274.11A) by removing the fourth and fifth sentences and adding a new last sentence to read as follows:

Guide 13. The Making of Loans to Other Persons

* * * * *

For the limits on the aggregate holdings by open-end companies of illiquid assets, see Guide 4.

Dated: March 12, 1992.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Part III

Department of Health and Human Services

Administration for Children and Families

Runaway and Homeless Youth Program; Availability of Financial Assistance for FY 1992 and Request for Applications; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. ACF/ACYF/RHYP 93.623-92-1]

Runaway and Homeless Youth Program; Availability of Financial Assistance for Fiscal Year (FY) 1992 and Request for Applications

AGENCY: Administration on Children, Youth, and Families (ACYF), Administration for Children and Families (ACF).

ACTION: Announcement of availability of financial assistance and request for applications for Runaway and Homeless Youth Basic Center grants.

SUMMARY: The Family and Youth Services Bureau of the Administration on Children, Youth and Families announces the availability of fiscal year 1992 funds for the Runaway and Homeless Youth Basic Center Grant Program.

Basic Center grant applications are solicited in two categories: Basic Center Expansion awards and Basic Center New Start awards. Competition for Basic Center awards in both categories will be possible in all States and Territories except Hawaii, Mississippi, Rhode Island, South Carolina, Guam, the Northern Marianas, Palau, and the Virgin Islands. In the jurisdictions listed above, the amount required for non-competing continuations equals the State's total allotment. (See the Table of Allocations by State and the accompanying narrative (Part I, Section G, "Available Funds for Basic Centers") for an explanation.)

DATES: The deadline or closing date for receipt of all applications under this announcement is: May 19, 1992.

ADDRESSES: Application receipt point: Runaway and Homeless Youth Basic Center Program, Department of Health and Human Services, Administration for Children and Families, Division of Discretionary Grants, 200 Independence Avenue, SW., room 341–F.2, Hubert H. Humphrey Building, Washington, DC 20201. Attn: William J. McCarron, ACF–92–ACYF/RHYP/BC.

FOR FURTHER INFORMATION CONTACT: Dr. Preston Bruce, Administration on Children, Youth and Families, Family and Youth Services Bureau, P.O. Box 1182, Washington, DC 20013, Telephone: (202) 245–0049.

SUPPLEMENTARY INFORMATION:

Part I. Background Considerations

A. Scope of This Program Announcement

This program announcement solicits applications and describes the application process for Basic Center grants under the Runaway and Homeless Youth Program. Basic Center applications are solicited in two categories: Basic Center Expansion awards and Basic Center New Start awards. (See paragraph G, below, for explanations of these two categories.) Both categories of grants will be competitively awarded during the third and fourth quarters of FY 1992. Project periods for grants will be three years for the New Start awards and either one or two years for the Expansion awards, depending on the number of years remaining in the project periods of the grantees seeking Expansion funds.

B. Legislative Authority

Grants under this program are authorized by Part A of the Runaway and Homeless Youth Act (the Act), 42 U.S.C. 5701 *et seq.* The Act was enacted as Title III of the Juvenile Justice and Delinquency Prevention Act of 1974 (Pub. L. 93–415), and amended by the Juvenile Justice Amendments of 1977 (Pub. L. 95–115), the Juvenile Justice Amendments of 1980 (Pub. L. 96–509), the Juvenile Justice Amendments of 1984 (Pub. L. 98–473), the Anti-Drug Abuse Act of 1988 (Pub. L. 100–690), and the Domestic Volunteer Service Amendments of 1988 (Pub. L. 101–204).

C. Outline of Program Announcement

This program announcement consists of five parts and appendices. Part I provides background information for potential applicants to apply for Basic Center grants. Part II describes the application process for the two categories of Basic Center grants: New Starts and Expansions. Part III outlines the responsibilities of the Basic Center grantees in the two categories. Part IV provides the criteria to be used in evaluating the applications. Part V provides instructions for assembling and submitting applications for Basic Center grants in the two categories. Following Part V are appendices to be consulted and forms to be used in preparation of applications.

D. Program Purpose

The purpose of Part A of the Act and of the Runaway and Homeless Youth Grant Program is to provide financial assistance to establish or strengthen community-based centers that address the immediate needs (e.g., outreach, temporary shelter, counseling, and aftercare services) of runaway and homeless youth and their families.

The term "runaway youth" means a person under 18 years of age who absents himself from home or place of legal residence without the permission of parents or legal guardian (45 CFR 1351.1(k)).

Under Part A of the Act, the term "homeless youth" means a person under 18 years of age who is in need of services and without a place of shelter where he or she receives supervision and care (45 CFR 1351.1(f)).

Programs receiving Runaway and Homeless Youth Act funding under this announcement are required to adhere to the Program Performance Standards which are included in appendix B of this announcement.

E. Program Goals and Objectives

The program goals and objectives of Part A of the Act are to assist runaway and homeless youth Basic Centers to: (1) Alleviate the problems of runaway and homeless youth, (2) reunite youth with their families and encourage the resolution of intrafamily problems through counseling and other services, (3) strengthen family relationships and encourage stable living conditions for youth, and (4) help youth decide upon constructive courses of action.

F. Eligible Applicants

States, Territories, localities, private for-profit and private non-profit agencies, and coordinated networks of such agencies are eligible to apply for Runaway and Homeless Youth Program Basic Center grants—either New Starts or Expansions—under this announcement unless they are part of the law enforcement structure or the juvenile justice system. Federally recognized Indian Tribes are eligible to apply for grants as local units of government. Non-Federally recognized Indian Tribes and urban Indian organizations are eligible to apply for grants as private agencies.

G. Available Funds for Basic Centers

In FY 1992, the Administration on Children, Youth and Families expects to award $32,175,900 in Basic Center grants. This total will be divided among the States in proportion to their respective populations under the age of 18, with the condition that the amount allotted to each State (including the District of Columbia and Puerto Rico) will be at least $75,000; and the amounts allotted to the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands (Palau), and the Commonwealth of the Northern Mariana Islands will be at least $30,000 each.

Non-Competing Awards. Of the total amount available for Basic Center grants, $21,002,527 will be awarded in the form of *non-competing continuation grants* to current Basic Center grantees having one or two years remaining in their project periods. Grantees in this category will receive instructions from their respective ACF Regional Offices on the procedures for applying for these continuation grants. These grantees are listed in appendix F and have project expiration dates in fiscal year 1993 or in fiscal year 1994.

Competitive Awards. Approximately $11,173,373 will be awarded *competitively* under this announcement. Eligible applicants may apply for these funds in only one of the following two categories:

Category 1: Basic Center Expansion Grants. Only current Basic Center grantees with one or two years remaining on their grants (with project periods ending in fiscal years 1993 and 1994), and whose current awards are under $85,000, are eligible to apply for Basic Center Expansion grants. Basic Center grantees whose current awards are $85,000 or over may *not* apply for these Expansion grants. Applicants for Expansion grants may request an award such that the total of the basic continuation (non-competitive) grant plus the Expansion grant will not exceed $85,000 per annual budget period.

Category 2: Basic Center New Start Grants. Current Basic Center grantees with project periods ending in fiscal year 1992 and all remaining eligible applicants may apply for Basic Center New Start grants. Basic Center grantees with one or two years remaining on their current awards may not apply for these New Start grants.

Applicants may refer to appendix F for a listing of current Basic Center expiration dates.

Basic Center Expansion grants and Basic Center New Start grants will be awarded during the third and fourth quarters of fiscal year 1992. The Expansion grants will be awarded in the form of supplements to the continuation awards of successful applicants. The supplements will be for one or two years, depending on the ending dates of the grantees' project periods.

Basic Center New Start applicants should request three-year project periods (Standard Form 424A (Rev. 4–88), Budget Information, Section E).

While the project period for each New Start award will be for three years, the initial award of grant funds will cover a budget period of only one year. Award of funds for the subsequent budget periods will depend upon satisfactory performance by the grantee (including timely submission of required reports) and on the availability of appropriated funds.

Funding recommendations for the competitive Basic Center applications (for both Expansions and New Starts) will be based primarily on the scores assigned to the applications by the non-Federal reviewers who will evaluate each application according to the criteria presented in Part IV, below, and on recommendations from staff of the Administration on Children, Youth and Families (ACYF) and from Regional officials of the Administration for Children and Families (ACF). Final decisions will be made by the Commissioner of ACYF.

The number of competitive awards made within each State will depend upon the funds available (i.e., the State's total allotment less the amount required to fund non-competing continuations in that State) as well as on the number of acceptable applications. Thus, where the amount required for non-competing continuations in any State equals the State's total allotment, no competitive awards will be made.

All applicants under this announcement will compete with other applicants in the State in which their services will be provided. In the event that an insufficient number of acceptable applications is approved for funding from any State or jurisdiction, the Commissioner, ACYF, may reallocate any unused funds.

Section 362(a) of the Act requires that grantees provide a non-Federal match that equals at least 10 percent of the Federal funds requested under this announcement (for details see Section H below: "Grantee Share of the Project").

Section 366(a)(2) of the Runaway and Homeless Youth Act requires that not less than 90 percent of the funds appropriated for a fiscal year shall be available for support of local runaway and homeless youth Basic Centers. The following Table, which reflects this requirement, indicates the FY 1992 allocations for each State. In this Table, the amount shown in the column labeled "Expansions/New Starts" is the amount available for competition in each State in FY 1992.

RUNAWAY AND HOMELESS YOUTH CENTERS—TABLE OF ALLOCATIONS BY STATE

[Total 57 States and Jurisdictions—Fiscal Year 1992]

Regions/states	Continuations	Expansions/new starts	Total allotments
Region I			
Connecticut	$229,261	$141,095	$370,356
Maine	55,000	97,673	152,673
Massachusetts	548,947	119,587	668,534
New Hampshire	27,242	110,487	137,729

Washington	443,800	179,432	623,232
Totals	21,002,527	11,173,373	32,175,900

H. Grantee Share of the Project

The Act requires the grantee to provide a non-Federal match that equals at least 10 percent of the Federal funds awarded. For example, if the applicant requests $100,000 in Federal funds (line 15a of Standard Form 424), then the non-Federal share (the sum of lines 15b, 15c, 15d, and 15e) must equal or exceed $10,000. For a project requesting $49,000 in Federal funds, the non-Federal share must equal or exceed $4,900.

The non-Federal portion may be cash, in-kind contributions or grantee incurred costs (including the facility, equipment or services) and must be project-related and allowable under the cost principles provided in 45 CFR parts 74 and 92, the Department's regulations on the administration of grants. For-profit applicants are reminded that no grant funds may be paid as profit to any recipient of a grant or sub-grant (45 CFR 74.705).

Part II. Application Process

A. Assistance to Prospective Grantees

Potential grantees can receive informational assistance in developing applications from the appropriate ACF Regional Youth Contacts listed in apendix D or from the Family and Youth Services Bureau in Washington, DC (see address at the beginning of this announcement). Organizations may also receive information and technical assistance in writing applications from the appropriate Training and Technical Assistance Provider grantee listed in appendix E.

B. Application Requirements

To be considered for a Runaway and Homeless Youth Basic Center Expansion grant or a Basic Center New Start grant, each application must be submitted on the forms provided at the end of this announcement (see Section E below) and in accordance with the guidance provided herein. The application must be signed by an individual authorized both to act for the applicant agency and to assume responsibility for the obligations imposed by the terms and conditions of the grant award.

C. Paperwork Reduction Act of 1980

Under the Paperwork Reduction Act of 1980, Public Law 96–511, the Department is required to submit to the Office of Management and Budget (OMB) for review and approval any reporting and record-keeping requirements in regulations, including program announcements. This program announcement does not contain information collection requirements beyond those approved for ACF grant applications by OMB.

D. Notification Under Executive Order 12372

This program is covered under Executive Order (E.O.) 12372, "Intergovernmental Review of Federal Programs," and 45 CFR Part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

All States and Territories except Alaska, Idaho, Kansas, Louisiana, Minnesota, Nebraska, Pennsylvania, Virginia, American Samoa and Palau have elected to participate in the Executive Order process and have established Single Points of Contact (SPOCs). Applicants from these ten jurisdictions need take no action regarding E.O. 12372. Applications for projects to be administered by Federally-recognized Indian Tribes are also exempt from the requirements of E.O. 12372. Otherwise, applicants should contact their SPOCs as soon as possible to alert them to the prospective applications and receive any necessary instructions. Applicants must submit any required material to the SPOCs as early as possible so that the program office can obtain and review SPOC comments as part of the award process. It is imperative that the applicant submit all required materials, if any, to the SPOC and indicate the date of this submittal (or date of contact if no submittal is required) on the Standard Form 424, item 16a.

Under 45 CFR 100.8(a)(2), a SPOC has 60 days from the application deadline date to comment on proposed new or competing continuation awards. Therefore, the comment period for State processes will end on July 20, 1992, to allow time for ACF to review, consider and attempt to accommodate SPOC input. The SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations. Additionally, SPOCs are requested to clearly differentiate between mere advisory comments and those official State process recommendations which they intend to trigger the "accommodate or explain" rule.

When comments are submitted directly to ACF, they should be addressed to: Runaway and Homeless Youth Basic Center Program, Department of Health and Human Services, Administration for Children and Families, Division of Discretionary Grants, 200 Independence Avenue, SW., room 341–F.2, Hubert H. Humphrey Building, Washington, DC 20201. Attn: William J. McCarron.

A list of the Single Points of Contact for each State and Territory is included as appendix C of this announcement.

E. Availability of Forms and Other Materials

A copy of each form required to be submitted as part of an application for a Basic Center Expansion grant or a Basic Center New Start grant under the Act, and instructions for completing the application, are provided in appendix A. The Program Performance Standards and a description of the National Runaway Switchboard are presented in appendix B. Addresses of the State Single Points of Contact (SPOCs) to which applicants should submit review copies of their proposals are listed in appendix C.

The Runaway and Homeless Youth Act (42 U.S.C. 5701 *et seq.*) and the Code of Federal Regulations (CFR) title 45, Part 1351, Runaway Youth Program, may be found in major public libraries and at the ACF Regional Offices listed in appendix D at the end of this announcement.

Additional copies of this announcement may be obtained from the ACF Regional Offices or from the information contact person listed at the beginning of this announcement. Further general information may be obtained from the Training and Technical Assistance Providers listed in appendix E. A listing of all current Basic Center grantees is presented in appendix F.

F. Application Consideration

All applications which are complete and conform to the requirements of this program announcement will be subject to a competitive review and evaluation process against the specific criteria outlined below. This review will be conducted in Washington, DC by teams of non-Federal experts knowledgeable in the areas of youth development and/or human service programs. Applications from a given State will be reviewed competitively only with other applications from that same State. Within a given State, Expansion applications will be reviewed in competition with other Expansion applications, and New Start applications will be reviewed in competition with other New Start applications. The non-Federal experts will review the applications to determine whether the grantee responsibilities listed in Part III of this announcement will be carried out. They will apply the criteria presented in Part IV and assign a score to each application. To avoid conflicts of interest, the non-Federal reviewers will be from States other than the one from which applications are being reviewed. The results of the competitive review will be analyzed by Federal staff and will be the primary factor taken into consideration by the Associate Commissioner of the Family and Youth Services Bureau who, in consultation with ACF Regional officials, will select from the two categories of applications—Expansions and New Starts—those to be recommended for funding to the Commissioner, ACYF. The criteria to be used in selecting within and between the two categories of applications within a given State will include (1) the scores assigned by the non-Federal reviewers, (2) the adequate geographic distribution of services across the State, and (3) the award of sufficient funds to a given grantee to provide for the full range of required Basic Center services.

The Commissioner will make the final selection of the applicants to be funded. Priority will be given to applicants with demonstrated experience in providing services to runaway and homeless youth as required by section 311 of the Act. In the interest of effective geographic distribution of the Basic Center grants, the Commissioner may show preference for applications proposing services in areas that would not otherwise be served. The Commissioner also may elect not to fund any applicants having known management, fiscal or other problems which make it unlikely that they would be able to provide effective services.

Successful applicants will be notified through the issuance of a Financial Assistance Award which will set forth the amount of funds granted, the terms and conditions of the grant, the effective

date of the grant, the budget period for which support will be given, the non-Federal share to be provided, and the total project period for which support is contemplated. Funds for successful Expansion applicants will be added to the basic continuation funds these applicants are scheduled to receive. Organizations whose applications are disapproved will be notified of that decision in writing by the Commissioner of the Administration on Children, Youth and Families.

Part III. Responsibilities of Basic Center Grantees

To ensure that agencies with the greatest capacity for providing quality services participate in this program, potential grantees who apply for funding under this announcement must demonstrate in the program narrative section of their applications that they are able to meet the requirements of the Act, the Program Performance Standards, and other applicable Federal policies and procedures.

The program narrative statement should be prepared in response to the requirements enumerated below and to the review criteria, presented in Part IV, which will be used to evaluate the submissions. To assist applicants in preparing the narrative statements of their grant submissions, the relevant requirements, standards, and applicable policies and procedures have been arranged according to the five review criteria.

The program narrative should be clear and concise, and should not exceed 30 single-spaced pages exclusive of such necessary attachments as organization charts, resumes, and letters of agreement or support. Review of the narrative statement portion of applications will be limited to the first 30 pages.

A. Objectives and Need for Assistance

Applicants should include a discussion of:

1. The purpose or objectives of the services to be provided by the Basic Center. The Act requires that, to be eligible for assistance, an applicant shall propose to establish, strengthen, or fund an existing or proposed runaway and homeless youth center (a locally controlled community-based facility) providing temporary shelter and counseling services to juveniles who have left home without permission of their parents or guardians or to other homeless juveniles (42 U.S.C. 5711(a)).

Basic Center grants may be awarded to agencies which will operate a central shelter facility, or to agencies which will provide emergency shelter through a series of host homes, *or* to agencies which will employ a combination of shelter facility(ies) and host homes. (Host homes are facilities providing short-term shelter, usually the home of a family, under contract to accept runaway and homeless youth assigned by the Basic Center grantee, usually for a nominal fee, and licensed according to State or local laws.)

2. The incidence of runaway and homeless youth in the area(s) to be served. The Act requires that each center shall be located in an area which is demonstrably frequented or easily reachable by runaway youth (42 U.S.C. 5712(b)).

3. Other relevant social, psychological, educational, institutional, health, or other demographic data on the youth to be served.

4. The immediate service needs of runaway and homeless youth and their families, and how the applicant will address these needs in a manner outside the law enforcement structure and the juvenile justice system (42 U.S.C. 5712(a)).

5. The adequacy or inadequacy of existing services, by identifying other youth agencies now providing services in the target area(s), and by describing how the proposed activities will relate to these agencies and services.

B. Results or Benefits Expected

Applicants should identify the results and benefits to be derived from the project, and should quantify these through a statement of the numbers of clients to be served and a description of the types and quantities of services to be provided.

Note: Applicants for expansion grants should indicate expected increases in the number of clients to be served and improvements in the types and quantities of services to be provided.

Section 312(b) of the Act requires that each grantee shall keep adequate statistical records profiling the children and family members which it serves, shall maintain the confidentiality of these records, and shall submit annual reports detailing how the center has been able to meet the goals of its plans. These reports shall include summaries of the required statistics.

The applicant shall describe the statistical records and evaluative data to be collected (such as numbers of runaway and homeless youth and their families served and the types and quantities of services provided) and the procedures for gathering and analyzing the data to determine the extent to which the project is achieving the results and benefits expected, and shall agree to provide this information to the Department in a timely manner.

The applicant shall describe procedures for preparing and submitting to the Department of Health and Human Services the quarterly progress reports and the biennial financial reports required by the ACF grants program, and the annual reports required by the Act.

The applicant must also indicate a willingness to cooperate with third party contractors funded by ACF, including participation in any management information (data collection) system operated by ACF.

C. Approach

Applicants should discuss how they will carry out each of the 14 Program Performance Standards established by the Department. The Standards are presented in full in appendix B of this announcement. A summary of each Standard is presented below along with associated grantee responsibilities.

1. Outreach

The project shall conduct outreach efforts directed towards community agencies, youth, and parents.

The applicant shall assure that major outreach efforts will be aimed at street youth or other actual or potential runaway and homeless youth not already under care of government agencies such as child protective services, foster care, or the courts.

2. Individual Intake Process

The project shall conduct an individual intake process with each youth seeking services from the project.

The applicant shall assure that each youth will enter the center voluntarily and will be free to leave at will, and that Federal funds received under this Act will not be used for services to youth already under care of government agencies such as child protective services, foster care, or the courts; and shall also assure that it will adhere to State and local laws relating to runaway and homeless youth (such as parent contact provisions, detention of runaways and status offenders, judicial and administrative processes regarding runaways, and licensing requirements).

3. Temporary Shelter

The project shall provide temporary shelter and food to each youth admitted into the project and requesting such services.

The applicant shall assure that each facility is in compliance with State and local licensing requirements, and shall accommodate no more than 20 youth at any given time.

4. Individual and Group Counseling

The projects shall provide individual and/or group counseling to each youth admitted into the project.

The applicant shall assure that the counseling program will include drug abuse prevention.

5. Family Counseling

The project shall make family counseling available to each parent or legal guardian and youth admitted into the project.

The applicant shall assure that a major aim of family counseling will be family reunification.

6. Service Linkages

The project shall establish and maintain linkages with community agencies and individuals for the provision of those services which are required by youth and/or their families but which are not provided directly by the centers.

The applicant shall assure that linkages have been or will be established with the National Runaway Switchboard, locally based hotlines, State and regional youth service networks, as well as with other related public and private agencies such as health, law enforcement and education systems.

The applicant shall assure that linkages have been or will be established and maintained with appropriate drug abuse prevention agencies.

7. Aftercare Services

The project shall provide a continuity of services to all youth served on a temporary shelter basis and/or their families following the termination of such temporary shelter both directly and through referrals to other agencies and individuals.

8. Recreational Program

The project shall provide a recreational/leisure time schedule of activities for youth admitted to the project for residential care.

9. Case Disposition

The project shall determine, on an individual case basis, the disposition of each youth provided temporary shelter, and shall assure the safe arrival of each youth home or to an alternative living arrangement.

10. Staffing and Staff Development

Each center is required to develop and maintain a plan for staffing and staff development.

If applicable, the applicant shall describe the recruitment, training, and use of volunteers.

11. Youth Participation

The center shall actively involve youth in the design and delivery of the services provided by the project.

The applicant shall assure the participation of young people in the operation of the program in capacities such as advising or serving on governing boards, providing direct services such as peer counseling and outreach, and related activities.

12. Individual Client Files

The project shall maintain an individual file on each youth admitted into the project. Such files shall include, at a minimum, an intake form which contains the basic background information required by the Family and Youth Services Bureau (FYSB), counseling notations, information on the services provided both directly and through referrals, disposition data, and any applicable follow-up and evaluation data.

The file on each client shall be maintained in a secure place and shall not be disclosed without the written permission of the client and his/her parent(s) or legal guardian(s) except to project staff, to the funding agency(ies) and its/their contractor(s), and to a court involved in the disposition of criminal charges against the youth.

13. Ongoing Center Planning

The center shall develop a written plan at least annually.

14. Board of Directors/Advisory Body

It is strongly recommended that the centers have a Board of Directors or Advisory Body.

If applicable, the applicant shall identify and describe the Board of Directors/Advisory Body.

D. Staff Background and Organizational Experience

Applicants should provide biographical sketches of the project director and other proposed key personnel, indicating their qualifying experiences for the project. (Applicants may refer to one-page résumés included in the supplementary documentation.)

Section 311(b)(4) of the Act, 42 U.S.C. 5711(b), requires that, in selecting among applicants for grants under this part, priority shall be given to private entities that have experience in providing services to runaway and homeless youth and their families. (Applicants may refer to the Organizational Capability Statement included in the submission.)

E. Budget Appropriateness

Section 312(b) of the Act, 42 U.S.C. 4712(b), requires that each applicant shall submit a budget estimate with respect to its planned activities. Applicants should be aware of the following requirements of the law and regulations in preparing this portion of the program narrative:

(1) The Act requires that priority be given to grants smaller than $150,000 (sec. 313 of the Act, 42 U.S.C. 5712);

(2) A Runaway and Homeless Youth grant may not cover the cost of constructing new facilities (45 CFR 1351.16); and

(3) Costs for the renovation of existing structures may not normally exceed 15 percent of the grant award. The Department of Health and Human Services may waive this limitation upon written request under special circumstances based on demonstrated need (45 CFR 1351.15).

Applicants should demonstrate that the project's costs (overall costs, average cost per youth served, costs for different services) are reasonable in view of the anticipated results and benefits. (Applicants should refer to the budget information presented in Standard Forms 424 and 424A and in the budget justification which follows these forms, and should relate this information to the results or benefits expected (Criterion 2) by detailing the numbers of youth, beds, meals and other services that will be supported with Federal funds. Applicants should also indicate non-Federal sources of support.

Note: Applicants for Expansion funds should describe the numbers of youth, beds, meals and other services that will be supported with their basic continuation funds, the additional numbers that will be supported with Expansion funds, and the expected overall totals.

Part IV. Review Criteria

The five criteria below provide further guidance to be used in developing the program narrative. The point values following each criterion heading indicate the numerical weight each section will be accorded in the review process.

Criterion 1. *Objectives and Need for Assistance (10 Points).* Pinpoint any relevant physical, economic, social, financial, institutional, or other problems requiring a solution. Demonstrate the need for the assistance and state the goals or service objectives

of the project. Supporting documentation or other testimonies from concerned interests other than the applicant may be used. Give a precise location of the project site(s) and area(s) to be served by the proposed project. Maps or other graphic aids may be attached. (The applicant may refer to Part I, Sections D and E of this announcement.)

Information provided in response to Part III, Section A, Numbers 1, 2, 3, 4, and 5 of this announcement will be used to review and evaluate applicants on the above criterion.

Criterion 2. *Results or Benefits Expected (20 Points).* Identify the results and benefits to be derived from the project. State the numbers of runaway and homeless youth and their families to be served, and describe the types and quantities of services to be provided. Identify the kinds of data to be collected and maintained, and discuss the criteria to be used to evaluate the results and success of the project.

Information provided in response to Part III, Section B of this announcement will be used to review and evaluate applicants on the above criterion.

Criterion 3. *Approach (40 Points).* Outline a Plan of action pertaining to the scope of the project and detail how the proposed work will be accomplished. Describe any unusual features of the project, such as extraordinary social and community involvements, e.g., how the project will be maintained after termination of Federal support. Explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved.

Information provided in response to Part III, Section C, Numbers 1 through 14 of this announcement will be used to review and evaluate applicants on the above criterion.

Criterion 4. *Staff Background and Organizational Experience (15 Points).* List each organization, cooperator, consultant, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution. Summarize the background and experience of the project director and key project staff and the history of the organization. Demonstrate the ability to effectively manage the project and to coordinate activities with other agencies. (Applicants may refer to the staff résumés and to the Organization Capability Statement included in the submission.)

Information provided in response to Part III, section D of this announcement will be used to review and evaluate applicants on the above criterion.

Criterion 5. *Budget Appropriateness (15 Points).* Demonstrate that the project's costs (overall costs, average cost per youth served, costs for different services) are reasonable in view of the anticipated results and benefits. (Applicants may refer (1) to the budget information presented in Standard Forms 424 and 424A and in the associated budget justification, and (2) to the results or benefits expected as identified under Criterion 2.)

Information provided in response to Part III, Section E of this announcement will be used to review and evaluate applicants on the above criterion.

Part V. Application Assembly and Submission

A. Contents of Application

Each copy of the application must contain the following items in the order listed:

1. Application for Federal Assistance (Standard Form 424, REV 4–88) (page i).
2. Budget Information (Standard Form 424A, REV 4–88) (pages ii–iii).
3. Budget Justification (Type on standard size plain white paper) (pages iv–v).
4. Organizational Capability Statement (pages vi–viii).
5. Assurances—Non-Construction Programs (Standard Form 424B, REV 4–88) (pages ix–x).
6. Certification Regarding Lobbying (page xi).
7. Program Narrative Statement (pages 1 and following; 30 pages maximum, single-spaced). SPECIAL NOTE: REVIEW OF THE NARRATIVE STATEMENT PORTION OF APPLICATIONS WILL BE LIMITED TO THE FIRST 30 PAGES. IT IS HIGHLY RECOMMENDED THAT NARRATIVE STATEMENTS NOT EXCEED THE 30 PAGE MAXIMUM.
8. Supporting Documents (pages SD–1 and following; 10 pages maximum, exclusive of letters of support or agreement).

B. Instructions for Preparing Application Components

1. Standard Forms 424 and 424A: At the top margin of Form 424, indicate whether the application is for a New Start or for an Expansion. Also, in box 8 of Form 424, check "New" if the application is for a New Start grant and check "Revision" if the application is for an Expansion grant. If the application is for a Revision, enter the letter "A" in the appropriate box.

2. Budget Justification: Provide breakdowns for major budget categories and justify significant costs. List amounts and sources of all funds, both Federal and non-Federal, used for runaway and homeless youth.

3. Organizational Capability Statement: Applicants should provide a brief (no more than three pages, single-spaced) description of how the applicant agency is organized and the types, quantities and costs of services it provides, including services to clients other than runaway and homeless youth. For the prior year, list all contracts with or funds received from probation and/or welfare agencies. Provide an organizational chart showing any superordinate, parallel, or subordinate agencies to the specific agency that will provide direct services to runaway and homeless youth, and summarize the purposes, clients and overall budgets of these other agencies. If the agency has multiple sites, list these sites. If the agency is a recipient of funds from the Transitional Living Program for Homeless Youth, the Youth Gang Drug Prevention Program, or the Drug Abuse Prevention Program for Runaway and Homeless Youth, show how the services supported by these funds are or will be integrated with the services funded by the Runaway and Homeless Youth Program. Discuss the experience of the applicant organization in providing services to runaway and homeless youth.

4. Standard Form 424B, Certification Regarding Drug-Free Workplace, Certification Regarding Debarment, and Certification Regarding Lobbying. Of these forms, only the Standard Form 424B and the Certification Regarding Lobbying need to be signed and returned with the application.

5. Program Narrative Statement: Follow the guidance of Part III, "Responsibilities of Basic Center Grantees," and of Part IV, "Review Criteria."

6. Supporting Documentation: Self-explanatory.

7. Duplication of Applications: Each application will be duplicated by the government in order to provide the total of six copies needed for review panels and filing. To make copying as trouble-free and accurate as possible, the following requirements must be followed:

a. Applicants may attach only photocopies (no originals) of any additional materials, such as resumes, letters of support or agreement, news clippings, or descriptions of the program's participation in local, State or regional coalitions of youth service agencies which would give further support to the application. Resumes must be limited to one page.

b. The absolute maximum for supporting documentation is 10 pages, exclusive of letters of support or agreement. Documentation which ACYF staff determines to be excessive will not be provided to the independent panel reviewers. Applicants may include as many letters of support or agreement as are appropriate

c. **Note:** Include only photocopies of the materials. Do not use separate covers, binders, clips, tabs, plastic inserts, pages with pockets, separately bound brochures, folded maps or charts, or any other items that cannot be processed easily on a photocopy machine with automatic feed. Do not bind, clip, or fasten in any way separate subsections of the application, including supporting documentation.

C. Application Submission

To be considered for a grant, an applicant must submit one signed original and two copies of the grant application, including all attachments, to the application receipt point specified below. The original copy of the application must have original signatures, signed in *black* ink. Each copy should be stapled (back and front) in the upper left corner. All copies of a single application should be submitted in a single package.

The *Catalog of Federal Domestic Assistance* Number (93.623) and Title (Runaway and Homeless Youth Program) must be clearly identified on the application (SF 424, box 10).

1. Closing Date for the Receipt of Applications

The closing date for receipt of applications under this announcement is: May 19, 1992. Applications must be mailed or hand delivered to: Runaway and Homeless Youth Basic Center Program, Department of Health and Human Services, Administration for Children and Families, Division of Discretionary Grants, 200 Independence Avenue, SW., room 341–F.2, Hubert H. Humphrey Building, Washington, DC 20201. Attn: William J. McCarron, ACF–92–ACYF/RHYP/BC.

2. Deadline for Submission of Applications

a. *Deadline.* Hand delivered applications will be accepted during the normal working hours of 9:00 a.m. to 5:30 p.m., Monday through Friday. An application will be considered as meeting the deadline if it is either:

i. Received on or before the deadline date at the above address, or

ii. Sent on or before the deadline date and received by the granting agency in time to be considered during the competitive review and evaluation process under Chapter I–62 of the Health and Human Services Grants Administration Manual.

(Applicants are cautioned to request a legibly dated U.S. Postal Service postmark or to obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service as proof of timely mailing. Private metered postmarks are not acceptable as proof of timely mailing.)

b. *Late applications.* Applications which do not meet the criteria in paragraph "a" of this section are considered late applications. The Administration for Children and Families (ACF) will notify each late applicant that its application will not be considered in the current competition.

c. *Extension of deadline.* The Administration for Children and Families may extend the deadline for all applicants because of acts of God such as earthquakes, floods or hurricanes, etc., or when there is a widespread disruption of the mails. However, if ACF does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicants.

3. Checklist for Complete Application

_____ One original application signed in black ink and dated plus two copies;
_____ A completed SPOC certification with the date of SPOC contact entered in item 16 of page 1 of SF 424, if applicable.

The original and both copies of the application include the following:

_____ SF 424 (The original application should have the word "ORIGINAL" hand printed in bold block letters at the top margin of its SF 424; also at the top margin of Form 424, indicate whether the application is for a NEW START or for an EXPANSION);
_____ SF 424A;
_____ Budget Justification;
_____ Organizational Capability Statement;
_____ SF 424B;
_____ Certification Regarding Lobbying;
_____ Program Narrative Statement with maximum of 30 single-spaced pages;
_____ Supporting Documents.

(*Catalog of Federal Domestic Assistance* Number 93.623, Runaway and Homeless Youth Program.)

Approved: December 13, 1991.

Wade F. Horn,

Commissioner, Administration on Children, Youth and Families.

BILLING CODE 4130-01-C

Instructions for the SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item	Entry
1.	Self-explanatory.
2.	Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3.	State use only (if applicable).
4.	If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5.	Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6.	Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7.	Enter the appropriate letter in the space provided.
8.	Check appropriate box and enter appropriate letter(s) in the space(s) provided: —— "New" means a new assistance award. —— "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date. —— "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9.	Name of Federal agency from which assistance is being requested with this application.
10.	Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11.	Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12.	List only the largest political entities affected (e.g., State, counties, cities).
13.	Self-explanatory.
14.	List the applicant's Congressional District and any District(s) affected by the program or project.
15.	Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16.	Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17.	This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18.	To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

Instructions for the SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B,C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary

Lines 1–4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1–4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5—Show the totals for all columns used.

Section B. Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1–4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a–i—Show the totals of Lines 6a to 6h in each column.

Line 6j—Show the amount of indirect cost.

Line 6k—Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)–(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

Line 7—Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8–11—Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a)—Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b)—Enter the contribution to be made by the applicant.

Column (c)—Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d)—Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e)—Enter totals of Columns (b) (c), and (d).

Line 12—Enter the total for each of Columns (b)–(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13—Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14—Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15—Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16–19—Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20—Enter the total for each of the Columns (b)–(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21—Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22—Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23—Provide any other explanations or comments deemed necessary.

Assurances—Non-Construction Programs

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting statndards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728–4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
